Josephine County, over which section several people desire to transport extra-long logs. Application of the formula to determine the overall length of loads that can be transported over any section of highway without crossing the center line, he said, indicates that, with proper precautions, loads up to 70 feet overall length can be safely transported over this section. In view of the report, the Commission authorized the granting of permits for the transportation of extra-long logs on this particular section of highway, at least until the matter of the Commission's authority to grant such permits has been determined.

The Engineer discussed with the Commission the matter of including in state highway specifications the type of pavement known as Amiesite, as has been requested by certain parties who are interested in this type of pavement. However, no decision was reached.

The Engineer reported the cost to reconstruct the John Day Highway through the town of John Day, particularly from the U. S. Forestry headquarters on the west to the new highway improvement on the east. He estimated the cost of such improvement, including the necessary grading, construction of bituminous macadam, curbs, gutters, drainage, and a bridge, at \$22,600.00. He recommended approval of the project so that bids can be taken for the same while there is a state contractor working in that vicinity; also, that the Commission authorize the securing of right of way options at once. After discussion the Commission approved the recommendation unanimously, the work to be financed with fiscal-year 1940 funds, if possible; otherwise, with 1941 fiscal-year moneys.

The Commission discussed briefly the Engineer's report on the secondary highway system in Curry County, but deferred action thereon pending an additional report from the Engineer on the economic value of the several county roads in this county that are eligible for designation as secondary state highways.

The Engineer reported the cost to reconstruct the Salmon River Highway (old McMinville-Tillamook Highway) through the town of Sheridan. He estimated that to widen the present highway between Bridge Street and the west city limits would cost approximately \$49,000.00, the work to provide for a 30-foot roadway with an 8-foot parking strip and a 7-foot sidewalk on each side. He pointed out that the City of Sheridan has offered to provide extra right of way as may be needed and to construct one of the larger fills at city expense. The Commission decided that this project is too costly to undertake this year and doubted that it would be possible to include it in any construction program before 1942. In this connection the Engineer pointed out the need to reconstruct a section of this highway in the vicinity of Bellevue, which section is being damaged by reason of heavy log-hauling traffic. He estimated the cost of the work at \$100,000.00, and suggested, in view of the fact that there are no unallocated funds available with which to finance it, that immediate repairs be made by the state patching crew, which would serve the purpose for the time being, and that provision be made for contracting the entire improvement in next year's construction program. The Commission approved the suggestion unanimously.

MAY 1 1940

The results of investigations relative to the removal of certain logging facilities from the right of way of the Elsie-Jewell County Road, which the Clatsop County Court desires designated a state secondary highway, were reported by the Engineer. He said that this investigation included inspection of both connections of this road with the Wolf Creek Highway to determine which branch is more desirable from the state's standpoint as a secondary highway route. He recommended the easterly branch as the better connection, if and when this road is placed on the secondary highway system. Action on this matter was deferred by the Commission pending receipt of the Engineer's report on the proposed alternate route between the Wolf Creek Highway, near Elsie, and the Nehalem Secondary Highway at a place known as Fish Hawk Falls.

The Commission by unanimous vote confirmed the authority granted the Engineer by telephone subsequent to the last meeting of the Commission, for an expenditure of approximately \$3,000.00 for the purchase of additional crushed material for emergency surfacing on the Elsie-Jewell Road, such material to be purchased from the state's contractor, A. S. Wallace, who is now operating in this vicinity under a state highway contract.

The question of whether or not to continue snow-removal operations on the Oregon Caves Highway had the attention of the Commission. The Engineer advised that the average annual cost of maintaining travel on this road from the floor of the valley up to the caves resort amounts to about \$1,200.00. He gave as his understanding that the National Parks Service, which has charge of the Oregon Caves, no longer requires its operators at the Caves Hotel to keep the resort open during the winter months, which raises the question in his mind whether snow-removal operations between the floor of the valley and the caves proper is justified. The Commission decided that if the Caves Hotel is closed to the public during the winter season it would be a useless expenditure of funds to keep the road open. The Secretary was instructed to convey such information to the Superintendent of the Caves Park.

The Commission had under discussion the adoption of a policy with respect to errors that are committed by contractors in connection with contract work, particularly the errors in stating their unit-bid prices. The Engineer explained that in the past it has been the practice of the Commission, in cases where there is a difference between the written amount and the figure, to accept the written amount, regardless of other indications of the bidder's intent, which in some cases reacts to the advantage of the state and in other cases to the advantage of the contractor. He suggested that it would be advisable to adopt a standard policy in this regard and that there be inserted in the proposal form immediately preceding the pages for the insertion of the unit bid amounts the following statement, which was prepared by the Attorney to cover the situation:

"IMPORTANT. In each instance the unit bid price must be expressed both in writing and in numerals, and the bidder is cautioned to exercise care in filling in the amount so that the written words and the numerals will be in exact conformance. If in the proposal submitted by the bidder there

MAY 1 1940

is found to be conflict between a bid price as stated in words and the same price as stated in numerals, the unit price which will govern in the comparison of bids shall be the unit price which checks with the extension as shown. If neither of the unit prices checks with the extension shown, or if no extension is shown, then the unit price which is stated in written words shall control."

The Commission approved the recommendation by unanimous vote and ordered that the statement hereafter be inserted in all proposal forms.

The Engineer reported the need to widen the bridge over Pilot Butte Canal on The Dalles-California Highway at the north city limits of Bend. He advised that the U. S. Reclamation Service expects to build a structure soon across The Dalles-California Highway nearby and the plans for the same call for a structure the full width of the roadway, which is 42 feet. The existing bridge over the canal, he said, has a roadway only 20 feet wide. He suggested that it would be advisable to widen the highway bridge at this time, particularly in view of the fact that the road carries a large volume of pedestrian traffic as well as vehicular traffic. He estimated the cost of the work at \$4,000.00. The Commission approved the project by unanimous vote.

The Secretary presented a petition from residents of Baker and Union Counties, requesting the improvement of the Shadilane Section of the Anthony Lake Road for the benefit of winter sports enthusiasts. The Engineer estimated that it would cost about \$10,000.00 to resurface this section, which he said is 5.4 miles in length. He gave as his thought that the expenditure is not justified, inasmuch as the farmers in the vicinity are satisfied with the present road and there are many other projects throughout the state of more importance. The Commission thereupon denied the request.

The Commission also discussed the matter of oiling the Flagstaff-Lower Powder Section of the Baker-Homestead Highway, for which the sum of \$10,000.00 has been budgeted. The Commission decided, in view of the objections that have been offered to a temporary improvement by the people of Baker and vicinity, not to undertake such temporary improvement at this time but to hold the funds in abeyance until another project materializes. The Commission also decided to give serious consideration to awarding a contract on permanent line east of Flagstaff in the 1941 program, the intention being to award a contract this fall for such work if funds are then in sight with which to finance it. Arrangements were thereupon made for Commissioner Oliver to contact the people of Baker and advise them of the Commission's plans and to contact also the people residing in the vicinity of Keating who heretofore offered objections to the reconstruction of the highway on the proposed permanent alignment.

The Commission discussed a letter from former State Highway Commissioner E. B. Aldrich, in which he suggests that it would be desirable to include in the 1941 construction program provision for the reconstruction of the Pendleton-John Day Highway from Tutuilla Bridge up the hill south of Pendleton in view of the fact that the entire road between Pendleton and Pilot Rock must

MAY 1 1940

be resurfaced and this hill section should be reconstructed on permanent alignment before the surfacing work is done. The Engineer advised that this is a desirable project and that it would cost approximately \$35,000.00. However, in his estimation, the most important thing to be done on this road is to stabilize the foundation so that the road will hold up under heavy logging traffic that now uses it. He pointed out that there are no funds available at the present time to finance the improvement. After discussion the Commission decided to inspect the road the next time it is in the vicinity of Pendleton and to give the project consideration in the formulation of next year's construction program.

A letter was presented from County Judge David F. Graham, of Malheur County, suggesting that, if the Highway Commission cannot approve the substitution of the Sucker Creek County Road for Graham Boulevard in the secondary highway system of Malheur County, the Commission improve Graham Boulevard, which road, he said, is in very poor condition. The Commission decided to inspect the road the next time it is in that vicinity and to consider it when preparing a program for the 1941 federal secondary funds.

A petition was presented, signed by 200 citizens of Morrow and Gilliam Counties, urging that the uncompleted portion of the Condon-Heppner Secondary Highway be improved as soon as it is within the power of the State Highway Commission to do so. The Engineer advised that the uncompleted portion is 9.8 miles in length. He estimated the cost to grade, rock, and construct an oil mat surface thereon at approximately \$181,000.00. He suggested, in view of the fact that this is a desirable improvement, that the Commission allocate a certain amount of money each year until the project is finished. Action on the matter was deferred by the Commission.

A request from the Hillsboro Chamber of Commerce for the oiling of the Hillsboro-Woodburn Secondary Highway from the end of the completed section at Scholls to the foot of the mountain north of Newberg had the attention of the Commission. The Commission denied the request for immediate construction but ordered that the project be kept in mind in the future allocation of funds.

The Secretary presented communications from the County Court of Josephine County; Howard Barrett, school bus driver, Grants Pass; M. B. Winslow, Superintendent, Grants Pass, Public Schools; and C. H. Massie, Postmaster at Grants Pass; and a petition signed by numerous residents of Josephine County, all of which urged the Highway Commission to improve the Rogue River Loop Secondary State Highway from the end of the completed section, at a place known as Gunnell Junction, to Robertson Bridge, a distance of approximately 5 miles. There was also presented another petition signed by 61 property owners who agreed to furnish the state, without cost, additional land that may be needed to provide a right of way 60 feet wide for this road. The Commission indicated that it might approve a small project on this road but definite action in regard thereto was deferred pending discussion with the County Court the next time the Commission is in that vicinity.

The Secretary presented a letter from Norman Hanson, Mist, Oregon.

MAY 1 1940

urging, in behalf of the people residing in his vicinity, the oiling of the Nehalem Secondary Highway between Mist and Birkenfeld so as to eliminate the dusty condition that obtains during the dry season. The Engineer advised that this section is approximately 3.3 miles in length and that the improvement was not included in the contract recently awarded for surfacing and oiling the adjacent section because there were not sufficient funds available to finance it. He estimated the cost of the project at \$76,000.00. The request was denied by the Commission because of insufficient funds to finance the work. However, the Commission decided to bear the project in mind for consideration in the formulation of next year's construction program.

The matter of approving the traffic signal installed by the City of Burns on the John Day-Burns Highway, in Burns, had the attention of the Commission. Action on the matter was deferred pending supplemental report from the Engineer.

The Engineer reported briefly on investigations that have been made of traffic accidents that have occurred on state highway routes in Salem to ascertain the need for traffic signals. He said that the investigation reveals that signals are particularly needed at four points, viz., intersection of State and 12th Streets; intersection of North Capitol and Center Streets; intersection of North Commercial and Center Streets; and intersection of South Commercial and Ferry Streets. He estimated the total cost of the four installations at approximately \$7,600.00. He advised that he has conveyed this information to the city council and informed the council that the state would pay half the cost of the installations, and has received reply from the city to the effect that it is not in a position financially at the present time to pay its share of the cost but will give the matter consideration in the preparation of next year's budget.

A letter was presented from the City of Cottage Grove in regard to the installation of an ornamental lighting system along the new highway in Cottage Grove from Main Street south to Madison Avenue. It appears that the property owners along this highway are interested in securing such ornamental lighting and the city council is desirous of knowing whether or not the State Highway Commission will assume a portion of the expense or will make provision for such lighting installation in the present highway contract by installing conduits at street intersections for use in the future in the event the lighting project is not approved at this time. The Commission voted unanimously not to install the traffic lights now, but instructed the Engineer to see that suitable conduits are placed to facilitate the installation at some future date.

The Secretary presented a letter from the Harrisburg Chamber of Commerce renewing its request for a flashing beacon at the Smith Street intersection with the Pacific Highway in Harrisburg. In the discussion of this matter it was pointed out that the Commission previously denied a similar request because it considered that the conditions obtaining at this point did not meet the requirements of the Commission for traffic signal installations. The Engineer advised that the conditions at this intersection have not changed since the Commission took its former action. He explained that the situation

MAY 1 1940

here is no different from that at hundreds of other intersections in small communities and gave as his thought that traffic lights at such locations would not reduce the number of accidents that occur; but, on the other hand, would have a tendency to increase the hazards because, if the signals become too common, motorists will disregard them even in locations where they are a necessity. He suggested that traffic signals should be limited to hazardous intersections outside of community centers. The Commission concurred in the Engineer's viewpoint of the matter and thereupon confirmed its previous action denying the request of the Harrisburg Chamber of Commerce in this particular instance.

The Commission considered and referred to the Engineer for investigation and report the request from the City of Vale for approval of an overhead flashing beacon installation at the intersection of Main and "A" Streets in Vale.

The Commission denied the petition from residents of Newberg and vicinity for the installation of a flashing beacon at the intersection of Springbrook Road with the Pacific Highway West about one mile east of Newberg, it appearing from the Engineer's report that conditions prevailing at this point do not justify the expense.

The matter of extending the time limit for the removal of the buildings of the Standard Stations, Inc., from the right of way of the Pacific Highway West at the intersection of Denver and Union Avenues, Portland, had the attention of the Commission. The Engineer pointed out that the Commission previously ordered the removal of these buildings by March 29, 1940, when it was thought that the plans for the control of traffic at this intersection would be completed. However, the problem involved is very difficult and requires additional serious study. He recommended, in view thereof, that an extension of time of 6 months be granted the company to clear the right of way, or until September 29, 1940. The Commission approved the recommendation unanimously.

The Commission considered the matter of the use of the ocean beach at Seaside as an airplane landing field. In this connection the Secretary reported that as previously instructed by the Commission he directed several communications to the Mayor of Seaside inquiring as to what interest, if any, the city has in the use of the beach for this purpose, but to date has not received a reply. The Commission instructed the Engineer to have Division Engineer Eason contact the mayor in person.

The Engineer requested instructions relative to a pending controversy with contractor E. C. Hall, relative to a quarry or gravel pit used by the E. C. Hall Company in connection with a forest highway contract in Lake County, which work is being carried on under the supervision of the U. S. Public Roads Administration. It appears that the contract provided for the use of a quarry located near the northern end of the project, which would have resulted in an average haul of approximately 4.3 miles and a considerable waste of materials because the rock is soft and there would be a large percentage of fine material which could not be used. Further, that Mr. Hall carried on

MAY 1 1940

investigations for another site, finding one at another location which met with the approval of the government engineers, same being located on certain lands owned by R. M. Chandler, and that Mr. Hall was required to pay Mr. Chandler the sum of \$650.00 for the right to enter upon these lands and to crush and remove rock for his contract. Mr. Hall, he said, is asking the state to reimburse him for such expenditure.

The question now arises, he said, whether or not to purchase the site from Mr. Chandler, for which he wants at least \$1,000.00, thereby securing the advantage of all of the waste materials deposited thereon by Mr. Hall, or simply to reimburse Mr. Hall in the amount of \$650.00, destroying entirely the value of the said wasted materials.

The Engineer gave as his thought that it would be to the best interests of the state to reimburse Mr. Hall for his expense, thereby saving an immediate expenditure of at least \$350.00, because the materials in the quarry are about exhausted. The Commission approved the recommendation unanimously.

The Commission discussed briefly the regulations adopted at its meeting on May 12, 1938, relating to the maintenance of advertising signs on state highways adjacent to unincorporated towns and villages, but deferred action thereon until the next meeting.

The Engineer reported that, in accordance with authority previously granted him, he awarded to contractor Frank Penepacker, on April 11, 1940, the contract for grading and fencing the Lamonta-Crook County Line Section of the Warm Springs Secondary Highway, in Jefferson County, Mr. Penepacker's bid being the low one received by the Commission for this project on March 21, 1940, and the conditions of the award having been satisfied. The Commission approved the award of this contract as reported.

The matter of permitting W. S. Pratt and O. D. Baldwin, Milwaukee, to transport long poles over the entire length of the Alsea Highway and over the Corvallis-Toledo Section of the Corvallis-Newport Highway had the attention of the Commission. The Engineer explained that Messrs. Pratt and Baldwin are engaged in furnishing poles for an R. E. A. power project in Lincoln County and in connection therewith are required to deliver poles up to 55 feet in length, making an overall length of approximately 65 feet, which cannot be moved over certain sections of these highways without taking up more than one-half the width of the roadway. The poles, he said, are for the use of the Benton-Lincoln Electric Cooperative Association which now has franchise from the State Highway Department to construct and maintain power pole lines on the rights of way of these highways, and, as he understands it, poles 55 feet long are required in connection with the proper building of the line. He suggested, in view of the circumstances, that the request of Messrs. Pratt and Baldwin to transport poles of such length over these highways for this particular purpose be approved, it being apparent that an emergency exists. The Commission approved the recommendation unanimously, subject to the condition that the loads be properly flagged for the protection of other traffic and that the privilege terminate immediately upon the completion of the hauling of poles for this particular project.

MAY 1 1940

The matter of permitting boathouses to be moored to the bank of the Willamette River along the north unit of the Oregon City project was discussed by the Commission. The Engineer pointed out that the state owns all of the land between the highway and the river at this point, having purchased the same as right of way at considerable cost, and that last year the Commission permitted the boathouses to stay in this location during the 1939 fishing season with the understanding that they would be moved when the fishing season closed. However, the boathouses are still there and the question now arises what to do with them. Action on this matter was deferred by the Commission pending personal inspection of the premises.

The Commission by unanimous vote approved the action taken by Chairman Cabell subsequent to the last meeting, relative to contributing funds toward maintaining an Oregon exhibit at the San Francisco Fair, which arrangement was as follows: State Highway funds up to a maximum of \$8,000.00 would be contributed toward this expense. The State Highway Department will pay 100 per cent of the cost of maintaining a strictly highway-promotional exhibit but will not pay any of the expense of maintaining promotional exhibits of the non-highway type. The State Highway Department will pay a reasonable proportion of the cost of overhead items, which it is estimated will not amount to more than 50 per cent of all such items. The State Highway Department's expense items for which state highway funds will be expended shall be agreed upon in advance and payment of the same shall be made in a legal manner. The State Highway Department's participation in this undertaking is contingent upon the following: that a Fair Committee be appointed, including Mr. T. H. Banfield, Portland, who is to be chairman.

Chairman Cabell advised that he agreed to this arrangement in order to make it possible for Oregon to have an exhibit at this fair, notwithstanding that it was his personal opinion, which he expressed at the time that the arrangement was made, that there was great danger that the exhibit would be unsatisfactory.

The matter of increasing the state's contribution to several forest highway projects included in the fiscal year 1941 forest highway program, was discussed. The Engineer advised that when the program referred to was arranged, accurate information concerning several of the projects included therein was not available but has since been assembled and it appears that additional funds may be required to complete the work outlined and that the state will have to advance approximately \$25,000.00 to take care of these items in the event the forest highway contingent fund is insufficient to meet the expense. He particularly referred to the Wapinitia Highway project which was originally estimated to cost \$80,000.00, of which amount the Commission agreed to contribute the sum of \$50,000.00 of state money. It appears now, he said, that the federal cooperation on this project will have to be increased to \$65,000.00, \$20,000.00 of which will be transferred from the Warm Springs forest highway clearing project and \$5,000.00 from the state contingent fund. A similar condition obtains, he said, on the Pendleton-John Day Highway forest highway project, to which an amount of \$50,000.00 of forest highway funds has been allocated and which it now appears will be about \$10,000.00 under the actual amount needed to do the necessary work. He explained that according to these estimates the total cost of the work will amount to approximately \$25,000.00 more than the amount of forest highway funds available; so, in order to insure the accomplishment of the work, the state may have to pay this expense, although the state will not be called upon to contribute such amount if the forest

MAY 1 1940

highway contingent fund, which has been set up to take care of emergency items, proves sufficient to pay the cost. In other words, the state will not be called upon to pay the extra \$25,000.00 unless absolutely necessary. He recommended approval of the arrangement. The Commission approved the recommendation unanimously.

The Engineer reported that the Prairie City-Unity Section of the John Day Highway is now sufficiently dry and stabilised to withstand legal-weight loads and he recommended that the reduced load limit heretofore in effect be lifted. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 16th day of February, 1940, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on several state highways, including the following:

JOHN DAY HIGHWAY from Prairie City, in Grant County,
to Unity, in Baker County,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

JOHN DAY HIGHWAY from Prairie City, in Grant County,
to Unity, in Baker County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

IT IS HEREBY ORDERED that certified copies of this resolution be furnished to the County Clerks of Grant and Baker Counties in which counties said section of said highway is located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The matter of permitting logging operations across the Hood River Bridge on the Columbia River Highway, at Hood River, was brought up for

MAY 1 1940

discussion by the Engineer. He advised that recently the Commission approved the hauling of logs over this structure from the Mount Hood Highway junction through the town of Hood River. However, it now appears that legal-length loads cannot negotiate the curves at each end of the bridge structure without taking up more than half of the roadway, which creates a hazard to other traffic. He also said that this feature has been brought to the attention of the log haulers and that they have been ordered to maintain a flagman at each end of the bridge to warn traffic of the logging operations. The Commission approved the action taken by the Engineer in this matter as a trial proposition and ordered that the operators be informed that it may be necessary to cancel their permits in the event the arrangement does not prove satisfactory.

The Commission considered the suggestion made by L. E. Bates, Office Engineer, Washington State Highway Department, Vancouver, relative to the control of over-dimension and/or overweight loads that are transported across the Interstate Bridge between Portland and Vancouver but took no action on the same, it being considered that the suggestion does not offer a practicable solution of this problem.

The Commission considered and ordered filed a letter from Mr. G. H. Struthers, Portland, commending the State Highway Department for the excellent condition in which the state highways have been maintained during the past winter.

The Secretary presented letters from Mr. A. W. Strowger and County Judge A. H. Boice, of Curry County, requesting a resurvey of the county road which extends up the Rogue River from Wedderburn, which road has heretofore been considered for improvement as a federal aid secondary highway. In this connection the Engineer pointed out that the Commission at its March meeting told a delegation from Curry County that it would inspect this road some time this summer. The Commission declared its intention to make this inspection trip as soon as a convenient time can be arranged but deferred the setting of a date for the same until later.

Communications were also presented from A. W. Strowger and Swan Hawkinson, Tillamook, protesting the removal of rock and gravel from the ocean beach at a place known as Jackson's Cut, near Bayocean. It was recalled that the Commission previously has received similar complaints in regard to the taking of rock and gravel from other beach areas and that the Commission has it in mind to adopt a policy relative thereto. After discussion the Commission decided to defer action on the matter pending personal inspection of the various sites, and to make such inspection at the same time that it inspects the road at Wedderburn.

A letter was presented from Mr. A. J. Price, President of the Old Wasco County Pioneers Association, inviting the Commission to be present at the Annual Meeting of the Association, which is to be held at The Dalles, Oregon, on Saturday, May 4, and during which meeting the Association expects to dedicate a monument adjacent to the Columbia River Highway, near Biggs, Oregon, to mark the old Emigrant Road. The Commissioners expressed their regrets that they would be unable to attend this meeting but delegated Assistant State Highway Engineer C. B. McCullough to represent them.

MAY 1 1940

The Secretary also presented a letter from Mr. W. L. Crissey, President of the Brookings Chamber of Commerce, Brookings, Oregon, inviting the members of the Commission to attend the Second Annual Azalea Festival, which is to be held in Brookings on May 11 and 12. It was decided that Mr. Clough should represent the Commission at this function.

The meeting was declared adjourned at 6:30 p. m.

<u><i>Robert H. Baldock</i></u> State Highway Engineer	<u><i>Henry F. Cabell</i></u> Chairman
<u><i>H. B. Glaisyer</i></u> Secretary	<u><i>Huron W. Clough</i></u> Commissioner
	<u><i>Herman Oliver</i></u> Commissioner

Portland, Oregon, May 2, 1940

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously-published notice, following which Chairman Cabell announced that the award of contracts would be made at 4:00 p. m. in the same room:

OREGON COAST HIGHWAY
ASTORIA (TAYLOR AVENUE-ASTOR STREET) SECTION -- GRADING AND PAVING

Jacobsen-Jensen Company	\$44,852.00
Edlefsen-Weygandt Company	45,281.00
McNutt Bros.	45,989.50
The United Contracting Company	52,795.60

CENTRAL OREGON HIGHWAY
BROTHERS-HARNEY COUNTY LINE SECTION -- OILING

Norris Bros.	\$31,391.00
Warren Northwest, Inc.	31,409.50

(Continued on next page)

MAY 1 1940

(Brothers-Herney County Line Section continued)

Diesel Oil Sales Company	\$31,433.00
Babler Bros.	31,946.00
J. C. Compton	34,343.00
R. O. Dail & Warren Bros., Inc.	35,814.50
Clifford A. Dunn	36,866.50
McNutt Bros.	38,551.50
J. F. Forbes	38,615.50

FREMONT HIGHWAY
HORSE RANCH SECTION - GRADING, SURFACING, OILING

E. L. Rigdon	\$29,815.00
Homer G. Johnson	32,029.50
A. Milne	33,161.00
Leonard & Slate	33,693.00
Berke Bros.	39,905.50
Clifford A. Dunn	41,294.50
McNutt Bros.	43,310.50

PACIFIC HIGHWAY
COTTAGE GROVE SECTION - GRADING AND PAVING

Berke Bros.	\$66,681.00
Jacobsen-Jensen Company	68,511.70
Edlefsen-Weygandt Company	71,915.50
McNutt Bros.	73,637.00
Homer G. Johnson	77,258.50
The United Contracting Company	88,491.90

OLD OREGON TRAIL
ONTARIO-SNAKE RIVER SECTION - ROADSIDE IMPROVEMENT

Arthur T. Fox	\$ 4,465.50
River Bend Sand & Gravel Company	4,706.00
Quinn-Robbins Company	6,841.50

I.O.N. HIGHWAY
30 MILES NORTH OF McDERMITT - DRILLING AND CASING WELL

Haigh Bros. & Hughes	\$ 1,205.25
Williams Drilling Company	1,980.50

OREGON-WASHINGTON HIGHWAY
PENDLETON-ADAMS SECTION - SURFACING AND FURNISHING CRUSHED ROCK

Edwin C. Gerber	\$ 95,517.00
Clifton & Applegate	98,949.00
Triangle Construction Company	101,889.00

(Continued on next page)

MAY 2 1940

(Pendleton-Adams Section continued)

County Judge Nelson B. Higgs of Harney County was present and inquired as to whether or not the Commission has taken any definite action on the request made by the Harney County delegation at the March meeting for certain oiling between the existing highway pavement and the curb lines in the city of Burns. The Engineer advised that investigation authorized on this matter has not been completed but he expects to report to the Commission the results thereof at its next meeting.

A delegation from Corvallis, including Professors S.M.P. Dolan; Fred O. McMillan, Head of the Electrical Engineering Department; and Wm. Teutsch, Chairman of the Program Committee of Radio Station KOAC, came before the Commission in regard to a proposition for broadcasting highway information over the state-owned radio station at Oregon State College during the summer months. Professor Dolan headed the group. They asked the Commission to take charge of a one-hour broadcast daily during the months of June, July, and August, and suggested the dissemination of information particularly interesting to the people of the State of Oregon. They estimated that the total cost to the State Highway Department would not exceed \$600.00 per month, representing salaries of one man in charge of broadcasting, one man to prepare script, and a secretary. It was their thought that the State Highway Department would receive much benefit from the use of these broadcasting facilities by way of informing the people of the state of highway work and points of interest, which would have a tendency to increase local travel and, incidentally, highway revenues. They further advised that there is now pending before

MAY 2 1940

the Federal Radio Commission the College's application for an increase in power and that the college station is now under observation by that Commission; and stated that favorable consideration by the State Highway Commission of their request would help greatly in securing authority from the Government for such increase in power, which is badly needed.

The Attorney advised that the Commission has legal authority to spend state funds for this purpose if it so desires. The matter was discussed at considerable length but definite action thereon was deferred by the Commission until it has had an opportunity to discuss the details with Mr. Harold Say, Director of the Travel and Information Department.

Mr. C. M. Conner and Mrs. Elizabeth C. Coleman, North Bend, came before the Commission in regard to Mrs. Coleman's application to purchase a parcel of state-owned property near the north end of the Coast Highway bridge over Coos Bay. Mrs. Coleman states that she is maintaining a number of cabins on her property at this location and also maintains a dance hall on the property, and alleges that the dance hall is being undermined by drainage water from the highway and there is danger that the building will collapse. In order to avoid this, Mrs. Coleman said that it would be necessary to move her building closer to the highway, which would necessitate taking some of the state's property, for which she is willing to pay a reasonable price. In the discussion of the matter the question arose whether or not the State Highway Department's activities at this point were the cause of the damage to Mrs. Coleman's property; also, whether the Commission is justified in selling state property situate so close to the bridgehead. Chairman Cabell explained the Commission's policy in this regard, which, he said, is adverse to the sale of property so located, it being considered advisable to retain such properties in state possession. After considerable discussion the Commission deferred its decision in the matter pending personal inspection of the premises and report by Commissioner Clough, to whom the matter was referred.

Mr. Conner also brought up for discussion the matter of the grading of a parking area in front of the Hauser Grade School. He presented a map showing the school property and pointed out that the State Highway Department owns a strip of land between this property and the highway and advised that it would be a great convenience if the Highway Commission would permit the leveling off of this area so as to facilitate the parking of cars. The matter was referred to the Engineer for investigation and report.

Mr. H. R. Williams, Manager of the Arrow Transportation Company, was present in regard to moving over the Columbia River Highway between the Washington state line and Umatilla equipment having an overall length in excess of the Oregon statutory limits, although it meets the requirements of the State of Washington in that respect. He said that under present conditions, due to the difference in the legal lengths allowed in both states, it is necessary for them to break up their truck and trailer combinations and to use auxiliary equipment so as to avoid overall length combinations in excess of the Oregon limits, which procedure is expensive; and, furthermore, there is no place along the highway at the state line suitable for making

MAY 2 1940

these changes. He asked the Commission to grant a permit authorizing his company to move the overlength combinations into Oregon to a point near Cold Springs, where, he said, a suitable place is available for the construction of a turnout such as they will need to make the changes.

It was explained to Mr. Williams that the Commission does not have legal authority to grant such permit. Mr. Williams then inquired whether or not the Commission would construct a turnout at the Washington state line and advised that they would need an area about 20 feet wide and 400 feet long to accommodate 5 truck and trailer combinations each 60 feet overall in length. The matter was referred to the Engineer for investigation and report.

The Commission adjourned at 12:15 p. m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Mr. Allison Dean, Portland, came before the Commission and inquired as to the status of the proposed Oswego Highway beautification project concerning which a large delegation from Oswego conferred with the Commission at the previous meeting. The Engineer advised that the report on this matter has not as yet been completed but that he would communicate with Dr. Cane, who headed the delegation, as soon as it is ready.

A delegation representing the Oregon Congress of Parents and Teachers, Inc., came before the Commission and inquired whether or not the Commission would contribute state funds to complete the purchase of a bronze bust of Dr. John McLoughlin, which bust they propose to erect on an approved site at Oregon City. This delegation consisted of Mrs. Kenneth B. Hall, Oswego, Chairman; Mrs. F. W. Blum, and Mrs. Martin W. Jones, Portland. They advised that the bust has already been made by the sculptor, Mr. Adrian Voisen, at a cost of approximately \$2,000 and that they have raised \$1,575.00 through 10-cent contributions from school children, but they still lack \$425 to complete the purchase. Also, that Mr. Voisen will not deliver the bust to them until the full amount has been paid.

The Commission expressed its sympathy in this project but declined to contribute state funds for the same because of the question of the legality and advisability of doing so.

A delegation from Washington County, consisting of the Washington County Court, represented by County Judge H. D. Kerkman and County Commissioners James Lewis and J. W. Hughes; J. W. Barney, City Manager of Hillsboro; Jake Weil and J. M. Perron, also of Hillsboro; C. C. Ruth, Nick Schmidt, Henry Hering, J. Imler, J. A. Oppenlander, and E. S. Barker, all of Cornelius; J. O. Johnson, attorney, Tigard; Sam K. Fetter, Aloha; Charles Inlay of Reedville; G. S. Lehman of Cedar Mills; and the following from Forest Grove: J.A. Thornburgh, banker; Hugh McGilvra, newspaper publisher; Loyal M. Graham, attorney; F. D. Gardner, realtor; and E. W. Woodford, came before the Commission.

They asked for the widening of the Tualatin Valley Highway for four lanes of traffic between Portland and Forest Grove. Speaking on behalf of the

MAY 2 1940

Project were Judge Kerkman, Commissioners Lewis and Hughes, J. W. Thornburgh, Messrs Barney, Fetter, Imlay, Ruth, Graham, Weil, Perron, and Gardner. They urged the improvement, particularly from the standpoint of traffic safety.

Chairman Cabell advised that this is an expensive project and that the Commission has no funds available at the present time to undertake it. Further, that it is the established policy of the Commission not to make any commitments or promises in regard to any particular project until there are funds in sight with which to finance it. He also said that the Commission appreciates that at least a portion of this section should be widened but he pointed out that there are many places throughout the state where similar conditions exist, and, inasmuch as the Commission cannot finance all of them, it is obliged to program them in the order of their priority. The Commission, he said, will give the Tualatin Highway project very careful consideration in the formulation of its future construction programs.

Mr. Gardner asked for the improvement of Fifth Street, Forest Grove, from its connection with the Tualatin Valley Highway southerly to a place known as Carnation. He asked the Commission to resurface this street which, he said, is being badly damaged by heavy traffic of state character, and at least to help the city finance the improvement, because the city is not able to undertake the project alone.

He was informed that the Commission has no legal authority under the present law to improve this street inasmuch as it is not a state highway route and is not a connection between state highway routes. However, the Commission will consider the matter of performing the work for the city at cost if the city will agree to reimburse the state for the expense involved although the Commission cannot give a definite decision in that regard until the matter has been discussed with the Engineer to ascertain whether or not it will be possible to assign equipment to the project.

The Engineer reported that a request has been received from a committee which has charge of an Oregon exhibit at the New York World's Fair for the loan of some of the Highway Department's pictures of Oregon scenes for this Fair. The only obligation assumed by the Highway Department, he said, would be to furnish the pictures and pay the express charges to and from New York. He also said that the pictures are available in the Travel and Information Department. The Commission approved the loan of the pictures with the understanding that the only expense would be the payment of transportation costs.

A delegation from Klamath and Lake Counties was present and asked for the completion this year of the remaining link of the Klamath Falls-Lakeview Highway, about 4 miles in length. The delegation consisted of County Judge U.E. Reeder of Klamath County; County Judge J. R. Heckman and County Commissioner W. P. Vernon of Lake County; Carl W. Pendleton, County Clerk, Lake County; County Engineer Frank Z. Howard of Klamath County; and Forrest Cooper, Secretary of the Lake County Chamber of Commerce.

Judge Heckman also asked the Commission for the improvement of the

MAY 2 1940

Warner Secondary Highway, particularly between Warner Canyon and Plush. He said that this section contains numerous sharp curves and carries a large volume of log-hauling traffic, and they would like to have the improvement scheduled in next year's program. Further, that they are not asking for a high-class road.

Chairman Cabell explained the tentative program for the completion of the Klamath Falls-Lakeview Highway. He also explained the status of funds available to the Commission for construction purposes. Due to the limited amount of funds available, he said, the Commission was unable to allocate a sufficient amount to complete this highway this year but expects to give it serious consideration in next year's program although it is not in a position to make any definite commitment or promise at this time with respect thereto. He also advised that the Commission would be pleased to bear in mind the request for the improvement of the Warner Secondary Highway.

Judge Heckman asked the Commission for a survey of the Warner Secondary Highway but the Commission made no definite commitment thereto, due to the fact that there are only a limited number of survey parties available and they are all busy at the present time on other assignments.

Mr. Cooper urged the Commission to inspect the Warner Secondary Road to the top of the mountain. Chairman Cabell agreed to do this some time when he is in that vicinity.

County Engineer Howard brought up for discussion matters pertaining to the Sprague River County Road. Also present and entering into this discussion were a number of residents of the Klamath Indian Reservation, including B. G. Courtright, Superintendent, Klamath Indian Reservation; Ben F. Mitchell, Tribal Secretary; Arthur R. Campman, Engineer, U. S. Indian Service; Norman P. Conway, U. S. Indian Service; Joe S. Ball, Road Foreman, Indian Service; and Judge Levi Walker, President, Klamath Tribal Business Committee.

They urged the Commission to designate this road as a state secondary highway and to allocate funds to reconstruct the same on the basis of finishing the work within three years. Mr. Campman filed with the Commission a brief in support of oral arguments requesting the improvement, which brief bore the signatures of representatives of the Indian Service, Klamath County Chamber of Commerce, and the Klamath County Court. He said that the road is badly in need of improvement and that neither the Indian Service nor the County Court is financially able to do the work. He also said that the survey for the road has already been made and has been approved by the Public Roads Administration.

Chairman Cabell explained the policy of the Commission with respect to the secondary highway system. He pointed out that under this policy Klamath County now has as much mileage of such highways as it is entitled to in comparison with the other counties of the state, so there is a question whether or not the Commission would be justified under such policy to so designate this road. He suggested that it would be advisable before passing

definitely on this matter that the road be investigated carefully by engineers of the State Highway Department in company with the County Engineer and the Engineer for the Indian Service and that a report be rendered indicating just what obligation the state would assume if the road were made a secondary state highway. The Commission approved this suggestion and so ordered.

A delegation from Prineville, consisting of County Judge A. R. Bowman, of Crook County; Mayor W. B. Morse; Millard T. Smith, Councilman; H. R. Lakin, Mack Houck, and Arthur Erickson, came before the Commission and asked for the oiling of Main Street (present route of the Warm Springs Highway) in Prineville between First Street and Tenth. Mayor Morse headed the group. He said that this street carries a large volume of traffic and during the dry season the dust conditions create an unbearable situation, which is a menace to traffic and health. He asked the Commission to authorize the oiling of this street by the state's oiling crew the next time it is in that vicinity. Mr. Smith said that the city is financially unable to pay for the entire project but has \$1,500.00 that it will be pleased to contribute thereto, and the businessmen of the town have also subscribed personal funds in the amount of \$1,000.00 to apply to this work. Furthermore, the city owns a gravel pit nearby which it will be pleased to turn over to the state for its use in connection therewith. Mayor Morse said that the city would be glad to take over the maintenance of the street after the oiling work is completed.

The Engineer estimated that a first-class improvement would cost between \$7,500.00 and \$10,000.00, according to whether or not storm sewers, curbs, gutters, and sidewalks are constructed. He also said that this street carries a large volume of logging traffic and that it appeared to him undesirable to do anything but a first-class job because any other type of improvement would simply result in heavy maintenance cost.

Chairman Cabell thanked the delegation for its offer of cooperation and advised that the Commission would like to help the city but there is a question how far the Commission should go in improving a road that is to be taken off the state highway system in the not distant future. He pointed out that the Commission has already adopted a new route for the Warm Springs Highway between Prineville and Madras and that the present route will be abandoned when the new route is opened for public use. The matter was discussed at considerable length but action thereon was deferred until later. Commissioner Oliver agreed to inspect the project on or about May 11 when he expects to be in that vicinity. (This matter was reconsidered by the Commission on the following day, at which time the Engineer suggested, in the event the Commission approved an expenditure of state funds for the same, that it would be advisable to include the work in the contract for the construction of another project at Prineville, bids for which are to be taken at the June meeting. The Commission concurred in the viewpoint of the Engineer and thereupon authorized an expenditure of \$7,500.00 for the work, provided the City of Prineville will contribute thereto the amount of its offer, \$2,500.00.)

Mr. J. O. Johnson, Tigard, came before the Commission in regard to a right of way matter at Tigard. He pointed out that in connection with the highway improvement at this place, which includes the realignment of the

MAY 2 1940

highway and the construction of the highway over the railroad tracks of the Southern Pacific Company and the Oregon Electric Company, it has been necessary to close Pine Street, which serves as a county road connection for the people living north and west of Tigard, so the people of this district now have no means of access to the business district of the town except by a roundabout route. He said that when the matter of the railroad grade crossing elimination in Tigard was before the Public Utilities Commissioner, this matter was given consideration, and the order made by the Public Utilities Commissioner, as a result of the hearing, provided that the county should maintain another roadway paralleling the Southern Pacific right of way, in lieu of the Pine Street connection, which would pass under the highway grade separation structure and would occupy land owned by the railroad company. Further, that a lease has been secured from the railroad company for the use of its land immediately under the grade separation structure, but no provision has been made for right of way beyond that point, the railroad company refusing to give up any of its property for such purpose and the property owners being unwilling to donate their land for right of way. In fact, they consider it unfair to ask them to donate the right of way, in view of the fact that the highway improvement has closed their outlet on Pine Street as well as two other crossings that were previously available. Mr. Johnson urged the Commission to acquire the right of way for this county road connection.

The Assistant Attorney advised that he was present at the Public Utilities Commissioner's hearing when the matter of closing Pine Street was discussed but no suggestions whatsoever were made at that time that the state should purchase the right of way for the county road connection. In fact, he said that he would have interposed objection to such suggestion if it had been made. He estimated that right of way across the private lands would cost about \$700.00.

County Judge H. D. Kerkman, who was present, confirmed the Assistant Attorney's remarks and advised that Washington County is ready and willing to construct and maintain the roadway but is not in a position financially to acquire the right of way.

The matter was discussed at considerable length but a decision in regard thereto was deferred until later. (The matter was reconsidered by the Commission on the following day, at which time the Attorney was instructed to confer with Judge Kerkman again and to advise him that the Highway Commission is willing to pay one-third of the cost of this right of way if the county court and Mr. Johnson will pay the balance.)

At 4:00 p. m. Chairman Cabell announced the following awards of contracts, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Astoria Section (Taylor Avenue-Astor Street) of the Oregon Coast Highway, in Clatsop County. 0.43 mile grading and 0.62 mile paving. Jacobsen-Jensen Company, Portland, submitted the low bid for this project in the amount of \$44,852.00. Edlefsen-Weygandt

Company, Portland, submitted the second-low bid in the amount of \$45,281.00. There were 2 higher bidders. The Commission awards this contract to the low bidder, Jacobsen-Jensen Company, at its bid of \$44,852.00.

"Brothers-Harney County Line Section of the Central Oregon Highway, in Deschutes and Lake Counties. 40.9 miles oiling. The low bid received for this project was that of Norris Bros., Burlington, Washington, in the amount of \$31,391.00. The next-low bid was that of Warren Northwest, Inc., Portland in the amount of \$31,409.50. There were 7 higher bidders. This contract is awarded to the low bidders, Norris Bros., at their bid of \$31,391.00.

"Horse Ranch Section of the Fremont Highway, in Lake County. 3.32 miles grading, surfacing, and oiling. E. L. Rigdon, Lapine, was the low bidder for this work, with his bid of \$29,815.00. Homer G. Johnson, Portland, was the next-low bidder, with his bid of \$32,029.50. There were 5 higher bidders. The Commission awards this contract to the low bidder, E. L. Rigdon, at his bid of \$29,815.00.

"Cottage Grove Section of the Pacific Highway, in Lane County. 0.85 mile grading and paving. Berke Bros., Portland, submitted the low bid for this work, in the amount of \$66,681.00. Jacobsen-Jensen Company, Portland, submitted the next-low bid in the amount of \$68,511.70. There were 4 higher bidders. The Commission awards this contract to Berke Bros., the low bidders, at their bid of \$66,681.00.

"Ontario-Snake River Section of the Old Oregon Trail, in Malheur County. 1.27 miles roadside improvement. The low bid received for this project was that of Arthur T. Fox, Salem, in the amount of \$4,465.50. River Bend Sand & Gravel Company, Salem, submitted the next-low bid in the amount of \$4,706.00. There was only one other bidder. The Commission has rejected all bids received for this project.

"Drilling and casing well on Highway Department property approximately 30 miles north of McDermitt, on the I.O.N. Highway, in Malheur County. There were only 2 bids received for this project, that of Haigh Bros. & Hughes, Gooding, Idaho, being the low one and being in the amount of \$1,205.25. The other bid was that of Williams Drilling Company, North Powder, in the amount of \$1,980.50. The Commission has awarded this contract to the low bidders, Haigh Bros. & Hughes, at their bid of \$1,205.25.

"Fendleton-Adams Section of the Oregon-Washington Highway, in Umatilla County. 11.51 miles surfacing and 12.02 miles bituminous macadam wearing surface; also, furnish 7,000 cu. yds. crushed rock in stock piles. Edwin C. Gerber, Oregon City, submitted the low bid on this project, in the amount of \$95,517.00.

Clifton & Applegate, Spokane, Washington, submitted the second-low bid, in the amount of \$98,949.00. There were 12 higher bidders. This contract is awarded by the Commission to Edwin C. Gerber, the low bidder, at his bid of \$95,517.00.

"South Milton Section of the Oregon-Washington Highway, in Umatilla County. 0.51 mile grading and 0.95 mile paving. The low bid received for this project was that of Warren Northwest, Inc., Portland, in the amount of \$25,330.50. The next-low bid received was that of Morris Bros., Burlington, Washington, in the amount of \$26,601.00. There were 2 higher bidders. This contract is awarded to the low bidders, Warren Northwest, Inc., at their bid of \$25,330.50.

"Warm Springs River Bridge Section of the Warm Springs Secondary Highway, in Wasco County. Construct 210-foot concrete bridge. Clifford A. Dunn, Klamath Falls, submitted the low bid for this project, in the amount of \$15,640.00. H. B. Klineline, Vancouver, Washington, submitted the next-low bid in the amount of \$16,825.50. There were 9 higher bidders. This contract is awarded to the low bidder, Clifford A. Dunn, at his bid of \$15,640.00.

"Warm Springs River Section of the Warm Springs Secondary Highway, in Wasco County. 1.39 miles grading. The low bid received for this work was that of Cochran & Gatton, Portland, in the amount of \$20,305.50. The next-low bid was that of Homer G. Johnson, Portland, in the amount of \$25,886.00. There were 11 higher bidders. The Commission awards this contract to Cochran & Gatton, Portland, the low bidders, at their bid of \$20,305.50.

"Strassel Undercrossing Section of the Wolf Creek Highway, in Washington County. Construct concrete abutments on treated piling foundations. S. S. Montague, Portland, submitted the low bid for this work, in the amount of \$17,147.00. Averill & Corbin, Portland, submitted the next-low bid, in the sum of \$17,455.00. There were 3 higher bidders. The Commission awards this contract to the low bidder, S. S. Montague, at his bid of \$17,147.00.

"Furnish only, F.O.B. cars at Portland, Oregon, approximately 58,000 lbs. structural steel for the Strassel Undercrossing Project on the Wolf Creek Highway, in Washington County. Willamette Iron & Steel Corporation, Portland, submitted the low bid on this project, in the amount of \$2,476.60. Minneapolis-Moline Power Implement Company, Los Angeles, California, submitted the next-low bid, in the amount of \$2,598.40. There were 3 higher bidders. This contract is awarded to the low bidders, Willamette Iron & Steel Corporation, Portland, at their bid of \$2,476.60."

Messrs. George Gray and D. T. Waterhouse came before the Commission in regard to the hauling of logs on the Cannon Beach Section of the Oregon Coast Highway. They advised that under the present ruling of the Commission log hauling is prohibited on this road between May 1 and September 15, when

MAY 2 1940

beach travel is heaviest, but there is no restriction, except as to length, on the section east of the summit. They further advised that they have a considerable amount of timber felled in the woods west of the summit and that it will require about two weeks to move the logs to market, and asked the Commission to extend the time for permissible log-hauling on this section approximately two weeks, or until the middle of May, in order to get these logs out. After discussion the Commission granted the request, extending the time limit to Saturday noon, May 18. However, the Commission informed Messrs. Gray and Waterhouse that the Commission may find it necessary to prohibit the hauling of logs over this road entirely in the event it considers that the best interests of the general traveling public will be served thereby.

In this connection the Engineer pointed out that the section between the summit and Cannon Beach contains numerous sharp curves, two of which are extremely bad, it being absolutely impossible for loads of logs 42 feet over-all in length to negotiate them without taking up more than half the width of the roadway. He pointed out that when the Coast Highway is open to general public use past Arch Cape and Neahkahnie Mountain, travel over this particular section is bound to increase materially. He suggested, therefore, that it would be advisable to conduct a survey of the section between Cannon Beach and the junction with the old route near Necanicum to determine the proper location and secure estimates of cost of reconstruction of the same. The Commission approved the suggestion unanimously, and so ordered.

A delegation from Nyssa, headed by Mr. A. L. Fletcher, City Attorney, and including R. A. Thompson, Mayor; Frank P. Morgan, Secretary of the Chamber of Commerce; and Leonard Frost, President of the Chamber of Commerce, came before the Commission in regard to the proposed improvement of the Old Oregon Trail at its crossing of the Union Pacific railroad tracks in this town, involving the construction of an undercrossing. They advised that they have assurances from the Amalgamated Sugar Company that the matter of financing the acquisition of the private property which is involved in this improvement and is appraised at \$9,000.00, has been taken care of or will be taken care of within the next few days and in view thereof they asked the Commission to authorize the taking of bids for the project at its June meeting, subject to the condition that the Commission would not have to award the contract in the event that all matters pertaining thereto are not cleared.

The Engineer advised that he is ready to proceed with the project as soon as the right of way situation has been disposed of satisfactorily. The Attorney advised that he has discussed the matter of acquisition of the Emison Addition property with Mr. Bets, attorney for the railroad company, who is quite certain that the railroad company will purchase this property; so, as far as the legal features of the project are concerned, it appears that a longer delay in contracting the work is not necessary, provided the real properties in Emison Addition are acquired by the railroad company and the sugar company. The Commission thereupon told the delegation that it would advertise this project for bids to be taken at the June meeting if it is definitely assured that the right of way and all other matters pertaining

MAY 2 1940

to the project have been satisfactorily disposed of by that time.

Mr. Walter Hembrie, President of the Sons and Daughters of Oregon Pioneers, was present and asked that a more conspicuous sign than is now being maintained be installed at the entrance to Champoeg State Park. He alleged that the existing sign is too small and is not befitting the importance of the park. The matter was referred to the Engineer for investigation and action as may be necessary, although it was pointed out to Mr. Hembrie that the Commission has standard signs for different purposes and likes to have all of its signs as uniform as possible.

Mrs. Mildred K. Colvin, Waldport, came before the Commission in regard to selling to the state for park purposes 327 acres of land which she owns in Curry County, same lying between the Oregon Coast Highway and the Pacific Ocean at a point about 4 miles south of Gold Beach and about 2 miles north of the present state park at Cape Sebastian. Mrs. Colvin advised that there is about \$3,600.00 against the property, including back taxes amounting to approximately \$1,000.00; \$1,472.00 due on the mortgage, and other expense; and that the mortgagee has foreclosed. Further, that the period of redemption expires during the early part of June, 1940. She further advised that some time ago the State Parks Superintendent offered her \$15.00 per acre for this property, which she refused because, in her estimation, the property is worth much more than that, but she is now willing to sell to the state for \$30.00 an acre.

The Attorney gave as his understanding that the alignment of the Oregon Coast Highway at this point is to be revised and that new right of way will have to be acquired across Mrs. Colvin's property. The matter was discussed at considerable length but action thereon was deferred until later. Chairman Cabell concluded the discussion by stating that if the Commission feels it should purchase this property it will offer Mrs. Colvin a fair price for the same but there is a limit to what the Commission feels it can pay in purchasing properties of this kind. (This matter was reconsidered by the Commission later in the session, at which time the Commission indicated that it might be justified in paying Mrs. Colvin as much as \$25.00 per acre for her land if inspection of the property reveals that it is worth that much and that it is needed in connection with the system of state parks. It was decided that the Commission would make an inspection of all prospective state parks along the coast some time this summer and would adopt a general policy as to the acquisition of additional state parks in this section after a review of the whole situation has been made. The Attorney was instructed to secure, in the meantime, if possible, consent from the mortgagee to extending the period of redemption in the foreclosure proceedings pertaining to Mrs. Colvin's property so as to give the Commission sufficient time in which to make its decision with respect to the acquisition of the same. He reported on the following day that he contacted Mr. Middleton, attorney for the mortgagee, who advised that his client is no longer concerned in the matter because his interests have been disposed of.)

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

MAY 2 1940

Timber strips along the Salmon River Highway:- The Parks Superintendent advised that he has secured from the Miami Corporation a 6-months' extension of time, or until October 1, 1940, for the state to purchase the wayside timber strips along this highway. The Commission approved the report.

Purchase of timber tract along the Oregon Coast Highway at Nelscott, Lincoln County:- The Parks Superintendent advised that a Mr. Lewis W. Nolte owns a 20-acre tract in Section 22, Township 7 South, Range 11 West, W. M., adjacent to the highway, for which he is asking the sum of \$100.00 per acre. He also said that the tract has a 660-foot frontage on the highway and that it is of very little value from the state parks standpoint because the timber has all been removed from the east side of the highway and there is only a small stand of timber remaining on the west side. He recommended against the purchase of this property for this reason and because, in his estimation, the money could be spent to much better advantage elsewhere. The Commission approved the recommendation.

Ocean frontage south of Yachats:- The Parks Superintendent advised that the Lumbermen's Trust Company, Portland, owns 75 acres of land in Section 34, Township 14 South, Range 12 West, W. M., which it has offered to sell to the state for the sum of \$500.00 per acre, or a total of \$37,500.00. This land, he said, lies just south of the bridge at Yachats and takes in the park roadway already owned by the state. He further stated that the tract would make a fine addition to the state parks system and, in his estimation, it is worth purchasing if it can be acquired at reasonable cost, but he could not recommend payment of \$500.00 per acre for the same. The Commission decided not to purchase this tract in view of the high cost involved.

In this connection the Parks Superintendent also reported an offer from O. F. Carpenter to sell to the state a 64-acre tract of land adjoining the Lumbermen's Trust Company property on the north, for the sum of \$400.00 per acre. The Commission refused the offer.

Proposed park at Bob Creek on the Oregon Coast Highway, in Lincoln County:- The Parks Superintendent advised that a Mr. C. M. Kruchex owns 36.5 acres of land at this location, being particularly situate in Lot 2, Section 22, Township 15 South, Range 12 West, and that he has offered to sell this property to the state for the sum of \$18,250.00, which is at the rate of \$500.00 per acre. The Commission declined the offer.

Request of Clatsop County Court for portion of Tongue Point State Park:- The Parks Engineer advised that Clatsop County deeded to the state some time ago a 40-acre tract of land bounded by the Columbia River Highway, the Tongue Point Naval Base Road, and the Columbia River, just north of the city limits of Astoria, a portion of which, it now appears, the U. S. War Department desires in connection with the maintenance of the naval base at Tongue Point, and the County Court has asked the State Highway Commission to deed such portion back to the county so that it, in turn, can deed it to the Government. He said that he has investigated this matter and it is his recommendation that all of this site be deeded back to the county with the exception of a strip approximately 100 feet wide fronting on the Columbia River Highway. The Commission approved the recommendation.

MAY 2 1940

Cut-over lands just south of Unpqua Lighthouse State Park:- The Parks Superintendent advised that the Buchner Investment Company of North Bend owns approximately 250 acres of land adjoining the present park, from which the timber has been cut. He recommended acquisition of this tract as an addition to the park and requested authority to negotiate for the same. The Commission authorized the taking of options for this land.

Addition to Cape Lookout State Park, in Tillamook County:- The Parks Superintendent requested authority to negotiate with a Mr. M. Peterson for the purchase of 25.96 acres of land which, he said, is needed in connection with the development of the present park at this point. The property is described as Lot 1 of Section 36, Township 2 South, Range 10 West, W. M. The Commission approved the request and instructed the Right of Way Department to secure an option from Mr. Peterson.

Proposed 120-acre addition to Short Sand Beach State Park:- The Parks Superintendent requested authority to negotiate for the acquisition of three 40-acre tracts on Neahkahnie Mountain which, he said, are needed in order to complete the setup for Short Sand Beach State Park. The properties are described as follows: West half of the northeast quarter of Section 18, the northeast quarter of the northwest quarter of Section 18, and Lots 1, 2, and a portion of Lot 3, of Section 7, all in Township 3 North, Range 10 West, W. M. The Commission authorized the Right of Way Department to secure options for the same. In this connection the Parks Superintendent pointed out that Clatsop County owns an additional 40-acre tract adjacent to this park, which it would be desirable to acquire if possible, so that this entire area will be in state ownership. The Oregon Coast Highway runs through this tract, he said, and he believed that the county would deed it to the state if the state would construct a roadway from the highway to the beach. The tract is described as the northeast quarter of the southwest quarter of Section 31, Township 4 North, Range 10 West, W. M., and is located about three-quarters of a mile south of Arch Cape Tunnel. The Engineer was instructed by the Commission to investigate the roadway matter and to report at the next meeting the practicability of constructing the same and how much it will cost to do the work.

Timber strips along the Pendleton-John Day Highway:- The Parks Superintendent advised that he has contacted the Pilot Rock Lumber Company, which owns the timber along the Camas Creek Section of this highway, and ascertained that the company is willing to sell the timber on the strips adjacent to the highway but wishes to retain title to the land. He advised that the proposed strips contain a beautiful stand of virgin timber and would make a fine addition to the state parks system, but the price that the company is asking for them would involve an expenditure of more than \$30,000.00. It was the thought of the Commission that this tract would be a desirable one to purchase with federal funds in the event the bill now before Congress, authorizing an expenditure of federal funds for the acquisition of wayside strips, is enacted into law. In view of the possibilities of securing this congressional legislation, the Commission deferred final action on the purchase of this property for the time being. The Parks Superintendent was instructed to prepare and submit to the Commission in the meantime, for its consideration, a

list of desirable wayside timber tracts that would be eligible for the federal funds, so that if and when the federal funds become available the acquisition of the approved tracts may be expedited.

Proposed roadway to top of Neahkahnie Mountain:- The Parks Superintendent advised that the Commission some time ago approved the construction of a roadway leading to the summit, in Neahkahnie Mountain State Park. However, in view of the cost involved, and for other reasons, it has been considered best to eliminate this roadway and to construct, in lieu thereof, trails that would serve the purpose equally as well and would not involve such heavy construction. He recommended approval of this plan and that he be authorized to secure leases from five property owners through whose properties the trails must be constructed. The Commission approved the report and authorized the Parks Superintendent to negotiate for the leases.

Wayside timber strips along the Wilson River Highway:- The Parks Superintendent recalled that the Weyerhaeuser Timber Company, which owns considerable of the timber through which the Wilson River Highway has been constructed, previously deeded to Tillamook County, without cost, certain strips along this road, it being the idea at the time that the strips would be re-conveyed by Tillamook County to the state. It was his thought that the gift of the Weyerhaeuser Timber Company should be recognized by appropriate public announcement, and advised that he has contacted the Tillamook County Court in regard thereto and that the court has volunteered to give the matter publicity through the Portland newspapers. The Commission approved the report.

Report on state park C.C.C. camps:- The Parks Superintendent advised that the Federal Government has reduced the number of C.C.C. camps in the State of Oregon in accordance with its new policy and as a result he has lost four of these camps from state parks, there now remaining only two camps, one of which is operating in Silver Creek Falls State Park, in Marion County, and the other in Saddle Mountain State Park, in Clatsop County. No action was taken by the Commission on this matter.

Myrtle tract along the Chetco River:- The Parks Superintendent reported a fine stand of myrtle trees at this location which, he said, would make a very fine addition to the state parks system due to the fact that the trees are exceptionally beautiful and the stand is the finest one in existence so far as is known. The owners of this tract, he said, are willing to sell it to the state and he recommended purchase of the same if it can be acquired at reasonable cost. He estimated that it would require an expenditure of about \$10,000.00. The Commission decided to inspect the tract when it makes its park inspection trip down the coast this summer. In the event the Commission decides that the tract is desirable as a part of the state parks system, then purchase of the same will be considered in the formulation of the 1941 parks budget.

Proposed park near Agate Beach Lighthouse, Lincoln County:- The Commission decided to inspect this property on its coastal inspection trip of state parks this summer. This property is owned by Messrs. Fred Williams, Salem, and Ira Wade, Newport.

MAY 2 1940

O. & C. Recreational Lands:- The State Parks Superintendent reported that there are available, as additions to the state parks system, 532 acres of O. & C. lands located at Silver Creek Falls, Marion County; Loon Lake, in Douglas County; Canas Mountain, in Douglas County; and at Wildcat Creek, in Clackamas County, which can be purchased for the sum of approximately \$6,000.00. These tracts, he said, would make desirable additions to the state parks system if funds can be spared to purchase them. The Commission decided not to acquire these tracts on account of the cost involved.

Wayside strips along the Oregon Coast Highway between Newport and Yachats and along the Salmon River Highway:- The Parks Superintendent reported that it would be highly desirable to acquire wayside strips along the above-mentioned highways if funds can be spared to purchase the same. He estimated that the strips along the Newport-Yachats Section would cost about \$50,000.00 and those along the Salmon River Highway would cost about \$20,000.00. Action on these purchases was deferred by the Commission pending the outcome of the bill in Congress that authorizes an expenditure of federal aid funds for purchases of this kind.

1940 park budget:- The Parks Superintendent reported the status of the 1940 budget, including necessary costs for maintenance, betterment, and for approved purchases, as follows:

Amounts approved under maintenance orders	\$ 35,525.00
Amounts approved under betterment orders	36,825.60
Definite obligations	57,483.80
Proposed acquisitions	<u>172,238.78</u>
TOTAL	<u>\$302,073.18</u>

The Commission approved by unanimous vote increasing the parks budget for 1940 from \$100,000.00 to \$150,000.00. The Commission also approved by unanimous vote the amounts reported by the Parks Superintendent as being needed to carry on maintenance work, betterment work, and to pay the definite obligations, totalling \$129,834.40.

Consideration was then given by the Commission to the selection of properties to take up the difference between the obligated amount and the approved budget, amounting to \$20,165.60. After considerable discussion the following purchases were selected and tentatively approved by the Commission by unanimous vote:

Colvin property in Curry County. 327 acres at \$20.00 per a.-	\$6,540.00
Wilsonville Bridgeheads	2,000.00
Rogue River Bridgeheads	3,000.00
Nehalem Sandspit	5,000.00
Short Sand Beach, Collins Tract. 40 a. at \$100.00 per a.	4,000.00
Short Sand Beach Addition. 40 a. at \$50 per a.	2,000.00
Neahkahnie Mountain. 120 a. at \$31.66 per a.	<u>3,800.00</u>
TOTAL	<u>\$26,340.00</u>

It was understood that adjustments would be made in this program as may be required to keep the total expenditure within the approved budget amount of \$150,000.00.

MAY 2 1940

It was also understood that the parks budget for 1941 would be discussed some time this coming fall.

The Commission adjourned at 6:00 p. m. and reconvened at 9:45 p.m. in the Green Room of the Congress Hotel, with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present.

The Assistant Attorney reported on the status of the 1940 right of way budget. He recalled that the budget approved by the Commission for this year is in the amount of \$600,000.00, and advised that, up to the present time, of this amount \$312,000.00 has been obligated for right of way purposes. The Commission approved the report.

The Attorney asked the Commission to confirm certain property settlements that were approved by Chairman Cabell and Commissioner Clough subsequent to the Commission meeting held on April 9, 1940, such confirmation being necessary for the records. The Commission approved the request and adopted the following resolution in regard thereto by unanimous vote:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

7661-Curtiss, Leon T.C., Estate (Correction)	Stock Pile	0.76	Land \$100 Lump Sum, + fencing	Benson

The Attorney also requested authority to acquire additional parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

MAY 2 1940

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement, hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The Attorney brought up for discussion matters pertaining to the acquisition of right of way needed for the proposed improvement of the Oregon Coast Highway through the town of Brookings, in Curry County. He advised that negotiations have been under way for some time to acquire extra land needed to provide right of way 80 feet wide, but difficulties have arisen and it now appears that it is going to cost considerably more for this right of way than was originally estimated. It was originally thought, he said, that this right of way would cost about \$15,000.00; however, a more careful appraisal indicates that the properties are valued at \$25,000.00 as compared with the amount of \$32,000.00 which the property owners are demanding. He particularly mentioned three properties, one being the garage business owned by the bankrupt estate of Fanny T. Pedrioli, which is involved in a proceeding in federal court. Another is a service station business owned by Bernice M. Ward, which is under lease to a tenant who will have to be paid damages. This property, he said, is appraised at \$3,000.00, but the owner is demanding \$3,500.00 and

MAY 2 1940

that the state in addition thereto pay the amount of the tenant's damage, which is estimated at \$500.00. The third property, he said, is that belonging to Irving Austin Leming and concerns a restaurant business. Mr. Leming, he said, is asking \$3,000.00 for the building and \$324.00 for the land. In addition to these three cases, he said, there is another involving property owned by H. F. Arnold, which property is appraised at \$45, whereas Mr. Arnold is demanding a considerably larger amount for the same. He suggested, in view of the fact that it is proposed to advertise the Brookings project for bids to be received at the June meeting of the Commission, that condemnation proceedings be commenced to acquire right of way across each of these properties, and recommended the following offers for condemnation:

	<u>Price Demanded</u>	<u>Recommended Offer</u>
Pedrioli property	\$10,000	\$4,000
Ward property	3,500 (state to pay damages to tenant)	3,000 (owner to pay damages to tenant)
Leming property	3,324 (Bldg. \$3,000 Land 324)	3,000 (for bldg. & land)
Arnold property	- - -	50

After discussion the Commission by unanimous vote approved the offers recommended and authorized the Attorney to proceed with condemnation. The Attorney was instructed to discontinue negotiations for the remaining right of way until the condemnation proceedings have been disposed of.

The Attorney also reported difficulties in arriving at satisfactory settlements with the owners of additional property that is needed for highway purposes, particularly the following:

Right of way needed for the Lone Rock Junction-Rock Creek Section of the Wasco-Happner Highway across property owned by Gladys Booth. He recommended an offer of \$60.00 for this property in condemnation and advised that it is necessary to condemn because it involves settlement with an estate.

Right of way needed for the Wright's Point-The Narrows Section of the Frenchglen Highway across property owned by Nora G. Thole. He recommended an offer of \$200.00 in condemnation.

After discussion the Commission approved the offers recommended in each instance and authorized the Attorney to proceed with condemnation. The following resolution authorizing the Attorney to institute condemnation for the acquisition of all of the above-described properties was thereupon adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

MAY 2 1940

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Brookings Section of the Oregon Coast Highway
Lone Rock Junction-Rock Creek Section of the Wasco-Heppner Highway
Wright's Point-The Narrows Section of the Frenchglen Highway

real property owned by or in possession of the following parties and/or persons, to wit:

Brookings Section of the Oregon Coast Highway
7707-Bankrupt estate of Fannie T. Pedrioli
7705-Bernice M. Ward
7704-Irvin Austin Leming
7698-H. F. Arnold
Lone Rock Junction-Rock Creek Section of the Wasco-Heppner Highway
7841-Gladys Booth
Wright's Point-The Narrows Section of the Frenchglen Highway
7791-Nora G. Thole

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the

lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission discussed and ratified the action taken by Chairman Cabell and Commissioner Clough on the following property sales, subsequent to the meeting of the Commission on April 9, 1940:

Transaction No. 7204 - sale of buildings on the right of way acquired from Helen McConnell for the improvement of the Pacific Highway south of Grants Pass. The Commission accepted the offer of Pete Fredericksen to pay \$105.00 for these buildings, acceptance having been recommended by the Attorney.

Transaction No. 7203 - sale of buildings within the limits of the right of way acquired from Jean Higgins for the improvement of the Pacific Highway south of Grants Pass. The Commission approved the sale of this property, including a portion of the land outside and to the east of the standard-width right of way boundary to Helen McConnell for the sum of \$2,250.00.

The Attorney requested instructions whether or not to acquire from a Mr. F. C. Adams certain right of way that is needed for the Klamath Falls-Dairy Section of the Klamath Falls-Lakeview Highway, in Klamath County. It appears that this property lies adjacent to the city of Klamath Falls and is on the Sixth Street section of this highway. Further, that the owner has subdivided the land and has placed the plat of the subdivision on file in the county records. The Attorney advised that Mr. Adams is asking \$2,300.00 per acre for the right of way, whereas, in his estimation, it is worth only

MAY 2 1940

about \$300.00 per acre. It was his thought that the right of way should be acquired now while the entire subdivision is still owned by Mr. Adams, which would limit negotiations to one individual rather than numerous property owners if the right of way is not acquired until later on when some of the property has been sold. Because of the great difference in the amount that is being asked by Mr. Adams for the property and the value placed thereon by the Right of Way Department, the Attorney suggested that it would be advisable to condemn the property.

In the discussion the Engineer pointed out that the permanent alignment for this highway has not as yet been determined, so he is not in a position to state just how much of this property is needed. In view thereof the Commission decided to defer commencement of the condemnation proceedings until the location survey has been completed. The Attorney was instructed to bring the matter up again at that time.

The Attorney reported that in connection with the settlement with Mr. C. L. Green for right of way needed for the improvement of the Pacific Highway East just south of Salem it was agreed that certain trees would not be destroyed, and in consideration thereof Mr. Green offered to sell his property to the state for \$150.00 less than if the trees were removed. It now appears, he said, that during the construction of the highway at this point the contractor inadvertently destroyed the trees and now Mr. Green is asking the state to pay him an additional \$150.00 for their loss. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Commission adjourned at 12:00 midnight, to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, May 3, 1940

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 p. m. in the same room:

CAPE ARAGO SECONDARY HIGHWAY
NORTH BEND (MIDLAND ADDITION) SECTION - GRADING & SURFACING

Coos Bay Dredging Company, Inc.
McNutt Bros.

\$ 3,985.05
4,379.35

**TILLER-TRAIL SECONDARY HIGHWAY
CANYONVILLE-DAYS CREEK SECTION - SURFACING, OILING, CRUSHED GRAVEL**

O. C. Yocom	\$25,251.00
J. C. Compton	25,823.50
Homer G. Johnson	27,610.00
Clifford A. Dunn	29,510.90
A. Milne	32,152.00
McNutt Bros.	33,982.10

**TILLER-TRAIL SECONDARY HIGHWAY
DAYS CREEK BRIDGE SECTION - CONSTRUCT LOG BRIDGE**

J. F. Johnston	\$ 4,861.30
Contracting & Sales Company	4,896.50
Tom Lillebo	5,461.25
W. H. Philpott	5,580.25
Clifford A. Dunn	6,451.50
McNutt Bros.	7,998.00

**WASCO-HEPPNER SECONDARY HIGHWAY
LOME ROCK JUNCTION-ROCK CREEK SECTION - GRADING & SURFACING**

M. L. O'Neil & Son	\$15,461.75
A. Milne	19,777.50
Leonard & Slate	23,189.00
McNutt Bros.	25,418.50
Homer G. Johnson	28,156.00

**PACIFIC HIGHWAY
EAST UNIT, GRANTS PASS-GREEN CREEK SECTION - GRADING & PAVING**

Leonard & Slate	\$39,240.00
R. I. Stuart & Son	40,636.00
McNutt Bros.	42,166.50

**FENDLETON-JOHN DAY HIGHWAY
NORTH PILOT ROCK SECTION - GRADING, SURFACING, OILING, CONCRETE BRIDGE**

McNutt Bros.	\$23,898.00
Babler Bros.	23,937.00
Birkemeier & Saremäl	24,857.50
F. R. Hewett	26,069.50
Norris Bros.	27,194.00

**PACIFIC HIGHWAY WEST
MIDDLETON-NEWBERG SECTION - ROADSIDE IMPROVEMENT**

Leonard & Slate	\$12,425.00
River Bend Sand & Gravel Company	16,821.50

MAY 3 1940

The Engineer brought up for discussion matters pertaining to the improvement of Lombard Street, Portland, and particularly the offer of the Portland Traction Company to cooperate in the cost thereof by reason of the abandonment of its streetcar tracks on this street. He said that the Traction Company has agreed in writing to contribute the sum of \$10,317.00 toward the cost of this improvement, which amount represents the cost of paving over the abandoned track area at the rate of 60 cents per square yard, and that the Traction Company has also agreed orally to pay the state an additional sum of \$1,500.00, which represents the cost of maintaining this area for the next ten years. He recommended acceptance of such offer as full and complete cooperation from the Traction Company and that the Commission authorize the advertising of this project for bids to be taken at the June meeting. The Commission approved the recommendation by unanimous vote, subject to the condition that the entire offer of the Traction Company be obtained in writing.

The Engineer reported a request from the Portland Traction Company for a letter outlining the attitude of the State Highway Commission with respect to the removal of the streetcar tracks from the Interstate Bridge between Portland and Vancouver. He said that the Traction Company has plans for the removal of its streetcar line between Portland and Vancouver, and the public hearing on its application is to be held on the following day in the Multnomah County Courthouse and, if consistent with the Commission's policy, they would like to have a letter from the Commission outlining its viewpoint, for the records of such meeting. He recommended approval of the request in view of the fact that the Interstate Bridge is narrow and the elimination of streetcar traffic across same would be a big advantage and of considerable benefit to vehicular traffic. The Commission authorized the Engineer to write such letter.

The Commission had under discussion a request from the 1940 San Francisco World's Fair Commission for the use of one of the Highway Department's trucks to deliver shrubbery to the Oregon exhibit at this fair. The Commission decided not to loan a truck for this purpose in view of its established policy concerning Highway Department equipment; however, instructed the Engineer to contact Mr. Sigfrid Unander, Secretary of the Oregon Fair Commission, and endeavor to work out a satisfactory solution of this problem.

A letter was presented from the West Coast Life Insurance Company offering, for the benefit of State Highway Department employees, a salary-saving plan involving the purchase by such employees individually any form of life or endowment insurance that they may desire and the paying of the premiums for the same by the state by making a deduction from the monthly salaries of such employees. The Commission disapproved the plan by unanimous vote in view of the complications that would result in keeping proper records of individual accounts, considering that there are so many life insurance companies doing business in this state, and if the Commission authorized one company to put its plan in force it would also have to grant the same privilege to all of the companies.

The Assistant Attorney brought up for discussion the matter of acquisition of the Giesendorfer park property at Cascadia. It appears that

there is an outstanding mortgage against this property, amounting to \$15,000.00, that will have to be paid off if the Commission acquires the property. Furthermore, the Baptist Church has a long-term lease to occupy a certain portion of the property, and, under the provisions of this lease, is now maintaining certain buildings thereon, valued at \$4,000.00, which lease would have to be terminated, and the buildings removed. Also, that Mr. Giesendorfer, who is past eighty years of age, is demanding an annuity that would provide him \$75.00 per month during the balance of his life.

The Assistant Attorney advised that in accordance with information that he has obtained from the State Insurance Commissioner and from a representative of one of the life insurance companies, an insurance policy providing for such an annuity payment to Mr. Giesendorfer can be purchased for the sum of \$4,814.00, based on a life expectancy of 2.78 years. In other words, the cash outlay by the state under such plan would total approximately \$23,800.00. He suggested that, if the Commission decides to acquire this tract, it would be advisable to pay Mr. Giesendorfer \$75.00 per month rather than to purchase the annuity insurance; and, on such basis, the total cash outlay would then be approximately \$21,000.00. The matter was discussed at some length, during which the Commission appeared inclined to favor the suggestion of the Attorney, but no definite action was taken the matter being held pending further discussion with Dr. F. W. Starring, Executive Secretary, Oregon Baptist Church Convention, Portland, who has an appointment with the Commission at this meeting.

Dr. Starring appeared before the Commission in company with Dr. C. S. Tunnell, Supervisor in charge of their recreational department. Dr. Starring advised that the Baptist Church Convention has a 50-year lease on 15 acres of land belonging to Mr. Giesendorfer and that said lease still has 44 years to run. Further, that they are paying Mr. Giesendorfer \$50.00 per year for the privilege of occupying his land. He estimated that the Baptist State Convention would suffer a loss of \$6,500.00 if it is required to vacate the premises and said that they would willingly move in order to accommodate the State Highway Department, if necessary, and provided they can find a suitable location elsewhere. He qualified his statement by saying that he has not been authorized to offer any definite proposition to the state but would take the matter up with the Board of Directors at a meeting which is scheduled for next week.

This matter was discussed at length but no decision reached except that it was decided to continue the search for another suitable site for the Baptist Church facilities. The Assistant Attorney reported later in the session that he discussed this matter further with Dr. Starring, who appeared favorably inclined to accept a cash settlement of \$4,000.00 to terminate the lease, provided the Baptist State Convention retain ownership of the buildings and not be required to move the buildings until 1941. The Commission considered the proposition fair and reasonable if it decides to purchase the park, and authorized the Assistant Attorney to direct a letter to Dr. Starring outlining the Commission's attitude, without making any definite commitment, so that Dr. Starring may present this letter to his Board of Directors.

MAY 3 1940

Mr. Fred Brenne, Secretary of the Eugene Chamber of Commerce, and Mr. H. L. Koppe, City Councilman, were present and advised the Commission that the Eugene Chamber of Commerce has gone on record as approving in full the Engineer's plan for the permanent routing of the Pacific Highway through the city of Eugene. The Commission thanked them for this information.

Mr. Ray Conway, member of the committee appointed by the Commission to recommend sites for historical markers along the Old Oregon Trail, was present and reported briefly the progress that is being made by the Committee on this matter. The Commission approved the report.

A delegation from Wasco and Wheeler Counties came before the Commission and urged improvements to the secondary state highway between Fossil, in Wheeler County, and Antelope, in Wasco County. The delegation was headed by Fred E. Metteer, of Fossil, and included the following: County Commissioner Mace Fulton, of Wasco County; County Judge S. J. Howard, and County Commissioners L. A. Gochenour and Chas. R. Jackson, of Wheeler County; Buster Burgess, Charles Conlee, Edward Lee, all of Fossil; Estel Storall, A. W. Gust, E. C. Woodcock, Charles Steele, and Chas. H. Crofoot, all of Maupin; W. C. Vreidt, Ed McGreer, V. W. Dunn, Robt. B. Rooper, E. A. Maurer, and J. A. Hastings, all of Antelope; Chas. Chapman, Martin W. Nill, and John Wilson, on Clarno; and J. B. Kirk, of The Dalles.

They particularly asked the Commission to transfer the federal aid secondary highway funds heretofore budgeted by the Commission for the improvement of the Kinsua County Road, amounting to \$15,000.00, from this road to the Fossil-Antelope Road. They were informed that it is now too late to make such transfer of funds; anyway, the money was allotted to the Kinsua Road at the request of the Wheeler County Court. Further, that while the Commission is not in a position at the present time to make any commitments or promises with respect to future allocations, it will be pleased to bear this project in mind and will consider it in the formulation of the next program for this type of road.

The Commission adjourned at 12:45 p. m. and reconvened at 2:00 p.m. in the same room.

The Engineer requested authority to conduct a resurvey of the county road which extends up the Rogue River from the town of Wedderburn, as was heretofore requested by a delegation from that vicinity. The Commission approved the request and ordered a report on the situation, for consideration at the next meeting. The Commission also instructed the Engineer to have on hand at that time an estimate of cost to improve the Sixes River Road in Curry County.

A group headed by Mr. Fred Packwood, attorney, Portland, and including W. C. Reugnitz, representing the Columbia Basin Loggers Association; Fay Abrams, representing the Booth-Kelly Lumber Company of Eugene; Herb Cox and George Metzger, of the West Coast Lumber Association, also of Eugene; and Truman and E. S. Collins of Portland, was present in regard to the granting of permits for the transportation over state highways of extra-long logs,

involving overall lengths in excess of the limit specified by statute. Chairman Cabell made the following announcement in regard thereto: "The State Highway Commission feels that, as it interprets the law, it has no right to continue issuing permits authorizing the transportation of overlength loads of logs except under conditions outlined at the Commission meeting last month. However, there are others, including some attorneys, who place a different interpretation on the law, and for that reason the Commission is prepared to enter into a friendly suit to determine just what the law is in the matter. Pending the outcome of this suit the Commission will continue to grant permits for such overlength movements as in the past; at least, the present practice of granting permits will not be changed until there is an adverse decision rendered by the court from this suit. Regardless of the outcome of this suit, it is the hope of the Commission that the representatives of the logging industry will introduce a bill before the next legislature to clarify the situation."

The group thanked the Commission for the action taken. The Secretary was thereupon authorized to continue the granting of permits for overlength movements of logs as in the past.

The Commission recessed from 2:15 p. m. to 3:15 p. m. to attend the funeral of B. F. Irvine, former editor of The Journal, Portland.

At 3:30 p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"North Bend Section (Midland Addition) of the Cape Arago Secondary Highway, in Coos County. 0.31 mile grading and 0.09 mile surfacing. Only 2 bids were received for this project, that of the Coos Bay Dredging Company, Inc., Marshfield, being the low one and amounting to \$3,985.05. The other bid was that of McNutt Bros., Eugene, in the amount of \$4,379.35. The Commission has awarded this contract to the low bidder, Coos Bay Dredging Company, Inc., at its bid of \$3,985.05.

"Canyonville-Days Creek Section of the Tiller-Trail Secondary Highway, in Douglas County. 7.12 miles surfacing and oiling; also furnish 5,150 cu. yds. crushed gravel in stock piles. O. C. Yocom, Willamina, submitted the low bid for this contract, in the amount of \$25,251.00. J. C. Compton, McMinnville, submitted the next-low bid, in the amount of \$25,823.50. There were 4 higher bidders. The Commission awards this contract to the low bidder, O. C. Yocom, at his bid of \$25,251.00.

"Days Creek Bridge Section of the Tiller-Trail Secondary Highway, in Douglas County. Construct 124-foot log bridge. The low bid submitted on this project was that of J. F. Johnston, Newberg, in the amount of \$4,861.30. The next low bid was that of the Contracting and Sales Company, Portland, in the amount of \$4,896.50. There were 4 higher bidders. The Commission has rejected all bids received for this work.

"Lone Rock Junction-Rock Creek Section of the Wasco-Heppner Secondary Highway, in Gilliam County. 6.29 miles grading and surfacing. The low bid received was that of M. L. O'Neil & Son, Jordan Valley, in the amount of \$15,461.75. A. Milne, Portland, submitted the next low bid, in the amount of \$19,777.50. There were 3 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"East Unit, Grants Pass-Green Creek Section of the Pacific Highway, in Josephine County. 0.83 mile grading and paving. Leonard & Slate, Multnomah, submitted the low bid for this work, in the amount of \$39,240.00. R. I. Stuart & Sons, Medford, submitted the next low bid in the sum of \$40,636.00. There was only one higher bidder. This contract is awarded to Leonard & Slate, the low bidders, at their bid of \$39,240.00.

"North Pilot Rock Section of the Pendleton-John Day Highway, in Umatilla County. 0.34 mile grading, surfacing, and oiling, and construct 54-foot concrete bridge. McNutt Bros., Eugene, submitted the low bid for this work, in the amount of \$23,898.00. Babler Bros., Portland, submitted the next low bid in the amount of \$23,937.00. There were 3 higher bidders. The Commission has awarded this contract to McNutt Bros., the low bidders, at their bid of \$23,898.00.

"Middleton-Newberg Section of the Pacific Highway West, in Washington and Yamhill Counties. 6.49 miles roadside improvement. The Commission received only 2 bids for this project, that of Leonard & Slate, Multnomah, being the low one, in the amount of \$12,425.00. The other bid was that of the River Bend Sand & Gravel Company, Salem, in the amount of \$16,821.50. The Commission has rejected both bids received on this project and has ordered the job readvertised."

The Engineer requested authority for the Right of Way Department to negotiate for the acquisition of a strip of land 20 feet wide along the west side of Block 33, Olney's Addition to Astoria, so as to provide a right of way 80 feet wide along Fifth Street, the connecting street between the Oregon Coast Highway and the Nehalem Secondary Highway at this place, which property is owned by the City of Astoria. The Commission granted the request.

The Attorney reported that in connection with the Cottage Grove improvement it is necessary to secure right of way and a slope easement from Alvin C. Spriggs, et al. The area to be acquired, he said, contains 997 sq. ft. of land plus a slope easement. He recommended the following settlement for the same: The conveying of 1,777 sq. ft. of state-owned property to Mr. Spriggs, et al, with the understanding that the Commission is to be paid 20 cents per square foot for the area deeded in excess of 997 sq. ft., which the state is obtaining, and advised that such settlement is satisfactory to Mr. Spriggs and his associates. The Commission approved such settlement by unanimous vote.

MAY 3 1940

Consideration was given by the Commission to a request of Mrs. S.E. Huntsberger, Portland, to purchase a parcel of state-owned land situate between the old highway and the new highway just north of the Pudding River Bridge, at Aurora. The Engineer advised that it is planned to revise the alignment of the highway somewhat at this point in the near future, and in connection therewith some of this land will be needed. He recommended that the request be denied. The Commission decided unanimously not to sell the property.

Reconsideration was given by the Commission to the application of L. A. Bratcher, Ashland, to purchase a parcel of state-owned property adjacent to the Bear Creek-Talent Section of the Pacific Highway, in Jackson County. The Commission decided not to sell the property.

A letter was presented from E. G. Robinson, Portland, suggesting that when the proposed bridge across the Willamette River at Wilsonville is constructed the road approaches to the ferry at such point be maintained for general public use rather than revert to the adjacent property owners, because, if the approaches are allowed to revert to private ownership, it would then be impossible for the general public to have access to the river anywhere in this area without encroaching upon private property. The Commission took the matter under advisement for future consideration.

The matter of acquiring additional property at the Highway Department's shops at Salem had the attention of the Commission. The Engineer advised that the Commission a short time ago authorized the acquisition of approximately 4 acres of land abutting upon and immediately east of the present highway shop site, which land was secured at a price of \$212.00 per acre. He pointed out that there remains between the enlarged shop site and the county road leading to the Salem Airport a triangular-shaped area containing 3.653 acres, and gave as his thought that it would be desirable to acquire this additional area in order to have control of all the property between the original highway shop site and the county road, and he so recommended. The Commission approved the recommendation unanimously on the condition that the property can be acquired at the rate of not more than \$212.00 per acre.

The Commission considered and denied the application of W. H. Kennedy, Deputy Sheriff, Coos County, to purchase an irregular-shaped parcel of state-owned property, approximately 50 feet wide and 125 feet long, adjacent to the Oregon Coast Highway just east of the Bunker Hill School, on which to construct and maintain a service station.

The Commission had under discussion matters pertaining to the proposed improvement of the Oregon Coast Highway at Gold Beach and particularly discussed the matter of acquiring additional needed right of way for the same. In this connection the Attorney advised that a George B. Stafford, Jr., whose property fronts on the east side of the highway, a portion of which property will be needed for right of way, contemplates the construction of an expensive filling station thereon and he has stated his unwillingness to sell any of this property for the highway improvement. The Engineer advised that Mr. Stafford's property is located at the south end of Gold Beach where there is

MAY 3 1940

no question about the permanency of the highway alignment; also, that it is contemplated to reconstruct this unit as the first project in the Gold Beach improvement. He recommended, therefore, that the Attorney be authorized to take options for the right of way at this time, beginning at the curve at the intersection of Strahan Street and extending southerly the full length of the contemplated improvement, which would include Mr. Stafford's property. The Commission approved the recommendation unanimously and so ordered.

The Engineer recommended the abandonment of certain sections of the following highways, such sections being no longer of value from the state's standpoint because the highways have been reconstructed on other alignment:

Portion of the Klamath Indian Agency Section of The Dalles-California Highway between Mile Posts 252 and 253, Klamath County.

Portion of the Green Springs Highway one-half mile east of Jenny Creek, in Jackson County.

Portion of the Draws Valley Section of the Klamath Falls-Lakeview Highway, in Lake County, opposite Draws Reservoir.

Also, the abandonment of certain portions and the retention of certain portions of the relocated Hunter Hill-Lakeview Section of the Fremont Highway, in Lake County.

The Commission approved the recommendation and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Klamath Indian Agency Section of The Dalles-California Highway in Klamath County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

MAY 3 1940

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Klamath Indian Agency Section of The Dalles-California Highway, but is now without the limits of the right of way of said highway as said highway has been relocated and reconstructed be and said fragment or parcel land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to tribal ownership by the Klamath Indian Tribe. The fragment or parcel of land affected by this resolution is defined and described as follow, to wit:

All that certain section of the old right of way of The Dalles-California Highway in Sections 7 and 18, Township 34 South, Range 7 East, W.M., Klamath County, lying on the easterly and westerly side of the right of way required for the reconstructed The Dalles-California Highway and lying between Mile Post 252 and Mile Post 253 of said highway, the beginning and ending points with reference to engineer's stations of the said old highway being Station 1634+50 on the southerly end and Station 1672+80 on the northerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated May 1, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguard as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof, together with a copy of said map or exhibit, delivered to Honorable B. G. Courtright, Superintendent of the Klamath Indian Agency, and thereafter said abandoned section of said highway shall no longer be under the jurisdiction or control of the State Highway Commission, nor shall the Highway Commission

*Map filed in Right of Way Abandonment and Retention File - No. 71

MAY 3 1940

assume or undertake any responsibility in connection therewith.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Green Springs Highway in Jackson County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Green Springs Highway in Jackson County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Jackson County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Green Springs Highway lying on the southerly side of the right of way required for the reconstructed Green Springs Highway lying between Mile Post 24 and Mile Post 25 of said highway, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 446+70 on the westerly end and Station 477+80 on the easterly end, all in Section 4, Township 40 South, Range 4 East, W.M., Jackson County, Oregon.

MAY 3 1940

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated February 23, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Klamath Falls-Lakeview Highway in Lake County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way

*Map filed in Right of Way Abandonment and Retention File - No. 72

MAY 3 1940

of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Klamath Falls-Lakeview Highway in Lake County but is now without the limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lake County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Klamath Falls-Lakeview Highway lying on the westerly side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway and lying between Mile Post 71.62 and Mile Post 73.46 of said highway; the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 472+14.8 on the northerly end and Station 554+38.4 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated February 16, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using

* Map filed in Right of Way Abandonment and Retention File - No. 73

MAY 3 1940

and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lake County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Lake County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate portions of the Hunter Hill-Lakeview Section of the Fremont Highway in Lake County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main travelled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically defined and described hereinafter in this resolution and are reflected on prints or maps, marked "Exhibit A", "Exhibit B", and "Exhibit C", and "Exhibit D", copies of which are attached hereto and made a part hereof; and

WHEREAS, while those sections hereinafter described as the parcels to be retained and shown in yellow on the attached prints are not required for use as a part of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public purposes, to wit: storage purposes, parking area and other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached prints; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as parts of the state highway system certain portions of the highway eliminated from the main travelled portion of said highway, which sections are made unnecessary as a part of the completed highway

MAY 3 1940

and are shown shaded in red on the attached prints or maps;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. The fragments or parcels of land which heretofore were within the right of way proper of the Hunter Hill-Lakeview Section of the Fremont Highway but which by reason of a relocation or re-alignment of said highway are now without the area improved and used by the traveling public, but are adjacent to and abut upon the said right of way, which parcels are shown shaded in yellow on the attached print, shall be preserved by the Highway Commission for such other public use as said land may serve in connection with the construction, improvement, and maintenance of said highway or the use of the same, which said parcels or fragments of land are described as follows, to wit:

All those certain sections of the old right of way of the Hunter Hill-Lakeview Section of the Fremont Highway in Lake County lying on each side of the right of way required for the reconstructed Fremont Highway and lying between Mile Post 80 and Mile Post 135 of said highway. The beginning and ending points of each section to be retained with references to the location and the engineer's stations of the reconstructed highway are described as follows:

(Hunter Hill-Currier Ranch Section, Mile Post 80 to Mile Post 86, Exhibit A.)

Station 3376+47 to Station 3369+54	on the westerly side of the highway
Station 3310+94 to Station 3304+79	" " " " " " "
Station 3223+68 to Station 3213+53	" " " " " " "
Station 3173+82 to Station 3157+80	" " " " " " "

(Warlow Creek-Paisley Section, Mile Post 97 to 98, Exhibit B.)

Station 2400+00 to Station 2387+15 on the westerly side of the highway, being all that portion of the old right of way lying in the South one-half of the Northwest quarter of Section 24, Township 33 South, Range 18 East, W. M., Lake County.

(Chandler Park-Loveless Creek Section, Mile Post 126 to Mile Post 129, Exhibit C.)

Station 822+00 to Station 812+18	on the easterly side of the highway
Station 808+70 to Station 803+60	" " " " " " "
Station 798+30 to Station 780+38	" " " " " " "
Station 751+50 to Station 741+74	" " " " " " "
Station 724+90 to Station 717+80	" " " " " " "

(Crooked Creek-Salt Creek Section, Mile Post 130 to
Mile Post 134, Exhibit D.)

Station 646+84 to Station 639+53	on the easterly side of the highway				
Station 550+86 to Station 545+96	" southeasterly	"	"	"	"
Station 545+39 to Station 540+94	" northwesterly	"	"	"	"
Station 540+73 to Station 537+11	" southeasterly	"	"	"	"
Station 531+90 to Station 509+89	" northwesterly	"	"	"	"
Station 508+80 to Station 495+23	" southeasterly	"	"	"	"

2. That the fragments of land confined within the area hereinafter described and designated as the parcels of land to be abandoned, which fragments were formerly within the limits of the right of way of the Hunter Hill-Lakeview Section of the Fremont Highway, be and said fragments of land are abandoned as a part of the right of way of said highway, and said fragments of right of way are, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lake County. The fragments of land to be abandoned are described as follows, to wit:

All those certain sections of the old right of way of the Hunter Hill-Lakeview Section of the Fremont Highway lying on each side of the right of way required for the reconstructed Fremont Highway and lying between Mile Post 80 and Mile Post 135 of said highway, The beginning and ending points of each section to be abandoned with reference to the location and the engineer's stations of the reconstructed highway are described as follows:

(Hunter Hill-Currier Ranch Section, Mile Post 80 to
Mile Post 86, Exhibit A.)

Station 3332+37 to Station 3325+52	on the easterly side of highway

(Chandler Park-Loveless Creek Section continued)

Station 851+50 to Station 822+00 on the easterly side of the highway and lying north of the west line of Section 6, Township 37 South, Range 21 East, W. M., Lake County.

(Crooked Creek-Salt Creek Section, Mile Post 130 to Mile Post 134, Exhibit D.)

Station 587+60 to Station 557+25 on the easterly side of highway
 Station 474+90 to Station 418+40 " " " " " "

3. In addition to the foregoing descriptions of said fragments or parcels of land there are attached hereto prints or maps, marked "Exhibit A", "Exhibit B", "Exhibit C", and "Exhibit D", which by this reference are made parts hereof, and upon which maps there are shown shaded in yellow the parcels of land formerly within the old right of way, but which are now by this official act preserved for public purposes, and upon which map there are shown shaded in red the abandoned sections of said right of way. Said exhibits or maps for identification purposes bear the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and bear date of April 2, 1940. *

4. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property".

5. In the event there remains any physical connection between any portions of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lake County, together with copies of said exhibits or maps, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of said Fremont Highway be further employed for public or private

* Maps filed in Right of Way Abandonment and Retention File - No. 74

MAY 3 1940

highway purposes such use shall be entirely under the control and supervision of the County Court of Lake County and beyond any responsibility or supervision by the State Highway Commission.

The Commission considered the application of Mr. Floyd Wood to purchase a portion of state-owned property adjacent to the Warm Springs Highway about 6 miles north of Madras, in Jefferson County. The Attorney advised that the area in question is an old borrow pit containing 23 acres and that Mr. Wood has offered to pay \$50.00 for the same, which is approximately the amount that the state paid for it. Also, that the land is of no value for state highway purposes. The Commission decided to sell the property to the bidder submitting the highest bid for the same, and ordered that the property be advertised for sale in the local newspaper. The Commission also ordered that, if the property is sold, the deed of conveyance contain a clause prohibiting right of access to the highway from the property.

The Commission also approved the sale of a small triangular-shaped parcel of state-owned land in Medford to the Medford Corporation for the sum of \$10.00, said parcel containing 46 sq. ft. of land and situate in Lot 13, Block 8, Berryvale Addition to Medford. The Attorney advised that this area was included in the deed to the state from the Medford Corporation by mistake and that the Corporation has asked that it be reconveyed to it in order to clear its records.

The Commission also approved the sale to Della A. Lindeman, Medford, for the sum of \$10.00, of a small parcel of land lying outside of the right of way, in Lot 21, Block 7, Berryvale Addition to Medford, for use as approach to her service station.

The Commission discussed the claim of Mrs. B. Huslik, Bend, for damages that she alleges occurred to her property by reason of the state highway improvement on Franklin Avenue, in Bend. The Assistant Attorney advised that Mrs. Huslik owns a service station at the corner of Third and Franklin Avenues which has been rendered more or less isolated by reason of the highway improvement, particularly because a curve has been introduced into the alignment at this intersection, taking traffic away from her place of business, and because the center of the highway has been raised somewhat, although there has been no change whatsoever in the grade of the highway at the property line. As a consequence, he said, Mrs. Huslik, in order to save her business, has purchased adjacent property fronting on Franklin Avenue, for which she paid \$2,500.00, and she is now asking such sum in settlement of her claim because she feels that the highway improvement has forced this expense upon her.

The Assistant Attorney gave as his thought that the damages sustained by Mrs. Huslik have arisen out of change in location of the highway, for which the State Highway Commission has no legal obligation, hence would have no legal authority to compensate her. However, he gave as his thought, in view of the fact that Mrs. Huslik's business will be somewhat adversely affected by reason of change in location of the highway, that she is entitled

MAY 3 1940

to some compensation therefor, and recommended the payment of \$500.00 as complete and full settlement of her claim. After discussion the Commission by unanimous vote approved the recommendation.

The Commission also considered the claim of J. N. Whitman, Dundee, for additional compensation arising out of the reconstruction of the Pacific Highway West at this place. It appears that when the original settlement was effected with Mr. Whitman providing for right of way needed for this improvement, nothing was said about reconstructing the concrete curb in front of Mr. Whitman's premises, which curb was destroyed by the highway improvement, and Mr. Whitman now wishes the curb replaced or that he be paid the sum of \$20.00 in lieu thereof so he can replace it himself. The Commission considered Mr. Whitman's claim reasonable and thereupon authorized the payment of \$20.00 to him for such purpose.

The Commission had under discussion the matter of consenting to the vacation of a portion of 8th Street in Albany for a short distance at the point where said street connects with the new route of the Pacific Highway, more particularly described as follows:

Beginning at a point where the south line of the new Pacific Highway intersects the south line of Eighth Street or the north line of Block 5 in Bryant's Addition to Albany, Oregon; thence easterly along the north line of said block to the east end of said Eighth Street, thence North 00° 56' West 30 feet to the south line of said highway, thence South 66° 46' West along said highway to the place of beginning, containing 1125 square feet.

The Attorney and the Engineer advised that this street is of no value from the State Highway standpoint or for any general public use whatsoever and that the city intends to vacate it and in connection therewith needs the consent of the State Highway Department because the street abuts on the state highway right of way. They recommended that the Commission join with the other property owners in consenting to the vacation. The Commission approved the recommendation unanimously and thereupon signed a form of consent relating thereto, as prepared by the Attorney.

The Assistant Attorney advised that the State Highway Department owns several residence buildings in Pendleton and that the renting of the same is in the hands of a local real estate agency which advises that it is having difficulty in securing desirable tenants in two of the houses because they are in need of repair. He said that investigation reveals that it would cost about \$90.00 to put these buildings in satisfactory condition, and requested authority to proceed with the improvement. The Commission approved the request unanimously.

The Assistant Attorney also reported that the Gibson house, which was acquired by the Commission in connection with the acquisition of right of way for the South Salem improvement of the Pacific Highway, is in need of repair to make it rentable. He estimated that it would cost about \$25.00 to make the repairs, consisting of the installation of a trash burner and other

MAY 3 1940

minor improvements. He requested authority for the expenditure of such sum. The Commission approved the request.

The Attorney brought up for discussion matters pertaining to the proposed improvement of the Pacific Highway through Eugene. He pointed out that the Southern Pacific Railroad Company owns certain property in University Addition to Eugene which may be needed for right of way for the new improvement, although it is not definitely known at this time whether or not the railroad company's land will actually be needed. He suggested that it would be advisable to write the railroad company and request that this property be not sold until the Highway Commission's plans for this improvement have been finally approved. The Commission approved the suggestion and so ordered.

The Assistant Attorney brought to the attention of the Commission the fact that fronting on Block 25 of the town of Dundee, between 9th Street and 10th Street, which section is now being reconstructed as a state highway route, certain gasoline pumps, a pump island, and storage tanks have been installed, all within the limits of the highway right of way, which facilities will conflict with the construction of sidewalks in connection with the highway improvement. He suggested that formal demand should be made upon the City of Dundee to cause the removal of these encroachments in order to permit the proper construction of the highway project, it being his thought that this is an obligation of the city. The Commission concurred in the viewpoint of the Attorney and thereupon instructed the Secretary to ask the city authorities, by letter, to have these encroachments removed.

The matter of constructing a fire trail across certain property acquired from the Sunset Logging Company adjacent to the Wolf Creek Highway had the attention of the Commission. It appears that in connection with the rules and regulations of the State Forester, the Sunset Logging Company, which owns the adjacent land, has been ordered to construct a fire trail around the tract sold to the state, and the Sunset Logging Company has objected thereto because of the cost involved and because it does not appear to the company to be necessary. Furthermore, the company would not have been required to construct a fire trail around this property had it retained title to the same, inasmuch as the State Forester's regulations do not require such fire trails where private properties abut on public roads. The Attorney advised that the tract, in question contains 22 acres. He was instructed by the Commission to discuss the matter with the State Forester in an endeavor to secure modification of his requirements so as to avoid the expense. In the event that the State Forester still demands that the fire trail be constructed, then the Commission authorized an expenditure of state highway funds to pay one-half the cost thereof.

The Engineer reported that approximately 50 M-FEM untreated used timbers have been salvaged from the contract for the lining of the Arch Cape tunnel, which material, he said, is in random lengths, is in rather bad condition, and has no structural value for any state use. He requested authority to advertise it for sale at the next meeting of the Commission. The Commission approved the request.

MAY 3 1940

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Reconn. - - - - 202-2821 - Lobster Mt.-Five Rivers Junct. Section, Benton and Lincoln Co. Roads. 1st authorization - \$400.00.

Plans - - - - 103-2824 - Clackamas Grade Separation, Cascade Secondary Hwy., Clackamas County. 1st authorization - \$1,000.00.

Plans - - - - 3-2825 - Pudding River Bridge, Pacific Highway East, Clackamas County. 1st authorization - \$800.00.

Plans - - - - 103-2825 - Market Rd. #10-Kaylor Junct. Sect., Woodburn-Mt. Hood Sec.Hwy., Clackamas County. 1st authorization - \$750.00

Reconn. - - - - 6-2820 - Reedsport-Coos Bay Section, Oregon Coast Highway, Coos County. 2nd authorization - \$400.00
Total to date \$1,600.00

Gravel Pits - 107-2812 - Deschutes County Line-Ochoco Highway, O'Neil Sec.Hwy., Crook County. 1st authorization - \$400.00

Gravel Pits - 107-2811 - Crooked River Hwy.-Paulina Section, Crooked River Sec.Hwy., Crook Co. 1st authorization - \$500.00

Plans - - - - 8-2813 - Port Orford-Rocky Creek Section, Oregon Coast Hwy., Curry County. 2nd authorization - \$1,000.00
Total to date \$1,150.00

Plans - - - - 9-2829 - Bend-North Section, The Dalles-California Hwy., Deschutes County. 1st authorization - \$250.00

Plans - - - - 11-2810 - John Day River-Squally Hook Section, Columbia River Hwy., Gilliam County. 2nd authorization - \$390.00
Total to date \$827.50

Testing - - - - 17-2811 - Sexton Mountain Section, Pacific Highway, Josephine County. 2nd authorization - \$2,400.00
Total to date \$3,000.00

Plans - - - - 18-2844 - Chemult Section, The Dalles-California Highway, Klamath County 1st authorization - \$200.00

Mile Post - - - 18-2845 - Klamath Section, The Dalles-California, Klamath Falls-Malin, and Klamath Falls-Lakeview Highways, Klamath Co. 1st authorization - \$865.00

MAY 3 1940

Right of Way - 19-1919 - Cottonwood Creek-Lakeview Section, Klamath Falls-Lakeview Highway, Lake County.
2nd authorization - \$100.00
Total to date \$150.00

Plans - - - - 20-2840 - Blackly-Long Tom River Section, Siuslaw Highway, Lane County.
2nd authorization - \$964.50
Total to date \$1,500.00

Plans - - - - 22-2825 - Trout Creek-Toll Creek Section, Santiam Highway, Linn County.
1st authorization - \$1,800.00

Plans - - - - 22-2824 - Albany-Lebanon Section, Santiam Highway, Linn Co.
1st authorization - \$700.00

Plans - - - - 124-2831 - Mt. Angel Section, Hillsboro-Silverton Sec. Hwy., Marion County.
1st authorization - \$100.00

Plans - - - - 224-2832 - Salem-Roberts Corner Section, So. River County Rd., Marion County.
1st authorization - \$2,400.00

Plans - - - - 26-2844 - Steel Bridge-Barbur Blvd. Section, Front Street, Multnomah County.
1st authorization - \$3,500.00

Plans - - - - 28-2808 - Spanish Hollow Section, Columbia River Highway, Sherman County.
1st authorization - \$125.00

Park - - - - 30-2829 - Battle Mt. Park Section, Pendleton-John Day Highway, Umatilla County.
1st authorization - \$150.00

Plans - - - - 131-2820 - Meadowbrook Section, Starkey Secondary Highway, Union County.
1st authorization - \$300.00

Quarry - - - - 33-2819 - Shaniko-The Dalles-California Highway, Sherman Hwy., Wasco County.
5th authorization - \$500.00
Total to date \$4,500.00

Plans - - - - 33-2823 - Cow Canyon Section, The Dalles-California Highway, Wasco County.
1st authorization - \$600.00

Plans - - - - 36-2810 - Deer Creek-Bellevue Section, Salmon River Highway, Yamhill County.
3rd authorization - \$400.00
Total to date \$3,506.18

Non-passing
Lanes - - - - 64-5032 - Pacific, Columbia River, The Dalles-California, Oregon Coast, and Old Oregon Trail Highways.
1st authorization - \$4,000.00

The Engineer reported that Contracts Nos. 2205, 2212, 2214, 2253, 2261, 2272, and 2279, for the construction of state highway projects, have

MAY 3 1940

been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2205, with Morrison-Knudsen Company, for clearing, grading, and embankment construction on the East Unit, Troutdale-Corbett and Bridal Veil-Benson Park Sections of the Columbia River Highway, in Multnomah County. Completed March 30, 1940.

Contract No. 2212, with J. F. Johnston, for bridge construction over West Fork Dairy Creek and Nehalem River on the Wolf Creek Highway, in Washington County. Completed March 31, 1940.

Contract No. 2214, with McNutt Bros., for tunnel enlargement and timber lining in the Arch Cape Tunnel, on the Oregon Coast Highway, in Clatsop County. Completed March 30, 1940.

Contract No. 2253, with A. S. Wallace, for furnishing crushed rock in stock piles on the Nehalem River-Sunset Summit Section of the Wolf Creek Highway, in Clatsop and Washington Counties. Completed April 9, 1940.

Contract No. 2261, with M. L. O'Neil & Son, for 4.08 miles grading on the Cow Hollow Creek-Owyhee School Section of the Vale-Adrian County Road, in Malheur County. Completed April 13, 1940.

Contract No. 2272, with Walter J. Stutte, for construction of frame building and addition to existing maintenance building at Medford, Jackson County. Completed April 13, 1940.

Contract No. 2279, with Birkemeier & Saremäl, for the construction of the C.O.I.D. Canal on the Ochoco Highway, in Crook County. Completed March 27, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

MAY 3 1940

The Commission had under discussion the setting of a date for its next regular meeting in June and decided to hold such meeting in Portland on Thursday and Friday, June 13 and 14, at which meeting bids will be received for highway construction projects. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium on the third floor of the Public Service Building. The Commission also set Thursday, May 23, 1940, as the date for an interim meeting in Salem for the disposal of accumulated routine matters.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Southern Pacific Company providing for the use of certain jointly-owned poles of the Western Union Telegraph Company and the Southern Pacific Company between Salem and Geer, in Marion County, for use in connection with the Highway Department's remote control radio setup.

Agreement with the Southern Pacific Company covering construction of the Davies Undercrossing on the Wolf Creek Highway, in Washington County.

Agreement with the United States of America, Division of Grazing, providing for the construction by the Division of Grazing of certain stock fences on the right of way of the Central Oregon Highway, the Old Oregon Trail, and the John Day Highway.

Agreement with Agnes Teedor providing for the installation of a cipoletti weir in a highway culvert, which culvert is located at the point where the I.O.N. Highway crosses Crooked Creek, in the SE $\frac{1}{4}$, NE $\frac{1}{4}$ Sec. 24, T. 33 S., R 39 E., W. M., Malheur County.

Agreement with Clatsop County providing for the maintenance by the county of the Warrenton-Fort Stevens County Road after construction by the state as a federal aid secondary highway, being designated as Project No. FAS 66-A(1).

Agreement with Multnomah County providing for the maintenance by the county of the county road known as Skyline Boulevard after construction by the state as a federal aid secondary highway, being designated as Project No FAS 71-A(1).

Agreement with the City of Florence providing for the improvement of an extension of Lincoln Street in Florence as a connection between the old and new routes of the Oregon Coast Highway.

Approval of assignment given by Wayne A. Shaw to H. D. Bostwick, being the assignment of \$1,500.00 which will be payable to Mr. Shaw by the State Highway Commission in accordance with agreement dated March 22, 1940, relative to the construction of a relief map of the State of Oregon.

MAY 3 1940

Permit authorizing the Consolidated Freightways, Inc., to transport over certain state highways certain equipment unladen or with load, having a maximum height of 11 feet 6 inches (Does not include Pacific Highway, which is subject of a separate permit.)

Permit authorizing the B. E. Maling Inc., Hillsboro, to move over the Columbia River Highway between Astoria and The Dalles, and over the Tualatin Valley and the Wolf Creek Highways between Hillsboro and Portland, certain peaviner equipment having an overall height of 13 feet 8 inches.

Easement agreement with G. B. Matthews et al providing for a detour road around Crater Lake Highway construction work, in Jackson County. Right of Way File No. 7229.

Easement agreement with C. C. Seeley and wife, providing for the construction of a fire trail across the Seeley property at Short Sand Beach State Park, in Clatsop County.

Easement agreement with George E. Huntley and wife, providing for right of way for the construction of a water system across the Huntley property for use in Short Sand Beach State Park.

Application to the Department of the Interior for a patent to certain government-owned lands situate in Douglas County.

Bargain and Sale Deed, conveying unto Helen L. McConnell, for the sum of \$2,250.00, 0.25 acre of land situate adjacent to the Grants Pass-Green Creek Section of the Pacific Highway, in Government Lot 7, Section 19, T. 36 S., R. 5 W., W.M., Josephine County. Right of Way File No. 7203.

Bargain and Sale Deed conveying unto O. A. Steen and Augusta Steen 2 parcels of state-owned property situate adjacent to the right of way of the Pacific Highway, in Lot 1, Block 31, Hackleman's Second Addition to Albany, containing 1342.4 and 2916.8 sq. ft., respectively. Right of Way Transaction No. 4974.

Quit Claim Deed conveying unto the Shevlin-Hixon Company 2.12 acres of land situate adjacent to the Century Drive Secondary Highway in the S $\frac{1}{2}$, SW $\frac{1}{4}$, Sec. 25, T. 18 S., R. 10 E., W.M., Deschutes County. Right of Way Transaction No. 7411.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:00 p.m.

MAY 3 1940

Salem, Oregon, May 23, 1940

The State Highway Commission met in special session at 10:30 a. m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Herman Oliver was excused from attending this meeting.

Commissioner Clough brought up for discussion matters pertaining to the paving contract on the Pacific Highway south of Grants Pass. He advised that he has received numerous complaints from businessmen in the district to the effect that if the Highway Department adheres to its present plans to construct this pavement, using slow-setting cement, their businesses will be adversely affected in that they will be deprived of their regular business by reason of the fact that the highway will be closed for such a long period during the time that the concrete is curing. Particularly does this affect the business establishments along a short section about 500 feet long, and the suggestion has been made that quick-setting cement be substituted for the ordinary cement at this particular location. After discussion the Commission authorized the Engineer to make such substitution of materials as may be consistent with current practice.

The Commission discussed the application of S. U. Johnson for a permit to transport logs directly across the Columbia River Highway at a point about 300 feet east of Mile Post 62, just west of Hood River. It appears that Mr. Johnson has about 500 M-FBM of timber to move and that there is no other way to get the logs to the Columbia River. After discussion the Commission authorized the granting of the permit to Mr. Johnson provided he will maintain flagmen on the highway at the point of crossing during the time that his operations are under way.

In this connection the Commission also considered the request of the Murphy & Nelson Logging Company of Portland to transport logs over the Columbia River Highway from Mile Post 63.9 to Mile Post 62.4, west of Hood River. The Engineer recommended approval of this request if a test run of a load of logs shows that they can be moved over this section of highway without any part of the load or hauling equipment extending across the center line of the highway at any point; and provided, further, that flagmen be maintained at the point where the loads enter the highway when operations are under way and that the back end of the logs do not project over the center line stripe at the point where the logs leave the highway. The Commission approved the recommendation unanimously. The Engineer was instructed to investigate the conditions at the point where it is proposed that the loads leave the highway and to do whatever is necessary to ease off the curve of the approach road so as to insure that the loads, when leaving the highway, will not project across the center-line stripe.

MAY 23 1940

The Commission had under discussion matters pertaining to the proposed Front Ave. project, Portland. It was pointed out that the people of the city of Portland at the primary election on Friday, May 17, approved the bond issue to secure funds to purchase right of way for this improvement and in view thereof the Engineer and the Attorney requested instructions relative to the contracting of the work and acquisition of the right of way. It was also pointed out that, in order to make this project eligible for federal funds, the route would have to be placed on the federal aid system and that it would be advisable to designate it as the state highway route. The Commission tentatively approved the placing of the Front Avenue route on both the federal aid and state highway systems but deferred final action thereon until its regular meeting on June 13 when all Commissioners will be present. The Engineer was instructed in the meantime to send full information in regard to the project to W. H. Lynch, District Engineer, Public Roads Administration, and to advise him of the Commission's intention in this matter.

The Attorney reported a number of inquiries as to when the Commission would need the extra-width right of way, particularly inquiries from the owners of buildings that are occupied by tenants who will be required to vacate. The Engineer requested authority to negotiate with the owners of the Steel Bridge, over which traffic is to be routed from the west side of the Willamette River to the east side. The entire matter was discussed by the Commission at considerable length and the feeling was expressed that the Commission should not make a final commitment to this project until all matters pertaining to the right of way and the use of the Steel Bridge have been satisfactorily disposed of. The Commission referred the entire matter to Chairman Cabell to work out the details in connection therewith, with the understanding that he would report his findings to the Commission at the meeting on June 13 for final action.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and brought up for discussion the matter of programming the fiscal year 1941 federal lands moneys which, he said, amount to approximately \$129,000 although only about \$65,000 is immediately available for contracting. The Commission decided tentatively to allocate these funds to the Warm Springs Highway; however, deferred a definite decision in that regard until the next meeting when Commissioner Oliver will be present. The Engineer was instructed to provide in the meantime a list of projects that are eligible for the full amount of these funds, it being the Commission's intention to select from such list for contracting in the near future only a sufficient number of projects to take up the funds that Mr. Lynch advised are immediately available.

The Engineer discussed with the Commission the matter of enforcing the Commission's orders with respect to the construction of channelizing islands on the highway right of way in front of service stations. He advised that he is conscientiously endeavoring to comply with the Commission's rulings in this regard but has encountered considerable difficulty in that the service station owners, for the most part, object to the islands and destroy them about as fast as they are installed. He declared that the trouble in handling these cases is entirely out of proportion to the time spent by Highway Department employees in connection therewith and he inquired whether or not the

MAY 23 1940

Commission considered it advisable to try out a test case in court. The Commission's decision in this matter was deferred pending an opinion from the Attorney.

The Engineer reported that certain interests contemplate the truck-hauling of logs over a section of the Siletz Secondary Highway, in Lincoln County that is very definitely only a one-way road, particularly the section between Mile Post 6 and Mile Post 9.6, south of Kernville. Portions of this road, he said, are very narrow and in very poor condition for such heavy hauling. He questioned the advisability of permitting any log-hauling whatsoever on this section. After discussion the Commission instructed the Engineer to discuss the matter with the logging operators and ascertain whether or not it would be possible to handle their logs in some other manner, such as dumping them into the Siletz River opposite the section of the highway where logging operations are not prohibited. He was also instructed to investigate and ascertain what it would cost to widen this section and to improve it sufficiently to withstand logging traffic.

The Commission discussed the complaint from Mrs. Wm. Lindblad, Marshfield, who alleges that the traffic island installed on the Oregon Coast Highway in front of her place of business in the Bunker Hill District has caused her considerable loss of business. Mrs. Lindblad asked for the removal of this traffic island so as to give traffic more easy ingress to her premises and to provide a larger parking space in front thereof. The Engineer advised that Mr. and Mrs. Lindblad own a beer parlor and dance pavilion at this point and that the complaint apparently is against the establishment of a one-way street in front of this place, which is located at the point of intersection of the Oregon Coast Highway and the Coos River Secondary Highway. He further advised that both highways carry considerable traffic and it is necessary, in order to minimize the possibilities of accidents occurring, to arrange a division of traffic, including one-way travel sections, which could only be accomplished by the installation of the traffic island in front of the Lindblad establishment. He further advised that Mrs. Lindblad's complaint has been thoroughly investigated by Division Engineer K. D. Lytle and Traffic Engineer John Beakey, both of whom are of the opinion that traffic is now being adequately handled at this intersection and who feel quite strongly that any revision in the highway as now constructed will destroy the effectiveness of the intersection and will increase the traffic hazard. He recommended that the request for the removal of the island be denied. The Commission approved the recommendation.

The Engineer reported briefly on matters pertaining to the acquisition of additional right of way needed for the improvement of the Columbia River Highway past the Indian village at Celilo, in Wasco County. He said that he has received information from the U. S. Indian Service to the effect that it cannot take any action to assist the State Highway Department in securing this additional right of way unless and until all of the Indians concerned are in agreement as to the plans. He suggested, in view thereof, that it might be possible to secure the consent of the Union Pacific Railroad Company to further encroachment upon the railroad property, and requested authority to take the matter up with the railroad company. He also requested

authority to conduct a topographic survey of the entire area on 1-foot or 2-foot contours so as to have this information available and to make it possible for him to discuss the matter more intelligently with the representatives of the Indians and the Indian Service when negotiations are resumed. The Commission approved the Engineer's request unanimously.

The Engineer presented a report on investigations of the county road between Elsie and Jewell, in Clatsop County, which road the Clatsop County Court wishes designated as a state secondary highway, and his investigations of the proposed road connecting the Wolf Creek Highway and the Nehalem Secondary Highway between Elsie and Fish Hawk Falls, being a suggested alternate connection between these two state highways. The Engineer compared the solvency and benefit quotients for each route, as computed from the economic survey, and presented figures on the cost to construct each of the alternate routes. He recommended the adoption of the Elsie-Fish Hawk Falls Road as a state highway when the Commission is ready to make such designation, and the maintenance of the present road between Elsie and Jewell by the state as a state highway detour until such time.

In this connection the Engineer also reported on the encroachments of logging facilities on the present road between Elsie and Jewell, which report indicates that there is nothing definite as to how long logging operations in this vicinity will be carried on and when the facilities will be removed from the highway. The Commission deferred action on this matter until its next regular meeting in June.

The Engineer reported briefly the results of traffic counts to determine the volume of traffic that is using the Tualatin Valley Highway between Portland and Forest Grove. He said that since the opening of the Wolf Creek Highway for public use there has been a large increase in the volume of traffic over this highway and there is every reason to believe that there will be a further increase when the Wilson River Highway is opened to general public travel. He gave figures to show the volume of traffic in 1939 as compared with the count taken in 1936, which reveal that there has been an increase in automobile traffic of 25 per cent between Forest Grove and Cornelius and approximately 10 per cent at the Multnomah-Washington County line. In this connection the Engineer brought up for discussion the Commission's application to the Public Utilities Commissioner for authority to maintain a grade crossing of the Wilson River Highway and the Consolidated Timber Company's railroad at Glenwood. It appears that the Public Utilities Commissioner has not as yet handed down his order with respect to such matter and there is a question whether or not he will permit the highway to be constructed across the railroad at grade, it being the contention of the engineers in his office that the highway and the railroad should be separated, particularly in view of the fact that logging trains are being operated on this railroad without air, under authority of permit from the Interstate Commerce Commission, making it difficult for the trains to stop when once in motion. Suggestion was made that the Public Utilities Commissioner might approve a crossing at grade if all highway traffic were required to stop before crossing the railroad tracks and if the State Highway Commission would install appropriate railroad crossing stop-signs. This matter was referred by the Commission to Chairman

MAY 23 1940

Cabell to discuss with the Public Utilities Commissioner. He was authorized to inform the Public Utilities Commissioner, if necessary, that the Commission will take the matter to court if he (the Public Utilities Commissioner) insists upon construction of a grade separation structure at this point.

The Commission adjourned at 1:00 p.m. and reconvened at 1:30 p. m. in the same room, with the same persons present and participating.

The Assistant Attorney reported the status of the 1940 right of way budget. He pointed out that the Commission budgeted \$600,000.00 for this purpose and that up to the present time there has been obligated to right of way purchases the sum of \$275,000.00. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

(Correction Report)				

The Attorney requested authority to condemn the following properties in Bandon that are needed in connection with the improvement of the Oregon Coast Highway through that town, if satisfactory settlements with the owners cannot be reached otherwise:

MAY 23 1940

Right of Way File No.	Owner	Recommended Offer	Owner's Demand
7872	G. Chappel and R. Young	\$246.00	---
5342	G. L. Stearns	100.00	---
5341	Ralph York	421.80	---
7855	Edmund Gallier	7.50	\$947.00

The Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Bandon Section of the Oregon Coast Highway

real property owned by or in possession of the following parties and/or persons, to wit:

R 7872-G. Chappel and R. Young
 R 5342-G. L. Stearns
 R 5341-Ralph York
 R 7855-Edmund Gallier

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper

MAY 23 1940

and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney reported on the controversy with the Erickson Dairy Products Company relative to a right of way settlement at St. Helens. It appears that if the standard-width right of way is acquired in front of the Erickson Dairy Products Company it will require the cutting off of a portion of the company's concrete building and will also involve the re-establishment of the company's equipment, which is a costly undertaking and, in order to avoid this expense, the Attorney has endeavored to arrange a settlement which would leave the building and the equipment in its present location, although it does necessitate the construction of a sidewalk and a parking area in front of the building. It also appears that Mr. Erickson at one time agreed to certain arrangements with respect to the sidewalk and parking space but has since reconsidered and is now demanding the sum of \$5,000.00 damages. A decision in the matter was deferred by the Commission pending personal inspection of the premises by Chairman Cabell and the Engineer.

MAY 23 1940

The Commission considered and denied the claim of J. W. Campbell Estate for damages on account of the change in grade of Water Street, in Oregon City, which is being reconstructed by the state as a state highway route. The Attorney advised that settlement in this matter was previously agreed upon by mutual consent but the Campbell Estate is now demanding an additional payment of \$250.00 and that he could not recommend approval of the same because, in his estimation, the estate property has not been damaged.

The Commission also discussed and denied the claim of the St. Paul's Episcopal Church of Oregon City for a connection to the highway viaduct on Water Street in Oregon City from the church property, the Commission considering that it is not obligated to build this connection at state expense. However, the Commission interposed no objections to the church constructing its own connection to the viaduct provided it will assume the whole cost thereof and will construct the same in accordance with state highway department standards and under the general supervision of the State Highway Engineer.

The claim of J. N. Whitman, Dundee, for additional compensation by reason of change in grade of the Pacific Highway West in front of his premises had the attention of the Commission. The Assistant Attorney advised that in connection with this highway improvement it was necessary to acquire some land from Mr. Whitman and that Mr. Whitman was assured at the time that the settlement was agreed upon that there would be no appreciable change in the existing grade line of the county road. However, it is evident that the plans were changed and as a result the highway was lowered 5 feet and the county road nearby was lowered 12 feet, in view of which Mr. Whitman is demanding additional payment for damages, amounting to \$150.00. He recommended payment of such sum in view of the fact that there was a mutual misunderstanding in the matter. The Commissioners expressed themselves as being reluctant to reopen any case that has once been settled; however, in this particular instance decided to pay Mr. Whitman \$150.00 as recommended by the Attorney in view of the fact that there apparently was a bona fide misunderstanding on the part of both Mr. Whitman and the Right of Way agent.

The Attorney presented a claim from the City of Toledo for the payment of a paving assessment in front of a small parcel of state-owned property in that town. He recalled that the Commission recently adopted a general policy authorizing the payment of such paving assessments in front of highway department property, provided the city concerned pays such assessments in front of city-owned property, and, in this particular instance, previously approved the payment of the paving assessment in Toledo. However, subsequent investigation reveals that the tract is a small, three-cornered area and represents only a very small fraction of the city lot of which it is a part, and, regardless of this fact, the city has charged the state for the paving in front of the entire lot. It was his thought that the charge is unfair and he suggested that the Commission pay the city on the square foot basis, limiting its payment to the percentage that the area of the state-owned tract bears to the area of the entire lot. The Commission approved the suggestion and so ordered.

Reconsideration was given by the Commission to the request of J. O.

MAY 23 1940

Johnson, Tigard, that the Commission acquire right of way for a proposed county road connection into Tigard, paralleling the Southern Pacific Railroad tracks, so as to provide a more direct route into this town for the people served by the county road than now obtains as a result of the state highway improvement at this place. The Assistant Attorney advised that, as previously instructed by the Commission, he discussed this matter with the County Judge of Washington County and ascertained that Mr. Johnson has now agreed to furnish the right of way, which is estimated to cost \$600.00, but wants the state to build the road. After discussion the Commission refused to assume any responsibility in connection with building the road but restated its willingness to pay one-third of the cost of the right of way needed for the same.

The Attorney brought up for discussion matters pertaining to the removal of buildings from the right of way of the Oregon Coast Highway on Taylor Avenue, in Astoria. He advised that the highway improvement that is now under contract at this place extends a short distance beyond the point where the right of way has been cleared of buildings and includes the next block, upon which there is a building that will have to be remodeled if the highway plans are strictly adhered to; also, that northerly from the end of the present contract there are other building encroachments that will have to be eliminated before another contract can be awarded. He estimated the cost to remodel the building involved in the present contract at \$600.00 and to clear all of the encroachments at \$8,150.00. He pointed out that unless the building is remodeled or moved back to conform with the building line in the adjacent block it would introduce a jog in the curb line that would be conducive of traffic accidents. He raised the question who would pay the cost of remodeling the building and advised that it is in the same category as the buildings in the adjacent block, which were remodeled or moved back under mutual agreement with the City of Astoria and the property owners. The Commissioners expressed themselves as not being averse to the purchasing of new right of way when necessary, in conformance with the established policy, but questioned the advisability of paying out state money for the moving of buildings that encroach upon existing right of way, because it would involve the establishment of a very undesirable precedent. The Engineer suggested that the condition could be corrected by gradually tapering off the pavement width from the wide section to the narrow section by introducing easy curves in the curb line, which would eliminate the abrupt jog and the necessity for additional expense in remodeling buildings at the present time. The Commission approved the suggestion and instructed the Engineer to revise his plans accordingly. The Attorney was instructed by the Commission to direct a communication to the Astoria City Council and to point out clearly therein that the State Highway Commission, by its action in contracting the work now under way on Taylor Avenue does not intend that such work shall commit the Commission in any way to future improvements on this street.

The Commission discussed a complaint from the Consolidated Timber Company concerning the burning of one of its railroad trestles adjacent to the Wolf Creek Highway, in Clatsop County. The Company alleges that the trestle was damaged by fire started by W.P.A. forces in connection with the clearing of state land and the burning of slashings thereon, and demands payment from the state for the cost of the repairs. The Attorney advised that he knows of

MAY 25 1940

no law that would permit the State Highway Commission to pay expense of this kind. The Engineer advised that there is a question whether or not the W.P.A. crew was responsible for the fire inasmuch as the fire occurred about a quarter of a mile from the place where burning operations were being carried on. After considerable discussion the Commission decided not to pay this claim but to suggest to the Consolidated Timber Company that it file its claim with the W.P.A. officials. If it develops that W.P.A. funds cannot be expended for such purpose, then it is to be suggested to the company that it present its claim to the legislature. The Engineer was instructed by the Commission to permit no burning operations whatsoever in connection with highway work at any time, except under supervision of the Fire Warden, and to do everything possible to protect private interests whenever burning operations are being carried on.

The Engineer discussed with the Commission the letter from Mr. E. J. Griffith, State Administrator for the Works Progress Administration, relative to certain work that was prosecuted under the Wolf Creek Highway W.P.A. project, particularly certain labor performed in connection with the improvement of 7 parcels of private property near the town of Manning. According to Mr. Griffith, W.P.A. labor was employed in the constructing of driveways to these private properties, which work the state was obligated to do as a right of way consideration, hence could not be paid with W.P.A. funds. Further, that the total expenditures in connection with such undertaking amounted to \$6,670.25, for which sum the Government is now asking reimbursement from the state. The Commission instructed the Engineer to investigate this claim thoroughly and report his findings at the next meeting. Also, to secure from the Attorney an opinion as to the Commission's legal authority to pay the claim.

Commissioner Clough reported the results of his investigation of the Mildred K. Colvin property in Curry County, which property Mrs. Colvin desires to sell to the state for park purposes. He said that he inspected this property in person and found it to be a beautiful tract well worth while as an addition to the state parks system. Of the 327 acres in the area, he said, approximately 50 acres is semi-open land, the balance containing a growth of scrub timber. A creek flows through the property and it would not be difficult to construct a roadway through the property from the highway to the beach, on which the property fronts. He gave as his thought that the tract would be particularly appealing to people who are looking for a restful recreational area and advised that, from his personal standpoint, the tract is more desirable for state park purposes than the Cape Sebastian State Park nearby, which he also inspected. He also gave as his thought that, based on prices paid by the state for other property in this vicinity, the state would not be criticized for paying as much as \$25.00 per acre for this land and he recommended acquisition of the property at such figure. The State Parks Superintendent, Mr. S. H. Boardman, was present and concurred in the remarks of Commissioner Clough who, he said, had not overestimated the value of the property from the state parks standpoint. He pointed out that the property has a 3/4-mile frontage on the Pacific Ocean. After discussion the Commission authorized the purchase of the area at the rate of \$25.00 per acre, subject to approval by Commissioner Oliver. The Attorney was instructed to ascertain

Commissioner Oliver's attitude in regard thereto. (Note: Commissioner Oliver's approval was secured by the Attorney on the following day.)

Consideration was given by the Commission to the offer of Oregon State College relative to the use of the college radio station, KOAC, for one hour daily during the summer months, to disseminate information concerning the State Highway Department. The matter was discussed at some length, during which it was pointed out that the Highway Department's expense in connection therewith would be \$1,800.00 for the 3-month period ending September 10, 1940; also, that the State College would hire all necessary personnel, including radio broadcaster, script writers, station attendants, et cetera, and that the script for the broadcasts shall be approved by the Highway Department before it is transmitted on the air. The Commission decided unanimously to accept the offer as a trial proposition during the present season, it being particularly understood, however, that the broadcasts shall in no way be connected with the Travel and Information Department for the dissemination of tourist and travel information.

The Commission had under discussion several resolutions from the County Court of Clatsop County pertaining to the use of certain portions of highway rights of way that have been abandoned by the state because of reconstruction of these highways on new alignment, such resolutions being as follows:

1. Resolution whereby Clatsop County retains for county road purposes portion of the Skipanon-West Lake Section of the Oregon Coast Highway between Mile Post 13 and Mile Post 15, particularly between Engineer's Stations 256+00 and 280+65.
2. Resolution whereby Clatsop County declares that certain parcels of land formerly within the right of way of the North Fork Nehalem River Section of the Oregon Coast Highway are of no use to the county, hence are being left to revert to abutting property owners.
3. Resolution whereby Clatsop County retains for county road purposes a portion of the Beneke Creek Section of the Nehalem Secondary Highway
4. Resolution whereby Clatsop County retains for county road purposes a portion of the Astoria-Svensen Section of the Columbia River Highway.

The Commission approved the resolutions and ordered them filed.

The Attorney reported briefly on matters pertaining to the Nyssa grade separation project, particularly the status of the acquisition of certain privately-owned lands by the Union Pacific Railroad Company and the Amalgamated Sugar Company, which is a matter contingent upon the contracting of the project. He said that, as the matter now stands, it does not appear that either the railroad company or the sugar company is willing to acquire

MAY 23 1940

this property, which will cost about \$9,000.00, so he is not in a position to clear the grade separation project from the right of way standpoint at this time. In view of this report the Commission decided not to advertise this project for bids at the June meeting of the Commission as was originally intended.

The Attorney reported receipt of a letter from the General Casualty Company of America offering to pay the Commission the sum of \$1,000.00 as full and complete payment of its obligation under the bid bond furnished by Saxton, Looney & Risley in connection with its proposal submitted on December 8, 1939, for the construction of the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, the contract having been awarded by the Commission to this contractor, who defaulted. The Attorney recommended rejection of this offer in view of the fact that the amount thereof is considerably less than the amount of the bid bond and for the further reason that the low bid received by the Commission upon the second advertising of this project was considerably in excess of the amount of the bid submitted by Saxton, Looney & Risley. The Commission approved the recommendation and instructed the Attorney to make demand on the bonding company for the payment of the full amount of the bid bond.

The matter of insurance to be required of log haulers in connection with the securing of permits for transporting over state highways loads longer than the length-limit specified by statute had the attention of the Commission. The Attorney advised that, as previously instructed by the Commission, he discussed this matter with Mr. Ormond R. Bean, Public Utilities Commissioner, who has indicated a willingness to increase the amounts of insurance required by him to such amount as the State Highway Commission may desire, and it is Mr. Bean's thought that public liability insurance in the amount of \$10,000/- \$20,000 and property damage insurance in the amount of \$5,000 should be adequate. In the discussion of this matter it was pointed out that the over-length log permits issued by the State Highway Department represent only a small percentage of the total number of permits issued by the Public Utilities Commissioner for the transportation of logs; and, if the insurance requirements are changed from \$50,000/\$100,000 public liability and \$10,000 property damage, to \$10,000/\$20,000 public liability and \$5,000 property damage for all logging operators, it would simply mean the penalizing of the bulk of the log haulers for the benefit of the few, because the Public Utilities Commissioner makes no distinction between the long-log hauler and the short-log hauler. In view of the circumstances, the Commission decided to make no change in its present insurance requirements at this time.

The Engineer reported a request from Mrs. Jessie M. Honeyman that the State Highway Department furnish to the several roadside improvement councils throughout the state, free of cost, copies of the State Highway Department's county maps. He said that Mrs. Honeyman is of the belief that these maps will be very beneficial to the various councils throughout the state and it would help them very much in their endeavors; further, that it would not be necessary to send a complete set of the maps to each of the councils but it would suffice to send to each only the maps of the counties in their respective districts. The cost to the state, he said, would be nominal in view of the fact that the map folios cost only \$5.00 each. He recommended approval

MAY 23 1940

of the request. The Commission approved the recommendation with the understanding that it was not to be taken as a precedent for the furnishing of such maps free of cost to others.

The Engineer presented a letter from Reverend A. L. Williams, Nelscott, requesting the privilege of using the ocean beach area in the vicinity of Nelscott as a landing field during the progress of an air circus which they propose to conduct some time during the month of July. The Commission considered that the use of the ocean beach area for such purpose would create a serious hazard to pedestrians, and particularly to children who congregate on the beach at that time of the year, and accordingly denied the request.

The Engineer reported a request from Mr. O. C. Yocom, Willamina, Oregon, for a letter advising him of the Highway Commission's plans with respect to the location of the Salmon River Highway (McMinnville-Tillamook Highway) through the town of Willamina; also, with respect to the reconstruction of the section of this highway between Sheridan and McMinnville, particularly near Bellevue. The Commission disapproved the writing of such letter; however, instructed the Engineer to invite Mr. Yocom and his group to Salem for a discussion of the entire matter so as to avoid any written statements that might commit the Commission in the future.

The Engineer also reported the request from the City of Junction City for a letter outlining the trend of traffic on highways through small towns, particularly with reference to the set-back line for buildings. The Commission considered it unwise to write such letter and instructed the Engineer to express appropriate regrets.

The Engineer submitted a report on the cost to construct a roadway extending from the Oregon Coast Highway to the beach at a place known as Cove Beach, near Arch Cape, in Clatsop County. He estimated the cost of such roadway at \$3,000.00 compared to \$2,000.00, which is the value of the 40-acre tract of land that Clatsop County has offered to deed to the state for state park purposes if the state will construct the roadway. The question arose whether or not it would be possible to construct a roadway to the beach at some other point at less expense. The Engineer stated that a roadway for this beach at any other point on the highway would be much more costly because of the steepness of the terrain. This statement was confirmed by the Assistant Attorney who advised that there is now pending before the Commission a claim for damages on account of the sliding of the highway embankment in this vicinity. The Assistant Attorney further advised that, in his investigation of the damage claim, he ascertained that the right of way for the Oregon Coast Highway along this section was donated by the property owners and that in consideration thereof Clatsop County committed itself to construct a roadway from the highway to the beach, although there is no record whatsoever of such commitment. This matter was discussed at considerable length and the following decision reached: That the State Highway Commission will not recognize any obligation to build a roadway from the highway to the beach at this point but will consider the payment of damages that have occurred to private property by reason of the sliding of the highway embankment. The acquisition of the 40-acre tract referred to shall be a separate and

MAY 25 1940

distinct matter and the tract shall be purchased outright from the county as a separate transaction if it is needed for state park purposes and can be obtained at reasonable cost.

The Attorney presented a form of agreement with Oregon's 1940 San Francisco Fair Commission covering the matter of the State Highway Department's cooperation in the maintenance of an exhibit at this Fair. He read aloud the provisions of this agreement, which the Commission approved. The agreement was signed later in the session.

The Commission discussed the proposed improvement of the Flagstaff-Lower Powder Section of the Baker-Homestead Highway. In this connection the Secretary presented a petition from the residents of Baker County opposing any expenditure of funds for the improvement of the existing road between these points and urging construction on the newly-adopted permanent route at the earliest possible time. The Commission decided not to oil the present road this year, for which the sum of \$10,000.00 was previously budgeted, but on the other hand to hold such sum for expenditure with an additional amount of \$110,000.00 of fiscal year 1941 federal aid funds to finance the construction of a section on the permanent route, bids for which are to be taken by the Commission in the fall of 1940. The Engineer was instructed to convey such information to Commissioner Oliver and to advise him of the reasons for the action.

Commissioner Clough reported on investigations made by himself of the Elizabeth C. Coleman property adjacent to the Oregon Coast Highway at the north end of the Coos Bay Bridge. He said that the investigation reveals that there is some caving-in of the ground under a corner of Mrs. Coleman's store, as she reported to the Commission at the previous meeting; however, in his estimation, the damage is not the result of the run-off of water from the highway but is caused by water from the downspout on the building itself, so is not the state's concern. He further advised that he investigated the trees complained of by Mrs. Coleman and ascertained that there are several of these near the north end of Mrs. Coleman's property which contain numerous dead limbs that should be removed. He recommended denial of Mrs. Coleman's request that she be permitted to re-establish her building on the old highway right of way, and that any improvement that the Highway Commission sees fit to make at this place be limited to the trimming of the trees. The Commission approved the recommendation.

In this connection the question arose whether or not it would be advisable to acquire Mrs. Coleman's holdings in order to protect the bridge-head, the property being situate so near the north end of the Coos Bay Bridge. The Attorney was instructed to appraise the property and report the results thereof to the Commission, which will then decide whether or not to acquire the same.

The Secretary presented two letters from Port Orford Chamber of Commerce, in which the Commission was requested to direct a letter to the Board of Engineers for Rivers and Harbors, Washington, D. C., giving such Board information as may be helpful in securing an appropriation of federal funds to

MAY 23 1940

construct a breakwater in the Port Orford harbor and otherwise improve the ship channel along the existing wharf at this place. The Engineer explained that the Board of Engineers for Rivers and Harbors previously considered this improvement and decided that it was not advisable to undertake it at federal expense; however, a rehearing in the matter has been ordered and the Port Orford Chamber of Commerce desires a letter from the State Highway Commission for use in connection with such rehearing. The Commission considered that it is not particularly concerned in this matter and thereupon denied the request.

Commissioner Clough brought up for discussion a complaint filed by J. G. Harem, a World War Veteran of Roseburg. It appears that Mr. Harem has recently constructed a residence building adjacent to the Pacific Highway and, in order to obtain access to the highway from his property, was obliged to build an approach road across the highway ditch. However, the culvert pipe that was installed was of wooden construction and not in conformance with the Highway Commission's requirements, notwithstanding that he was informed of these requirements several times. Further, that Mr. Harem was instructed by the local engineer to remove the wooden culvert and was given 60 days within which to do the work, but he failed to comply with instructions, so the culvert was removed by state forces and Mr. Harem now wants the state to replace the culvert and to fill in the highway ditch the full length of his frontage on the highway. After discussion the Commission referred this matter to the Attorney and the Engineer for investigation and to ascertain whether or not there is anything unusual about this installation to which the Commission's standard policy with respect to approach-road culverts will not apply.

Commissioner Clough reported receipt of a request from a Mr. Edwards of Roseburg to purchase a parcel of state-owned land adjacent to the Pacific Highway at the northern entrance to Roseburg. In the discussion it was pointed out that this tract was originally purchased by the county and deeded to the state, so the question arose whether the state should sell the property or deed it back to the county and let the county receive the benefits of the sale. The Commission referred the matter to the Attorney for investigation and report.

Reconsideration was given by the Commission to the application of the Oregon Packing Corporation, Astoria, for a blanket permit to move pea-viners, 11 feet wide and 13 feet 8 inches in height, overall measurements, along the state highways in the vicinity of Astoria. The Commission decided not to grant such blanket permit in view of the fact that the indiscriminate movement of such wide vehicles over the public roads of this state would create too great a hazard to other traffic. However, the Commission authorized the granting of permits for individual movements of such equipment during the present pea-harvest season. The Secretary was instructed to so inform the Corporation and to advise them that they must rebuild their equipment so that it will not be wider than 8 feet, because the movement of same under individual permits will not be allowed hereafter.

The Engineer requested authority to increase the state parks budget for 1940 in the approximate amount of \$8,175.00 so as to enable certain oiling work to be done in Washink State Park, Ecola State Park, and Silver Creek

MAY 23 1940

Falls State Park, such work to consist of oiling of roadways and parking areas for automobiles. He estimated the cost of such work in Woahink State Park at \$1,200.00; at Ecola State Park at \$2,400.00; and in Silver Creek Falls State Park at \$4,575.00. The Commission considered these worthy projects and thereupon approved them and the Engineer's request for an increase in the parks budget in like amounts.

The Attorney reported a request from Mr. Roman Kintz, who occupies, as a tenant under the State Highway Commission, a portion of the real property acquired by the state for Silver Creek Falls State Park, for permission to use a power pole now located on state property, being also located on the property that he has under lease, to suspend power wires to serve his place of business. He advised that such use of the power pole will not interfere with nor impair the service that the power company renders to the state in connection with the state park; further, that Mr. Kintz's lease expires in 1941, so has only a short time to run. He recommended approval of the request. Mr. S. H. Boardman, State Parks Superintendent, was present and concurred in the recommendation. The Commission approved the recommendation unanimously and authorized the Secretary to issue the permit to Mr. Kintz.

The Engineer requested authority to purchase the following equipment:

- 3 cars of light Buick type for use of division engineers, 3 old cars to be traded in as part purchase price - estimated total cash outlay \$2,700.00
- 5 pickup trucks - estimated total cost \$3,000.00
- 10 light-type trucks - estimated total cost \$8,500.00
- 1 station wagon for use of Bridge Department - estimated cost \$750.00

The Commission approved the request unanimously and ordered that the purchases be made through the State Purchasing Department in accordance with the usual practice.

The Engineer reported that, in conformance with authority previously granted him by the Commission, he has awarded contracts as follows, the conditions of the awards having been satisfied:

Contract awarded to W. D. Miller Construction Company for construction of the Lost River Section of the Klamath Falls-Malin Highway, in Klamath County. Bids taken January 11, 1940; contract awarded May 10, 1940.

Contract awarded to W. D. Miller Construction Company for construction of the Lost River Bridge on the Klamath Falls-Malin Highway, in Klamath County. Bids taken January 11, 1940; contract awarded May 10, 1940.

MAY 23 1940

Contract awarded to General Construction Company for construction of dredge embankment on Upper Columbia River Highway between Troutdale and Dodson. Bids taken by U. S. Army Engineers on April 5, 1940; contract awarded May 13, 1940.

The Commission approved these awards as reported.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Markham & Callow, being an easement authorizing construction of a fire trail across property owned by them on Neah-kahnie Mountain, in Tillamook County, being in connection with Short Sand Beach State Park.

Agreement with Syneva and E. A. Lindberg providing for lease of maintenance headquarters site at Port Orford,-real property transaction No. 7956.

Agreement with the City of Pendleton covering the moving of a garage building, sloping banks, rebuilding steps, sidewalks, et cetera, on state property adjoining state highway right of way in Pendleton,-real property transaction No. 2454.

Agreement with the Southern Pacific Company authorizing P.W.A. equipment operations across railroad property on the Wolf Creek Highway at Strassel.

Agreement with Oscar Parrein providing for the lease of a maintenance headquarters site at Silver Lake.

Agreement with A. T. Dolan and wife providing for lease of a maintenance site at Seaside,-real property transaction No. 7929.

Agreement with S. G. Reed and wife providing for construction of a fire trail across the Reed property adjacent to Short Sand Beach State Park.

Agreement with the 1940 San Francisco Fair Commission of Oregon pertaining to the maintenance of an Oregon exhibit at the 1940 San Francisco Fair.

Bargain and Sale Deed conveying unto Samuel Wolf and wife 113 sq. ft. of land situate in Lot 4, Block 4, Oregon City,-right of way transaction No. 5304.

Bargain and Sale Deed conveying unto the Medford Corporation 46 sq. ft. of land situate in Lot 13, Block 8, Berryvale Addition to Medford,-right of way transaction No. 290.

Bargain and Sale Deed conveying unto Emil A. Johnson 701 sq.ft.

MAY 23 1940

of land situate in Lot 3, Block 3, Kingston, Town of Tigard,-
right of way transaction No. 6930.

Quitclaim Deed conveying unto Louise K. Lamb 1,650 sq.ft. of
land situate in Lot 1, Block 8, Nye and Thompson's Addition to New-
port, right of way transaction No. 4437.

There being no further business to come before the Commission at
this time, the meeting was adjourned at 6:00 p. m.

W. H. Baldock
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
Herman Oliver
Commissioner

Portland, Oregon, June 13, 1940

The State Highway Commission met in regular session at 9:00 a.m. in
in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Clough was excused from attending this meeting.

Bids as follows for highway construction work and sale of used lum-
ber were opened and read in conformance with previously published notice, fol-
lowing which Chairman Cabell announced that the award of contracts would be
made at 3:00 p. m. in the same room:

Mr. B. Frost, President of the Nyssa Chamber of Commerce, came before the Commission in regard to the proposed Nyssa railroad grade separation project on the Old Oregon Trail. He advised that the Amalgamated Sugar Company, which is interested in this project, is proceeding with the acquisition of certain real property that is needed in connection therewith and is en-

JUN 13 1940

deavoring to arrange the financing of the same; however, will need a little time to work out the details. He asked the Commission not to delete this project from its construction program until the outcome of the present negotiations is known. Chairman Cabell advised that there is a limit to the time that the Commission can postpone the project and this particular job was scheduled for contracting in July and unless bids for the same are taken by the Commission at its July meeting the work could not be done this year. Mr. Frost asked the Commission to defer a definite decision in the matter as long as it could before the July meeting. The Commission granted the request subject to the condition that the job would have to be deferred indefinitely in the event that a satisfactory settlement of the real property matters is not arranged by June 20, 1940. This time was extended by the Commission to June 22, 1940, later in the session. The Attorney was instructed to inform the Nevada Chamber of Commerce, by letter, just what information the Commission needs with respect to the clearing up of this difficulty.

A delegation from Morrow County, consisting of County Judge Bert Johnson and County Commissioner George N. Peck, County Engineer H. Tamblin, Gene Ferguson, Harvey Miller, Harry Duvall, Chas. Cox, and J. G. Barratt, came before the Commission and renewed their request for the following improvements:

1. Oiling of the Heppner-Spray Secondary Highway from the end of the present oiled section to Ruggs. They urged the Commission to contract this work in July.
2. Complete the construction of the Heppner-Condon Secondary Highway from Eightmile to the Rock Creek Road, a distance of about 10 miles.
3. Reconstruction of the Heppner-Spray Secondary Highway from Ruggs to Hardman.
4. Oil the Oregon-Washington Highway between Heppner and Lena.

Judge Johnson headed the group. Speaking on behalf of the projects were Messrs. Barratt, Ferguson, Duvall, and County Commissioner Peck. They alleged that Morrow County has been treated unfairly in the allocation of highway funds and urged the favorable consideration of the above-listed projects, particularly the oiling of the section of the Heppner-Condon Secondary Highway between Parkers and Ruggs, which, they declared, is their preference project.

Chairman Cabell advised that the 1941 federal aid highway program has not as yet been adopted but the Heppner-Rhea Creek project will be given serious consideration in the formulation of the same. Pending adoption and approval of this program, he said, the Commission is not in position to make any promises as to when it will advertise the project for bids but will do so at the earliest possible time. The County Court voiced its approval of such procedure. Chairman Cabell also advised that the other projects requested are not eligible for federal funds and must be financed with state moneys, of which there are none available at the present time. However, the Commission will bear them in mind for future consideration.

JUN 15 1940

Judge Johnson also asked the Commission to designate the Paterson Ferry Road as a state secondary highway, advising that, while it is a county road, it is of no particular benefit to local residents because none reside along the same but the road carries a considerable volume of interstate traffic and in view thereof it is the County Court's thought that the state should maintain the road as a state highway. The Engineer advised that this road has been investigated and it has been ascertained that the right of way does not meet the state's requirements as to width. He suggested that the present road be oiled at state expense as a temporary route for state highway traffic but that jurisdiction of the road remain with the county. The County Court approved this suggestion as did also the members of the State Highway Commission. The Attorney was instructed to prepare an appropriate form of agreement between the state and the county covering the matter.

Messrs Charles T. Parker and C. A. Schram came before the Commission in connection with the bid bond furnished by them with their proposal for the construction of the Corvallis-Lincoln School Section of the Pacific Highway West, in Benton County, on which project they inadvertently submitted a bond prepared for the Fir Grove-Albany Section of the Independence-Albany County Road, on which project they did not submit a bid. They advised that it was their original intention to submit bids on both projects but at the last moment they decided not to bid on the Fir Grove-Albany project, although they had a bid bond prepared for it; and, in their rush to deliver their bid on the other project, thoughtlessly inserted the incorrect bid bond in their proposal form. They submitted a new bond properly made out, covering the Corvallis-Lincoln School Section and asked that this be substituted for the incorrect bond. They were informed by Chairman Cabell that the Commission has always proceeded on the theory that if a bond is not in order the bid is not considered, and in the present instance, while the Commission knows that the contractors are acting in good faith, nevertheless there is a possibility that some day, if the Commission does not adhere to its established policy, something will occur that will result in loss to the state, in view of which the Commission is inclined not to approve the substitution of the bond, although it will reconsider the matter later in the session. This matter came up for discussion at the time the award of contracts was considered and the Commission at that time decided not to permit the substitution of the bond.

A delegation from Eugene, consisting of Ed Turnbull, Wm. Tugman, Fred Brenne, Secretary of the Chamber of Commerce, and C. I. Rynearson, President of the Oregon Pacific Highway Association, came before the Commission in regard to the proposed plan for the permanent routing of the Pacific Highway through Eugene. They inquired whether or not the Commission has as yet taken definite action on the Engineer's report on this subject, which report was the subject of discussion at the public hearing held in Eugene on May 1, 1940. They were informed by Chairman Cabell that the Commission has not yet made its final decision with respect to this matter but will endeavor to do so at this meeting. (The matter was reconsidered later in the session, when the Engineer's report was approved. See resolution ahead.)

A delegation from Grants Pass, consisting of County Judge T. A. Johnson, County Commissioner Richard McElligott, and James K. Manuel, Secretary

JUN 13 1940

of the Chamber of Commerce, came before the Commission in regard to the elimination of a dip in the Pacific Highway a short distance south of Grants Pass. They requested the elimination of this dip and also that cement concrete pavement be substituted for black pavement in the contract that is now under way at this location. The matter of the elimination of the dip was discussed at considerable length, during which it was pointed out that raising the grade line would involve considerable expenditure for construction and for extra right of way. The Engineer gave as his thought that the expense is not justified and that the conditions obtaining under the original plan would not be objectionable. He explained the construction details and as a result the delegation was satisfied that a change in plans was unnecessary. As to the substitution of cement concrete pavement for black pavement, the Engineer pointed out that the present black pavement is in good condition and expressed his reluctance to destroy it simply to change the type. After discussion the Engineer was instructed by the Commission to investigate the matter personally.

The County Court of Clatsop County, represented by County Judge Guy Boyington and County Commissioners James Elliott and John Slotte, was present and inquired as to the status of the deed whereby the state is to reconvey to Clatsop County a portion of the Tongue Point State Park so the county can in turn deed it to the federal authorities for use in connection with the maintenance of the U. S. naval base at this point. The Attorney advised that the deed is ready with the exception of the description of the property to be conveyed. He was instructed by the Commission to expedite the matter as much as possible.

County Judge Nelson B. Higgs of Harney County was present and inquired as to the Commission's plans for the improvement of the secondary highways extending south from Burns and Crane. He was informed that the Commission has deferred its decision in the matter pending personal inspection of the roads, which inspection the Commission expects to make this summer.

Judge Higgs also inquired as to the plans of the Commission to oil the strips between the pavement and the curb line along the state highway in the city of Burns. The Engineer advised that this matter has been investigated and it has been ascertained that the job would cost about \$8,000.00. After discussion the Commission approved the project, the construction of the curbs and the rocking of the strips to be done under contract and the oiling work to be done by state forces this year, if possible.

Judge Higgs also asked for sidewalk construction along the Central Oregon Highway between Burns and the public swimming pool at Hines Mill for the benefit and safety of children and others who patronize the pool. The matter was referred to the Engineer for investigation and report.

Inquiry was made by Judge Higgs as to the improvement of the farm-to-market road south of Burns to Wright's Point. He was informed that this project is in the construction program for 1940 funds and that it is proposed to take bids for the same at the regular meeting of the Commission in August.

Mr. John Mitzel, Aloha, was present and requested permission to

JUN 15 1940

transport a boat, the overall dimensions of which are 12 feet wide, 16 feet high, and 34 feet long, over the Tualatin Valley Highway from Aloha to Portland. After discussion the Commission granted the request, provided Mr. Mittel will comply with the Commission's standard rules and regulations covering such movements.

The Commission adjourned at 12:20 p. m. and reconvened at 2:00 p. m. in the same room, the same persons being present and participating.

A delegation from Benton and Lincoln Counties came before the Commission in the interests of the Alsea Highway. The delegation was headed by S. M. P. Dolan, Corvallis, and included the following: County Commissioner W. H. Malone of Benton County; L. J. Richards, President, Waldport Chamber of Commerce; Claude Hall, W. F. Keady, and Desmond Fulp, also of the Waldport Chamber of Commerce; John Greenbo, President, and Wm. Hunter, Jr., representing the Waldport Lions Club; Ross Linville and L. M. Christensen, representing the South Lincoln County Rod and Gun Club; Don Wolf, President of the Silver-side Club of Waldport; Ken Crawford of Alsea; and Leo Goodman, J. M. Jackson, H. E. Fry, Vern Goodman, and E. W. Martinson, all representing Tidewater Grange. They presented arguments for the reconstruction and oiling of the remaining 16-mile section of this highway. They alleged that a former highway commission once committed itself to this project, provided Lincoln and Benton Counties would do certain things in cooperation. Further, that the county's obligation has been fulfilled but the state has not done its part. They urged the improvement at the earliest possible time.

Chairman Cabell advised that the Highway Commission is aware of the need for the improvement of this road but is handicapped in the performance of the work by lack of funds. He pointed out that the road is not on the federal aid system, hence is not eligible for federal aid funds, and any improvements that are made would have to be financed with forest highway funds and state funds. He said that the amount of state funds is limited and must be conserved as much as possible for matching the federal aid funds. It has not been considered advisable, he said, to allocate forest highway funds to this project because it was considered best to use these funds to finance the completion of other going forest highways. However, some of these other highways are now rapidly approaching the state of completion and it might be possible to budget some of the forest highway funds for the improvement of this road. At least, the Commission will keep it in mind when the next forest highway program is arranged.

Chairman Cabell also advised that to reconstruct this road to modern standards is a very costly undertaking and one that the Commission cannot see its way clear to finance now. He suggested that it would be satisfactory to construct the section within the national forest boundaries to forest highway standards and the balance in a manner comparable to the work that is now under way on the Siuslaw Highway where the improvement follows generally the line of the existing highway and consists of widening at the sharp turns, the placing of stabilizing rock, and oiling, which work, he said, could be done at minimum expense. The members of the delegation expressed their approval of such arrangement and urged that the work be done this year. The Commission

made no commitment to that effect but agreed to consider the project in the preparation of its next construction program of forest highway funds. Mr. Dolan filed with the Commission a petition signed by numerous civic organizations interested in this road, urging the improvement of the same.

Miss Margaret Clarke, Assistant P. & S. Supervisor, Oregon Historical Records Survey, was present and requested permission to search the State Highway Department's records for information with which to compile a historical record of the State Highway Department. The Commission approved the request unanimously, subject to the condition that Miss Clarke allow someone from the State Highway Department to review her script before it is published.

The County Court of Hood River County, represented by County Judge C. D. Nickelsen and County Commissioners R. W. Perry and R. Waldo Arens; and County Engineer C. M. Hurlburt, came before the Commission in regard to the improvement of the county road which extends from the town of Odell to a connection with the Mt. Hood Highway. They asked the Commission to designate this road as a state secondary highway and improve the same as such. After discussion the Commission indicated that it would approve the request if presented in legal form. The Engineer was instructed to furnish the County Court with the proper form of resolution for its adoption.

The matter of oiling this road was then discussed. The Engineer advised that it would cost about \$1,800.00 to do a proper oiling job. The Commission indicated that it would approve the oiling work, same to be done with state forces, if and when the road is designated a state secondary highway.

The County Court also asked the Commission to designate a permanent route for the Hood River Secondary Highway between Dee and Parkdale. They advised that they are not particular which route is designated but they would like the designation made now so the county can go ahead with certain county road improvements that it has in mind. The matter was referred to the Engineer for investigation and report at the next meeting.

The matter of the improvement of the Mt. Hood Highway in the vicinity of Fike's Corner was also brought up for discussion, particularly the matter of reconstruction of the highway under the railroad tracks. The financing of such project was discussed, during which the question arose whether it would be possible to secure federal railroad grade separation funds for the same. The Engineer was instructed to ascertain from Mr. W. H. Lynch, District Engineer, Public Roads Administration, whether or not this project would be eligible for such funds. In the event that government funds can be used for such purpose, then the Engineer is authorized to conduct a location survey of the section.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts and sale of used lumber, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Fir Grove-Albany Section of the Independence-Albany County Road, in Benton County. 4.38 miles surfacing and oiling. The low

bidder for this project was A. Milne, Portland, at \$23,767.50, based on the use of asphalt. He did not submit a bid based on the use of tar. The second-low bidder was R. O. Dail & Warren Bros., Portland, at \$24,678.00, based on the use of tar. They did not submit a bid based on the use of asphalt. There were 3 higher bidders. The Commission awards this contract to the low bidder, A. Milne, at his bid of \$23,767.50, based on the use of asphalt.

"Corvallis-Lincoln School Section of the Pacific Highway West, in Benton County. 0.80 mile grading and paving. Only two bids were received for this project, the low one being that of United Contracting Company, Portland, at \$53,447.25, and the other being that of Warren Northwest, Inc., Portland, at \$53,726.25. The Commission rejects both bids and orders the project readvertised.

"Fischers Millrace Bridge on the Pacific Highway West, approximately 0.6 mile south of the south city limits of Corvallis, in Benton County. Six bids were received for this project, the low one being that of Averill & Corbin, Portland, at \$6,826.75. The second-low bid was that of McNutt Bros., Eugene, at \$7,235.00. The Commission awards this contract to Averill & Corbin at their bid of \$6,826.75.

"Warrenton (Massachusetts Ave.-Market St.) Section of the Fort Stevens County Road, in Clatsop County. 0.52 mile grading and paving. The low bid for this project was submitted by Jacobson-Jensen Company, Portland, at \$24,224.50. The second-low bid was submitted by Edlefsen-Weygandt Company, Portland, at \$24,420.20. There was one higher bidder. The Commission has referred all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Prineville Section of the Ochoco Highway, in Crook County. 1.67 miles grading and 1.51 miles surfacing and oiling; also furnish 6,500 cu. yds. crushed rock in stock piles. Homer G. Johnson, Portland, submitted the low bid for this project at \$64,226.80. Clifford A. Dunn, Klamath Falls, submitted the second-low bid at \$66,647.00. There were four higher bidders. The Commission awards this contract to Homer G. Johnson at his bid of \$64,226.80.

"John Day Section of the John Day Highway, in Grant County. 0.45 mile grading and bituminous macadam surfacing. No bids were received on this project.

"Germantown Road-Barnes Road Section of the Skyline Boulevard, in Multnomah County. 6.47 miles bituminous macadam wearing surface. Six bids were received for this project, the low being that of Homer G. Johnson, Portland, at \$41,502.00, based on the use of asphalt. He did not submit a bid based on the use of tar. The second-low bid was submitted by Norris Bros., Burlington, Washington,

JUN 13 1940

at \$48,416.50, using tar. They did not submit a bid based on the use of asphalt. The Commission awards this contract to Homer G. Johnson at his low bid of \$41,502.00, using asphalt.

"Lombard Street (Alma Ave.-Interstate Ave.) Section of Lombard Street in Portland, Multnomah County. 2.55 miles pavement resurfacing. Parker-Schram Company, Portland, submitted the low bid for this project at \$44,102.80. Cascade Construction Company, Portland, submitted the second-low bid at \$45,994.25. There were two higher bidders. The Commission awards this contract to Parker-Schram Company at its low bid of \$44,102.80.

"East Unit of Shaniko-Cow Canyon Section of the Sherman Highway, in Wasco County. 5.03 miles grading, surfacing, and oiling; also furnish 4,000 cu. yds. crushed rock in stock piles. The low bid for this project was submitted by Leonard & Slate, Multnomah, at \$87,103.00. The second-low bid was submitted by A. Milne, Portland, at \$89,621.00. There were six higher bidders. All bids received for this project have been rejected and the project ordered readvertised.

"Sunset Tunnel Section of the Wolf Creek Highway, in Washington County. 0.165 mile grading, tunnel excavation, lining and paving. Ten bids were received for this project, the low one being that of Kern & Kibbe, Portland, at \$135,295.00, based on the use of Wolman Salts. They did not submit a bid based on the use of Zinc Chloride-Sodium Dichromate. The second-low bid was that of C. J. Eldon, Portland, at \$138,316.80, based on the use of Wolman Salts, and an identical bid based on the use of Zinc Chloride-Sodium Dichromate. The Commission awards the contract to the low bidder, Kern & Kibbe, at \$135,295.00, based on the use of Wolman Salts.

"Middleton-Newberg Section of the Pacific Highway West, in Washington and Yamhill Counties. 6.49 miles roadside improvement. Only two bids were received on this project, the low one being that of Leonard & Slate, Multnomah, at \$12,420.00, and the other being that of D. L. Ashton, Lebanon, at \$15,612.50. The Commission awards the contract to Leonard & Slate at their bid of \$12,420.00.

"Sale of approximately 53 M-FB of used lumber and cord wood at the site of the Arch Cape Tunnel, approximately 15 miles south of Seaside, in Clatsop County. Three bids were submitted for the purchase of this material, the high one being that of the Cannon Beach Lumber Company, Astoria, at \$150.00, and the second-high being that of the Park Fuel Company, Tolovana Park, at \$56.50. The Commission considers the bid of the Cannon Beach Lumber Company satisfactory and accordingly sells the material to it at its high bid of \$150.00."

The Commission discussed the John Day city project on the John Day Highway, in Grant County, which project was advertised for bids to be received

at this meeting but for which no bids were submitted. After discussion of this matter the Commission decided to do the work involved with state forces, and so ordered. The Engineer was instructed by the Commission to proceed accordingly.

A delegation from Marshfield and Coquille, consisting of Clarence Coe, President, Marshfield Chamber of Commerce; Lafe Compton, Coquille; Fred McGougan, Marshfield; H. G. Kern and Lars Peterson, both of North Bend, came before the Commission. Mr. Coe headed the group. They inquired as to the plans of the Highway Commission for the improvement of the Oregon Coast Highway between North Bend and Coquille. They were informed that the Commission has amounts budgeted to commence the reconstruction of the section between North Bend and Marshfield, starting at the Marshfield end, and to finance the Bunker Hill Section just south of Marshfield, and that it is proposed to take bids for these projects at the July meeting of the Commission. They were also advised as to the method used by the Commission in the allocation of funds at its disposal, which precludes the contracting of more work in this vicinity at the present time.

Mr. Compton urged additional work between Marshfield and Coquille and suggested that, if the Commission cannot finance permanent construction, it improve the present road by widening at sharp curves, etc. He was informed that the permanent route of the highway does not follow the present road, hence it would be a waste of funds to improve the present road, as suggested. Mr. Kern suggested that the improvement between Marshfield and North Bend start at the North Bend end rather than at the Marshfield end. It was explained to him that this could not be done because of the interference of the railroad along this section, the difficulties incident thereto having not as yet been ironed out between the Commission and the railroad company. There followed a general discussion of highway matters in Coos County. The Commission expressed regrets that it could not approve the additional expenditures at this place but agreed to bear the project in mind for future consideration.

A delegation from Portland, representing the Building and Construction Trades Council of Portland and Vicinity, was present. The delegation was headed by B. R. Mathis, Secretary, and included the following: E. F. Harland, representing the Allied Heavy Crafts; F. W. Griffith, Hoisting and Portable Engineers No. 701; John O'Neil, representing the Iron Works Union; Jack Shallot, Truck drivers' Council No. 162; and Ed Nelson, of the Pile Drivers. They urged the Commission to include in its specifications for highway contract work provision for the payment of the prevailing scale of wages to all crafts, according to their jurisdiction on highway work. The Commission indicated reluctance to comply with this request because it considers that it is not the business of the state to enforce agreements between the various unions and the highway contractors and because the Commission believes in the system of collective bargaining for the settlement of labor disputes. However, the Commission agreed to give the matter serious consideration. The members of the delegation expressed a willingness to furnish the Commission with any information in its files that might aid the Commission in its study of the matter.

JUN 13 1940

Mr. John R. Hall, attorney, Portland, appeared before the Commission in the interests of the application of Safeway Stores, Inc., to operate over the Old Oregon Trail, between the Idaho state line and Ontario, truck and semi-trailer combinations having an overall height and an overall length in excess of the limits specified in the Oregon statutes. He read the complete file on this matter, which included a letter from the State Highway Department to the effect that the Highway Commission had authorized the granting of the permit covering the overheight feature. He pointed out that their request was for a permit covering the overlength feature as well as the overheight; and, on the basis of the information received, the company has ordered several pieces of equipment which, it now appears, cannot be operated legally within the State of Oregon. He urged the Commission to reconsider the matter and grant a blanket permit covering the overlength feature, inasmuch as it involves an operation over the highways in Oregon for a distance of only one mile. After considerable discussion the Commission authorized the granting of such permit if, in the opinion of the Attorney, the Commission has legal authority to do so. The Attorney was instructed to render an opinion on the subject.

Messrs. Kenneth Poorman and Bob Hintz, contract haulers of Portland, came before the Commission in regard to the matter of securing permits for movements over state highways of equipment, et cetera, that exceeds the statutory limits in Oregon as to dimensions. They advised that they frequently are delayed in securing permits from the Salem office of the Commission, which is rather inconvenient and embarrassing, particularly in cases of emergency, and suggested that the issuance of permits could be expedited if the Commission would authorize the Division Engineer in Portland to issue them. They urged the Commission to take action to that effect. The matter was referred to the Engineer for study and recommendation.

Mr. Murphy, of the Murphy and Nelson Logging Company, Portland, was present and requested permission to truck-haul logs over the Columbia River Highway from Mile Post 63.9 to Mile Post 62.4. The Engineer advised that, as instructed by the Commission at the previous meeting, a trial run of logs over this section was made and it was found that logs over 40 feet in length could not be transported without the use of more than one-half the width of the roadway, particularly at a place known as Ruthton Hill. He recommended denial of the request for the transportation of logs over this particular section. Mr. Murphy stated that it is essential that he move these logs in 40-foot lengths, and suggested, as an alternate route, that he be granted permission to transport the logs over and across the Hood River Bridge at Hood River, thence along the Columbia River Highway to the county road that leads to the Columbia River opposite the intersection of the Columbia River Highway with the Mt. Hood Highway. The Commission deferred a decision in the matter pending an additional report from the Engineer. This matter was reconsidered by the Commission on the following day and the permit was authorized. (For details see minute entry ahead.)

Reconsideration was given by the Commission to the Engineer's report on the results of investigations for the permanent routing of the Pacific Highway through Eugene. After discussion the Commission approved the report

and the program of construction as outlined therein. The following resolution designating a permanent route for this highway through Eugene was adopted by the Commission by unanimous vote:

WHEREAS, the Pacific Highway is a part of the state highway system and is likewise a part of the federal highway system; and

WHEREAS, the section of said highway located in Lane County passes through the City of Eugene over streets selected and designated by the Highway Commission; and

WHEREAS, said highway entering Eugene from a westerly direction has been routed by the Highway Commission over Sixth Avenue from the west city limits to Willamette Street; thence over Willamette Street to Broadway; thence over Broadway to Franklin Boulevard and thence over Franklin Boulevard to the east city limits; and

WHEREAS, the volume of traffic using said highway and said route into and through Eugene exceeds 5,000 cars per day, which traffic will materially increase in the near future; and

WHEREAS, for the purpose of relieving traffic congestion and for the purpose of affording to the travelling public a more convenient route into and through the City of Eugene and for the further purpose of accommodating local business concerns and industries the Highway Commission has found it advisable to change the routing of said highway into and through Eugene and has found it necessary to make other needed highway changes and improvements.

THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively participating, as follows:

1. That the route and location of the Pacific Highway entering Eugene from the westerly direction shall be as follows:

a. Beginning at or near highway station 646 on said highway over the present route to the westerly terminus of Sixth Avenue; thence over Sixth Avenue to an intersection with High Street; thence over High Street to an intersection with Broadway; thence over Broadway to an intersection with Franklin Boulevard; thence over Franklin Boulevard to the easterly city limits;

b. Beginning at highway engineer's station 646; thence in an easterly direction to a connection with the westerly terminus of Seventh Avenue; thence over Seventh Avenue to an intersection with Pearl Street; thence over Pearl Street to its intersection with Broadway; thence over Broadway to Franklin Boulevard; thence over Franklin Boulevard to the easterly city limits.

2. That Seventh Avenue from its westerly terminus to its intersection with Pearl Street and Pearl Street to its intersection with Broadway shall be made one-way traffic streets and only traffic moving from a northerly direction to a southerly direction shall be permitted to move over said streets.

3. That Sixth Avenue from its westerly terminus to its intersection with High Street and High Street from Sixth Avenue to its intersection with Broadway shall be made one-way traffic streets and only traffic moving from a southerly to a northerly direction shall be permitted to travel over said streets.

4. Traffic shall not be routed over said newly designated streets until the highway connecting the Pacific Highway with Seventh Avenue has been constructed and made ready for use. When traffic is routed over said newly selected and designated streets then Willamette Street from Sixth Avenue to Broadway and Broadway from Willamette Street to Pearl Street shall no longer be streets of the City of Eugene over which state highway traffic shall by order of the Highway Commission be deemed routed.

5. That the municipal authorities of the City of Eugene be requested to pass and adopt an appropriate resolution or other appropriate procedure or action to supplement the action of the Commission with respect to making Sixth Avenue and Seventh Avenue one-way traffic streets, and confining such streets to one-way traffic operation.

6. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof be delivered to the City of Eugene and to the Public Roads Administration and the County Court of Lane County, Oregon.

The following resolution designating a permanent route for the Willamette Highway between Dexter and a connection with the Pacific Highway at Goshen was also adopted by the Commission by unanimous vote:

WHEREAS, the Highway Commission contemplates the more permanent improvement of the Willamette Highway, which is a part of the state highway system; and

WHEREAS, in connection with said proposed improvement it is the judgment of the Commission that a portion of said highway should be relocated so as to afford a better alignment and a more serviceable highway for the general public;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and participating, as follows:

1. That the location of the Willamette Highway between Dexter and Goshen be changed and that said section of said highway be located over the following route, to wit:

Beginning at or near the town of Dexter; thence north-westerly to a junction with the Pacific Highway at or near the town of Goshen over the route heretofore surveyed by the State Highway Engineer and approved by the Commission.

2. That the field notes and other engineering data made and obtained by the Engineer in the survey and location of said route be and the same hereby are approved and adopted as the survey, location and route of said Willamette Highway between said termini and said field notes and other engineering data shall be filed in the records of the State Highway Commission at Salem, Oregon.

3. That the foregoing route hereby is adopted and designated as the route and location of the Willamette Highway between said termini and when said highway is constructed or improved between said points it shall be constructed and improved pursuant to said relocated line.

4. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Lane County, Oregon.

The Commission also considered the matter of the adoption of a route for a state highway along Front Avenue, Portland. The Commission decided to designate such street as a state highway route. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the volume of traffic entering Portland over the Pacific Highway, the Columbia River Highway and other state highways entering the City of Portland has caused congestion and a traffic problem which demands relief; and

WHEREAS, it is the purpose of the Commission to select certain streets of the City of Portland over which to route state highway traffic and to reconstruct such streets so as to convert the same into a more adequate thoroughfare or freeway; and

WHEREAS, the State, represented by the State Highway Commission, and the City of Portland, represented by its duly constituted authorities, have agreed to cooperate in the accomplishment of an adequate thoroughfare through said City, and for that purpose have mutually agreed to construct a major project known as the Front Avenue project; and

WHEREAS, in order that said program and project may be

JUN 13 1940

accomplished it is necessary that certain streets be selected by the Highway Commission as streets of the City of Portland over which to route state highway traffic;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively participating, as follows:

1. That the following named streets of the City of Portland hereby are selected and designated as streets over which to route state highway traffic in said City and as streets which shall constitute a state highway route through said City:

Beginning at the intersection of Barbur Boulevard and Southwest Front Avenue at or near Southwest Lane Street in the City of Portland; thence northerly along Southwest Front Avenue, crossing Southwest Arthur Street (and its extension known as Southwest Kelly Avenue) by means of a structure passing over the grade of said Southwest Arthur Street to a point at or near the intersection of Southwest Carruthers Street; thence crossing diagonally from Southwest Front Avenue to Southwest Water Avenue, and thence along Southwest Water Avenue, passing underneath the grade of Southwest Madison Street at Hawthorne Bridge, and underneath the grade of Southwest Morrison Street at the Morrison Street Bridge, and thence to an intersection with the Steel Bridge at or near the intersection of Northwest Front Avenue and Glisan Street; thence onto the Steel Bridge by a set of ramps; thence across the Steel Bridge to the east side of the Willamette River, passing under the Steel Bridge by a set of ramps, at a point near the intersection of North Williams Avenue and Northeast Oregon Street; thence northerly along the east bank of the Willamette River, passing underneath the Broadway Bridge, and thence to an intersection with Interstate Avenue at or near its junction with North Tillamook Street.

Also the following named streets are hereby selected and designated as a secondary route which shall operate as a service road and which shall diverge from the first-named route at its intersection with Southwest Columbia Street; thence westerly along Southwest Columbia Street to its intersection with Southwest Front Avenue and thence northerly along Southwest Front Avenue to its intersection with Northwest Glisan Street at a point which is the approximate westerly end of the Steel Bridge.

2. That said streets which are intended to constitute streets involved in the Front Avenue project be and they hereby are declared to be the streets and to constitute the route over which shall be constructed and maintained the said Front Avenue project, and the Commission does hereby declare its purpose to cooperate with

JUN 13 1940

the City of Portland and the Federal Government in the permanent improvement and accomplishment of said Front Avenue project.

3. That when said project is completed and thrown open for traffic a further and appropriate resolution shall be adopted by the Commission fixing and prescribing rules and regulations with respect to the movement and control of traffic using said streets and the erection and maintenance of necessary and appropriate directional signs and traffic control signals.

4. That the Engineer be and he hereby is instructed to prepare and submit to the Highway Commission for approval, and thereafter to the Public Roads Administration and to the City of Portland for approval, necessary plans and specifications for said Front Avenue project and that upon the approval of said project by the several governmental agencies interested in and concerned therewith units or sections of said project shall be placed under contract as quickly and as expeditiously as funds are available therefor.

5. That this resolution and action of the Highway Commission with respect to the selection and designation of the said streets is adopted and made pursuant to the authority of the Highway Commission under Section 22, Chapter 529, Oregon Laws, 1939, to alter or change such routing when in its opinion the interests of the motoring public will be better served.

6. That this resolution be entered in the minutes and records of the Commission and the Secretary be and he hereby is instructed to deliver to the Public Roads Administration and to the City of Portland duly certified copies thereof.

The Commission adjourned at 5:15 p. m., to reconvene on the following morning in the same room.

Portland, Oregon, June 14, 1940

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Chairman Henry F. Cabell and Commissioner Herman Oliver were present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

Bids as follows for highway construction work were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p.m. in the same room:

The Engineer reported that the West Diamond Lake Secondary Highway has dried out sufficiently following the spring thaw to withstand legal-weight loads. He recommended, in view thereof, that the reduced load limit which has been in effect on this road for the past several months be lifted. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 9th day of April, 1940, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the

WEST DIAMOND LAKE SECONDARY STATE HIGHWAY from its junction with the Crater Lake Highway, in Jackson County, to its junction with the Crater Lake North Secondary State Highway, in Douglas County,

and

WHEREAS, subsequent to the passage of said resolution, conditions have changed so that it is no longer necessary or desirable and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution on the said above-named highway;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the

WEST DIAMOND LAKE SECONDARY STATE HIGHWAY from its junction with the Crater Lake Highway, in Jackson County, to its junction with the Crater Lake North Secondary State Highway, in Douglas County,

be and the same hereby is rescinded and cancelled as of this date, and the maximum load limit permissible on the said section of said highway hereafter shall be the maximum load limit provided by law.

JUN 14 1940

IT IS HEREBY ORDERED that certified copies of this resolution be furnished the County Clerks of Jackson and Douglas Counties in which counties said highway is located, and that a certified copy of this resolution also be furnished the Superintendent of the Department of State Police for his information.

The Commission also adopted by unanimous vote the following resolution lifting the reduced load limit heretofore in effect on the Willamette River Bridge at Corvallis, the Engineer having reported that repairs to this bridge have been completed and the reduced load limit is no longer required:

WHEREAS, on the 13th day of January, 1939, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following, to wit:

CORVALLIS-EASTSIDE SECONDARY HIGHWAY

210-00.13	Corvallis Bridge	10 tons
-----------	------------------	---------

and

WHEREAS, subsequent to the passage of said resolution the said above-named bridge has been repaired so that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridge, to wit:

CORVALLIS-EASTSIDE SECONDARY HIGHWAY

210-00.13	Corvallis Bridge	10 tons
-----------	------------------	---------

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridge shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that certified copies of this resolution be furnished to the County Clerks of Benton and Linn Counties between which counties said bridge is located; and that a certified copy of this resolution also be furnished the Superintendent of the Department of State Police for his information.

The Engineer recommended the posting of two small bridges on the Alsea-Deadwood Secondary Highway in Benton County for reduced loads. He said that these bridges are in a poor state of repair and will not withstand loads

JUN 14 1940

to which they have recently been subjected and it was his thought that they should be posted for reduced loads as a matter of safety to the general traveling public. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the road or highway hereinafter named has been designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon, as a state highway;

AND WHEREAS, on the said state highway there are located certain bridge structures which, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury and in order to safeguard traffic over said bridge structures it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structures and each of them and of the traffic which uses the said bridge structures that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of any of the said structures at any time shall be reduced and fixed as in this order provided:

NOW, THEREFORE, the premises being in part as above stated and the State Highway Commission having, as a result of due investigation, found that the bridge structures above referred to and hereinafter designated are incapable of safely sustaining or supporting a total gross load in excess of that specified hereinbelow;

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the bridge structures shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

ALSEA-DEADWOOD SECONDARY STATE HIGHWAY, Benton County

Mile Post 201.52	small log trestle	10 tons
Mile Post 201.53	small log trestle	10 tons

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions

JUN 14 1940

of Section 55-2707. Oregon Code 1935 Supplement, shall be in full force and effect until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereon in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this resolution be furnished to the County Clerk of Benton County in which county said bridge structures are located, and that a certified copy of said resolution be furnished the Superintendent of the Department of State Police for his information.

The Attorney reported a request from Mr. Jack Latourette, attorney, Portland, either to purchase certain state-owned property at the end of Fifth Street, in Oregon City, or to lease the same from the state in order to provide access thereover to property owned by the Latourettes. The Commission decided not to sell this property as it is needed for state highway purposes and to retain a clear view for highway traffic at this point. The Commission also decided not to lease the property to any private individual. The Attorney was instructed to inform Mr. Latourette of the action taken.

The Attorney also presented a request from the Crown Zellerbach Corporation, Portland, to lease certain Willamette River frontage in Oregon City between Tenth Street and Fifteenth Street, which frontage the corporation desires to use for the storage of logs in the Willamette River pending utilization of the logs in the paper mill at Willamette Falls. The Attorney advised that the Crown Zellerbach Corporation is willing to pay a reasonable amount for the use of this privilege and considers that \$250.00 per year is a fair charge for the same. Action on this matter was deferred by the Commission pending completion of the construction of the highway at this location and the determination at that time whether or not the use of the river frontage for the purpose intended would interfere with or detract from the scenic view from the highway. The Commission instructed the Attorney to convey such information to the Crown Zellerbach Corporation and to also investigate what would be a reasonable price to charge the corporation for the use of the property.

The County Court of Tillamook County, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, came before the Commission and inquired as to the plans of the Commission for the oiling of certain Tillamook County roads. They asked consideration of the following projects in the 1941 construction program: (1) 1½-mile section of the South Prairie Road which extends into the Trask River district; (2) Nehalem River Road up the Nehalem River from Mohler; (3) A section of the Lower Miami Road; (4) Section of the Sand Lake Road near a place known as Woods.

JUN 14 1940

They were informed by Chairman Cabell that the Commission has not as yet adopted a program for the fiscal year 1941 federal aid secondary highway funds, with which this work must be financed, but the Commission expects to consider this matter at this session, if possible. The suggestion was made by Judge Woods that a definite amount of funds be budgeted for county road oiling work in Tillamook County and that the decision as to the projects be deferred until later. The Commission indicated a favorable attitude toward additional oiling work in Tillamook County but declined to make any definite commitment of funds in regard thereto at the present time.

Judge Woods renewed the county's request for the designation as a state secondary highway of the road leading from Tillamook to Netarts. The Commission took the matter under advisement. The County Court also asked the Commission for the improvement of the Oregon Coast Highway between Bay City and Garibaldi, particularly the straightening of this section. The Commission took no action on this request. Inquiry was made by the County Court as to the plans of the Commission for improving the alignment of the Oregon Coast Highway south from the city of Tillamook. The Commission authorized the Engineer to make a survey of this section.

Commissioner Anderson inquired when the Commission proposes to reconstruct the bridge on the Oregon Coast Highway at Beaver and was informed that, according to present plans, bids for this project will be received at the August meeting of the Commission. This concluded the conference.

Mr. Elmer Bankus, Brookings, was present in regard to right of way that is needed for the improvement of the Oregon Coast Highway through the town of Brookings, in Curry County. He advised that local interests have been working on this matter and they are now of the belief that all right of way matters can be cleared up without further difficulty. The Assistant Attorney advised that, with the exception of three parcels, there will be no difficulty encountered in acquiring the right of way for this project, the three in question being the property required from the Pedrioli Estate, that needed from Bernice M. Ward, and property required of Irvin A. Leming, which it appears will have to be condemned. After considerable discussion, and it being desired by the Commission to proceed with the construction of this project as soon as possible, the Commission instructed the Attorney to proceed with the condemnation of these three properties. He was also authorized to close the options heretofore taken for other property when the condemnation cases have been disposed of. The Engineer was authorized to advertise this project for bids some time this coming fall, if the right of way matters are cleared at that time, and to make provision in the contract for the completion of as much of the work as possible this winter without discommoding business in this town.

The Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

Addition to Umpqua Lighthouse State Park, in Douglas County:- The Parks Superintendent reported a gift from Douglas County of approximately 500 acres of land adjoining Umpqua Lighthouse State Park, same being described as follows: $W\frac{1}{2}$ of the $NE\frac{1}{4}$ and the $NW\frac{1}{4}$ of the $SE\frac{1}{4}$ of Section 36; Lot 3 of

JUN 14 1940

Section 12, all in Township 22 South, Range 13 West, W.M. The Commission accepted this gift and instructed the Secretary to send to the Douglas County Court an appropriate letter of appreciation.

Proposed park east of Burns, in Harney County:- The Parks Superintendent presented a letter from Mr. Earl K. Nixon, Director of the State Board of the Department of Geology and Mineral Industries, Portland, suggesting that an 80-acre tract of land in Harney County, which contains a petrified forest, be acquired by the state as an addition to the state parks system. He advised that he has inspected this property, which is located 35 miles east of Burns and about 10 miles south of the Central Oregon Highway, and ascertained that, in order to be of any value to the state for park or other purposes, a road-way would have to be constructed to it, the present road being narrow, crooked, and in a poor state of repair. He also said that one of the conditions of the acquisition would be the fencing of the property with metal fence and that a caretaker be maintained on the premises at all times. He questioned the advisability of the state taking over this property because of the cost involved. The Commission concurred in the viewpoint of the Parks Superintendent and accordingly disapproved the acquisition of the property. The Secretary was instructed to convey such information to Mr. Nixon.

Request for concession privileges at Peter Skene Ogden State Park:- The Parks Superintendent reported a request from Mr. L. D. McBain, of Culver, Oregon, to maintain a concession in this park for the sale of novelties constructed of juniper wood. He recommended that the request be denied because of the precedent that would be established. The Commission approved the recommendation.

Use of the Vista House at Crown Point for advertising purposes:- The Parks Superintendent suggested that, because of the large number of tourists that visit the Vista House, it would be a good place to disseminate travel information. He was instructed by the Commission to ascertain the attitude of Harold B. Say, Director of the Travel and Information Department, in regard thereto and to report the results thereof.

Addition to Crooked River State Park in Jefferson County:- The Parks Superintendent advised that the Commission recently leased from the Federal Government 3,900 acres of land at this location at an annual rental of \$10.00. However, there are several additional parcels that should be acquired to properly round out the park, some of these being in county ownership and some being privately owned. He gave as his thought that the entire acreage could be acquired from the owners at not to exceed \$3.00 an acre, except one parcel containing an orchard. He recommended purchase of the property if the Commission can finance it but suggested that the Commission's decision in the matter be deferred until it has had an opportunity to inspect the property and to investigate the entire state parks setup. The Commission approved the Parks Superintendent's suggestion and agreed to inspect this property the next time it is in that vicinity, following which a decision will be rendered.

The Assistant Attorney reported collusion in the submission of bids by house-moving contractors for the removal of buildings from the right of way

JUN 14 1940

of the Oregon Coast Highway at Bandon. He explained that inspection of the bids received for this work indicates strongly that all of the bidders, with the exception of the low bidder, have agreed among themselves as to what price they should demand for this work. He suggested a thorough investigation of the matter, inasmuch as it will have considerable bearing on future work of this kind that the Commission has to offer. He also explained that the low bidder, who was not a party to the collusion, is unable to furnish the required performance bond, and requested instructions whether or not to award the contract to such bidder under the circumstances. After discussion the Commission referred the matter of the collusion of the bidders to the Engineer and the Attorney for investigation, and report at the next meeting, particularly inasmuch as the Commission will receive bids shortly for the removing of buildings from the right of way in Brookings and the probabilities are that the same bidders will submit bids for this work. The Commission decided to defer the award of the contract for the Bandon project, for which bids were taken at the morning session, pending the outcome of the investigation. The Attorney was instructed to contact Mr. A. C. Baumback, one of the bidders, with regard thereto. He was also instructed to discuss with the owners of the buildings the matter of the acceptance of the bid of the low bidder who was unable to furnish a contract bond.

Consideration was given by the Commission to the claim of the Elks Club, Oregon City, arising out of the construction of the highway along Water Street in that city. The Assistant Attorney advised that the Elks Club is demanding payment in the sum of \$26.50 for changing the location of its flagpole, and \$75.00 for placing certain wire facilities in conduit, and an additional amount of \$329.76 for moving and replacing a certain tank which the club has heretofore maintained in Water Street in front of its clubhouse, although the record does not disclose that they have had a permit to maintain the tank in such location. Furthermore, the billing includes the cost of a new tank. He gave as his thought that, with the exception of the moving of the flagpole, the claim is invalid and not one for which the Commission is liable. He recommended reimbursement to the Elks Club in the amount of \$26.50, being the expense of moving the pole, and that the balance of the claim be denied. The Commission approved the recommendation.

The Attorney brought up for discussion the matter of the removal of certain privately owned buildings from Casey State Park adjacent to the Crater Lake Highway, in Jackson County. He advised that the park property was acquired by the Commission from the Federal Government some years ago and that it was occupied at that time by Mr. Casey, a squatter, who maintained a camp ground thereon; and that, in addition thereto, a Mr. E. M. Lampert secured permission to maintain a building on the property; and, although his lease expired in 1936, Mr. Lampert still maintains a building there and refuses to vacate, alleging that he has an investment of \$3,000.00 in the property and that he has been advised by competent authority that he cannot be disturbed. Furthermore, Mr. Lampert intends to seek recourse through Senator McNary. The Attorney requested instructions. The Commission deferred a decision in the matter until later; however, instructed the Attorney to bring all of the facts in the case to the attention of Senator McNary by letter.

JUN 14 1940

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

The Honorable Julius Cohn, Municipal Judge, City of Portland, came before the Commission in behalf of Lake County Post No. 53, American Legion, in regard to the setting aside of a strip of land paralleling the Klamath Falls-Lakeview Highway on Quartz Mountain, about 30 miles west of Lakeview, as a memorial to be named the "Lake County World War Veterans' Memorial". He inquired as to the attitude of the Commission in regard to such matter and was informed that the Commission could take no action until certain investigations have been made. The Commission thereupon referred the matter to the State Parks Superintendent for such investigation and report.

Messrs. W. H. Lynch, District Engineer, and Hal D. Farmer, Senior Highway Engineer, representing the Public Roads Administration, were present in regard to the surfacing that will be needed this winter to keep the Timberline Lodge Road open to winter traffic. They said that the contract under way at the present time does not include surfacing as they contemplated doing such work this year under a separate contract but the delay by Congress in appropriating funds had made this impracticable. It appeared to them that the logical thing to do, therefore, is to make arrangements by which the state would surface this road, as no local material was found which would be available for surfacing under the grading contract. They inquired whether or not the State Highway Commission would advance funds in the event further investigation reveals that federal funds cannot be used for this purpose. The Commission agreed to pay this cost if necessary.

Mr. Lynch also asked the Commission to authorize the use of state equipment for doing certain patching work on the oiled section of the North Santiam Highway. He said that he considers the job too small to interest any private contractor and if the state would do the work the Federal Government would reimburse the state for the cost thereof. He estimated that the work would not take longer than two or three days and that it would cost not to exceed \$2,500. The Commission approved the request by unanimous vote and thereupon signed an agreement with the Federal Works Administration covering the matter.

Consideration was given by the Commission at this time to the programming of federal public lands funds which, according to Mr. Lynch, amount to approximately \$129,000.00. Mr. Lynch also advised that of this amount possibly \$60,000.00 is available for contracting at the present time. The Engineer recalled that the Commission last year allocated all of the public lands funds to expedite construction of the I.O.N. Highway in Malheur County, with the understanding that this year's money would be expended on the Warm Springs Highway. He recommended, in view thereof, that the \$60,000.00 now available be expended for the improvement of the Warm Springs Agency Section of the Warm Springs Highway, or at least a sufficient amount to make good the promise of the previous year. The Commission approved the recommendation and so ordered.

The Commission had under consideration the programming of the 1941 regular federal aid and federal aid secondary highway funds. The Engineer presented projects that are eligible for such funds, from which the Commission selected the following, subject to telephonic approval by Commissioner Huron W. Clough: (Mr. Clough's approval was secured by the Engineer later.)

PROGRAM OF 1941 REGULAR FEDERAL AID PROJECTS

9588

County	Termini	Fed. Funds		Kind of Work	Length	Section

The Engineer was authorized to submit these programs to the Public Roads Administration for approval.

The Assistant Attorney reported the status of the 1940 right of way budget. He advised that the Commission budgeted \$600,000 for the purchase of right of way this year and that of this amount \$316,000 has been obligated to date. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration, the Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

JUN 14 1940

The Attorney also requested authority to institute condemnation proceedings to acquire right of way needed for the Quartz Mountain-Drews Valley Section of the Klamath Falls-Lakeview Highway across property belonging to the estate of George H. Newell of Lake County. He advised that this would be a friendly suit and is simply required in order to clear title to the property. The Commission approved the request and, thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Quartz Mt.-Drews Valley Section of the Klamath Falls-Lakeview Highway

real property owned by or in possession of the following parties and/or persons, to wit:

Estate of George H. Newell, deceased

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

JUN 14 1911

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having been previously approved by the unanimous vote of the two members of the Commission present:

"Rock Creek-Molalla Section of the Woodburn-Sandy Secondary Highway, in Clackamas County. 4.9 miles bituminous macadam surfacing. Babler Bros., Portland, submitted the low bid on this project, in the amount of \$65,365.00, using tar. They did not submit a bid based on the use of asphalt. E. C. Hall Company, Eugene, submitted the next low bid being in the amount of \$70,660.00, based on the use of asphalt, and \$70,935.00, based on the use of tar. There were 3 higher bidders. The Commission awards this contract to Babler Bros., at their low bid of \$65,365.00, based on the use of tar.

"Elsie-Sunset Tunnel Section of the Wolf Creek Highway, in Clatsop and Washington Counties. 1.10 miles surfacing and 20.37 miles oiling. The low bid received for this project was that of A. Milne, Portland, in the amount of \$27,252.50. The next low bid was that of Babler Bros., Portland, in the amount of \$29,970.00. There

JUN 14 1940

were 3 higher bidders. This contract is awarded to the low bidder, A. Milne, at his bid of \$27,252.50.

"Rainier Section (6th Street E.-3rd Street W.) of Columbia River Highway, in Columbia County. 0.45 mile grading and paving. The City Motor Trucking Company, Portland, submitted the low bid for this work in the amount of \$24,736.50. Edlefsen-Meygandt Company, Portland, submitted the next low bid in the amount of \$25,884.70. There was only 1 higher bidder. This contract is awarded to the City Motor Trucking Company at its low bid of \$24,736.50.

"Bandon Section of the Oregon Coast Highway, in Coos County. 0.59 mile grading and plant-mix bituminous macadam surfacing. Only 3 bids were received for this project, that of the Coos Bay Dredging Company, Marshfield, being low, in the amount of \$43,963.00. Leonard & Slate, Multnomah, were the second-low bidders, with their bid of \$48,345.00. The Commission refers all bids received on this job to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"North Canal Bridge on The Dalles-California Highway at the north city limits of Bend, in Deschutes County. Remodel and widen existing bridge. Birkemeier & Saremäl, Portland, submitted the low bid on this project in the amount of \$3,145.00. W. H. Philpott, Portland, submitted the next low bid in the amount of \$3,332.50. There were 3 higher bidders. The Commission awards this job to the low bidders, Birkemeier & Saremäl, at their bid of \$3,145.00.

"Medford Maintenance Station Landscaping Project on the Pacific Highway, in Jackson County. The low bid received for this work is that of Arthur T. Fox, Salem, in the amount of \$3,898.00. The next low bid is that of D. L. Ashton, Lebanon, in the amount of \$4,520.00. There were 2 higher bidders. The Commission awards this contract to the low bidder, Arthur T. Fox, at his bid of \$3,898.00.

"Albany-Crabtree Corner Section of the Santiam Highway, in Linn County. 3.95 miles surfacing, 1.13 miles cement stabilization, 1.22 miles paving, 1.97 miles oil surface treatment, 1.98 miles bituminous macadam wearing surface. Only 2 bids were received for this work, that of Warren-Northwest, Inc., Portland, in the amount of \$71,531.50, based on the use of asphalt, being the low one. They did not submit a bid based on the use of tar. The other bid was that of the United Contracting Company, Portland, in the amount of \$78,628.50, based on the use of asphalt, and \$78,532.50, based on the use of tar. The Commission awards this contract to the low bidder, Warren Northwest, Inc., at its bid of \$71,531.50, using asphalt.

"Ontario-Snake River Section of the Old Oregon Trail, in Malheur County. 1.27 miles roadside improvement. M. E. Myers & Son,

Echo, submitted the low bid for this work in the amount of \$2,772.41. Guy H. Booker, Portland, submitted the next low bid in the amount of \$3,784.00. There were 3 higher bidders. This contract is awarded to the low bidders, M. E. Myers & Son, at their bid of \$2,772.41.

"Maintenance Patrol Station at Blue Mountain, on the I.O.N. Highway, 30 miles north of McDermitt, Nevada, in Malheur County. The low bid received for this work was that of Fife & Company, Nyssa, in the amount of \$20,823.00. The next low bid was that of Viesko & Hannaman, Salem, in the amount of \$21,348.00. There were 2 higher bidders. The Commission has referred all bids for this work to the Engineer with power to award the contract to the low bidder, Fife & Company, when certain conditions have been fulfilled.

"Replacement of wire rope on the Interstate Bridge over the Columbia River, on the Pacific Highway between Vancouver and Portland, Multnomah County. Only 2 bids were received for this work, that of the Contracting & Sales Company, Inc., Portland, being the low bid, in the amount of \$6,290.00. The other bid was that of The Gilpin Construction Company, Portland, in the amount of \$9,465.00. Both of these bids have been referred to the Engineer with power to award the contract to the low bidder, the Contracting & Sales Company, Inc., when certain conditions have been fulfilled."

The Commission had under discussion the matter of acquiring tidelands from Mr. C. C. Inman which are desirable in connection with the proposed relocation of the Oregon Coast Highway near Port Orford. In connection with this matter the State Highway Commission also gave consideration to the desirability of acquiring all of the property between the revised location of the highway, at Hubbard Creek, and the normal high-water mark, which purchase may affect certain lands understood to be under option by Captain Harold Roach. After consideration, the Commission decided to acquire all of the property between the highway and the ocean at this point, including the Inman tidelands which will be a valuable adjunct thereto. The Commission authorized the purchase of the Inman property for the amount of the option, which is \$1,250, or \$25.72 per acre for the 48.6 acres.

Mr. Walter Meacham, Member of the Committee appointed by the Commission to recommend sites for the erection of historical markers along the Old Oregon Trail, was present and submitted to the Commission a report from this committee. The report was referred to the Engineer for study.

Chairman Cabell expressed the Commission's appreciation of the work performed by the members of this committee, which consists of Ray Conway, Chairman, Manager of the Oregon State Motor Association; Lewis A. McArthur, President of the Oregon Historical Society, and Mr. Meacham.

Mr. Murphy of the Murphy & Nelson Logging Company reappeared before the Commission in regard to the hauling of logs over the Columbia River Highway

JUN 14 1940

from Hood River easterly to the county road which connects with this highway at the Mount Hood Highway junction and extends northerly to the Columbia River. The Engineer advised that a test run of logs over this section reveals that 40-foot logs cannot be transported thereover without crossing the center line of the highway, particularly at the east end of the Hood River Bridge. He recommended, however, that a permit be granted to the Murphy-Nelson Logging Company to truck-haul logs 40 feet in length over this section provided they will maintain flagmen for the protection of other traffic, one of said flagmen to be stationed at the curve at the east end of the Hood River Bridge and the other at the point where the county road intersects the Columbia River Highway. The Commission approved the recommendation.

In this connection the Engineer recalled that the Commission previously authorized certain operators to truck-haul 32-foot length logs over this highway from the Mount Hood Highway junction into the city of Hood River without flagmen. He gave as his thought that the conditions obtaining at this point justify the maintenance of flagmen at three points, viz., at the intersection of the Mount Hood Highway with the Columbia River Highway and at each end of the Hood River Bridge, and he recommended that the Commission so modify its previous ruling. The Commission approved the recommendation and so ordered. The Secretary was instructed to convey this information to the Public Utilities Commissioner and request a modification to that effect in the permits that are issued from his office.

In the discussion of this matter the question arose whether or not the county road extending from the Columbia River Highway to the Columbia River, over which road the Murphy-Nelson Logging Company plans to truck-haul its logs, has a proper connection with the Columbia River Highway. The Engineer was instructed to investigate the conditions and to report the cost to improve this connection if it is not satisfactory at the present time.

The Engineer discussed with the Commission a letter from the Director of Highways of the State of Washington, advising that he is now preparing a construction budget for the next biennium, which begins April 1, 1941, and in connection therewith is considering the improvement of the highway between Walla Walla and the Oregon State line, particularly the section between College Place and the state line, and inquiring as to the plans of the Oregon State Highway Commission for the construction of this road within the state of Oregon. The Engineer advised that if the State of Washington reconstructs the Washington Section of this highway it would necessitate Oregon's building the section from Milton-Freewater to the Washington State line which it was not planned to do for several years. The Commission instructed the Engineer to inform the Washington officials that the State of Oregon does not contemplate undertaking this project during the next biennium.

Communications were presented from the Parkrose Lions Club and Multnomah County Fire District No. 2 requesting the oiling of the dirt shoulders adjacent to the highway pavement through the Parkrose District, Portland, from 82nd Avenue to 122nd Avenue. The Commission decided to inspect this project before taking action on the request and to consider it in the programming of funds for next year's construction.

JUN 14 1940

A telegram was presented from the Sweet Home Chamber of Commerce urging the Commission to complete the construction of the South Santiam Highway throughout its entire length at the earliest possible time. The Secretary was instructed to inform the Chamber of Commerce that the Commission is now proceeding as rapidly with this work as funds will permit.

The Engineer reported the cost to oil the shoulders adjacent to the pavement on the Oregon Coast Highway through the town of Cloverdale. He said that this work, which would consist of oiling full width between curbs for a distance of about two blocks, would cost about \$2,000 and he recommended approval of the expenditure. The Commission approved the recommendation.

The Commission discussed matters pertaining to the construction of a section of the "Route F" Highway in Lane County across the Fern Ridge Dam Reservoir. The Engineer advised that Lane County, the Army Engineers and he are in agreement with respect to the financing of this work, according to letters which have been exchanged, although the matter has not been covered by formal agreement. He requested authority to advertise this project for bids as soon as such formal agreement has been executed by all parties concerned. The Commission approved the request on condition that all of the legal features involved are approved by the Attorney. The Attorney was instructed to discuss the matter with the Lane County Court.

A report was rendered by the Engineer on the cost to construct a turnout for trucks adjacent to the Columbia River Highway at the Washington State line, as has heretofore been requested by certain trucking industries as an accommodation in breaking up their truck and trailer combinations to meet the Oregon statutory requirements as to overall length. He advised that investigation reveals that it is possible to construct a turnout 20 feet wide and 400 feet long at the state line for the sum of approximately \$500. He pointed out that there are suitable locations available within the State of Washington where the truck equipment could be broken up into units that would meet the Oregon length requirements and gave as his thought that Oregon should not be required to spend its funds for this purpose. He recommended denial of the request. The Commission approved the recommendation.

Consideration was given by the Commission to a letter from the Springfield City Council requesting advice on the feasibility of diverting logging truck traffic and other heavy traffic off the McKenzie Highway to a route about one-half block south of Main Street in that town, so as to relieve the city of this traffic problem. The Commission considered that this is a matter of strictly local concern and accordingly decided not to assume any responsibility in connection therewith.

The Secretary presented a letter from the Roseburg Chamber of Commerce inviting the members of the State Highway Commission and its staff to attend the celebration that is to be held in Roseburg on Friday, June 21, in connection with the dedication of the North Umpqua Road between Roseburg and Diamond Lake, which celebration includes a caravan trip to Diamond Lake. The Commission accepted the invitation with thanks.

JUN 14 1940

The Commission discussed the setting of a date for its inspection trip on the Oregon Coast Highway but deferred definite action thereon until later.

Reconsideration was given by the Commission to the request of the Gold Hill Garden Club for the construction of a sidewalk on the Rogue River Bridge at Gold Hill for the benefit of school children and other pedestrians. Action on this matter was deferred by the Commission pending additional report from the Engineer as to the volume of pedestrian traffic that uses this bridge.

The Commission discussed a letter from County Judge Hugh McLain, Coos County, urging the Commission to improve the Coos River Secondary Highway through Golden Falls Park in order to provide a suitable road for the truck-hauling of logs. The Engineer advised that, while the present road runs through the state park at this location, it is not a state highway and there is a question whether it is even a county road. He suggested that the Commission deny Judge McLain's request and that the logging operators be required to build their own road entirely off the state park premises which he believed could be done at reasonable cost. The Commission indicated approval of the Engineer's suggestion but took no definite action on the matter.

A letter was presented from the Huber Commercial Club requesting the elimination of a dangerous dip on the Tualatin Valley Highway a short distance east of the town of Huber. The Engineer advised that a dip in the highway, such as exists at the point referred to, is naturally very undesirable in a highway that carries as much traffic as does the Tualatin Valley Highway; however, it would cost a considerable sum to eliminate it. He suggested that the Commission defer its decision on the matter pending a trial of the double traffic stripe which has been painted on the pavement at this place to see what effect such striping will have in the elimination of accidents. The Commission approved the suggestion.

The Secretary presented a resolution from the Malheur County Pomona Grange urging the construction of a road extending from the I.O.N. Highway, near the town of Rome, northerly to a connection with the Central Oregon Highway, near the town of Harper. The Commission denied the request because funds cannot be spared to finance it and for the further reason that the Commission considers that it should complete the I.O.N. Highway before starting on new projects in this vicinity.

The Commission discussed a letter from Mr. R. B. McGinnis, Mining Engineer, Granite, Oregon, requesting the improvement of a 3-mile section of the Sumpter Valley Secondary State Highway between Sumpter and a place known as McColley's Fork, which section Mr. McGinnis alleges is practically impassable in places. The Engineer advised that this section is simply an ungraded and unsurfaced county road although it is on the secondary state highway system and, accordingly, is being maintained by the state. He estimated the cost to stabilize the weak portions thereof at \$1,500 and suggested that the request be denied. The Commission deferred a decision in the matter pending an inspection of the road.

JUN 14 1940

In this connection the Secretary presented a resolution from the Baker County Court requesting that the Sumpter Valley Secondary State Highway be extended to the town of Granite. Action on this matter was deferred pending inspection of the road.

Petitions were presented from numerous taxpayers of Baker County opposing any expenditure of highway funds for the improvement of the existing section of the Baker-Homestead Highway between Flagstaff and Lower Powder and urging construction on permanent alignment between these points at the earliest possible time. In the discussion of this matter the Commission reaffirmed its previous decision to contract work on the permanent alignment, costing about \$120,000, some time this fall.

The Commission discussed a number of communications from citizens and organizations in Coos County requesting the oiling of the Powers Secondary State Highway, particularly the northerly 5-mile section thereof. The Engineer advised that there is considerable log hauling traffic over this road and that the dust conditions resulting therefrom, according to reports, are most unbearable. However, inspection of the road reveals that it is not in condition to receive an oil treatment. Further, that to surface and oil the 5-mile section would cost about \$14,000. He said that he could not see how the Commission could finance the project at this time so, in order to alleviate the dust condition somewhat, he ordered maintenance forces to sprinkle the road with water and that the watering tank is now in operation and should alleviate the dust nuisance considerably and make the road much safer for travel. The Commission approved the action taken by the Engineer in this matter and agreed to bear this project in mind for consideration in the formulation of future construction programs.

The Secretary presented a resolution from the County Court of Wallowa County requesting the designation, as a state secondary highway, of the county road known as the Wallowa-Powwotka-Troy Highway, in Wallowa County, which road is 39.5 miles in length. A letter was also presented from the Wallowans Club of Wallowa requesting such designation and a resolution from the Wallowa Pomona Grange No. 22, Joseph, Oregon, requesting state aid in the improvement of this road from Troy to the Washington State line. The Commission denied the request for the time being; however, agreed to keep the project in mind and to discuss it with the Wallowa County Court when the programming of future federal aid secondary state highway funds is considered.

The Commission discussed a letter from County Judge U. G. Couch of Union County inquiring as to the plans of the Commission for the proposed cutoff section of the Old Oregon Trail which extends up Ladd Canyon to North Powder. Judge Couch advised that the county court has under contemplation the improvement of this cutoff but, because of limited county funds available, does not wish to spend very much for a permanent improvement if it is the intention of the State Highway Commission to take it over as a state highway. The Commission ordered that Judge Couch be informed that definite plans for this cutoff have not been made, hence the Commission is not in a position to give him any definite information at this time; however, the Commission will be pleased to inspect this road the next time it is in that vicinity.

JUN 14 1940

Consideration was given by the Commission to a letter from Mr. H. Jepson, Mist, Oregon, who requests the oiling of the 3-mile section of the Nehalem Secondary Highway between Mist and Birkenfeld which will complete the oiling of this road. The Engineer advised that this is a very desirable improvement and is on the priority list. He recommended that it be kept in mind for construction next year in the program for state funds. He estimated that it would cost about \$35,000. Chairman Cabell suggested that it might be possible to finance this job with funds heretofore set up for the improvement of the Siletz Secondary Highway, in Lincoln County, inasmuch as there is a question whether or not the federal authorities will approve the Siletz project as now planned. The Commission indicated a favorable attitude toward the transfer of such funds but deferred a definite decision pending receipt of additional information from the Engineer. The Engineer was instructed to report at the next meeting on the cost to construct the Siletz project to a low standard, using all state funds to finance it. Also, to submit an estimate of cost to construct it to federal standards, using federal funds to finance it, and, as a third alternate, to submit an estimate of cost to construct a portion of it with federal funds and a portion with state funds.

The Commission discussed and ordered filed a resolution from Aloha Grange, Aloha, Oregon, in which the Commission was urged to widen the Tualatin Valley Highway for four lanes of traffic between Portland and Beaverton and to continue such improvement to Forest Grove.

A petition was presented from the property owners of Hebo, Oregon, requesting the oiling, or otherwise hard surfacing, of the shoulders on both sides of the Three Rivers Highway (McMinnville-Tillamook Highway) through Hebo. The Commission decided that it cannot finance this project this year, in view of the fact that it has just ordered the improvement of the Oregon Coast Highway through the town of Cloverdale which will take all of the funds that can be spared in this vicinity this year, but agreed to bear it in mind for next year's construction.

The Commission discussed a letter from the North Lincoln County Chamber of Commerce urging improvement of the Salmon River Highway between Bellevue and Valley Junction. The Commission denied the request for construction this year on account of lack of funds to finance the work; however, agreed to bear the project in mind for consideration in the formulation of next year's program.

The Commission discussed and referred to the Engineer for report a petition from numerous residents of Salem requesting the improvement of the Silver Creek Falls Secondary Highway No. 163 between the State Highway Shops, at Salem, and its junction with the Turner Road at a place commonly known as Four Corners, a distance of about one mile.

The Commission discussed a letter from the Union Pacific Railroad Company inquiring whether or not it would be possible to secure the services of the state's oiling crew to repair the roadway leading to the company's freighthouse and team track in Hood River and offering to reimburse the state for the cost thereof if the state will do the work. The Engineer estimated

JUN 14 1940

that this work will cost about \$125.00. However, he recommended denial of the request for the reason that it would establish an undesirable precedent in doing work for private concerns. Furthermore, in his estimation, it is work that should be done by some contractor. The Commission approved his recommendation.

A petition was presented from residents of Benton and Lincoln Counties requesting the oiling of the Eddyville-Blodgett Secondary Highway from Blodgett to Nashville. The Engineer advised that this section is $7\frac{1}{2}$ miles in length and that the surfacing is not suitable to take a coat of oil. He estimated the cost to stabilize and oil the road at about \$44,600. The Commission decided, in view of the cost involved, to deny the request for immediate construction, however, agreed to keep the project in mind for consideration in next year's program.

The Commission discussed a petition from residents of Lane County requesting the improvement of the Alsea-Deadwood Secondary Highway between Swisshome and Paris, particularly the sections known as Haight's Grade, Olson Grade, the rock crusher site, and two places near Deer Creek, totalling approximately four miles. The Engineer estimated that it would cost about \$18,500 to widen the grade and construct surfacing on the widened portions and that it would cost about \$855,000 to grade, surface, and construct bridges on the entire road, which is 20.1 miles long. The Commission denied the request in view of the high cost of the improvement, and the lack of funds with which to finance it.

The Commission considered and denied the request from the City of Klamath Falls for the improvement of the secondary highway on the west side of Klamath Lake, known as the West Side or Rock Creek Road, as a detour in the event The Dalles-California Highway should become impassable at any time by reason of floods or other disasters.

A letter from Chester P. Walker, Yamhill, Oregon, requesting the oiling of the unoled portion of the Yamhill-Newberg Secondary Highway had the attention of the Commission. The Engineer advised that the unoled section is about 4 or 5 miles long and he estimated that it would cost about \$5,000 to place a light oil treatment thereon. The Commission instructed the Engineer to make further investigation of the road and, if in his estimation the oiling work can be done for not to exceed \$5,000, then he is authorized to proceed with the improvement.

The Commission discussed a letter from Earl G. Muir, Eugene, in which the Commission was urged to improve the Eugene-Swisshome Secondary State Highway, particularly the section between San Antone Creek and its junction with the Siuslaw Highway, so as to permit the hauling of logs over the same. The Engineer advised that the section which Mr. Muir wishes improved is 6.7 miles in length. He estimated that the minimum amount required to place this section in condition to permit log hauling would be about \$4,000, exclusive of bridge structures, of which there are sixteen on this section. He recommended denial of the request, particularly in view of the fact that this road will be abandoned as a state highway if and when the so-called "Route F" High-

JUN 14 1940

way is constructed, and because the volume of traffic that uses the road does not justify the expense. The Commission approved the recommendation.

The Commission considered the matter of extending the contract with Leonard and Slate for furnishing ferry service across the Willamette River at Wilsonville and decided to extend this contract for a period of six months, or until January 1, 1941. The Commission thereupon signed an agreement with Leonard and Slate covering the matter which said agreement also bears the consent of the surety on the bond furnished by the contractor in connection with this project. The Engineer was authorized to advertise this ferry service for bids to be received at the next meeting.

The Engineer requested authority to purchase the following equipment:

Power plant equipment for lighting the Willamette Tunnel on the Willamette Highway - estimated cost \$6,000;

1 light-type truck equipped with 600-gallon pressure tank and two pumps for use by landscape maintenance crew - estimated cost \$1,184.00.

The Commission approved the request and ordered that the purchases be made through the State Board of Control in the usual manner.

The Secretary presented the application of the Foster Lumber Company, Willamina, to maintain a $1\frac{1}{2}$ " guy wire across the Salmon River Highway as one of the supports for a boom pole to be used in connection with the loading of logs onto railroad cars. The Commission denied the request as a matter of policy, it being considered that the maintenance of such guy wire under pressure over a highway would constitute a hazard to the general traveling public.

The Commission considered and ordered filed an item from a newspaper known as "The Progressive" published in Portland, in which the Commission is criticized for its plans in connection with the 32nd Street project (Cascade Secondary Highway) between Portland and Oregon City.

The Commission discussed and denied as a matter of policy the application of Lewis M. White, Portland, to maintain beehives on the right of way of the Wolf Creek Highway near a place known as Wolf Creek Camp. Mr. White offered to pay the state \$40 for this privilege.

The Secretary presented a letter from the Baker County Taxpayers' League offering objections to the taking of some of the city park in the town of Haines as right of way for the improvement of the Old Oregon Trail through this town. The Engineer advised that only a very small part of this park was taken for the highway improvement and that it did not in the least affect the park adversely; furthermore, he believed that when the highway improvement is completed the people in this town will be perfectly satisfied with the same and will not miss the small portion of the park that has been taken. The Commission ordered the communication filed.

JUN 14 1940

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

Denton & Young, Contract No. 2233, for the construction of a bridge over Lang Canyon on the Columbia River Highway, in Gilliam County, requested an additional extension of time, from March 31 to April 5, 1940, within which to complete this job. The Engineer advised that the contract time limit was previously extended for 90 days, or until March 31, 1940, without penalty, on account of delay in the award of the contract. He further advised that the bridge was practically completed before the expiration of this extended time limit but the contractors were not able to complete the painting of the handrails on account of adverse weather conditions. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from W. H. Lynch, District Engineer, Public Roads Administration, concurring therein. The Commission approved the recommendation unanimously.

Guy H. Booker & Arthur T. Fox, Contract No. 2288, for roadside improvement on the North Unit, Ana Spring-Hunter Hill Section of the Fremont Highway, in Lake County, requested an extension of time of two days, from May 15 to May 17, 1940, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to unusually rainy weather and additional work which they were required to do, which work was not included in the original contract. The Engineer advised that the reasons given by the contractor for failure to complete the job within the specified time are correct. Further, that the traveling public has not been inconvenienced by the delay, neither has the state incurred any extra expense for engineering supervision. He recommended that the extension be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Vernie Jarl, Contract No. 2295, for clearing the Middle Unit, Troutdale-Corbett Section of the Columbia River Highway, in Multnomah County, requested an extension of time of three days, from April 15 to April 18, 1940, within which to complete this job. He alleged that bad weather conditions which prevented burning operations were the reason for his failure to complete the job within the specified time limit. The Engineer advised that the explanation given by Mr. Jarl for failure to complete the project on time is correct. He further advised that the state has not incurred any extra expense for engineering supervision, neither has the general traveling public been inconvenienced by the delay because the job is situate entirely away from any traffic. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

JUN 14 1940

The Engineer reported that Contracts Nos. 2164, 2184, 2195, 2202, 2211, 2231, 2233, 2241, 2255, 2263, 2270, 2276, 2288, and 2295, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2164, with Fisher Bros., for grading, surfacing, and oiling the Eagle Creek-Wade Corner Section of the Eagle Creek-Firwood County Road, in Clackamas County. Completed May 27, 1940.

Contract No. 2184, with S. S. Montague, for grading, surfacing and oiling the Road Creek-Wron Section of the Kings Valley Secondary Highway, in Benton County. Completed June 3, 1940.

Contract No. 2195, with Birkemeier & Sarnal, for construction of the Third Street Undercrossing on The Dalles-California Highway in Pend, Deschutes County. Completed June 6, 1940.

Contract No. 2202, with H. L. Rice, for grading, surfacing, and oiling the Strebin Road-Hosner Road Section of the Troutdale-Sandy County Road, in Multnomah County. Completed June 1, 1940.

Contract No. 2211, with H. L. O'Neil & Son, for grading and bridge construction on the Oryhee River-Tudor Ranch Section of the I.O.H. Highway, in Malheur County. Completed May 24, 1940.

Contract No. 2231, with Roy L. Houck, for grading the State Farm-Adams Section of the Oregon-Washington Highway, in Umatilla County. Completed May 25, 1940.

Contract No. 2233, with Denten & Young, for bridge construction over Long Canyon on the Columbia River Highway, in Gilliam County. Completed April 2, 1940.

Contract No. 2241, with F. R. Hewett, for furnishing crushed rock on the Elgin-Rock Creek Section of the Wallowa Lake Highway, in Wallowa County, and the Union-North Powder Section of the Old Oregon Trail, in Union County. Completed June 5, 1940.

JUN 14 1940

Contract No. 2255, with A. S. Wallace, for furnishing crushed rock on the Siskiyou Junction-Klamath County Line Section of the Green Springs Highway, in Jackson County. Completed May 25, 1940.

Contract No. 2263, with Contracting & Sales Company, for moving and reconstructing the Methodist Episcopal Church Buildings in Tigard, Washington County. Completed May 31, 1940.

Contract No. 2270, with Tidepoint Company, for furnishing crushed rock on the Mist-Vernonia Section of the Nehalem Secondary Highway, in Columbia County. Completed May 4, 1940.

Contract No. 2276, with Fisher Bros., for grading and surfacing the Hay Canyon Section of the Moro-Hay Canyon County Road, in Sherman County. Completed May 1, 1940.

Contract No. 2238, with Guy H. Booker and Arthur T. Fox, for roadside improvement on the North Unit, Ana Spring-Hunter Hill Section of the Fremont Highway, in Lake County. Completed May 17, 1940.

Contract No. 2295, with Vernie Jarl, for clearing on the Troutdale-Corbett Section of the Columbia River Highway, in Multnomah County. Completed April 18, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

- - - - -

The Commission had under discussion the setting of a date for its next regular meeting for the receiving of bids on highway construction projects and decided to hold such meeting in Portland on Thursday, July 18, 1940. The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building for this purpose. The Commission also decided to hold a special meeting in Roseburg on the evening of Thursday, June 20, to dispose of accumulated routine matters.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Leonard and Slate covering extension of the Wilsonville Ferry Contract for a period of six months - to January 1, 1941.

JUN 14 1940

Agreement with Mildred K. Colvin pertaining to the acquisition of a park site in Curry County.

Permit authorizing the U. S. Forest Service to move oversized equipment over state highways in connection with the fighting of forest fires.

Agreement with Eugene F. Hug providing for the lease of a maintenance headquarters site at Elgin.

Agreement with the Federal Works Administrator providing for repair work to be done on the Forest Highway Section of the North Santiam Highway by state forces, reimbursement to the state to be made by the Federal Government.

Agreement with the Portland Traction Company relative to the improvement of Lombard Street in Portland.

Agreement with the City of Astoria covering the matter of the State Highway Commission's contribution of funds to assist in the financing of the removal of houses from Taylor Avenue, in Astoria.

Agreement with the Mountain States Power Company providing for the use of three of the company's poles in connection with a traffic signal suspension in the town of Rickreall.

Agreement with the Union Pacific Railroad Company covering the matter of the elimination of the railroad grade crossing in the town of Nyssa, in Malheur County.

Agreement with I. J. Rossman and wife providing for the lease of a maintenance headquarters site in the town of Florence.

Agreement with Oregon State Board of Higher Education covering the matter of the use of the facilities of the college radio station KOAC during the summer months of 1940.

Lease agreement with Weyerhaeuser Timber Company extending for a period of five years, or until August 14, 1945, the lease of three stockpile sites in Jackson County; right of way file #2527.

Warranty Deed conveying unto the O.W.R.R. & N. Company certain property situate in the SE $\frac{1}{4}$ of Section 33, Township 7 South, Range 39 East, W.M., Baker County, being in the town of Haines; right of way file #6882.

Bargain and Sale Deed conveying unto Hugh G. Walker 389 sq. ft. of land situate outside of the highway right of way limits in Lot 4 of Block 4, Shield's Addition to Cottage Grove, Lane County; right of way file #5640

JUN 14 1940

Quitclaim Deed conveying unto Lincoln County 3.15 acres of land situate in Government Lots 1, 2 & 3, of Section 36, Township 13 South, Range 12 West, W. M., in Lincoln County; right of way file #R-4475.

The meeting was adjourned at 5:00 p. m.

R. H. Baldock
State Highway Engineer

Henry F. Cabell
Chairman

H. B. Glaisyer
Secretary

Huron W. Clough
Commissioner

Roseburg, Oregon, June 20, 1940

The State Highway Commission met in special session at 9:30 p. m. in the Blue Room of the Umpqua Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Due to the fact that Commissioner Clough was not present at the meeting held on June 13 and 14, in Portland, when the Commission selected certain projects for the construction program for the fiscal year 1941 federal aid funds, full information concerning the projects selected for such program at that time was given him by Mr. Cabell. Commissioner Clough approved the selection of projects, thus making the Commission's decision unanimous with respect thereto.

The Commission had under discussion the matter of preparation of bills for the 1941 legislature. The Attorney was instructed to prepare bills covering the following subjects and present them to the Commission for approval at its meeting on July 18: (1) Modification of House Bill No. 28 that was considered by the 1939 legislature. (2) Freeway bill. (3) Roadside beautification bill in behalf of the Oregon Roadside Council. (4) Bill covering the regulations for the truck-hauling of logs and piling over state highways.

The Commission also had under discussion the advisability of securing a special allocation of federal funds to expedite the modernization of the Pacific Highway and the Columbia River Highway. It was decided not to appeal to Congress for a special appropriation for any particular project. However, the

JUN 20 1940

Commission expressed itself as being not opposed to the people of Roseburg and vicinity endeavoring to secure a special allotment of funds for the improvement of the Pacific Highway between Roseburg and Grants Pass, if they so desire.

The Commission discussed a letter from the State Parks Superintendent relative to charging to the state parks budget the cost of acquiring wayside strips. It was the Parks Superintendent's thought that, inasmuch as wayside strips are necessary to the construction and maintenance of highways and because W.P.A. forces can be used in cleaning up and reforesting the areas, it might be advisable to charge this expense to right of way rather than to parks thus conserving the parks funds for strictly park purposes. The Commission decided to keep the accounts separate and to charge to the right of way budget the cost of the land acquired for right of way purposes and to the parks budget the cost of land outside of the limits of the right of way.

A letter was presented from the Acting Regional Grazier, U. S. Department of the Interior, Grazing Service, in regard to the Highway Commission's application for additional right of way along the Fremont Highway in the vicinity of Picture Rock Pass, Lake County. The Acting Regional Grazier advises that the Grazing Service has no objection to the approval of this application if the State Highway Department will, first, agree to protect and preserve the Indian writings on the rocks at the Pass; and, second, will allow the free use of the Pass as a stock driveway. As to condition No. 1, the Commission agreed to protect and preserve the Indian writings, inasmuch as that is in compliance with the Commission's established policy. As to condition No. 2, the Commission considered it inadvisable to allow stock on the highway; however, agreed to accept the condition if possible to construct fences to keep the stock off the highway.

The Commission considered the application of contractors Kern & Kibbe, Portland, to purchase a state-owned rock quarry at Bandon, known as Tupper Rock Quarry, which contains about two acres of land. It was the contractors' thought that this quarry is of no value to the state inasmuch as it contains extra-hard rock unsuitable for manufacturing into road surfacing material. The Engineer advised that the State Highway Department acquired this quarry a number of years ago for use in connection with surfacing work in the vicinity of Bandon. However, the rock proved to be very hard and it was difficult and very expensive to break it up into a size that could be used on the road, so it was abandoned for that purpose and the contractor was obliged to ship in rock from other sources. The rock is of excellent quality, he said, and would make fine road-building material if broken up into proper sizes, which he thought could be done now in view of the improvements that have been made in crushing equipment. He suggested that the quarry be not sold to Kern & Kibbe, who want to use the rock in repairing and extending the jetty at Bandon, and suggested, in lieu thereof, that all of the contractors who are interested in the jetty work be given an opportunity to purchase rock from the quarry on a specified royalty basis, with the understanding that the State Highway Department could have all of the tailings from the manufacture of the jetty rock. The Commission approved the suggestion and instructed the Engineer to notify the jetty contractors when the jetty work is advertised for bids.

JUN 20 1940

The Commission discussed the sale of 23 acres of land situate adjacent to the Warm Springs Highway in the NE $\frac{1}{4}$ of Section 9, Township 10 South, Range 13 East, T.M., Jefferson County, to Mr. Floyd Wood, Madras, Oregon, who submitted the high bid therefor in the amount of \$50.00, in reply to the Attorney's call for bids on June 17, 1940. The Commission deferred approval of this offer pending inspection of the premises.

Reconsideration was given by the Commission to a request made by County Judge Hugh McLain, Coos County, for the improvement of the road through Golden and Silver Falls State Park. The Engineer advised that the records have been searched to ascertain what, if any, obligation the Commission assumed in accepting the deed to this park from the county, and it has been ascertained that there are no obligations that have not been satisfied. In view thereof, he recommended that Judge McLain's request be denied, particularly in view of the fact that the road carries very little traffic other than logging traffic, and, in his estimation, the expense of the improvement is not justified; and for the further reason that, according to the State Parks Superintendent, it would be possible for the logging company to construct a much better private road entirely outside of the park boundaries. The Commission approved the recommendation.

The Attorney reported the results of his investigation of the small parcel of state-owned property near the north city limits of Roseburg, which property a Mr. Edwards of Roseburg desires to purchase for his personal use. He said that such investigation reveals that the property is part of an old county road right of way that was given to the state by the county. Further, that it lies entirely outside of the new highway right of way and is not needed for state highway purposes. He suggested that, inasmuch as the county deeded this property to the state, the state quitclaim it back to the county and let the county sell it to Mr. Edwards if it so desires, and secure the benefits of the sale. The Commission approved the suggestion.

The Commission had under discussion the application of Schroeder & Iverson, Sixes, Oregon, for permission to occupy temporarily certain state-owned property adjacent to the Oregon Coast Highway at Sixes River, it being their intention to construct certain buildings on this property for use in connection with their logging operations in this vicinity. The Commission denied the request and instructed the Engineer to order Schroeder and Iverson to vacate the state property that they are now using without permit.

The Commission had under discussion matters pertaining to the right of way for the proposed improvement of the Oregon Coast Highway south of Port Orford. It was pointed out that the Commission at the previous meeting authorized the securing of all of the land between the proposed highway centerline and the beach along the section from Port Orford to a point near Hubbard Creek, but no definite decision was reached with respect to the balance of the right of way, and the Public Roads Administration is now suggesting that all of the land between the highway centerline and the beach along the entire length of the proposed project be acquired so as to eliminate any possibility of its being commercialized and to retain the present unobstructed view of the Port Orford Harbor and the ocean shore line. The Commission approved the suggestion and authorized the Attorney to obtain options for the property.

JUN 20 1940

Reconsideration was given by the Commission to the matter of constructing driveways providing ingress and egress to and from service stations and other commercial establishments located adjacent to state highway rights of way, and the construction of pump islands that are involved. The question arose whether or not it would be advisable to ascertain through the courts just what authority the State Highway Commission has to construct and maintain the islands on the highway right of way. Action in this matter was again deferred pending consultation with Commissioner Oliver and then with Governor Charles A. Sprague.

The Commission discussed an order from the office of Governor Charles A. Sprague with respect to the granting of leaves of absence to state employees who are members of military or naval forces of the nation. The order extends to such employees, in view of the extraordinary conditions now obtaining, leave of absence of 21 days, without loss of pay or vacation, during the calendar year 1940 only. The Commission approved the order in so far as it pertains to employees of the State Highway Department for the year 1940 and instructed the Engineer to adhere to the provisions thereof in the granting of vacations and leaves of absence to employees under his supervision.

The Engineer reported briefly on county roads in Curry County that are eligible for federal secondary highway funds. The Commission took no action on this report, deferring the same until it makes its inspection trip into Curry County later in the summer. The Engineer was instructed to send to each Commissioner, in the meantime, a copy of the report.

The Engineer reported the results of investigation of the request of Mr. Charles E. Burnett, City Recorder, Pendleton, for the landscaping of cut-bank slopes along the Old Oregon Trail east of the railroad grade separation structure on Turner Street in East Pendleton. He advised that this matter was investigated by Landscape Engineer George Otten, who ascertained that the owners of the adjacent properties, a Mr. Russell Adams, Indian, and Mr. Wm. Giebels, want the state to plant shrubbery on the slopes and to maintain and irrigate the same, alleging that that was one of the conditions of their sale of right of way for the highway improvement. Mr. Otten also reports, he said, that the nature of the soil in the cutbanks is such that it would be very difficult to secure proper growth of shrubbery and vines. Furthermore, any obligation that the state may have had in connection with the securing of the right of way has been fulfilled. There is no assurance, he added, that after the shrubbery has been planted it will not be destroyed later on by excavation to make room for service stations or other roadside establishments. He recommended that the request be denied. The Commission approved the recommendation.

A letter was presented from County Judge David F. Graham, Malheur County, renewing his request for the improvement of the Vale West Secondary Highway (Graham Boulevard). The Engineer suggested that serious consideration should be given to this project in the formulation of the next program, and that in the meantime the Commission should make a trip into Eastern Oregon to inspect the county roads in that district. The Commission approved the suggestion.

The Commission discussed the letter from the Toledo Lions Club inquiring when the Commission proposes to surface and oil the Siletz Secondary Highway between Toledo and Siletz. The Engineer advised that the Commission budgeted \$35,000.00 of 1940 federal aid funds to finance a 2-mile project on this highway where the present road is very crooked. However, the Public Roads Administration will not approve such project, alleging that the plans do not meet the federal standards; so, the question now before the Commission is whether to proceed with the improvement, using federal standards, or to do the work as a state project, using lower standards. He recommended adoption of the government standard job and that the contracting of the work be deferred until the 1941 federal funds are available for use, when it would be possible to undertake a much larger job, using both 1940 and 1941 funds in conjunction with state funds to finance it. It was his idea that the worst section should be improved first and that the state funds should be used to finance the work that cannot be paid with the federal funds. The Commission indicated approval of the Engineer's suggestion but deferred definite action until later.

The Attorney brought up for discussion the matter of insuring a residence building that was acquired by the Commission in a right of way transaction at Grants Pass. He advised that the insurance heretofore carried on the building has expired and that the building is being occupied by engineers of the State Highway Department. Further, that the building is valued at \$1,800.00 and that the annual premium for \$1,200.00 is \$53.00. He also said that the building is in fairly good condition and will not be needed for state highway purposes when the engineers vacate it. A decision in this matter was deferred by the Commission pending additional report from the Attorney as to how many buildings in this category are owned by the Highway Department.

A letter was presented from the Plywood, Veneer & Box-Shook Workers Union, Sheridan, Oregon, urging the installation of traffic signals at the entrance of the Salmon River Highway (McKinville-Tillamook Highway) into Sheridan and Willamina; also, requesting that railroad-crossing signals be installed at the two railroad crossings between Willamina and Sheridan, and that safety lanes be painted and signs be erected at these points for the benefit of pedestrian and vehicular traffic. The Engineer advised that the Traffic Engineer has made a thorough investigation of this matter and recommends the installation of one two-way beacon at the curve at the north end of the bridge and one one-way beacon at the curve at the south end of the bridge at Willamina, at an estimated total cost of \$200.00, provided the City of Willamina will pay the cost of operating the same. The Commission approved the recommendation.

The Engineer also reported on requests for traffic signals, lights, et cetera, at Newberg, Jefferson, Albany, and Baker. He said that these requests have been investigated by the Traffic Engineer, who recommends as follows:

Newberg: The Traffic Engineer recommended the installation of a semi-traffic-actuated signal at the intersection of First and College Streets at an estimated cost of \$2,500.00, and the installa-

JUN 20 1940

tion of flashing beacons at the intersection of First and River Streets and at First and Main Streets at an estimated total cost of \$300.00, subject to the Commission's established policy, which provides that the entire cost of the flashing beacons shall be paid by the state but that 50 per cent of the cost of the semi-traffic-actuated signals, being approximately \$1,250.00, shall be paid by the City of Newberg; and provided, further, that the city shall furnish the electrical energy required to operate all of the signals. The Commission approved the recommendation provided the city pays its share of the cost.

Jefferson: The Traffic Engineer recommended the installation of a flashing beacon at the intersection of Second and Main Streets, provided the city will pay the cost of electricity to operate it. The Commission approved the recommendation.

Albany: The Traffic Engineer recommended that the Commission defer its decision with respect to the installation of traffic signals at this place until the new highway route through the city is completed, at which time a new traffic survey will be made. The Commission approved the recommendation.

Baker: It was the recommendation of the Traffic Engineer that the request for traffic signals at this place be denied but that the matter of stopping traffic at the three intersections involved be modified so as to require three-way stops and that the city be requested to adopt parallel parking along the routes of state highways through this city. The Commission approved the recommendation. The Engineer was instructed to direct a communication to the City of Baker and inform them why, in the opinion of the Commission, traffic signals are not needed and to suggest to the City things that it could do to safeguard traffic.

In the discussion of this matter there arose the question of uniformity in the painting of traffic lanes. It appears that there is no particular uniformity in the painting of such lanes at the present time. The Engineer was instructed by the Commission to look into the matter.

A letter was presented from the Eastside Commercial Club, Portland, endorsing the request of the Union Avenue Association, Portland, for the better lighting of Union Avenue, route of the Pacific Highway East. The request was denied for lack of funds to finance it.

In the discussion of this matter it was pointed out that when the Commission approved the lighting project on Interstate Avenue, promise was given to the Public Roads Administration that such lighting would be extended later on to the Interstate Bridge. However, the work has not yet been done. The Commission decided to consider this project in its next program and instructed the Engineer to submit to the Commission in the meantime an estimate of cost to do the work.

JUN 20 1940

The Commission discussed a letter from Contractor Homer G. Johnson with respect to his bid submitted on June 13 for the construction of the German-town Road-Barnes Road Section of the Skyline Boulevard, in Multnomah County. Mr. Johnson alleges that a mistake was made in submitting his bid for Item 8B, "Heavy Tar in Place", and that the unit price for such item was inadvertently inserted in the space for Item 8A, "Asphalt in Place", it being his intention to limit his bid to the tar alternate, such mistake having been made by a clerk in his office. He said that this was an honest mistake and that he would not be justified in submitting a bid of \$16.50 per ton for asphalt. He also said that the bids submitted by the other contractors on this work were all based on the tar alternate and he pointed to such fact as evidence that he is acting in good faith in requesting that he be allowed to use tar instead of asphalt in this work. In this connection the Secretary also presented a letter from Contractor J. C. Compton of McMinnville, who expects to subcontract the oiling work, in which he verifies Mr. Johnson's assertions.

The Commission took the attitude that the contractor should be responsible for any bid that he submits and that it would be a mistake and would cause embarrassment in the future if this change were permitted. Accordingly, the request was denied. The Engineer was instructed to advise Mr. Compton by telephone of the action taken.

The matter of designating the Willamette Highway a through highway throughout its entire length had the attention of the Commission. The following resolution so designating this highway was adopted by the Commission by unanimous vote, upon recommendation of the Engineer, and the Engineer was instructed to install appropriate stop signs at all crossroads where warranted:

WHEREAS, the Willamette Highway is a state highway of primary importance and because of its connection with The Dalles-California Highway and the Pacific Highway carries a large volume of traffic; and

WHEREAS, said highway between its connection with the Pacific Highway at Goshen and its connection with The Dalles-California Highway near the town of Chemult is intersected by many local roads and by some roads serving various communities through which the Willamette Highway passes; and

WHEREAS, in the judgment of the Commission the Willamette Highway should be designated as a main traveled or through highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED BY THE COMMISSION, a majority of the members being present and affirmatively voting, as follows:

1. That the Willamette Highway from its junction with the Pacific Highway from the town of Goshen in Lane County throughout its entire length to its junction with The Dalles-California Highway near the town of Chemult in Klamath County be and the same hereby is designated as and declared to be a main traveled or through highway.

JUN 20 1940

2. That the Highway Engineer be and he hereby is instructed to place along said highway at all points where roads intersect the Willamette Highway appropriate signs or markers notifying drivers of vehicles to stop before entering or crossing the Willamette Highway. The Engineer is further instructed to place such signs or markers as nearly as practicable at the place where said cross or intersecting road meets the prolongation of the nearest property line of such through highway, and the place where such signs are installed shall designate to the drivers of motor vehicles entering said through highway from any of said cross or intersecting roads the place where the stop shall be made.

3. This resolution shall be entered in the minutes and records of the Commission as of the twentieth day of June, 1940, and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Lane County and the County Court of Klamath County, Oregon.

Reconsideration was given by the Commission to the matter of the use of the ocean beach at Seaside as an airplane landing field. The Attorney advised that he has investigated this matter and is of the opinion that the City of Seaside is fully within its rights in allowing the beach to be used for this purpose. Further, that the Highway Commission is without authority in the matter because the area that is being used by aircraft is outside of the area that is under the control of the Commission. In view of the Attorney's report the Commission decided to take no further action to stop the use of the beach for this purpose.

The Engineer reported that since the primary and secondary highway minor betterment budgets were approved by the Commission last fall additional construction work has been ordered by the Commission requiring increases in these budgets totalling \$63,944.00, of which amount \$34,892.00 is for primary minor betterments, \$23,932.00 is for secondary minor betterments, \$4,720.00 is for primary bridge betterment, and \$400.00 is for secondary bridge betterment. He submitted the following list of projects making up the totals and requested authority from the Commission to increase the budgets accordingly. The Commission approved the request unanimously and ordered that the increased amounts be paid from the Emergency Fund:

PRIMARY MINOR BETTERMENT

26-1626-163	Sprinkling system at S. plaza at Ross Island Bridge	\$ 760.00
26-1623-131	Grading and paving shoulder area in Tigard	3300.00
26-1620-153	Guard fence on Barbur Blvd. at Dr. Menne property	300.00
26-1615-172	Traffic islands at Sylvan	275.00
26-1615-131	Shoulder oiling between Portland and Sylvan (Canyon Road rock walls)	1220.00
	(Carried forward)	\$5855.00

Primary Minor Betterment (continued)

	Brought Forward	\$5855.00
34-1623-171	Reflectorized crossbuck signs in Tigard (labor only)	12.00
29-1612-154	Bridge replacement with pipe and grade widening in cooperation with Tillamook Co. (State's share)	5000.00
22-1604-107	Oil Main Street in Sweet Home	3000.00
27-1629-135	Repair sidewalk N. of Mornmouth	115.00
204-1621-110	Stabilize Elsie-Jewell Road	3000.00
21-1623-165	Remove rock point and widen roadbed S. of Waldport	600.00
17-1633-104	Pavement planing N. of Grants Pass	3500.00
17-1633-104A	Nonskid N. of Grants Pass	9000.00
6-1641-135	Oil footpath in Coquille	3200.00
10-1626-107	Widen and oil Pacific Highway in Sutherlin	125.00
20-1627-107	Surface and oil Lincoln Street in Florence	810.00
18-1616-154	60' of 18" C.G.I. pipe in Bly	175.00
9-1615-165	Remove 3 rock points on McKenzie-Bend Hwy.	75.00
28-1616-171	Preparation of site for marker for Wasco Co. Pioneer Ass'n	225.00
23-1615-154A	Lower ditch and install siphon on Old Oregon Trail	200.00
	Total	<u>\$34,892.00</u>

SECONDARY MINOR BETTERMENT

124-1671-104	Widen one block on State Street in Salem	1900.00
103-1661-104	Plane and nonskid 4.6 miles of Cascade Highway	6400.00
103-1663-131	Construct gravel shoulder at Estacada School	800.00
134-1665-171	Install crossbuck signs at Durham Sta. (labor only)	12.00
124-1665-163	Dig and transplant 100 Incense trees S. entrance to Mt. Angel	300.00
122-1663-107	Oil 1.62 miles at Thomas Cr.	1620.00
103-1663-107	Oil 2.46 miles on Woodburn-Sandy between contracts	2460.00
106-1665-153	Guard fence in Powers	40.00
120-1669-107	Stabilize and oil M.P. 0.0 to M.P. 2.61 in vicinity of Jasper	4500.00
120-1669-107	Stabilize and oil M.P. 2.61 to M.P. 5.22 in vicinity of Jasper	4500.00
106-1661-142	Storm sewer and catch basins in Charleston	1400.00
	Total	<u>\$23,932.00</u>

PRIMARY BRIDGE BETTERMENT

20-1623-151-08 and 09	Grade Revision at Goshen & Springfield	\$4720.00
	Total	\$ 4,720.00

JUN 20 1940

SECONDARY BRIDGE BETTERMENT

134-1665-152-06	Sidewalk on Fanno Creek Bridge	\$250.00	
120-1661-152-02, 03, & 04	Raise bridges to provide additional drainage area	150.00	
	Total		\$ 400.00
	Grand Total		\$63,944.00

The Engineer reported that, in accordance with authority previously granted him by the Commission, he has awarded contracts as follows:

Grading and surfacing Lone Rock Junction-Rock Creek Section of the Wasco-Heppner Secondary Highway, in Gilliam County. Bids taken May 3, contract awarded May 28, 1940, to M. L. O'Neil & Son, the low bidders, the conditions of the award having been satisfied.

Replacement of wire rope on Interstate Bridge over the Columbia River on the Pacific Highway between Vancouver and Portland. Bids taken June 14, contract awarded June 17, 1940, to Contracting & Sales Company, the low bidders, the conditions of the award having been satisfied.

The Commission confirmed the awards as reported.

The Commission discussed the claim of the Northwest Development Company, which company is represented by Hallock, Donald & Banta, attorneys-at-law, Baker, said claim having to do with the right of the company to conduct dredging operations across the right of way of the Sumpter Valley Secondary Highway, in Baker County, particularly in the NE $\frac{1}{4}$ of the SE $\frac{1}{4}$ of Section 32, T. 9 S., R. 37 E., W. M. The Engineer advised that when this matter first came to his attention it was thought that the development company simply wished to move its dredge from one side of the highway to the other, which would necessitate the digging of a trench only big enough to float the dredge and that the trench would be filled in immediately after the dredge was taken across the road, which operation would not interfere greatly with the traffic on the highway because it was intended to provide a good detour. However, it now appears that the company desires not only to cross the highway with its dredge but also wishes to conduct gold-dredging operations on the highway right of way, which is an entirely different matter and would prove very objectionable and would introduce an extreme hazard to highway traffic. He recommended denial of the company's request to conduct mining operations on the highway right of way but that the company be allowed to dig a trench of sufficient depth to float the dredge across the highway provided the company will backfill the trench immediately after the moving operation is completed and will provide a suitable detour for traffic around the scene of the operations. After discussion the Commission approved the Engineer's recommendation and instructed the Attorney to prepare an appropriate agreement covering the matter, which agreement is to state clearly that the authority granted by

JUN 20 1940

the Commission is simply to cover the movement of the dredge from one side of the highway to the other and not to cover mining operations on the highway right of way, which operations will be opposed by the Commission.

The Secretary reported that the Oregon Packing Corporation has renewed its request for a blanket permit authorizing the movement of its peaviners over state highways in the vicinity of Astoria. He advised that he is in receipt of a letter from the company stating that it is the equipment on which the peaviners are transported that is 12 feet in width and not the peaviners themselves and that they have cut down the width of the hauling equipment to 9 3/4 feet. The Commission considered that the movement of equipment of such width over state highways introduces too great a hazard to other highway traffic and accordingly confirmed its previous decision denying the request for a blanket permit. However, the Secretary was authorized to issue permits for individual movements during the present pea-harvesting season only, which is in conformance with the Commission's previous ruling on this matter.

The Engineer reported the cost to construct a proposed State Highway Department laboratory building in Salem. He estimated that the building, as planned, will cost about \$75,000.00. The Commission considered this too costly an undertaking at the present time and therefore deferred further consideration of the matter until next year.

The matter of granting permits for the moving of combination over-width and overlength loads over state highways had the attention of the Commission. The Commission authorized such movements in the event no part of the hauling equipment or the load would extend beyond the center line of the highway, such permits to be issued only in cases of emergency and in the event that the article being moved cannot be dismantled so as not to exceed the limits prescribed by statute.

The Engineer reported a request from the City of Albany for the construction of driveways across the Albany drainage canal at the south city limits of Albany. He said that the city has it in mind to develop certain property adjacent to the Pacific Highway East at the south city limits of Albany, and, in connection therewith, will need several road approaches from the highway. Further, that the Albany drainage canal parallels the highway at this location and, in the construction of such roadway approaches, it will be necessary to install drainage structures of some kind to carry the water. The drainage canal, he said, is located on city-owned right of way and has nothing whatever to do with the highway, although the canal was constructed in connection with a state highway contract. He estimated the cost of the structures at several thousand dollars and recommended denial of the city's request because, in his estimation, it is strictly a city responsibility. The Commission concurred in the viewpoint of the Engineer and thereupon approved his recommendation.

Consideration was given by the Commission to a request from the County Roadmaster of Douglas County for certain obsolete metal caution signs owned by the State Highway Department, which signs Douglas County desires to

JUN 20 1940

install on winding, crooked county roads, the work to be done by W.P.A. forces. The Engineer advised that the State Highway Department has approximately 500 of these old signs stored at the Highway Shops at Salem, consisting of curve signs, slow signs, narrow road signs, et cetera, and that for the most part they are not of much value since the Highway Department is now using reflectorized signs on primary highways. He further stated that these signs are made of galvaneal steel and could not be sold as junk. He recommended that they be given to Douglas County in accordance with the Road Master's request. The Commission approved the recommendation.

The Commission had under discussion a letter from the Feenaughty Machinery Company, Portland, with respect to its bid submitted as a result of the call for bids dated March 15, 1940, for one current-model road sweeper, which bid was accepted by the State Highway Department, but delivery of the sweeper could not be made by the Feenaughty Machinery Company because of misunderstanding with the factory, for which reason it was necessary for the Commission to re-order a sweeper from the next-low bidder at a higher price; and, in accordance with the provisions of the specifications, to hold the bid deposit of the Feenaughty Machinery Company. The company alleges that they were unable to deliver this road-sweeper through no fault of their own, but it was strictly on account of their disagreement with the factory; and, in view of the circumstances, they are asking for the return of their certified bid check. The Commission was of the opinion that to modify the specifications in this particular instance would establish a very undesirable precedent and lead to much embarrassment in the future purchases of equipment, and accordingly decided to retain the company's check. The Engineer was instructed to deposit the same in the state highway fund and to notify the Feenaughty Machinery Company of the action taken.

The Commission discussed a claim presented by L. T. Nicholson, Bend, for damage caused to his property by a falling tree in Bend. It appears that the tree was growing on a lot, a portion of which had been acquired by the state for right of way purposes, and that the major root of the tree extended into the area to be occupied by the roadway; and, when the excavation for the roadway was made, the root was cut and subsequently, during a wind storm, the tree fell on Mr. Nicholson's property, damaging his building and necessitating repairs to the same, costing \$29.64. The Attorney recommended payment of the claim notwithstanding that there is some question as to who is liable for the same. After discussion the Commission approved the recommendation.

The Secretary presented a resolution from the County Court of Josephine County vacating a certain section of the old Pacific Highway right of way in Josephine County heretofore abandoned by the State Highway Commission as a state highway since the highway has been reconstructed on other alignment, said section being described as all of that portion of the old Pacific Highway right of way 60 feet in width between the original Engineer's Station 210+10 and original Engineer's Station 314+17, save and excepting those portions lying within the right of way acquired on revised alignment constructed in 1932. The Commission approved the resolution and ordered it filed in the department records.

JUN 20 1940

The Commission considered and approved a letter from the County Court of Jackson County advising that the Court has decided that it has no use for the old right of way of the Green Springs Highway, in Jackson County, which was abandoned by the State Highway Commission on May 3, 1940, under Abandonment and Retention Resolution No. 72, on account of relocation of the highway on other alignment. The Secretary was instructed to file this letter in the department records.

The Commission discussed a report from the State Police Department relative to log-hauling operations on state highways in the vicinity of Grand Ronde. It appears that on June 12, 1940, officers Spaulding and Enahieser were engaged in the weighing of logging trucks at the Grand Ronde scales, and, in order to expedite the weighing, Officer Spaulding directed the truck drivers to the scales from a service station about 1 mile westerly thereof. It also appears that, during the process of weighing, three operators (viz., B. R. Bewley, Independence; Waldemar Herman Johnson, Tillamook; and Norman Francis Updegrave, Chiloquin) parked their loaded trucks on the parking area at the service station. In the opinion of the officer the trucks were overloaded and he directed the operators to proceed to the Highway Department's scales at Grand Ronde, which the operators refused to do, stating that they knew they would lose their P.U.C. licenses if their equipment were weighed. It appeared to the Commission that the operators were all aware of the fact that their trucks were overloaded and that the overloading was deliberate; further, that the operators were not cooperating in keeping the weight of their loads within the weight limits specified by statute. In view thereof the Commission ordered the cancellation of the permits of the three operators regardless of the number of trucks being operated by them, provided they have previously been apprehended for similar violations.

The Commission also had under discussion a report from the State Police Department regarding an accident that occurred on the McKenzie Highway involving a truck loaded with logs. It appears that the truck is owned by a Mr. George Clark and that logs were being hauled over this highway after dark, which is in violation of the provisions of the permit, and that the truck was not properly lighted and as a result was run into by a touring car driven by Mr. Robert F. Dawe of Eugene, whose car was badly damaged and who himself received personal injuries. The Commission considered that this violation justified cancellation of Mr. Clark's permit and so ordered.

The Engineer requested instructions relative to certain changes or amendments to the purpose and policy of the American Association of State Highway Officials in the establishment and development of U. S. numbered highways. He explained that there have been submitted to him by the Association, for approval or disapproval, four ballots covering the following changes: (1) An amendment to the definition of a "bypass route"; (2) An amendment to the definition of an "alternate route"; (3) An amendment to the policy in reference to the extension of U. S. numbered routes; (4) a change in the definition concerning the erection of signs on routes within the state. After discussion of these proposed amendments the Commission voted unanimously in favor of all of them and instructed the Engineer to cast an affirmative ballot for each in behalf of the Commission.

The Secretary presented a letter from the Newberg Chamber of Commerce requesting, on behalf of the Newberg Berrians, cooperation from the State Highway Department and the Oregon State Police in preventing congestion of traffic on the Willamette River Bridge at Newberg during their Second Annual Regatta on the Willamette River on Sunday, August 25, 1940, as was done last year. The Commission approved the request.

A letter was presented from the Good Roads Committee of Loon Lake Grange No. 721, Reedsport, requesting the support of the State Highway Commission in its efforts to have the C.C.C. road work continued on the county road which passes Golden and Silver Falls State Park, in Coos County. The Engineer was authorized to direct a letter to the U. S. Forest Service requesting the continuation of such work in the event the State Parks Superintendent, Mr. S. H. Boardman, is of the opinion that the road work is of value to the state.

The Commission considered and ordered filed resolutions from the Portland Chamber of Commerce and the Nyssa Chamber of Commerce requesting the designation of the Warm Springs Highway as a federal aid highway in order to expedite the completion of this highway. The Commission ordered that this matter be placed on the agenda for consideration at its next regular meeting.

A petition signed by numerous residents of Metolius, Culver, Madras, and other points in Jefferson County, in which protest was made to the changing of the route of The Dalles-California Highway through Jefferson County so as to bypass the towns of Culver and Metolius, had the attention of the Commission. The Secretary was instructed to inform the petitioners that the Commission has already adopted the new route and proposes to reconstruct the highway on such route as soon as funds are available to finance the work. The Engineer was instructed to ascertain what progress is being made by the irrigation company toward the construction of ditches and canals in connection with the Wickiup Irrigation Project, which project has necessitated the adoption of the permanent alignment for The Dalles-California Highway in this vicinity. When this report is rendered the Commission will then decide whether or not to authorize the Attorney to proceed with the securing of options for the right of way.

A letter was presented from Mrs. J. E. Meehan, Tillamook, concerning three lots that she owns in the town of Deer Island where the Commission proposes to improve the Columbia River Highway. Action on this matter was held pending personal inspection of the premises by Chairman Cabell.

The Secretary presented a resolution from the Ardenwald Community Club, Milwaukie, requesting the designation of Southeast 39th Street, Portland, as a state highway route. He also presented a letter from the Woodstock Community Club opposing any attempts to designate such street as the state highway route. The Commission ordered these communications filed.

The Commission also ordered filed letters dated June 17 and June 19 from E. J. Griffith, State Administrator, Works Progress Administration, concerning the construction of driveways and approaches to the Wilson River Highway and the Wolf Creek Highway where these highways are being constructed with

W.P.A. labor. Mr. Griffith advised that he is presenting this matter to their Washington, D.C., office for reconsideration in view of information received from the State Highway Engineer in reply to his (Mr. Griffith's) request for reimbursement for W.P.A. funds advanced for the financing of the construction of such driveways and approaches.

A letter was presented from the Vale Chamber of Commerce requesting that particular study be given by the Commission to the acute need for added secondary highway construction in Malheur County. The Commission decided to inspect the secondary highways in this county on the proposed inspection trip into Eastern Oregon later in the summer.

Letters were presented from the City of Tillamook requesting that a survey be authorized to determine the permanent location for state highways through the city of Tillamook; also requesting the loan of the services of the State Highway Department's lighting specialist to confer with the city officials in regard to the establishment of modern lighting along certain city streets and on state highway routes in Tillamook. The Commission approved both requests.

The Commission discussed and ordered filed a letter from E. A. Hollinshead, Portland, suggesting Sullivan's Gulch as a route for a state highway entrance into Portland from the east.

The Secretary reported receipt from the City of Prineville of a certified check in the amount of \$2,500.00, representing the city's contribution toward the cost of oiling Main Street in that town. The Commission accepted the payment and ordered that it be disposed of in conformance with previous understanding and agreement with the city.

The Secretary presented communications and petitions signed by numerous residents of Bradwood and Clifton communities along the Lower Columbia River Highway in which the Commission was urged to take necessary steps to improve the sight distance at a curve on the Columbia River Highway where such highway connects with the Bradwood and Clifton county road. The Engineer advised that a hazardous condition obtains at this junction, which should be remedied. He estimated the cost of the improvement at about \$1,500.00 and recommended that he be authorized to do the work. The Commission approved the recommendation.

The Commission discussed a letter from the Weston Chamber of Commerce requesting permission to place a sign on the highway right of way on each side of Weston, advertising Weston as the "Gateway to the Langdon Lake Recreational Area". The Commission denied the request as a matter of policy but offered no objection to the placing of these signs on the highway right of way within the city limits, where they will be beyond the jurisdiction of the Commission.

A letter was presented from Congressman James W. Mott in which suggestion was offered that the Highway Commission permanently locate the 82nd Street Highway (Cascade Highway) east of the schoolhouse through the town of

Clackamas as has heretofore been urged by the citizens of that district, which location, in his estimation, is the proper side considering the safety of school children. The Commission ordered the communication filed for future reference.

The Commission also considered and ordered filed a letter from Mrs. Pearl S. Koble relative to her claim against the State Highway Commission arising out of the reconstruction of the Pacific Highway through the Siskiyou Mountains in Jackson County, and a letter from the Seaside Chamber of Commerce approving the progress that is now being made by the Commission in constructing the Wolf Creek Highway.

The Commission discussed a letter from County Judge F. E. Gilkey, Lincoln County, giving as his understanding that the Highway Commission expects to reconstruct this year a section of the Oregon Coast Highway at Gleneden Beach, and giving as his thought that the funds appropriated for this project should be expended for the improvement of more important sections of this highway where the existing hazards are greater. The Secretary was instructed to inform Judge Gilkey that the Commission has decided to postpone the Gleneden improvement and has eliminated such project from the 1940 construction program in favor of a section of this highway in the vicinity of Depoe Bay.

In this connection a letter was presented from Mr. W. F. Carey, Gleneden Beach, renewing his request for the improvement of this highway past Gleneden Beach. The Secretary was instructed to inform Mr. Carey that the Commission regrets that its financial status will not permit construction of this project this year. However, the Commission will consider it in the formulation of next year's budget and will authorize the purchase of needed right of way for the same if the Commission can see its way clear to do the work next year.

The Commission considered a letter from Mr. Leon D. Pitts, Warren, Oregon, in which the Commission was asked to reconsider its previous decision refusing him permission to construct a private roadway, about 150 feet long, across state-owned property between the old and new routes of the Columbia River Highway at Warren, so as to provide the general public with easy access to his store building which is located on the old highway. A decision in this matter was deferred pending personal inspection of the premises by Chairman Cabell.

The Commission considered and ordered filed resolutions from the City of Portland and the Commissioner of Public Docks, Portland, approving the plans of the Highway Commission for the improvement of Front Avenue in Portland as an arterial highway route.

The Engineer reported receipt of a communication from Unatilla County Court requesting the privilege of purchasing some crushed rock from the state-owned stock pile south of Nye Junction on the Pendleton-John Day Highway for the use of Mr. Jim Whitaker, a local citizen, in the gravelling of his private road in that vicinity. The Court advised that Mr. Whitaker donated

JUN 20 1940

the right of way for about 2 miles of state highway in this vicinity and also permits the maintenance of snow fence on his property each year without cost. Furthermore, Mr. Whitaker is willing to pay for any of the rock that he might use. The Engineer pointed out that it is contrary to the Commission's established policy to dispose of any stockpiled material for private use. He advised, however, that this particular case is somewhat different, inasmuch as it could be considered that the rock is being sold to the county, which, in turn, would deliver it to Mr. Whitaker as a means of satisfying the county's obligation. He recommended, in view thereof, that the request be granted, provided Umatilla County will pay for the rock. The Commission approved the recommendation.

The Commission also considered a letter from the Umatilla County Court requesting that the 40-foot steel span bridge on the Athena-Cold Springs Secondary Highway, in Umatilla County, which has been replaced by a standard timber trestle, be turned over to the County Court for use on one of its county roads. The Engineer advised that this structure is of no value from the state highway standpoint and that the bridge has been dismantled and is stored in the Highway Department's maintenance yard in Pendleton. He recommended that it be given to Umatilla County provided the county will agree to rebuild the floor system, which is in poor condition, so that when it is re-erected it will be safe for traffic. The Commission approved the recommendation.

A letter was presented from the Arizona State Highway Department giving a tabulation showing the average field engineering costs incurred by that department on various classes of highway construction work. The Engineer advised that the average field engineering cost on all classes of projects for the State of Oregon is 6.3% of construction costs, which is considerably less than the average for the State of Arizona. The Commission took no action on this matter.

The Commission discussed and ordered filed letters as follows:

Letters from Clarno Grange and Fred Metteer, Fossil, Oregon, urging the Commission to personally inspect the Fossil-Shaniko Secondary Highway some time this summer;

Letter from the Lebanon Lions Club urging the Commission to consider the matter of preserving timber strips along the Santiam Highway, in Linn County, between Cascadia and Foster;

Letter from Tillamook County Court commending the Commission for the progress that is being made in the construction of the Wilson River Highway.

The Commission discussed a letter from the Tigard Businessmen's Club requesting permission to construct a roadway on the right of way of the Pacific Highway West in Tigard, said roadway being an extension of Center Street, to serve as a shortcut from Greenberg Road to the Tigard business district. The Engineer recommended that the request be denied because there is very little right of way at this point that is not being covered by embankment slopes

JUN 20 1940

and it was his thought that if this roadway were constructed it would have very short sight-distance at the point where it connects with the county road under the railroad viaduct and would result in a very dangerous intersection. The Commission approved the recommendation.

A letter from the City of Cascade Locks, requesting the Highway Commission's approval of certain W.P.A. improvements that the city plans to undertake on the Columbia River Highway in that city, had the attention of the Commission. The Engineer advised that the city has in mind the improvement of certain city streets involving minor improvements on the Columbia River Highway right of way, including the cutting of concrete curbs at certain places, and that they plan to do the work as a W.P.A. project, but the W.P.A. officials will not approve the project until they are furnished a letter from the Highway Commission authorizing the work on the highway right of way. He recommended approval of the city's request. The Commission approved the recommendation.

A communication was presented from the State Land Use Planning Committee, Corvallis, suggesting that someone representing the State Highway Commission be authorized to accept appointment on their committee as they feel that the Highway Commission's work in planning roads has a very definite relationship to the land-use planning activities of both the state and county committees. The Engineer recommended approval of the request and that Assistant State Highway Engineer C. B. McCullough be authorized to represent the Commission in this matter. The Commission approved the recommendation.

The Commission considered and denied the claim of Mr. Benjamin Gant for financial assistance in paying doctor bills, et cetera, incident to an accident that occurred on the Powers Secondary Highway, resulting in injuries to his wife and son, it being the Commission's contention that the accident occurred through no fault in the condition of the highway, hence the state is not liable.

The Commission read and ordered filed a letter from G. O. Hamilton, Portland, suggesting legislation to prohibit the operation of trucks on state highways from noon on Saturdays to midnight on Sundays, and a letter from Zone Council No. 10, Federation of Community Clubs, Multnomah County, opposing any movement or legislation for the purpose of acquiring new streets, highways, et cetera, which will in any way jeopardize the life of any established institution.

Similar action was taken by the Commission on an editorial from the Albany Democrat-Herald complaining of the condition of the Albany-Scio Secondary Highway, inasmuch as the Commission has already made plans for the improvement of this road.

The Commission discussed, approved, and ordered filed certain resolutions adopted by the Executive Committee, American Association of State Highway Officials, at its meeting in Chicago, Illinois, on June 3, 1940.

The Commission had under discussion a resolution from the Fifth

JUN 20 1940

District, Oregon Federation of Women's Clubs, expressing sentiment for the re-designation of U. S. Highway No. 30 as the Old Oregon Trail; also, a letter from Carol R. Belden, Seaside, opposing such change in designation. The Commission voted unanimously not to make any change in the present designation of this highway.

A communication from Cornelius O'Donovan, Portland, directed to Marion County Court, and County Judge J. C. Siegmund's reply thereto, having reference to the construction of a proposed highway from Marquam to Gates, in Marion County, was brought to the attention of the Commission. Mr. O'Donovan urged the construction of this section in the near future. Judge Siegmund advised him that the county is not able financially to undertake the improvement, although it would offer no objection to the State Highway Department undertaking the project if it so desires. The Engineer advised that this project is entirely through a new section and has not been considered seriously for any program of construction in the near future because of the many other projects that have priority. The Commission ordered the communications filed.

The Commission also ordered filed a resolution from Chenoweth Grange No. 591, The Dalles, endorsing any effort that is made for the removal of tolls on bridges and ferries operating across the Columbia River between the states of Oregon and Washington.

A letter was presented from John L. Lamar, Scappoose, Oregon, directed to Governor Sprague and referred by him to the State Highway Commission, in which letter Mr. Lamar urges the retention of the present route of the Columbia River Highway south of Scappoose at the point where the Highway Commission has plans to relocate the highway parallel to the S. P. & S. railroad tracks, which relocation passes through a cemetery plat. The Engineer advised that funds have already been budgeted by the Commission for this proposed improvement and that the project is ready for advertising for bids as soon as right of way matters have been cleared. The Attorney advised that the right of way will all be acquired within about a week. The Commission decided not to revise its plans for the improvement and authorized the Engineer to advertise the project for bids as soon as right of way matters have been definitely clarified.

The Engineer reported that the controversy with Mr. L. Flews, Dundee, Oregon, relative to the moving of his pump island adjacent to the Pacific Highway West at Dundee, has been disposed of to the satisfaction of all parties concerned, including the Union Oil Company of California, which has this property under lease.

The Commission read and ordered filed a news item from the Klamath Basin Progress complimenting the State Highway Department for the speedy restoration of traffic along the Algoma Section of The Dalles-California Highway, which section was recently flooded by reason of a break in a dyke on Klamath Lake.

Letters were presented from County Judge Clinton Hurd of Lane County and Mayor Elisha Large of Eugene, in which the Commission was urged to designate and construct, as a state secondary highway, a connecting road between

JUN 20 1940

the Pacific Highway and the so-called "Route F" Highway (6th Street to 11th Street), Eugene, commencing at a point on the Pacific Highway near the curve at the west end of 6th Street and extending southerly therefrom. The Engineer advised that the proposed roadway will be a section of the Pacific Highway at some future time when this highway is constructed on its eventual route, by-passing Eugene; furthermore, a portion of the same (viz., between 6th Street and 7th Street) will be needed in connection with the Commission's present plans for routing southbound traffic along 7th Street through Eugene. He recommended approval of the request for these reasons and for the further reason that it will provide a good connection between the Pacific Highway and "Route F". The Commission approved the recommendation subject to the condition that formal request for such designation be submitted by the Lane County Court.

The Engineer discussed with the Commission matters pertaining to the reconstruction of the Oregon Coast Highway through the town of Brookings, in Curry County. He advised that the people of this town are extremely anxious that the Commission award a contract for this work at its July meeting. He questioned whether or not the right of way situation will have been clarified by that time and gave as his thought that it would not be possible to advertise the work until this fall. The Commission approved the fall letting of this contract if right of way matters have been disposed of by that time.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Stock File	- 104-2834	- Elsie-Vernonia Section, Nehalem Secondary Highway, Clatsop County.	1st authorization - \$100.00
Right of Way	- 4-2835	- West Lake-Gearhart Junction Section, Oregon Coast Highway, Clatsop Co.	1st authorization - \$150.00
Plans	- - - - 6-2821	- North Bend-Marshfield Section, Oregon Coast Highway, Coos County.	1st authorization - \$360.00
Plans	- - - - 7-2808	- Crooked River-Prineville Section, Ochoco Highway, Crook County.	5th authorization - \$350.00 Total to date \$1,800.00
Reconn.	- - - - 9-2830	- Bend-Lapine Section, The Dalles-California Highway, Deschutes Co.	1st authorization - \$1,450.00
Plans	- - - - 11-2810	- John Day River-Blalock Section, Columbia River Hwy. Gilliam County.	3rd authorization - \$700.00 Total to date \$1,527.50
Reconn.	- - - - 18-2846	- Crescent-Diamond Lake Section, The Dalles-California Hwy., Klamath Co.	1st authorization - \$1,550.00

JUN 20 1940

Right of Way - 19-2823 - Paisley-Lakeview Section, Fremont Highway. Lake
County. 1st authorization - \$160.00

Location - - - 20-2834 - Eugene-Wilbur Section, Pacific Highway. Lane County.
2nd authorization - \$9,580.00
Total to date \$35,260.00

Gravel Pit - - 220-2842 - Houston-Veneta Section, Route "F", Lane County.
1st authorization - \$175.00

Plans - - - - 220-2842 - Houston-Veneta Section. Route "F", Lane County.
2nd authorization - \$250.00
Total to date \$425.00

Plans - - - - 122-2823 - Crabtree-Scio Section, Albany-Lyons Sec. Hwy., Linn
County. 2nd authorization - \$420.00
Total to date \$570.00

Bridge - - - - 26-2843 - Interstate Bridge (Vancouver), Pacific Hwy., Multno-
mah County. 1st authorization - \$300.00

Plans - - - - 126-2845 - Vancouver Ave.-82nd St. Section, Northeast Portland
Hwy., Multnomah Co. 1st authorization - \$900.00

Location - - - 128-2809 - Tygh Valley-Grass Valley Section, Sherars Bridge
Highway, Sherman Co. 1st authorization - \$3,000.00

Plans - - - - 31-2818 - Cricket Flat-Wallowa County Line Section, Wallowa
Lake Hwy., Union Co. 2nd authorization - \$1,900.00
Total to date \$5,000.00

Reconn. - - - 233-2824 - Wamic-Bear Paw Springs Section, Wasco County Road,
Wasco County. 1st authorization - \$1,000.00

The Engineer reported that Contracts Nos. 2226, 2244, 2251, 2275, 2292, and 2314, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2226, with Averill & Corbin, for construction of eight culverts and one bridge on the Albany Section of the Pacific Highway East, in Linn County.
Completed June 19, 1940.

JUN 20 1940

Contract No. 2224, with Edlefsen-Teygandt Company, for paving the Oregon Slough-Columbia Slough Section of the Pacific Highway West, in Multnomah County. Completed May 31, 1940.

Contract No. 2251, with Saxton, Looney & Risley, for surfacing and oiling the Jordan Creek-McNamer's Camp Section of the Wilson River Highway, in Tillamook County. Completed May 24, 1940.

Contract No. 2275, with E. C. Hall Company, for surfacing and oiling the Pleasant Hill-Oakridge Section of the Willamette Highway, in Lane County. Completed June 12, 1940.

Contract No. 2292, with Homer G. Johnson, for grading the Ochoco Creek-Prineville Section of the Warm Springs Secondary Highway, in Crook County. Completed May 31, 1940.

Contract No. 2314, with Coos Bay Dredging Company, for grading and surfacing the North Bend (Midland Addition) Section of the Cape Arago Secondary Highway, in Coos County. Completed June 17, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Joint letter with W. H. Lynch, District Engineer, Public Roads Administration, directed to the Commissioner of Public Roads, Washington, D. C., recommending that approximately 50 per cent of the 1941 fiscal year public lands funds, amounting to \$64,600.00, heretofore apportioned to the State of Oregon, be allocated to finance additional construction work on the Warm Springs Highway in Wasco County.

Quitclaim deed conveying unto L. O. Harra two tracts of land containing 2.031 acres and 0.2 acres, respectively, in Polk County. Right of Way File No. 1293.

Agreement with Elmer Taylor and Myrtle Taylor, husband and wife, covering the lease of certain property in the town of Alsea, Benton County, for use in connection with highway construction maintenance and operation. Real Property File No. 8150.

JUN 20 1940

Agreement with Polk County covering the lease of certain county-owned property for a maintenance headquarters site at Dallas, Oregon.

Agreement with Edward L. Dimmitt extending for one year the lease of the Vista House on Crown Point, Columbia River Highway, or until December 31, 1940.

There being no further business to come before the Commission at this time, the meeting was adjourned at 1:15 a. m.

Henry F. Cabell
Chairman

Huron W. Clough
Commissioner

Portland, Oregon, July 18, 1940

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the furnishing of ferry service across the Willamette River at Wilsonville were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 4:00 p. m. in the same room:

	<u>Per Month</u>
Leonard & Slate	\$ 1,250.00

Mayor Clifton Richmond, Klamath Falls, came before the Commission and requested an advance of state funds to finance the city's share of the cost to install traffic lights in the city of Klamath Falls, amounting to about \$7,500.00. He advised that the city voted a 1-mill levy to pay for the lights but the amount has not yet been collected and they are very anxious to proceed with the installation and thought perhaps the State Highway Commission would advance the necessary funds if the city agreed to reimburse the Commission at a later date. Chairman Cabell explained the Commission's policy with respect to such matters, which precludes the advancement of state funds and requires a deposit from the city or county, as the case may be, guaranteeing that the state will be reimbursed in the event that the state does the work. It was suggested that the city endeavor to find some other way to finance its project. The Commission agreed to advertise the project for bids as soon as the city arranges to pay its share of the cost.

Mr. T. B. Watters, Klamath Falls, came before the Commission in behalf of the Klamath County Court and the Klamath County Chamber of Commerce relative to the following:

- (1) Additional federal aid secondary highway construction work. Mr. Watters alleged that Klamath County has not received, in the last year or two, benefits from the federal aid secondary highway fund,

JUL 10 1940

and suggested an allocation of at least some of the 1941 funds to this county. Chairman Cabell explained the status of the Commission's finances and the basis of allocation of the funds under discussion, particularly pointing out that, due to the small amount of such funds available, it is not possible to distribute them to all of the counties and undertake projects of any great size. The Commission tries to be fair in the matter, he said, and, in order to avoid doing a lot of very small jobs in all of the counties, has considered it advisable to undertake a comparatively few jobs in about half of the counties in any one year, and then the following year to allocate the funds for improvements in the remaining counties. After further general discussion of the matter the Engineer was instructed by the Commission to send to Mr. Watters a statement showing the distribution and expenditure of the funds under discussion.

(2) Designation of the Klamath Falls-Merrill-Hatfield Road as a federal aid highway. Mr. Watters urged the placing of this road on the federal aid highway system in order to expedite reconstruction of the same to modern standards. He advised that the State of California is arranging to so designate the California Section of this highway and gave as his thought that the State of Oregon should so designate the Oregon section. Action on this matter was deferred by the Commission pending receipt of information from the California Highway Department as to its intentions in this regard. The Engineer was instructed to obtain this information and report back to the Commission.

(3) Additional improvements on The Dalles-California Highway between Klamath Falls and Modoc Point. Mr. Watters inquired as to the Commission's plans for further improvement of this section. He was informed that the Commission has \$100,000.00 of state and 1941 federal aid funds budgeted to grade, surface, and construct bituminous macadam on the 5-mile section between Algoma and Terminal City and that it is proposed to take bids for this work next spring. Mr. Watters urged the contracting of the work this fall, if possible. After some discussion the Commission authorized the Engineer to advance the project for fall letting, if possible to do so without postponing some other project. He was instructed to investigate the possibilities and advise Mr. Watters in regard thereto.

(4) Improvement of the "Lake of The Woods" Road. Mr. Watters asked for an appropriation to improve this road which, he said, is in very unsatisfactory condition at the present time. The Commission denied the request on account of lack of funds with which to finance the work.

County Judge F. E. Gilkey, of Lincoln County, and Dow Walker, Toledo, came before the Commission in regard to the Siletz Secondary Highway. They advised that log hauling is being carried on extensively over this road and during the last two weeks the road has broken down in numerous places, and, as a

JUL 10 1940

consequence, truck-hauling of logs has had to be suspended and if something is not done to remedy the situation soon it will be necessary for the big mill belonging to the C. D. Johnson Lumber Company at Toledo to suspend operations. The Engineer advised that the condition of this road was brought to his attention a few days ago and he immediately ordered minor repairs, which are now under way. However, they are of a temporary nature only and what the road really needs is a major improvement. He recalled that the Commission heretofore budgeted a certain amount of funds to finance a partial improvement of the section between Toledo and Siletz and advised that since the budget was prepared he has inspected the road and ascertained that the amount is insufficient to properly do the work that is needed. He recommended a combination state- and government-financed project, costing approximately \$113,000.00, the state's share to be about \$40,000.00 and the government's share about \$73,000.00 and that the project be advertised for bids at the earliest possible time so as to make certain that the road will be in good condition throughout the coming winter. He advised that there is considerable work to be done in preparing the project for contracting and that it would not be possible to take bids for the same until the September meeting of the Commission, so that about all the work that could be done this year is the grading and surfacing, which would leave the oiling work to be done next spring. After considerable discussion the Commission approved the arrangement as outlined by the Engineer and authorized the contracting of the work in accordance with his recommendation.

The Commission adjourned at 12:30 p. m. and reconvened at 1.45 p.m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The County Court of Tillamook County, consisting of County Judge Harland M. Woods and County Commissioners E. G. Anderson and E. H. Lindsey, came before the Commission in regard to the allocation of the fiscal year 1941 federal aid secondary highway funds. They inquired as to how much of this money has been allocated to Tillamook County and what project the Commission proposes to construct with such funds. They were informed that on account of the limited amount of secondary funds available the Commission has found it necessary to limit its allocation in Tillamook County to \$30,000.00, and that the Commission proposes to apply these funds to the improvement of the Fairview-Clemens Corner County Road, particularly the section between the Trask River and the junction with Federal Aid Route No. 2, approximately 5 miles south of Tillamook, the work to consist of grading, surfacing, and oiling, and being a continuation of the improvement completed last year. Chairman Cabell pointed out that this project is contingent upon the county furnishing the necessary right of way. The county court appeared dissatisfied with the amount of funds allocated Tillamook County but agreed to abide by the Commission's decision in the matter.

Judge Woods then renewed the county's request for the placing of the Tillamook-Netarts Road on the state secondary highway system. The Commission took the matter under advisement.

Commissioner Lindsey requested the oiling of the strips between the highway pavement and the curb lines through the town of Wheeler. The Engineer

JUL 10 1940

advised that this matter has been investigated and it is estimated that the work will cost about \$300.00. He recommended approval of the project and that the work be authorized for construction this year in the event a state ciling crew is available in that vicinity. The Commission approved the recommendation.

Judge Woods inquired as to the Commission's plans for completion of the Oregon Coast Highway in the vicinity of Arch Cape. The Engineer advised that all of the grading work either has been completed or is under contract and that there remains to be done only the surfacing and oiling between Hug Point and Mansanita. Further, that the Commission has already budgeted funds to finance this work and that it is expected that the contract for the same will be awarded some time this fall.

A delegation from Tillamook and Washington Counties appeared before the Commission in regard to the Wilson River Highway. This delegation consisted of the County Court of Tillamook County, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson; Washington County Court, represented by County Judge H. D. Kerkman and County Commissioner J. W. Hughes; Jack Aschim, Secretary of the Tillamook Chamber of Commerce; Robert Brady; C. W. Barrick, City Attorney of Tillamook; Oscar Effenberger, Tillamook; L. G. Apperson, Portland; and Mr. Woodford of Forest Grove.

The Engineer pointed out that available W.P.A. funds will be exhausted by August 2, 1940, and that the work on this project will have to close down on that day unless the federal authorities will approve the new W.P.A. project for this highway, application for which has been pending for about six months. Chairman Cabell advised that the State Highway Commission filed this application for additional funds last November and since that time has been doing all that it can to secure approval of the same. Further, that the Portland office of the W.P.A. has recommended the project to the officials in Washington, D.C., but it appears that for one reason or another approval has been deferred, although information received within the last few days indicates that such approval will be forthcoming soon. Judge Woods suggested that the state take over this work in the event that the new W.P.A. funds do not materialize. He was informed that the Commission is not prepared to assume such responsibility.

Commissioner Lindsey inquired whether or not the Commission would take the state equipment away from this job in the event the new W.P.A. project is not approved shortly. He was informed that the Commission would leave its equipment on the job a reasonable length of time and if, for any reason, all or any part of the equipment were taken away for use on some other project it would be returned as soon as the new W.P.A. funds are received and work on the Wilson River project is ready to be resumed. There followed a general discussion of matters pertaining to this work.

Judge Woods invited the Commission and its staff to join the caravan inspection trip which is to be made over the Wilson River Highway on Thursday, July 25, 1940, to be followed by a banquet in the city of Tillamook. Chairman Cabell thanked him for the invitation on behalf of the Commission and advised

JUL 13 1940

him that he would be present if possible. In any event, the Commission will be represented, he said. Commissioners Clough and Oliver expressed regrets that it would be impossible for them to attend on account of personal business matters.

Mr. Bernard Blum, Chief Engineer, and Mr. A. J. Witchel, Assistant Superintendent, S. P. & S. Railroad Company, came before the Commission relative to the proposed installation of traffic signals at the railroad crossings on 14th Street, Doan Street, and Balboa Street, in Northwest Portland. They advised that, due to the many parallel car tracks at the 14th Street location, it appears impossible to install a standard railroad crossing signal at this location, for which reason they prefer the elimination of this particular signal from the Commission's program and the substitution therefor of a standard-type signal installation at the Balboa Street crossing where there is a large volume of truck-traffic to and from the oil company's plants. The Traffic Engineer, Mr. John Beakey, advised that federal approval has been secured for the installation of signals at 14th Street and at Doan Street. However, subsequent investigations reveal that it would be impossible to install a standard-type signal at the 14th Street crossing. He further advised that, while there is no record of any accidents having occurred at the Balboa Street crossing, the potential hazard to traffic is great. He recommended approval of the request of the railroad company. The State Highway Engineer concurred in the recommendation, provided the Federal Government will approve the change. The Commission approved the recommendation unanimously.

The County Court of Linn County, represented by County Judge J. J. Barrett and County Commissioners H. A. Renninger and H. W. Cooley, was present and inquired as to the plans of the Highway Commission with respect to the old Pacific Highway routes through Albany upon completion of the new highway through this city. The Engineer advised that the plans for the Albany project provide for connections of the old highway with the new highway at both south and north entrances into Albany and that an arrangement has been devised, after a very careful study of traffic conditions, for a division of traffic so as to enable traffic destined for Albany to use the old entrances with a minimum amount of hazard in crossing the new highway. He explained the plan in considerable detail. Judge Barrett advised that the people of Albany are not satisfied with this arrangement and want direct two-way connections between the old highway and the new highway. After considerable discussion it was decided that the Engineer should go to Albany some time during the following week and explain the details of the plan to the County Court on the ground. Commissioner Renninger inquired whether or not it is the plan of the Commission to close the old highway route into Albany from the north. He gave as his understanding that this road is to be closed upon completion of the new highway. He was informed that the Commission has no plans to that end but the information that he (Mr. Renninger) has received is no doubt a rumor which has originated because of the plan of the Commission to close this approach for two or three days after the new highway is opened for traffic so as to permit certain repairs to the bridge on the old route.

The County Court also inquired as to the Commission's plans for completing the South Santiam Highway. They were advised that progress on this

JUL 10 1940

work is being carried on as rapidly as is possible with funds available; that the state has \$75,000.00 budgeted for additional oiling work on the state's portion between Cascadia and Trout Creek but the contract cannot be awarded until next spring; also, that \$100,000.00 of fiscal year 1941 forest highway funds have been allocated for this highway, which it was intended to contract this year, but the federal funds have not as yet been released, so the work will have to be delayed. However, it is intended to place the work under contract as soon as possible.

Messrs. Howard Harker and Roy Earwood, Prineville, accompanied by their attorney, Mr. R. J. Brown, Prineville, came before the Commission in regard to settlement for right of way needed for the Warm Springs Secondary Highway between Madras and Prineville. They advised that they are unable to reach an agreement with the Highway Department's right of way agent for land taken from them and urged reconsideration of the state's offer and payment of damages to them in proportion to the resale value of their properties, including increased amounts by reason of severance. Action on this matter was deferred by the Commission pending consultation with the right of way agent, Mr. Harry Benson, and inspection of the property by Commissioner Oliver.

A delegation from Washington County came before the Commission and asked for the surfacing of the Sylvan Section of the Wolf Creek Highway, which has heretofore been graded by W.P.A. forces. Members of this delegation were as follows: County Judge H. D. Kerkman and County Commissioners James Lewis and J. W. Hughes; Fred, George, William F. and Edna Durig; R. Beamish, H. Bauer, Herman Jenne, Henry Johnson, Mrs. Tom C. Gallagher and Mrs. H. A. Chambers, Charles W. Duefre, Paul Stalder, Essher V. Alean, Frank H. and Gordon F. Reeves and E. R. Hoagard. Judge Kerkman headed the group and urged the surfacing of this road so that it can be used by adjacent property owners.

The Engineer pointed out that there is no connection at present between the Wolf Creek Highway and the Tualatin Valley Highway and that the plans for this connection involve construction of an expensive traffic separation structure, which is an absolute necessity in order to avoid a serious traffic hazard that would obtain if the two highways were connected in any other manner. Judge Kerkman suggested a temporary connection along a private road near the Mount Calvary Cemetery, which he thought would serve the purpose until the Commission could see its way clear to construct the grade separation structure. The Commission indicated reluctance to spend any money to improve the present grade at this time, particularly in view of the fact that the Commission is spending so much money to complete the westerly end of this highway, which it considers of primary importance, and for the further reason that the Commission does not consider that it is obligated to the people who have purchased property adjacent to the Sylvan Section since this section was graded. However, Chairman Cabell agreed to inspect the project some time this month.

Judge Kerkman inquired into the possibilities of securing about 2000 cubic yards of material from the state's borrow pit at Tigard after the highway work now under way at that place is completed. He said that the county would like this material for use in connection with some county work that it contemplates in this vicinity and would appreciate authority from the Commis-

JUL 13 1940

sion to secure the materials from this source. The Engineer was instructed to look into the matter.

Mr. George H. Clark, Eugene, came before the Commission in regard to reinstatement of his permit for the truck-hauling of logs over the McKensie Highway east of Eugene, which permit was ordered cancelled by the Commission at its previous meeting because Mr. Clark violated the provisions thereof by hauling logs during hours of darkness and without proper lights on his truck and for the further reason that his truck was involved in an accident which caused serious injury to Mrs. Robert F. Dawe and damaged Mr. Dawe's automobile.

Mr. Clark made an urgent plea for reinstatement of his permit. His request was granted by the Commission after considerable discussion, under the condition that hereafter Mr. Clark would abide strictly by the provisions of the permit and would not violate these provisions again. He was warned that the Commission would probably impose a more serious penalty in the event he is again arrested for a traffic violation.

Mr. W. S. Allan, Dundee, Oregon, was present and extended an invitation to the members of the Commission and its staff to be the guests of the people of Dundee and vicinity at a celebration to be held upon the completion of the construction of the Dundee Section of the Pacific Highway West. The Engineer advised that this project would be completed the early part of September. Mr. Allan was advised that the Commission would be pleased to accept the invitation if possible, but, because of several other engagements, could not state definitely now. However, the Commission will be represented at this function. The Engineer was thereupon instructed to contact Mr. Allan and arrange a convenient date for the gathering.

Mr. Lee Lewis, Corvallis, administrator of the estate of Miles Homer Otis, deceased, who lost his life as a result of an accident on the Corvallis-Newport Highway on July 28, 1939, came before the Commission and requested payment of damages in the amount of \$5,000.00. He alleged that the accident which resulted in Mr. Otis's death was caused by loose gravel spread on the surface of the road by State Highway Department employees. He said that Mr. Otis was an elderly man and that he did not drive his car in excess of 35 miles per hour and that on this particular day he encountered large gravel on the highway which caused his car to skid off the road and crash into a tree, resulting in his death.

The Engineer advised that the conditions obtaining at the time of the accident were not unusual for light-oil surfaced roads, of which there are many throughout the state. During hot weather, he said, it is the practice to spread a thin layer of screenings on the road surface to eliminate the bleeding of the oiled surface and the splashing of the oil and that this is the operation that was under way at the time of the accident. He read aloud the report of Maintenance Engineer J. N. Bishop, report from the State Police officer who investigated the accident, and several written statements from residents of the district who had first-hand knowledge of the conditions, and gave as his thought that the condition of the road was not responsible for the accident. After considerable discussion the Commission took the matter under

JUL 10 1940

advisement and informed Mr. Lewis that a decision would be rendered as soon as possible.

At 4:00 p. m. Chairman Cabell announced the award of contracts, bids for which were received at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Corvallis-Lincoln School Section of the Pacific Highway West, in Benton County. 0.80 mile grading and paving. The United Contracting Company, Portland, submitted the low bid for this project in the amount of \$52,791.00. J. C. Compton, McMinnville, submitted the next-low bid in the amount of \$53,133.90. There were two higher bidders. The Commission awards this contract to the United Contracting Company at its low bid of \$52,791.00.

"Marshfield-Bunker Hill Section of the Oregon Coast Highway, in Coos County. 0.39 mile grading and paving. The low bid received for this project was that of R. I. Stuart & Sons, Medford, in the amount of \$46,248.00. The next-low bid was that of the Coos Bay Dredging Company, Marshfield, in the amount of \$48,291.50. There were two higher bidders. The Commission has rejected all bids received for this work and has ordered the project readvertised.

"East Unit of Lava Falls-Bend Section of Century Drive Secondary Highway, in Deschutes County. 2.0 miles oiling. Warren Northwest, Inc., Portland, submitted the low bid in the amount of \$5,136.00, for this work. J. C. Compton, McMinnville, was the second-low bidder with his bid of \$5,492.00. There were two higher bidders. The Commission has rejected all bids received on this project.

"John Day Section of the John Day Highway, in Grant County. Construct 40-foot concrete bridge over Canyon Creek in the city of John Day. The low bid received for this structure was that of William Zickler, John Day, in the amount of \$8,888.00. The next-low bid was that of Harry I. Hamilton, Eugene, in the amount of \$9,578.80. There were 11 higher bidders. This contract is awarded by the Commission to the low bidder, William Zickler, at his bid of \$8,888.00.

"Veneta-Fisher Road Section of the Eugene-Veneta County Road, in Lane County. 5.23 miles grading, surfacing and oiling and construction of five bridges. The low bid received for this project was that of Berke Bros., Portland, in the amount of \$105,353.00, based on the use of asphalt. They did not submit a bid based on the use of tar. Leonard & Slate, Multnomah, submitted the second-low bid in the amount of \$107,573.00, based on the use of tar. They did not submit a bid using asphalt. There were 6 higher bidders. The Commission has referred all bids for this project to the Engineer with power to award the contract to the low bidders, Berke Bros., when certain conditions have been fulfilled.

JUL 10 1940

"Albany Section of the Pacific Highway East, in Linn County. 3.8 miles roadside improvement. E. L. Gates, Trail, was the low bidder for this project with his bid of \$45,544.00. Leonard & Slate, Multnomah, were the next-low bidders with their bid of \$49,477.50. There were 3 higher bidders. The Commission awards this contract to E. L. Gates, the low bidder, at his bid of \$45,544.00.

"Sanderson Bridge-Crabtree Creek Section of the Albany-Lyons Secondary Highway, in Linn County. 2.46 miles grading, 3.89 miles surfacing, 4.20 miles oiling; also construction of three bridges. The low bid received on this project was that of E. C. Hall Company, Eugene, in the amount of \$47,632.00, based on the use of tar. They did not submit a bid using asphalt. M. L. O'Neil Son, Eugene, submitted the second-low bid in the amount of \$49,916.85 also based on the use of tar. They did not submit a bid using asphalt. There were 5 higher bidders. The Commission has awarded this project to the low bidder, E. C. Hall Company, at its bid of \$47,632.00, using tar.

"Nyssa Undercrossing Section of the Old Oregon Trail Highway, in Malheur County. Construct grade separation with Union Pacific Railway and also 0.45 mile grading, oiling, and paving. Henry L. Horn, of Caldwell, Idaho, submitted the low bid for this work in the amount of \$205,704.00. Clifford A. Dunn, Klamath Falls, submitted the next-low bid in the amount of \$206,550.90. There were 6 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Lombard Street-Killingsworth Street Section of Lombard Street, Portland, and Northeast Portland Secondary Highway, in Multnomah County. 0.4 mile grading and 4.5 miles paving. The low bid submitted for this project was that of Porter W. Yett, Portland, in the amount of \$141,722.00, based on the use of asphalt. He did not submit a bid based on the use of tar. The next-low bid was that of Edlefsen-Weygandt Company, Portland, in the amount of \$152,867.00, based on the use of tar. They did not submit a bid based on the use of asphalt. There were 3 higher bidders. The Commission awards this contract to the low bidder, Porter W. Yett, at his bid of \$141,722.00, using asphalt.

"Oregon Slough-Columbia Slough Section of the Pacific Highway West (North Denver Avenue), in Multnomah County. 0.96 mile pavement resurfacing. Only two bids were received for this work, that of Parker-Schram Company, Portland, being the low one, in the amount of \$2,376.00. The other bid was that of the United Contracting Company, Portland, in the amount of \$2,420.00. The Commission awards this contract to the low bidders, Parker-Schram Company, at their bid of \$2,376.00.

"East Unit of Shanika-Cow Canyon Section of the Sherman Highway, in Wasco County. 5.03 miles grading, surfacing, and oiling; also, furnish 4000 cubic yards crushed rock in stock piles. Leonard & Slate,

Multnomah, submitted the low bid for this work in the amount of \$87,103.00. Fisher Bros., Oregon City, submitted the next-low bid in the amount of \$89,207.00. There were two higher bidders. This contract is awarded to Leonard & Slate, the low bidders, at their bid of \$87,103.00.

"Butte Creek-Mayville Road Section of the Kinzua County Road, in Wheeler County. 3.20 miles grading and surfacing. Frank Penepacker, Portland, submitted the low bid for this work in the amount of \$15,104.50. M. L. O'Neil & Son, Eugene, submitted the next-low bid in the amount of \$15,499.90. There were 7 higher bidders. The Commission awards this contract to Frank Penepacker, the low bidder, at his bid of \$15,104.50.

"Furnishing ferry service across the Willamette River, near Wilsonville, in Clackamas County. Only one bid was received for this service, being that of Leonard & Slate, Multnomah, in the amount of \$1,250.00 per month. The Commission has referred this bid to the Engineer."

A delegation from Multnomah County, representing the Peninsula Drainage District No. 1 and the U. S. Engineer's Office, came before the Commission in regard to securing permission to construct a concrete wall along the northerly side of the right of way of Swift Secondary State Highway for a distance of about 1200 feet westerly from the intersection of this highway with the Pacific Highway, for the purpose of controlling flood waters of Oregon Slough. The delegation was headed by Dan Phipps, President of the Drainage District, and included R. R. Bullivant, T. G. Donora, P. D. Berrigan representing Major C. R. Moore, and M. W. Jones of the U. S. Engineer's office. Mr. Phipps exhibited a map showing the extent of the proposed improvement and its relation to the state highway. He advised that they originally intended to construct this wall on private property belonging to a Mr. Frank Kernan but encountered difficulties with Mr. Kernan in securing an easement to use his property; and, in view of the fact that the wall would be of considerable benefit to the highway, they concluded, after study, that the highway right of way would be the proper location on which to build it, provided the State Highway Commission would grant the necessary authority.

Mr. Phipps further advised that it is their intention to secure a declaratory judgment in the courts to ascertain whether or not they can construct this wall without compensating anyone for the use of the highway, because they anticipate objections thereto by Mr. Kernan, who is challenging the right to the use of the highway right of way for the purpose intended.

The State Highway Engineer stated that such wall would benefit the highway considerably in that it would prevent the highway being inundated during periods of high water. He recommended approval of the request. After considerable discussion the Commission approved the recommendation unanimously, under the condition that there be no legal impediments. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

JUL 10 1940

WHEREAS, Peninsula Drainage District Number One of Multnomah County, Oregon, has applied to the State Highway Commission for an easement permitting the construction and maintenance of a flood wall within and along the right of way of the North Portland Road, sometimes known as Swift Boulevard, now a part of the state secondary highway system in Multnomah County; and

WHEREAS, after due consideration the Commission is of the opinion that the construction and maintenance of said flood wall will in nowise interfere with the use of the right of way for highway purposes, but on the contrary will benefit the highway by reason of protecting the roadbed against floods and high water; and

WHEREAS, it is the opinion of the Commission that said application should be granted;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and voting affirmatively as follows:

1. That the application of the Peninsula Drainage District Number One of Multnomah County for an easement permitting the construction and maintenance of a flood wall within the right of way of the North Portland Road, also known as Swift Boulevard, be and the same hereby is granted.

2. That J. M. Devers, Attorney for the Commission, be and he is hereby authorized to prepare the necessary form of easement and submit the same to the Commission for approval and execution.

3. That when said easement has been executed by the Commission an executed copy thereof shall be delivered to the Peninsula Drainage District Number One of Multnomah County.

4. That this resolution be entered in the minutes and records of the Commission and a copy thereof attached to the said easement agreement.

A delegation from Tigard, consisting of Emil A. Johnson, George Halowell, W. M. Evans, and Messrs. Vermilye and Young, was present and asked the Commission to extend the limits of the improvement of the old highway route through Tigard from the business section of the town to the point where the old highway connects with the new highway on the north, and to Fanno Creek on the south. They asked for the oiling of this entire section full-width between curbs. The Engineer advised that this work would cost about \$5,000.00 more than the Commission has already budgeted for the Tigard improvement. He questioned the advisability and justification for the improvement of the entire section as requested but recommended that the proposed improvement be extended about 150 feet at each end, which he thought would be satisfactory and would cost about \$1,500.00. After considerable discussion the Commission authorized an expenditure of \$1500 for the additional work and left it with the Engineer to decide with the people

JUL 10 1940

of Figard the particular section to be improved. The delegation approved such arrangement.

Mayor E. J. Bayliss of Sheridan was present and inquired as to what plans the Commission has, if any, for the improvement of the Salmon River Highway (McMinnville-Tillamook Highway) through the town of Sheridan. He recalled that the Engineer was authorized to make certain investigations with the idea in mind of improving this section if possible. The Engineer advised that, as instructed by the Commission, a survey of the project was made and the results thereof reported to the Commission some time ago and that the Commission found it necessary to defer its approval of the project because of the high cost involved and the limited amount of funds available to the Commission for work of that kind. Chairman Cabell advised that it would not be possible for the Commission to undertake this project this year but the Commission will give it due consideration in the formulation of the program for next year's federal funds. The Engineer was instructed to contact Mayor Bayliss in Sheridan at his convenience and discuss the entire project with him.

The Commission adjourned at 5:30 p. m., to reconvene at 9:00 a. m. the following day in the Imperial Hotel to dispose of routine matters.

Portland, Oregon, July 19, 1940

The State Highway Commission reconvened at 9:00 a. m. in the Streamline room of the Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

A delegation from Southern Oregon, consisting of sixteen members, presented an urgent plea for assistance from the Commission in securing a special federal appropriation to finance the reconstruction of the Pacific Highway from Eugene to Ashland, and the Columbia River Highway between Portland and The Dalles so as to make these highways suitable for the transportation of military equipment in the event of necessity. Members of the delegation were A. C. Marsters, W. C. Harding, Senator C. W. Clarke, County Judge Morris C. Bowker and County Commissioner J. Ross Hutchinson, of Douglas County, all from Roseburg; C. H. Demeray, W. A. Johnson, County Judge and John Valen, and Richard McElligott, County Commissioners of Josephine County; County Commissioners C. M. Young and W. J. Holland, of Lane County; County Commissioner William Perry and County Engineer Paul B. Rynning, of Jackson County; J. B. Coleman, County Judge of Jackson County; H. E. Eakin of Cottage Grove; and Captain S. M. Tuttle of Medford. Mr. Marsters headed the group.

JUL 19 1940

Speaking on behalf of this improvement were Messrs. Marsters, Bowker, Tuttle, Johnson, Demeray, Clark, McElligott, Rynning, and Eakin. They presented numerous arguments and gave numerous reasons for militarizing these highways, particularly the Pacific Highway, and offered to give the Commission full cooperation in anything that the Commission should undertake to accomplish the desired end. They also informed the Commission that any special moneys received from the Federal Government for this purpose could be charged to the various districts in which the expenditures are made, thus releasing other federal funds for expenditure elsewhere throughout the state. They declared that this project requires the concerted efforts of everyone and urged the Commission to take a definite stand in the matter and to help in securing the assistance of all of the members of the Oregon delegation in Congress. Mr. Marsters closed the delegation's presentation with a few appropriate remarks. The Commission made no statements whatsoever with respect to the subject and took no action thereon.

The Commission by unanimous vote approved the minutes of the meetings held on March 21 and 22, April 9, May 1, 2, and 3, and May 23, 1940.

The Engineer reported on the condition of the I.O.N. Highway surfacing, particularly between the Owyhee River and the Nevada state line. He said that the surfacing on this section consists of pit-run gravel and that cars driven thereover at a reasonable rate of speed are not caused any trouble; but, due to the fact that the road is straight and carries very little traffic, the tendency of autoists is to drive at an excessive rate of speed, and as a result during the past two or three months numerous accidents have occurred by reason of tire blowouts, the last one during the preceding week resulting in the death of two prominent Nevada men. The oiling of the road, he said, would alleviate this condition. However, to give it a light-oil treatment would cost about \$100,000.00. He pointed out that this highway is eligible for federal lands highway funds and suggested the contracting of the oiling work this fall and the securing, if possible, to finance the work, the unallocated federal lands highway funds for the fiscal year 1941 and as much of the 1942 federal lands highway funds as may be needed, under an arrangement such as was made with the government officials last year whereby the state advanced funds for other work on this highway with the understanding that the Government would reimburse the state for its share of the cost. He estimated that federal lands funds in the amount of about \$70,000.00 would be needed. He recommended such an arrangement and that in the meantime appropriate signs be erected advising the traveling public of the existing condition and limiting the speed of traffic to 40 miles per hour. After discussion the Commission approved the Engineer's suggestion relative to the oiling work; however, instructed him not to present it to the Public Roads Administration until Congress has appropriated additional federal lands highway funds. The Commission also approved the Engineer's recommendation relative to the maintenance of warning and speed-limit signs along this highway.

The Engineer brought up for discussion the matter of snow removal on the North Santiam Highway during the coming winter. He pointed out that, according to the records that have been kept of these operations during the past two years it has averaged between \$5.00 and \$10.00 per car to keep this

JUL 19 1940

road open during the winter season, and the question has arisen whether or not the expense is justified in view of the fact that the South Santiam Highway is now available for year-round traffic and it is contemplated to keep it open during the winter months. The normal annual expense for such operations on these highways, he said, is \$15,000.00 each. He pointed out that the Willamette Highway will be open for general public use on August 1 and, according to present plans, will be kept open during the winter months, which will add a considerable amount to the annual expense of snow-removal operations throughout the state.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, advised that sufficient forest highway funds are not available to embark on a program of snow-removal work other than that which it is possible to do with push plows. He suggested that the state assume this obligation on the North Santiam Highway for that reason and pointed out that the relieving of the Government of this expense would simply mean that the federal funds that have heretofore been used for such purpose could be applied toward the cost of additional construction work. After considerable discussion the Commission decided to conduct snow-removal operations on this highway next winter on the same basis as that on which such operations were carried on last winter; viz., that the Federal Government would pay for push-plow work on the section under its control, Marion County would do as much as possible with push plows, and the state would do what is necessary with rotary snow plows, with the understanding that Marion County would reimburse the state for such expense in view of the fact that the North Santiam is not a state highway. This arrangement is conditioned upon there being sufficient state equipment available to carry on the work. The Engineer was instructed to contact Marion County Court in regard thereto.

In this connection the Engineer reported a suggestion from the Public Roads Administration that the state take over and assume the obligation of maintaining the Forest Highway Section of the Willamette Highway, including both maintenance of the road surface and snow removal. It appears that this highway is so situated that it cannot be maintained economically by government forces; hence their request for state maintenance. The Engineer recommended approval of the suggestion, which, as in the case of the North Santiam Highway, would leave forest highway funds for construction purposes. The Commission approved the recommendation unanimously and authorized the Engineer to maintain this highway with state forces at state expense; also, to do what is necessary in the way of snow removal to keep the road open for travel throughout the winter season.

The Assistant Attorney reported the status of the right of way budget. He advised that the Commission approved a budget of \$600,000.00 for right of way purchases in 1940 and that up to the present time of this amount \$344,000.00 has been obligated. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration of each item

JUL 19 1940

the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

JUL 19 1940

The Attorney requested authority to institute condemnation proceedings to acquire property needed from the estate of Gladys Schmidt, file 8106, as right of way for the improvement of the Shaniko-The Dalles-California Highway Section of the Sherman Highway, in Sherman County, and also to acquire from Benjamin Fisher, file R8155, land needed for a quarry site and a hauling road to be used in connection with the construction of the Eugene-Veneta Section of the Eugene-Mapleton Highway (Route F). The Commission approved the request and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, the State Highway Commission is by law authorized and directed to lay out, locate, relocate, designate, construct, reconstruct, improve, and maintain a system of state highways in the State of Oregon, including both primary and secondary state highways, to acquire rights of way necessary therefor, and to declare the necessity and need for the acquisition thereof, and the advantages to be gained thereby;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the State Highway Commission does hereby find and declare that it is necessary, will be of advantage to the State of Oregon, and is needful that the State acquire for right of way purposes for use in connection with the permanent location, construction, improvement, and maintenance of the following section or sections of the state highway system of the State of Oregon, to wit:

Shaniko-The Dalles-California Highway Section of the Sherman Highway

real property owned by or in possession of the following parties and/or persons, to wit:

8106-Estate of Gladys Schmidt

and this Commission does hereby declare further that the said property or properties are necessary, are needful, and the acquisition thereof will be of advantage to the State of Oregon for right of way purposes in order to make it possible for the State Highway Commission to properly locate, relocate, construct, reconstruct, and maintain said portion or portions of the said state highway system in accordance with standards adopted by this Commission relative to curvature, grades, alignment, drainage, and factors of safety.

2. That the State Highway Engineer be and he hereby is instructed and directed to properly survey the parcel or parcels of land required for such right of way purposes and prepare proper and adequate descriptions thereof, which descriptions shall be employed in the preparation of a deed or deeds or other instrument or instruments necessary to complete the acquisition of the said property or

JUL 19 1940

properties or which descriptions may be used in the preparation of a complaint in the event that condemnation proceedings are necessary.

3. That the boundaries of the said parcel or parcels of land, as defined and determined by the said survey made by the said Highway Engineer, along the route or location adopted by the Highway Commission, shall be and the same hereby are adopted and the lands defined therein are hereby declared to be and the same are included within the rights of way of the said portion or portions of the said state highway system and hereby are declared to be necessary for the proper location, improvement, construction, and maintenance of the said portion or portions of the state highway system.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the power of eminent domain real property deemed by the Highway Commission necessary for the accomplishment of any or all of the foregoing things; and

JUL 19 1940

WHEREAS, in the judgment of the Highway Commission the real property hereinafter described is necessary for quarry site and hauling road purposes in connection with the construction of its Eugene-Veneta Section of the Eugene-Mapleton Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the real property hereinafter described is necessary for the accomplishment of the purposes hereinafter declared, which said real property is described as follows, to wit: real property owned by Benjamin Fisher and located in Section 26, Township 17 South, Range 5 West, W. M., Lane County, Oregon, more particularly described on the attached sheet. (See Real Property Condemnation File No. 1 for description as approved by State Highway Commission.)

2. That the purpose for which the above described real property is being acquired is for a quarry site and hauling road to be used in connection with the construction of the Eugene-Veneta Section of the Eugene-Mapleton Highway.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Commission confirmed the sale of 23 acres of land adjacent to the Warm Springs Highway, in Jefferson County, to Floyd Wood of Madras, for the sum of \$50.00, upon recommendation of the Engineer and the Attorney, Mr. Wood's bid being the only one received as a result of advertising the sale of this property in the Madras paper and it being considered a satisfactory bid and the land being considered of no value for state highway purposes.

The Engineer reported the results of a pedestrian traffic count taken on the Rogue River Bridge at Gold Hill to ascertain the justification for sidewalk construction on this bridge, as has been requested by the citizens of this town. He advised that the count taken during a 12-hour period, on Thursday, June 27, 1940, reveals a pedestrian count of 126, and 13 bicycle riders, the movements being about equally divided between north and south traffic. He estimated that it would cost about \$9,000.00 to construct permanent concrete sidewalks on both sides of the bridge and that it would cost about \$3,500.00 to construct these sidewalks of timber. He suggested approval of the permanent concrete sidewalks in the event the Commission decides to proceed with the improvement, because the bridge is in the town and will always be used, notwithstanding that the highway may be rerouted at some time in the future. The Commission deferred a decision in the matter.

Reconsideration was given by the Commission to the matter of constructing the Brookings project on the Oregon Coast Highway, in Curry County. The Engineer recommended that this project be advertised for bids to be taken at the August meeting of the Commission, if the right of way can be cleared at that time, and that the specifications be written so as to preclude the contractor from doing anything in connection with this job during the winter months that will interfere with or discommode businessmen. The Attorney advised that options for the right of way have been acquired for the entire project with the exception of two or three parcels that will have to be condemned. After discussion the Commission instructed the Attorney to proceed with condemnation of these parcels, as heretofore authorized, and authorized the Engineer to advertise this project in accordance with his recommendation.

The Commission had under discussion the setting of dates for its trip down the Oregon Coast Highway for inspection of state parks and county roads in Curry County, and decided tentatively to make this trip during the week commencing Friday, August 16. The Commission also tentatively set the week commencing September 1, 1940, as the time for its inspection of highways in Eastern Oregon. The Engineer was instructed to prepare an itinerary for both trips.

The Commission also discussed matters pertaining to the Annual Meeting of the American Association of State Highway Officials, which is to be held in Seattle, Washington, on September 16, 17, 18, and 19, 1940. It was decided that all three members of the Commission should attend this meeting and that the Highway Department should be represented by certain employees to

JUL 19 1940

be designated later. It was left with Chairman Cabell to discuss this matter with Governor Charles A. Sprague whose opinion is desired relative to the furnishing of state cars for transporting other employees who may wish to attend this meeting at their own personal expense.

Consideration was given by the Commission to the matter of attending the dedication of the Willamette Highway, which is to be conducted at Salt Creek Tunnel at the summit of the Cascade Mountains under the sponsorship of the Eugene and Klamath Falls Chambers of Commerce on Tuesday, July 30, 1940. The Commission decided to attend this function if possible.

The Attorney reported refusal on the part of the City of Roseburg to pay the cost of operating a traffic light at the crossing of the Pacific Highway with the Southern Pacific Railroad in Roseburg. He said that up to the present time the State Highway Department has paid bills amounting to \$281.77 for electrical service and that, according to the orders of the Public Utilities Commissioner, who conducted a hearing on this crossing, this expense is to be paid by the city; further, that the city agreed at the hearing to pay this expense. He requested instructions. In the discussion of this matter the question arose whether or not the state should assume expense of this kind as a matter of state-wide policy, which would require modification of the present policy with respect thereto. A decision in the matter was deferred by the Commission pending a report from the Engineer as to how many lights in this classification are now being maintained, and the amounts that are being expended by the state in the various municipalities annually for the electrical energy required to operate them.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p.m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

Mr. William P. Ellis, attorney, Salem, came before the Commission relative to the application of the Consolidated Freightways, Inc., before the Interstate Commerce Commission, for a "certificate of public convenience and necessity" to extend its operations between San Francisco and Oregon points. He said that the Consolidated Freightways, Inc., is endeavoring to secure authority for the establishment of a high-speed freight service along the Oregon Coast Highway between Marshfield and California points and that a hearing on the subject is to be held in Portland on the following Monday, July 22. It was his thought that the Highway Commission is particularly interested in the matter because, in his estimation, the establishment of high-speed freight service on this highway would introduce considerable hazard to other traffic, in view of the fact that this section of highway contains so many sharp curves. He suggested that the Commission have someone present at the hearing who is able to testify as to the physical characteristics of this highway within Oregon, which would help the Interstate Commerce Commission in making its decision and would possibly effect an adverse decision in the case and prevent the unnecessary misuse of this highway, which is one of Oregon's most scenic routes. He further stated that his interest in the proceeding is partly in the interest of certain local truck lines whose business would be adversely affected should the application be granted. However, he is also concerned as a citizen

JUL 19 1940

who believes in the retention of scenic highways for the purposes for which they were intended. He was informed by Chairman Cabell that the Commission would be pleased to give the matter consideration but is not prepared to make a definite statement at the present time.

Following Mr. Ellis's departure the matter was reconsidered, when the Commission decided that the time is too short to prepare a statement to the Interstate Commerce Commission. Furthermore, the Commission is reluctant to enter into a controversial matter of this kind. The Commission considered it best to discuss the matter with the Public Utilities Commissioner of Oregon, Mr. Ormond R. Bean, who has jurisdiction in so far as it pertains to the highways within the State of Oregon, it being the thought of the Commission that it could forestall the granting of the permit to the Consolidated Freightways, Inc., if that is considered advisable after further study.

The Attorney brought up for discussion matters pertaining to the right of way needed for the proposed Front Avenue project in Portland. He said that options have been secured from nearly all of the owners where big transactions are involved and that he is now prepared to proceed with the securing of options for the balance of the property and to close the options already secured if the Commission so instructs him. Chairman Cabell gave as his thought that the Commission should not be bound to take up these options until all other matters pertaining to this matter have been clarified and disposed of, particularly the securing of the right of way from the railroad companies, the ascertaining of the right of the public to the use of the upper deck of the Steel Bridge over which it is proposed to route traffic, and the securing of the railroad company's approval for the use of this bridge. Commissioners Clough and Oliver concurred. As a matter for the record, the Commission instructed the Attorney to continue the taking of options for right of way as is needed for this project. Chairman Cabell was authorized by the Commission to arrange a conference with the city officials of the City of Portland relative to the closing of the options when he is satisfied as to the proper disposition of other major matters pertaining to this undertaking, it being understood that he would report the results of this conference to the other Commissioners for ratification.

The Attorney submitted for the approval of the Commission tentative drafts of several bills involving state highway legislation that the Commission is sponsoring and proposes to submit to the 1941 Legislature, particularly the following:

1. Revision of House Bill No. 28 which was rejected by the 1939 Legislature and pertains to log hauling, granting of continuous permits, and increasing the overall length and overall height of vehicles that may be transported over state highways.
2. Bill covering the removal of "danger trees" from private property adjacent to state highways and the payment of the cost of removing such trees.
3. Bill providing for the elimination of billboards and

JUL 19 1940

advertising signs from private property adjacent to highways, which bill is being sponsored by the Oregon Roadside Council.

4. Proposed amendments to the present law pertaining to the maintenance of advertising signs on state highways within municipalities.

5. Bill for the establishment of freeways.

6. Bill providing for a division of traffic within cities and towns by the construction of curbs and parting strips.

7. Legislation to effect the proper submission by Justices of the Peace of sums collected as fines for traffic violations.

The Attorney read aloud the provisions of each bill and after some discussion the Commission approved all of them in principle, with certain revisions.

The Attorney also suggested that it might be advisable to introduce a bill prohibiting stock from running at large on primary and secondary state highways, and a bill with reference to payment to incorporated cities and towns of a certain amount of the state highway revenue, as has been proposed by the League of Oregon Cities. The Commission decided not to sponsor a bill relating to stock running at large on state highways and to give the other matter serious consideration before making its decision.

Messrs. Homer Johnson and J. C. Compton, contractors, came before the Commission in regard to Mr. Johnson's bid submitted on June 13, 1940, for the Germantown Road-Barnes Road Section of Skyline Boulevard, in Multnomah County, in which bid Mr. Johnson alleges an improper entry was made by a clerk in his office who inadvertently inserted a unit bid price for asphalt, whereas it was his intention to bid on the tar alternate, which makes a difference of \$1,500.00 in the total amount of the bid. He said that this was an honest mistake and he asked the Commission to change the bid accordingly. Otherwise, he stated, he did not want the job. Mr. Compton confirmed Mr. Johnson's statements, as prospective subcontractor on the oiling work, and advised that the price quotation that he gave to Mr. Johnson was on the tar alternate and that he had no intention of submitting a quotation for asphalt.

After considerable discussion the Commission voted unanimously not to make any change in the bid submitted by Mr. Johnson for this work, inasmuch as it involves the modification of a long-standing policy of the Commission and would establish an undesirable precedent. The Engineer suggested that if Mr. Johnson will not sign the contract forms and furnish the required bond within a reasonable length of time, the Commission declare him in default and collect on the bid bond; also, that the project be readvertised for bids to be received at a future meeting of the Commission. He pointed out, however, that there is some question whether or not Multnomah County still desires the construction of this project, which is on a county road and is to be financed with federal secondary highway funds. The Commission tentatively approved

JUL 19 1940

the Engineer's suggestion but deferred final action pending consultation with the Board of County Commissioners of Multnomah County. The Engineer was instructed to discuss the matter with County Roadmaster George Buck and report back to the Commission.

Mr. Johnson attributed the mistake made by his office force to the rush incident to the preparation of the bid and the filing of same with the Commission before 9:00 o'clock a. m. on the day the bids were opened. He alleged that the opening of the bids at 9:00 a. m. does not give the contractors sufficient time to prepare their bids and secure bid bonds before the time of the opening, the result being a last-minute rush, which is conducive to the making of mistakes. He suggested that the Commission change the time of the bid opening to 10:00 or 11:00 a. m. The Commission agreed to consider the matter and referred it to the Engineer for recommendation.

A letter was presented from the Marshfield Chamber of Commerce requesting improvement of the road through Golden and Silver Falls State Park, Coos County. The Engineer advised that the road through the park is not on the state highway system, although it connects with the Coos River Secondary Highway. He gave as his thought that the time is not propitious to officially extend the secondary highway and recommended that the request be denied, particularly in view of the fact that the improvement is being requested for the benefit of log haulers and because investigation reveals that it is possible for the logging operators to build their own road entirely outside the park area, which would serve their purpose perhaps better than the road through the park. The State Parks Superintendent, who was present, concurred in the Engineer's statements and advised that, in his estimation, the present roadway through the park is not in the proper location and that it would be a waste of funds to improve the same. The Commission thereupon denied the request.

The Engineer requested authority to install a new type of traffic signal on the Salem-Dallas Highway at its intersection with Edgewater Street in the town of West Salem. He advised that this is a very busy intersection and that accidents frequently occur there, notwithstanding that a standard-type flashing beacon is now being maintained at this point. He gave as his thought that it would be a good place to try out the new type of signal, which consists of a flashing red light which changes to green upon the approach of traffic at a certain designated speed. He estimated the cost of the new type signal at \$1,500.00 and recommended approval of the installation as an experiment. The Commission approved the recommendation unanimously.

The Engineer also reported the results of investigation by Traffic Engineer John Beakey of the traffic signals which the city of Burns has erected at certain locations on state highways in that town without the Commission's approval. He said that the Traffic Engineer now recommends approval of the flashing beacon installed at the intersection of Broadway N. and D Streets which is at the top of a vertical curve where sight distance is short, and disapproval of the signal installed at the intersection of W. Monroe Street with Egan Street, as there is no apparent need for the same. A similar investigation was made, he said, of the request of the city of Vale for approval of

JUL 19 1940

a flashing beacon which the city proposes to install at the intersection of A and Main Streets in Vale and it is his recommendation that this request be denied as there is no evidence that the signal is needed. He advised that he concurs in the Traffic Engineer's recommendations. The Commission approved the recommendation unanimously.

The Assistant Attorney reported the results of discussions with house-moving contractors relative to collusion in the submission of bids for the removal of houses from state highway rights of way. He said that it is not possible to state definitely that there was collusion in the submission of bids for the removal of houses from the right of way in Bandon but he is convinced in his own mind that such was the case. He suggested as a remedy that the Commission require each house-moving contractor hereafter to submit to the Commission along with his bid for house-moving an affidavit to the effect that he has not entered into collusion with anyone with respect to his bid. The Commission approved the suggestion and so ordered.

The Assistant Attorney also reported that the State Board of Control has agreed to assume the insurance risk on all buildings owned by the State Highway Department so that it is no longer necessary to purchase private insurance covering buildings acquired by the Commission in connection with right of way negotiations unless the Commission so desires. He referred particularly to the building acquired from a Mr. Gibson in Salem and to the one purchased from a Mr. L. E. Dayton in Grants Pass. In view of the Attorney's report the Commission decided as its general policy to be followed hereafter not to insure such buildings in private companies. The Attorney was instructed to make the necessary arrangement with the State Board of Control for state insurance coverage under the provisions of the Restoration Act.

The following matters were reported by the State Parks Superintendent in person:

Request of Lake County Post No. 53, American Legion, for a reservation of a strip of land along the Quartz Mountain Section of the Klamath Falls-Lakeview Highway, in Lake County, as a memorial to be named "Lake County World War Veterans' Memorial":— The Parks Superintendent recommended that the request be denied because it would establish a very undesirable precedent and would encourage the reservation of similar areas in other parts of the state for like purposes, which would eventually react adversely to the best interests of the highways. The Commission approved the recommendation and instructed the Secretary to inform the Honorable Julius Cohn, Municipal Judge of Portland, who presented this request to the Commission on behalf of the Lake County Legionnaires, that, while the Commission is sympathetic with the idea of this reservation, it cannot approve the same as a matter of policy, which policy limits the bestowing of honors to donors of property or to persons who have done something important for the state from the state highway standpoint.

Establishment of C.C.C. Camps:— The Parks Superintendent advised that he frequently receives from the federal authorities telegrams offering to establish additional C.C.C. camps in Oregon and requesting immediate answer

by wire relative thereto, said camps having to do with the development and improvement of state parks. He pointed out that he does not really have authority to make a final decision in such matters and requested instructions from the Commission with respect thereto so as to avoid embarrassing situations that might arise. In this connection he advised that request has already been made for the renewal of C.C.C. camps at the following state parks for the 16th period: Silver Creek Falls, Jessie M. Honeyman, Saddle Mountain, and Short Sand Beach; also, that applications have been filed for new C.C.C. camps in the following state parks: Cape Lookout and Cape Mears, as a joint camp; Crooked River; Unpqua Lighthouse; Salmon River; and Silver Creek Falls. The Commission approved such applications by unanimous vote; however, ordered that hereafter, when matters requiring immediate decisions arise, the State Parks Superintendent shall bring them to the attention of Chairman Cabell by telephone or otherwise for instructions, and thereafter to the attention of the Commission at its next meeting. Action on matters that do not require immediate decisions shall be deferred until the next meeting of the Commission. The Attorney was instructed to prepare an appropriate form of resolution covering the matter.

Charge for the use of bathhouse at Cleawox Lake in Jessie M. Honeyman State Park:- The Parks Superintendent advised that the bathhouse will be open for general public use on the following Sunday, and gave as his thought that a charge should be made for use of the facilities. He suggested that adults should be required to pay 10 cents each and that children up to 15 years of age should be charged 5 cents. The Commission approved the suggestion.

Purchase of additional wayside strips along the Salmon River Cutoff between Highway Engineer's Stations 227+00 and 380+50:- The Parks Superintendent reported that the Miami Corporation, which owns this land, has offered to sell it to the state at the rate of \$10.00 per acre, provided the company is given the privilege of cutting all matured timber standing thereon and to maintain roadways across the property. The Commission deferred a decision in this matter pending further negotiations with the corporation by the Parks Superintendent in an endeavor to secure a reduction in the purchase price.

The Engineer reported the need to place a limit on the overall height of vehicles that are permitted to pass under the Southern Pacific Railroad tracks on First Street in Albany, the present route of the Pacific Highway East. He advised that the clearance between the pavement and the railroad girders which support the railroad tracks is only 10 feet 8 inches and that several times recently trucks loaded with logs passing under this structure have struck the girders and there is a possibility of serious damage being done unless remedial measures are taken. It was his thought that the limiting of the overall height of vehicles passing under this structure to 10 feet would take care of the situation satisfactorily and recommended that the Commission make an order to that effect. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

JUL 19 1940

WHEREAS, that certain highway known as the Pacific Highway East is a state highway, the route of which passes through the corporate limits of the City of Albany; and

WHEREAS, the State Highway Commission has heretofore selected and designated First Street in said city as one of the streets over which to route said highway; and

WHEREAS, said street is crossed by the Southern Pacific railroad and traffic using the street at the point of intersection of railroad and highway passes beneath the tracks of the railroad through a viaduct or undercrossing; and

WHEREAS, the vertical clearance in said undercrossing does not exceed ten feet eight inches and many trucks using said highway route have a height of eleven feet and over; and

WHEREAS, it is the judgment of the Highway Commission that for the safety of the general public using said highway and for the protection of the railroad crossing said street trucks passing through said viaduct should be limited to a maximum height of ten feet.

THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by the Commission:

1. That no truck having a maximum height either unladen or with load of over ten feet shall be permitted to pass through the viaduct beneath the tracks of the Southern Pacific Railroad Company where said tracks cross over First Street in the City of Albany.

2. That the State Highway Engineer be and he hereby is directed and instructed to prepare and place at each entranceway to said viaduct an appropriate notice, sign or warning advising truck operators that the clearance beneath said viaduct is impaired and that no truck having a height in excess of ten feet is permitted to pass through said viaduct.

3. That this resolution shall be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court of Linn County and a duly certified copy thereof delivered to the municipal authorities of the City of Albany, and a like copy to the officials of the Southern Pacific Company.

The Engineer also recommended the adoption of a similar resolution limiting to 10 feet the overall height of loads passing under the Oregon Trunk railroad tracks on the Central Oregon Highway in Bend, where the vertical clearance between the highway pavement and the railroad structure is only

JUL 19 1940

10 feet 4 inches. The Commission approved the recommendation and thereupon adopted the following resolution in regard thereto by unanimous vote:

WHEREAS, that certain highway known as the Central Oregon Highway is a state highway, the route of which passes through the corporate city limits of the City of Bend; and

WHEREAS, the State Highway Commission has heretofore selected and designated Greenwood Avenue in said City as one of the streets over which to route said highway; and

WHEREAS, said street is crossed by the Oregon Trunk railroad and traffic using said street at the point of intersection of said railroad and highway passes beneath the tracks of the railroad through a viaduct or undercrossing; and

WHEREAS, the vertical clearance in said undercrossing does not exceed ten feet four inches, and many trucks using said highway route have a height of eleven feet and over; and

WHEREAS, it is the judgment of the Highway Commission that for the safety of the general public using the said highway and for the protection of the railroad which crosses said street trucks passing through said viaduct should be limited to a maximum height of ten feet.

THEREFORE, BE IT AND IT HEREBY IS RESOLVED AND ORDERED by the Commission:

1. That no truck having a maximum height either unladen or with load of over ten feet shall be permitted to pass through the viaduct beneath the tracks of the Oregon Trunk Railroad Company where said tracks cross over Greenwood Avenue in the City of Bend.

2. That the State Highway Engineer be and he hereby is directed and instructed to prepare and place at each entranceway to said viaduct an appropriate notice, sign or warning advising truck operators that the clearance beneath said viaduct is impaired and that no truck having a height in excess of ten feet is permitted to pass through said viaduct.

3. That this resolution shall be entered in the minutes and records of the Highway Commission and a certified copy thereof delivered to the County Court of Deschutes County and a duly certified copy thereof delivered to the municipal authorities of the City of Bend, and a like copy to the officials of the Oregon Trunk Railroad Company.

The Secretary presented a letter from Hood River County Court requesting permission to do certain construction work on the right of way of

JUL 19 1940

the Columbia River Highway at a point about $1\frac{1}{2}$ miles west of the town of Hood River in connection with the construction of a new county road approach to this highway. It was explained that the county proposes to do this work as a county W.P.A. project but cannot secure approval of the same by the W.P.A. officials until authority to do the work on the state highway has been obtained from the State Highway Commission, in writing. The Engineer recommended approval of the request. The Commission approved the recommendation and instructed the Secretary to send an appropriate letter to the County Court.

The Commission also had under discussion a letter from the City of Hood River requesting permission to do certain construction work on 9th Street, route of the Hood River Secondary Highway, in Hood River, between Eugene Street and Oak Street, consisting of the replacement of old curbs and gutters with new facilities of like nature. It was explained that the city proposes to do this work as a W.P.A. project and that approval by the W.P.A. is contingent upon the city securing from the State Highway Commission authority to work on the state highway. The Engineer recommended that the request be granted. The Commission approved the recommendation and instructed the Secretary to send an appropriate letter to the City Council.

Consideration was given by the Commission to the designation of the Warm Springs Secondary Highway as a federal aid highway. After considerable discussion the Commission decided to recommend such designation to the federal authorities in order to secure the benefits of federal aid funds which are needed in order to expedite the construction of this road to proper standards. The Commission also decided to change the classification of this road from a state secondary highway to a state primary highway. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, that certain highway known and designated as the Warm Springs Highway, which extends from a junction with the Wapinitia Highway near Bear Springs, thence in a southeasterly direction to a connection with The Dalles-California Highway near Madras, has heretofore been designated as a secondary highway and is therefore now a part of the secondary highway system; and

WHEREAS, it is the judgment and opinion of the Highway Commission that said highway is of sufficient public importance and carries a sufficient volume of traffic to warrant its designation as a primary state highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the highway extending from a junction with the Wapinitia Highway near Bear Springs, thence in a southeasterly direction to a connection with The Dalles-California Highway near Madras, be and the same hereby is adopted as a primary state highway, and hereby is declared to be such.

2. The Engineer hereby is instructed to give proper recognition to said highway as a primary state highway in the records and reports of the Highway Commission.

3. In addition to the adoption of said highway as a primary state highway it hereby, subject to approval by the Public Roads Administration, is ordered that said highway shall be, and the same hereby is declared to be, a Federal Aid Highway, and therefore a part of the Federal Aid Highway System.

4. Upon approval by the Public Roads Administration the Engineer is instructed to give appropriate recognition in the records and reports of the Highway Commission to said highway as a Federal Aid Highway.

5. That this resolution be entered in the minutes and records of the Highway Commission and a duly certified copy thereof delivered to the County Court of Wasco County, a certified copy to the County Court of Jefferson County, and a certified copy to the Public Roads Administration.

The Commission discussed a request from several farmers residing along the Middle Fork of the John Day River, in Grant County, for permission to purchase rock from the state's contractor in this vicinity, Mr. F. R. Hewett, who is producing maintenance materials for the Nye Junction-Long Creek Section of the Pendleton-John Day Highway. The Engineer advised that these farmers need about 1000 cubic yards of crushed rock for use on a semi-public road so as to give them access to the Pendleton-John Day Highway; also, that, in his estimation, the furnishing of this rock to the farmers will not interfere with Mr. Hewett's contract with the state. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Secretary presented a resolution from the Hood River County Court requesting the designation as a state secondary highway of the county road which extends westerly from the Mount Hood Highway a distance of about one mile to the town of Odell. The Commission approved the request, it being in conformance with previous understanding with the County Court. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the state, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

JUL 19 1940

WHEREAS, the State Highway Commission, by mutual agreement with the Hood River County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Hood River County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Odell Secondary Highway No. 282:

Beginning at a point on the Mt. Hood Highway at the junction of the Mt. Hood Highway with County Market Road No. 1; thence west to a point approximately one-quarter mile east of Odell, a distance of approximately 0.90 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Commission also considered a resolution from the County Court of Lane County requesting the designation, as a state secondary highway, of a connection between the Pacific Highway at 6th Street, in Eugene, and the so-called Route F Highway at 11th Street. Due to the lateness of the hour and the necessity to give this matter very careful consideration the Commission decided to defer action on the resolution until the next meeting.

The Engineer brought up for discussion the matter of designating the Hood River Secondary State Highway as a through highway. He said that this highway carries a large volume of traffic and, in his estimation, traffic from side roads should be required to stop before entering the same. He recommended appropriate action by the Commission to that end. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Hood River Highway extending from its junction with the Columbia River Highway at or near Hood River thence in a southwesterly and southeasterly direction to a junction with the Mt. Hood Highway at or near Parkdale is a secondary highway and therefore a part of the state system of secondary highways; and

JUL 19 1940

WHEREAS, said highway carries a large volume of traffic, and between its termini is intersected by several local roads serving the various communities through which said secondary highway passes; and

WHEREAS, in the judgment of the Commission said Hood River Highway should be designated as a main-travelled or through highway.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the Hood River Secondary Highway from its junction with the Columbia River Highway at or near Hood River throughout its entire distance to its junction with the Mt. Hood Highway at or near Parkdale be and the same hereby is designated as and declared to be a main-traveled or through highway.

2. That the Highway Engineer be and he hereby is instructed to place or cause to be placed along said highway at all points where roads intersect or enter the said Hood River Secondary Highway signs or markers notifying drivers of vehicles to stop before entering or crossing said highway.

3. The Engineer is further instructed to place such signs or markers as nearly as practicable at the place where said cross or intersecting roads meet a prolongation of the nearest property line of such through highway, and the place where such signs are installed shall designate to the drivers of motor vehicles entering said through highway from any of said cross or intersecting roads the place where the stop shall be made.

4. This resolution shall be entered in the minutes and records of the Commission as of the nineteenth day of July, 1940, and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Hood River County, Oregon.

The Engineer reported the award of the following contracts since the last meeting, authority previously having been granted him by the Commission to make such awards when certain conditions had been satisfied:

Construction of maintenance patrol station at Blue Mountain on the I.O.N. Highway, in Malheur County. Bids taken June 14, contract awarded July 1, 1940, to Fife & Company, the low bidders.

Grading and paving of the Warrenton Section (Massachusetts Avenue-Market Street) of Fort Stevens County Road, in Clatsop County. Bids taken June 13, contract awarded July 12, 1940, to Jacobsen-Jensen Company, the low bidders.

JUL 19 1940

Grading and surfacing of the Bandon Section of the Oregon Coast Highway, in Coos County. Bids taken June 14, contract awarded July 12, 1940, to Coos Bay Dredging Company, the low bidders.

The Commission confirmed these awards as reported.

The Engineer requested authority to purchase the following equipment:

- 20 four-wheel-drive trucks of the Marmon-Harrington type,
20 old trucks to be traded in on purchase price. Estimated cash outlay \$64,000.
- 1 Snogo for use on the Willamette Highway, estimated cost \$16,000.
- 30 modern push-type snow plows for installation on Ford trucks, estimated total cost \$10,500.
- 1 set Lowell steel socket bridge wrenches for use of bridge crew, estimated cost \$200.

The Commission approved the request by unanimous vote:

The Engineer requested authority to advertise for sale certain obsolete, worn-out equipment and an accumulation of junk, such as old tires, scrap iron, and other materials, stored at the several highway shops. The Commission approved the request.

The Engineer brought up for discussion the matter of allowing a 10 per cent weight tolerance for loads transported over state highways. He said that frequently applications are filed for movements that weigh in excess of the statutory weight limits and it was his thought, in view of the fact that the 1939 Legislature allowed log haulers a 10 per cent weight tolerance in the transportation of logs, that it would be no more than fair that haulers of other commodities should be given similar consideration. He recommended a weight tolerance of 10 per cent for the movement of such commodities in special instances only, but not as a general rule. The Commission approved the recommendation.

The Secretary pointed out a peculiarity in the law with respect to the length of loads that may be transported over the public roads in Oregon, particularly the law which authorizes movements up to 50 feet overall in length where the hauling equipment consists of truck and full trailer, but limits the overall length to 35 feet where the hauling equipment consists of a truck and semi-trailer. He pointed out that, according to this law, a load of lumber involving an overall length of 50 feet may be transported without special permit from the Commission, but if small articles such as shingles, cement, hay or similar commodities, are made a part of the load, then the classification immediately changes and the 35-foot overall length obtains. He inquired whether or not the Commission desires to make any special concession in cases of this kind. It was the Commission's decision that the law, "as written, must govern and that requests for special permits in cases of this kind should be denied.

JUL 19 1940

The matter of increasing the salary of the Radio Technician, Wm. R. Patton, and two of his assistants, Harold C. Anderson and Wm. Grenfell, had the attention of the Commission. The Engineer advised that these employees have passed the federal civil service examination for Radio Inspector, which commands a salary of \$2,600.00 per year, and are open for appointment in the federal service at any time. He pointed out that Mr. Patton's present salary is \$2,220.00 per year and that of each of his assistants is \$1,800.00 per year. He recommended an increase for Mr. Patton and Mr. Grenfell because they are particularly well trained for the work that they are doing, hold first class radio operators' licenses, and would be hard to replace. It would be possible, he added, to replace Mr. Anderson with an officeman who is not highly specialized in radio work, so he is not recommending an increase for him. The Commission by unanimous vote approved increases for Messrs. Patton and Grenfell but left it with the Engineer to fix the amounts thereof.

The Engineer read aloud a letter directed to Mr. A. G. Teepe, Portland, replying to his inquiry of June 25, 1940, whether or not the operation of heavy logging trucks on the Oregon Coast Highway comes within the scope of the state law and whether or not the State Highway Commission has authority and power to regulate the weight of such equipment so as to provide for safety on the highway and against impairment of the roads. The Commission approved the Engineer's reply.

The Engineer reported that the management of Linfield College, McMinnville, in order to bring attention to Linfield campus, has installed concrete letters on the cut slope of the Pacific Highway West in front of Linfield College without having first obtained permission from the State Highway Commission so to do. He pointed out that the letters that were installed are purely of an advertising nature and are therefore illegal. He requested instructions as to how to handle the matter. He was instructed by the Commission to bring to the attention of the college authorities the law pertaining to the erection and maintenance of advertising signs on state highway rights of way and to inform such authorities that the Commission does not have the legal right to grant a permit for the maintenance of a sign or emblem of this character upon the highway right of way and in view thereof the occupancy of the highway by the sign referred to is by sufferance only and entirely at the risk of the college and that the Highway Commission does not approve the same, and will appreciate opportunity to discuss any matters of similar nature that may arise in the future before any work on the state's property is commenced.

The Commission considered and approved the request of Wheeler County Court that the Highway Commission take bids at its next meeting on behalf of the county for the reconstruction of a county road bridge at Spray.

The Secretary presented a letter from Mr. John Helfrich, Brothers, Oregon, stating that the Directors of the School District at that place contemplate presenting to the Highway Commission an offer to purchase a sufficient area of ground in the Oasis State Park at Brothers on which to maintain a school building. Mr. Helfrich protested the use of the state's property for such purpose and urged the Commission to deny the request when received. The Commission concurred in his viewpoint of the matter and

JUL 19 1940

expressed its intention to refuse the School Board's offer, which refusal is in line with the Commission's established policy with respect to such matters.

The Commission had under discussion a request from Mr. Arthur L. Churchill, Portland, for permission to use the ocean beach at Manzanita as a landing place for an airplane on Saturday and Sunday, July 20 and 21, as may necessary during the search for the body of his son who was recently drowned in the surf at this beach. The Commission approved the request unanimously, subject to the condition that an officer from the State Police Department be present during the time that the beach is used for this purpose.

The Engineer brought up for discussion the matter of granting the Northwest Development Company of Baker, Oregon, permission to do certain excavation work on the right of way of the Sumpter Valley Secondary State Highway in the vicinity of the town of Sumpter so as to permit the movement of its gold dredge from one side of the highway to the other. The Engineer recalled that this matter was discussed at a previous meeting and it was understood at that time that the company wanted to conduct dredging operations generally on this highway. However, further investigation reveals that that is not the case and that it simply wants to move the dredge from one side of the highway to the other, which necessitates the digging of a trench large enough to float the dredge. He questioned very much that the company would want to dredge the entire highway after considering that it would cost about \$5,000.00 to construct a suitable detour road for traffic. However, he recommended that the company be permitted to dredge the entire highway if it so desires and will pay the entire cost of constructing the detour road and the cost to maintain the same during the time that it is in use. The Commission approved the recommendation and ordered that the matter be covered by appropriate agreement between the Commission and the Northwest Development Company.

The Commission considered the application of A. E. Stebinger, representing Stebco, Inc., Vancouver, Washington, for permission to transport logs over the Columbia River Highway within the city limits of the town of Mosier, particularly from a point near the east city limits of Mosier to a point about 500 feet west of the city limits of Mosier. The matter was referred to the Engineer for investigation and report as to whether or not such operations would create an undue hazard to the general traveling public.

A letter was presented from Lake County Chamber of Commerce inviting the State Highway Commission and its staff to be the guests of the Chamber at the annual meeting of the Order of the Antelope on Hart Mountain on July 20 and 21, and suggesting that the Commission make its inspection of the Warner Valley Secondary Highway at the same time. The Commission expressed regrets that it could not accept this invitation.

The Engineer brought up for discussion the request from the American Youth Hostels Association for the erection of markers along state highways indicating routes to be used by the members of this organization. He gave as his understanding that certain loop trips are designated for the various groups and that hostels are established at approximately 15-mile intervals thereon, such hostels being private residences in most instances. In any

event they are privately owned. He further advised that, according to his understanding, the members travel either on foot or on bicycles and that the routes are laid out, in so far as possible, so as to avoid main highways, and that the people in charge are asking the Highway Department to prepare and erect signs indicating these routes, a sign to be erected at each point where there would be any possibility of the members taking the wrong road. He pointed out that it is contrary to a long-established policy of the Commission to permit signs of this kind on official highway department signposts and suggested that a more satisfactory way to handle the matter would be to use the Highway Department's main-traveled road map in conjunction with a few signs placed at strategic points, particularly at turnouts to the hostels. After considerable discussion the Commission approved the Engineer's suggestion unanimously and instructed him to convey this information to the persons in charge of the Youth Hostels movement and to inform them that the state would furnish the maps and erect signs in accordance with this decision.

The Engineer reported a request from the Honorable Earl Snell, Secretary of State, that the State Highway Commission assume the sponsorship and responsibility of securing certain factual information concerning automobile travel in this state for use by the National Association of Motor Vehicle Operators, of which association Mr. Snell is vice president. He estimated that it would cost about \$500.00 to secure the information desired by Mr. Snell and recommended denial of the request because the information will be of no particular value to the State Highway Department inasmuch as a considerable portion of the information wanted has already been secured in connection with the State-wide Planning Survey. The Commission approved the recommendation; however, instructed the Engineer to give to Mr. Snell as much information as he wants of the material already assembled.

Reconsideration was given by the Commission to the claim of Miles Homer Otis Estate which was presented to the Commission on the previous day by Mr. Lee Lewis, Corvallis, administrator of the estate. Due to the lateness of the hour the Commission was unable to give this matter proper attention and accordingly deferred a decision until the next meeting. The Secretary was instructed to so inform Mr. Lewis and to advise him that the Commission is inclined to deny the claim unless the Commission's Attorney, who was previously called away from the meeting, should make a favorable recommendation.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

George F. Anderson, Contract No. 2235, for the construction of a bridge over the Necanicum River at Black Bridge, on the Oregon Coast Highway, near Seaside, Clatsop County, requested an extension of time of 30 days, from July 31 to August 31, 1940, within which to complete this job. He alleged that failure to complete this job within the specified time limit was due to unusual high water in the Necanicum River during the spring months. The Engineer advised that the reason given by the contractor for failure to complete the job within the specified time limit is incorrect because the water in the Necanicum River was unusually low for that time of the year.

JUL 19 1940

However, he recommended the granting of the request subject to the condition that the contractor be charged with all of the engineering expense incurred by the state subsequent to the specified date of completion, which is July 31, 1940. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

F. R. Hewett, Contract No. 2222, for the furnishing of crushed rock in stock piles for the Nye Junction-Long Creek Section of the Pendleton-John Day Highway, in Grant and Umatilla Counties, requested an extension of time of 7 days, from June 30 to July 7, 1940, within which to complete this project. He attributed his failure to complete the project within the specified time limit to prolonged wet weather, which delayed the beginning of his operations until April 16. He also alleged that his work was retarded considerably by rainy weather subsequent to that time and by difficulties encountered in operating the quarry. The Engineer advised that the principal reason for the contractor's failure to complete the project within the specified time limit was the fact that the road over which it was necessary for him to transport his equipment was posted for reduced loads and even if it had been possible for him to deliver the equipment at the quarry site he could not have proceeded with the rock crushing work because the reduced load limit on the highway would have prohibited the hauling of the crushed materials to the stock piles. He further stated that the contractor lost 30 days' time due to this feature; also, that the delay has not increased the cost of the work to the state nor inconvenienced the traveling public. He recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2210, 2222, 2247, 2262, 2265, and 2274, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2210, with Roy L. Houck, for grading the South Unit, Siskiyou-Bear Canyon Section of the Pacific Highway, in Jackson County. Completed July 7, 1940.

Contract No. 2222, with F. R. Hewett, for furnishing crushed rock in stock piles for the Nye Junction-Long Creek Section of the Pendleton-John Day Highway, in Grant and Umatilla Counties. Completed July 6, 1940.

JUL 19 1940

Contract No. 2247, with Morrison-Knudsen Company, Inc., for surfacing and oiling and also furnishing crushed gravel in stock piles on the Black Bridge-Richland Section of the Baker-Homestead Highway, in Baker County. Completed June 28, 1940.

Contract No. 2262, with J. F. Johnston, for construction of a bridge over the East Fork of the Illinois River, on the Illinois Valley County Road, in Josephine County. Completed July 11, 1940.

Contract No. 2265, with E. L. Rigdon, for grading and surfacing and oiling the Lapine-West Forest Boundary Section of the Fremont Highway, in Deschutes and Klamath Counties. Completed July 6, 1940.

Contract No. 2274, with Eugene Sand & Gravel Company, for furnishing crushed rock or gravel in stock piles on the Cushman-Swissnome Section of the Siuslaw Highway, in Lane County. Completed May 25, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed the date for its next regular meeting for the receiving of bids for highway construction projects and decided to hold such meeting on Thursday and Friday, August 22 and 23, 1940, in Portland. The Secretary was instructed to make the usual arrangements to hold this meeting in the auditorium of the Public Service Building.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Lane County covering the construction of a section of Route "F" Highway between Veneta and Eugene, across the Fern Ridge Dam site.

Agreement with Fisher Bros., contractors, disposing of their claim for extra compensation arising out of their contract for surfacing the Odell Lake-Walker Mountain Section of the Willamette Highway, in Klamath County.

Agreement with E. Powell providing for rental of an RD-8 caterpillar tractor and a 12-yard carryall for use on the John Day Section of the John Day Highway.

JUL 19 1940

Agreement with the Union Pacific Company covering the installation of automatic grade-crossing signals at Adams and Pendleton.

Agreement with Wheeler County providing for county maintenance of the Kinzua County Road from its junction with the John Day Highway to a point 3.182 miles easterly thereof, after construction of the same by the state as a federal aid secondary highway project, being Project FAS- 69-A(1).

Agreement with Lane County providing for county maintenance of the Route "F" Highway between Fisher Road and the Territorial Secondary Highway after construction of the same by the state as a federal aid secondary highway project, being Project FAS 234-D(1).

Agreement with John M. Zeller and wife disposing of issues in a controversy involving right of way for the Oregon Coast Highway in Tillamook. Right of Way File 4809.

Easement agreement with George W. Joseph, Jr., and wife, providing for the construction of a water-pipe line across the Joseph property near Talbot State Park, in Multnomah County.

Easement agreement with Evans Products Company providing for detour road over the company's property adjacent to the Oregon Coast Highway in Block 8, Railroad Addition to Marshfield. Right of Way File 8172.

Easement agreement with George Hagelstein and wife providing for a detour road across the Hagelstein property adjacent to The Dalles-California Highway in Sec. 18, T. 37 S., R. 9 E., W.M., Klamath County.

Permit authorizing Bonneville Power Administration to construct certain improvements on the Pacific Highway near Eugene in connection with substation development.

Quitclaim deed conveying unto Vera Bahrke 1,125 sq. ft. of land, being a portion of 8th Street, in Albany, which has been vacated by the city on account of highway construction. Right of Way File 5509.

Bargain and Sale Deed conveying unto Clatsop County 6.09 acres of land, being a portion of Tongue Point State Park at Astoria, which property Clatsop County proposes to convey to the Federal Government for use in connection with Tongue Point Naval Base. Right of Way File R8189.

Quitclaim deed conveying unto Floyd Wood 23.4 acres of land situate adjacent to the Warm Springs Highway in the NE $\frac{1}{4}$ of Sec. 9, T. 10 S., R. 13 E., W.M., Jefferson County. Sale price \$50.00. Right of Way File 3079.

JUL 19 1940

Quitclaim deed conveying unto Douglas County 1,842 sq.ft. of land situate in the W. $\frac{1}{2}$ of Sec. 18, T. 27 S., R. 5 W., W.M., Douglas County, near the north city limits of Roseburg. Right of Way File R8219.

"Offer to Convey Easement" whereby the Commission declares its willingness to grant to the Bonneville Power Administration authority to maintain a power pole line across certain state-owned property in Hood River County, said property being known as the Lawler property. Right of Way File R6465-A.

There being no further business to come before the Commission at this time, the meeting was adjourned at 6:00 p. m.

TABLE OF CONTENTS

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1940	
9679	Aug. 16	Pacific Highway. Delegation confers relative to improvement between Roseburg and Grants Pass.
	Aug. 17	National park along Oregon coast line. Conference with representatives of National Parks Service relative to establishment of park in Curry County.
9681		Survey. Reconnaissance survey of highway through proposed national park area in Curry County authorized.
	Aug. 18	Powers Secondary Highway. Delegation confers relative to improvement.
9682	Aug. 19	Park matter. Delegation urges authorization of funds to improve small park at south city limits of Waldport.
9683	Aug. 20	Gravel on Lincoln County beaches. Delegation confers relative to removal of sand and gravel from beach. No decision.
		Traffic light. Otis. Installation at intersection of Salmon River and Oregon Coast Highways requested. Decision deferred.
		Drift logs. Prohibiting burning of logs on Lincoln County beaches requested.
		Park matter. Commission urged to purchase, as park site, land between Oregon Coast Highway and Ocean at outlet of Devils Lake.
		Netarts County Road. Tillamook County Court requests designation as state secondary highway. County to make application.
9684	Aug. 21	Klamath Falls-Alturas Road. Status of California section considered.
		Saxton, Looney & Risley. Warm Springs Agency-Vanora Section. Surety deposits check covering claim for failure to execute contract agreement and bond.
		Homer G. Johnson. Germantown Road-Barnes Road Project. Considered in default for failure to execute contract forms.
		Hood River Secondary Highway. Permanent route between Dee and Parkdale, designated as ABOD route, adopted.
9685		Bend Undercrossing. Landscaping to be done by state forces.
		Oregon Coast Highway. Ocean Lake District. Report on cost to improve Main Street Section.
		Wolf Creek Highway. Elimination of two sharp curves south of Cannon Beach Junction requested by L. H. Weathers.
9686		Survey. Location survey to determine cost to revise Wolf Creek Highway south of Cannon Beach Junction authorized.
		Mehalem. Oiling of unpaved strips adjacent to pavement on present highway approved.
		Sumpter Valley Secondary Highway. Extension of highway from Sumpter to Granite requested. Decision deferred.
		Snow removal. Sumpter Valley Secondary Highway. Removal authorized on secondary state highway portion and on county road portion if Baker and Grant Counties pay expense.
		Sprague River Road. Request that road be placed on state secondary highway system denied.
		Solvency quotients. Comparison to be made of report on Sprague River Road and Klamath Lake Secondary Highway No. 421.

<u>Page</u>	<u>Date</u>	<u>Subject</u>
	1940	
9686	Aug. 21	Midland Secondary Highway. Oiling requested. Future consideration.
9687		Coos Bay-Roseburg Highway. Request for widening of county road approach north of Myrtle Point denied.
		Wilson River Highway. Reconstruction to eliminate bad curve at Randalls deferred.
		Silver Creek Falls Secondary Highway. Request for improvement between Salem and Four Corners denied.
		Albany. City streets heretofore used as state highway routes and streets damaged by building of new route to be repaired.
		Sidewalk. Rogue River Bridge at Gold Hill. Construction of timber walk on one side of bridge approved.
		Footpath. Construction along Central Oregon Highway between Burns and Hines Mill disapproved.
9688		Construction of walk along Oregon Coast Highway at Seal Rocks denied.
		Construction between Gearhart and Seaside approved.
		American Association of State Highway Officials. Members of Commission and seventeen employees of department to attend meeting in Seattle at state expense.
9689		N. M. Finkbinder. Authorized to attend meeting of Committee on Materials of American Association of State Highway Officials in Seattle on September 13 and 14, 1940.
		Right of way budget. Attorney's report on status of budget.
		Real property. Resolution authorizing acquisition.
9696	Aug. 22	Bids. Chairman's announcement of time bids must be received.
9697		Bids received on following projects:
		Bunker Hill Section, excavation for drainage ditch;
		Brookings Section, grading and macadam surfacing;
		Gold Hill Rock Production Project;
9698		Little Butte Creek-Cascade Gorge Section, crushed rock;
		Reconstruct Henley Flume and widen U.S.R.S. canal bridge;
		Bridge at Albany;
		Eightmile-Dry Creek Section, grading, surfacing, oiling;
		Forest Boundary-Warm Springs River Section, grading;
9699		Reconstruct John Day River Bridge, near Spray.
		Footpath. Burns to Hines Mill. No action taken on suggestion of Judge Higgs that towns of Burns and Hines Mill pay portion of expense.
		Frenchglen Secondary Highway. Wright's Point-Marrows Section. Plans for calling for bids discussed with Judge Higgs.
		Hanley Lane Section. Request for resurfacing denied. To be kept in condition to maintain travel during winter months.
		Diamond Valley Secondary Highway. Improvement south of Crane requested.
		Sign. Commission disapproves wording suggested for privately-owned directional sign to be erected near Cairo directing traffic over Central Oregon Highway.
9700		Deschutes County. Delegation requests state aid in improvement of county road extending westerly from Terrebonne, passing plant of Oromite Company

Page	Date	Subject
9700	Aug. 22	Butler Market Road. Placing of road on state highway system and removal therefrom of section of Powell Butte Secondary Highway requested. Powell Butte Secondary Highway. Removal of section from state highway system and substitution therefor of Butler Market Road requested.
9701		Cline Falls Secondary Highway. Oiling north of Tumalo requested. Tumalo-Deschutes Secondary Highway. Oiling from Tumalo to connection with The Dalles-California Highway requested. Warm Springs Secondary Highway. Additional construction between Warm Springs Agency and Wapinitia Highway junction requested. Grant County. Citizens extend invitation to entertain Commission on proposed Eastern Oregon trip. Blue Mountain Springs-Prairie City County Road. Placing on secondary highway system and improvement thereof requested. Projects. Construction projects for next letting approved. Fences. Erection of electrically-charged fences to be permitted. Property owners to be responsible.
9702		World's Fair Commission. Commission's share of pay roll expense to be handled similar to salaries in State Purchasing Dept. Other expense to be handled by revolving fund voucher. Flashing beacon. Drain. Installation approved. Lights. Corvallis. Installation of sodium vapor lights on Willamette River Bridge and Mary's River Bridge approved.
9703		General Construction Company. State to reimburse company for premium on bond and liability policy furnished Union Pacific Company and Western Union Company in connection with Troutdale-Dodson Section, Contract No. 2320. Historical markers. Old Oregon Trail. Installation of 25 markers at estimated cost of \$2,600 approved. Equipment. Engineer authorized to purchase following: 12 trucks of Mack and Federal type; 13 snow plows for use on Walters trucks; 20 modern push-type plows; 6 air compressors; 1 laboratory crusher.
9704		Camera. Purchase of new camera for Travel and Information Department approved. Mr. Gifford to be reimbursed for use of his camera during past two years. Oversized equipment. Request of O. K. Transfer Company to transport overheight paving machine from Klamath Falls to Nyssa denied. Permit. Request of Pierce Auto Freight Lines for blanket permit to operate overheight equipment between Portland and California granted. Overall height limited to 12 feet.
9706		Awards. Commission announces awards of contracts. Powers Secondary Highway. Delegation renews request for oiling. Oregon Coast Highway. Newport-Otter Rock Section. Delegation urges early reconstruction.

Page	Date	Subject
	1940	
9706	Aug. 22	Corvallis-Newport Highway. Delegation requests elimination of bad dip near city limits of Newport.
		Territorial Secondary Highway. Gillespie Corner-Douglas County Line Section. Delegation requests ciling.
9707		Alsea Highway. Delegation requests completion of uncoiled lower end of highway. Chairman explains plans for improvement.
		Building. T. R. Maxwell to make monthly payments of \$100 for building at Enterprise until total amount is paid.
		Nysa. Moving of houses from property acquired by Amalgamated Sugar Company in connection with undercrossing project discussed.
9708		Bonneville Power Administration. Agreement signed covering right of Administration to construct pole lines over and across certain state highways.
		Lake. Pumping of water by individuals from borrow pit lake near S. P. Overcrossing at Eugene discussed.
		State Parks Superintendent. Authority with respect to activities which are partially federal in development of state parks discussed. Action deferred.
		Rental of building. Request of employee of General Construction Company to rent dwelling on Jordan property, Upper Columbia River Highway denied.
		Property, state-owned. Oregon City. Offer of Mr. Coleman to purchase property at connection of old and new Pacific Highways near Alernethy Creek Bridge. Decision deferred.
		Portland. Front Avenue Project. Representative of railway companies voices objection to newspaper item relative to endeavors of companies to block project. Service to industries if project materializes discussed.
9709		Property, state-owned. Grants Pass. Action deferred on offer of Hewell Wright to purchase property for access to highway.
		Albany. Thos. Gilchrist requests acquisition of property formerly deeded to state near intersection of Pacific and Santiam Highways. Investigation ordered.
		Claim. Agreement disposing of Bruno Huslik's claim for damages arising out of construction of Bend undercrossing approved.
		Property, state-owned. Albany. Application of Dr. Sternberg to purchase property at wye connection of old and new Pacific Highways denied.
9710		Freight service. Organizations along Oregon Coast Highway oppose granting permit to Consolidated Freightways, Inc., to operate fast freight service between Marshfield and California line.
		Wall. Agreement with Peninsula Drainage District No. 1 covering construction of flood wall on Swift Secondary Highway, in North Portland, signed.
		Drainage. Investigation to be made of drainage facilities on J. G. Harem's approach road to Pacific Highway, north of Roseburg.
		Safeway Stores, Inc. Permission granted to operate oversized equipment between Ontario and Idaho state line.

Page	Date	Subject
9710	Aug. 22	Claim. Damage claim arising out of death of Miles Homer Otis on Corvallis-Newport Highway denied.
9711		Condemnation. Recommended offers. Resolutions adopted as follows: Quarry site for Brookings project; Hauling road for Sage Hen Hill-Burns project; Hauling road for Brookings project; Quarry site for Brookings project; Right of way for Troy Ranch Section; Land for channel change along Troy Ranch Section; Park site in Curry County; Right of way for Jefferson County Line-Prineville project.
9718		Rental of building. Request of employee of contractor Roy L. Houck to rent building at summit of Siskiyou Mountains denied. Building. Disposal of buildings at summit of Siskiyou Mountains discussed. Lights. Policy requiring cities to pay cost of operating lights at crossing of highways and railroad tracks not to be changed. Roseburg. City refuses to pay cost of operating lights at crossing of Pacific Highway and Southern Pacific tracks. Claim to again be presented to City Attorney.
9719		Lookout. Construction of lookout on Sun Mountain adjacent to The Dalles-California Highway requested. Pendleton-Adams Highway. Old route to be offered to Umatilla County for maintenance as county road. Wilsonville. Establishment of memorial garden discussed. Title reports. Rates charged by Hartman Abstract Company for furnishing real property title reports discussed. Front Avenue Project. Request that brick, lumber, etc., salvaged from buildings be given to Portland School District. Lincoln County. Acquisition of property between Oregon Coast Highway and ocean at Agate Beach discussed. Kings Valley Secondary Highway. Portion in Benton County. Abandonment resolution.
9721		Alsea Highway. Portion in Lincoln County. Abandonment resolution.
9723		Park matter. Clean-up work in park south of Oregon Coast Highway near Astoria authorized. Request made by Oregon Historical Society. American Legion Park. Name suggested for timber strip adjacent to Fremont Highway south of Lakeview. Parks Superintendent to investigate and report. Roadway. Construction of roadway from Willamette Highway to Crescent Lake and designation as secondary highway discussed. Snow removal. Keeping road open from Willamette Highway to Crescent Lake discussed. Fences. Request of Horsefly Cattle Association for state cooperation in construction of fences along Klamath Falls-Lakeview Highway east of Ely denied.
9724		Territorial Secondary Highway. Request for oiling between Elmira and Sigulaw Highway junction denied. Oiling requested between Central Turn and Lorane.

Subject

- Aurora-Portland Highway. Early completion urged.
Knoll. Bunker Hill District. Request for removal of knoll adjacent to Oregon Coast Highway denied.
Polk County highways. Letter from C. A. Robertson expressing need for improvement.
Umatilla County. County Court, by letter, requests several improvements.
- 9725 Crater Lake Highway. Improvement through Fort Klamath requested.
Albany-Lyons Secondary Highway. Oiling of unoiled section between Scio and Thomas Creek requested.
Tualatin Valley Highway. Widening for four lanes of traffic between Portland and Forest Grove requested.
Load limit. Resolution lifting reduced load limit on Alsea River Bridge and on small trestles on Alsea-Deadwood Secondary Highway.
- 9726 Survey. Location survey on Pacific Highway in Josephine County extended to section between Wolf Creek and Glendale junction.
Gold-dredging operations. Request of C. W. Henderson to conduct gold-dredging operations adjacent to Pacific Highway, near Bear Creek, in Jackson County, denied.
Gravel. Adoption of policy with respect to removal of sand and gravel from ocean beach areas discussed. Inspection of beaches between Waldport and Roads End ordered.
Electrical Service. Secretary to sign application to Pacific Power and Light Company for electrical service at maintenance headquarters at Rufus.
- 9727 Klamath Falls-Malin Highway. Application to Department of Interior for permission to reconstruct highway across irrigation canals and ditches in Klamath County. Resolution adopted.
- 9728 Award of contracts. Commission approves following awards:
Wilsonville ferry service, Leonard & Slate;
Eugene-Fisher Road Section, Berke Bros.;
- 9729 Nyssa undercrossing, Henry L. Horn.
Permits. Issuance of permits to be concentrated in Salem office rather than in offices of Division Engineers.
Newspaper boxes. Application of Eugene Daily News to install boxes, in Lane County, within highway rights of way. Action deferred.
Log hauling. Complaint filed on closeness with which logging trucks operate on Wolf Creek Highway and Oregon Coast Highway. State Police requested to observe movements.
Columbia River Highway. Correspondence relative to securing special allotment of funds for construction of new route.
Logging traffic. Public Utilities Commissioner requested to insert clause in permit requiring trucks to stop before crossing railroad tracks at grade.
- 9730 Snow removal. Oregon Caves Highway. Operations not to be conducted.
Signs. Request for erection of signs diverting traffic to Central Oregon Highway denied.

Page	Date	Subject
	1940	
9730	Aug. 22	Signracks. Hillsboro. Rotary Club inquires regarding erection of signracks outside city limits.
		Signs. Adoption of policy regarding maintenance of city entrance signs, lodge signs, et cetera, on rights of way of state highways at city entrances discussed.
		Redwood Empire Association. Commission invited to attend 20th annual convention in Ukiah, California. Harold B. Say authorized to represent Commission.
9731		Parks or state forests. Orange Belt Mineralogical Society suggests establishment of state parks or forests in southeastern Oregon.
		Tolls. State Grange endorses efforts for removal of tolls across Columbia River.
		Surveys. List of surveys ordered since last meeting.
9733		Extensions of time, as follows:
		D. L. Ashton, North Roseburg roadside improvement;
		J. W. & J. R. Hillstrom, bridge over Coalbank Slough;
		Norris Bros., Butte Falls Section;
9734		Chester T. Lackey, Brothers-Harney County Line Section;
		F. R. Hewett, Mountain Rest-Mt. Vernon Section;
		R. O. Dail & Warren Bros., Warm Springs Agency-Vanora Sec.;
9735		J. C. Papin, Bend-Butler Ranch Section;
		Haigh Bros. & Hughes, drilling well on I.O.N. Highway.
		Contracts completed and accepted, as follows:
9736		Salt Creek Falls-Odell Lake Section, J. A. Lyons;
		North Roseburg roadside improvement, D. L. Ashton;
		Buchanan-Juntura Section, A. Milne;
		Butte Falls Section, Norris Bros.;
		Cottonwood Creek-Lakeview Section, Rogers Construction Company and J. C. Compton;
		Mountain Rest-Mt. Vernon Section, F. R. Hewett;
		Trout Creek-Toll Creek Section, E. C. Hall Company;
		Bend-Millican Section, A. S. Wallace;
		Willamette River Bridge at Corvallis, Averill & Corbin;
9737		John Day-Prairie City Section, Triangle Construction Co.;
		Silver Lake-Chalk Cliff Section, Warren Northwest, Inc.;
		Fir Creek-Laurel Road Section, M. L. O'Neil & Son;
		Austin Junction-Baker County Line Section, Fisher Bros.;
		Weston-McDougal Camp Section, Norris Bros.;
		Lamonta-Crook County Line Section, Frank Penspcker;
		Brothers-Harney County Line Section, Norris Bros.;
		Well drilling on I.O.N. Highway, Haigh Bros. & Hughes;
		South Milton Section, Warren Northwest, Inc.
		Date for next regular meeting set for October 10 and 11, 1940.
9738		Subsequent meetings scheduled for November 12 and 13, December 17 and 18, 1940; and January 23 and 24, 1941.
		Inspection trip in Eastern Oregon tentatively scheduled for first week in October.
		Projects for 1941 construction on primary and secondary hwy's.
		List of projects approved.

	1940	
9740	Aug. 22	Budget. Biennial budget for period January 1, 1941, to June 30, 1943, adopted. To be submitted to Legislature.
9742		Fort Stevens County Road. Action deferred on placing road on state secondary highway system.
		Warm Springs Highway. Section from junction with Wapinitia Highway to Madras to be placed on federal aid highway system.
		Letter to Public Roads Administration requesting designation.
		Boardman-Stanfield revision of Old Oregon Trail. Placing on federal aid highway system approved. Letter to Public Roads Administration requesting such designation. (See page 9852)
9744	Aug. 23	Bids received on following construction projects and for sale of scrap materials and obsolete equipment.
9745		Keating Road-Ruckles Creek Section, grading and bridge;
		Troy Ranch Section, grading and surfacing;
		Sage Hen Hill-Harney Section, crushed rock;
		South Newport Section, grading, surfacing and oiling;
9746		Redrive pier fenders for Yaquina Bay Bridge;
		Reconstruction of King Creek Culvert;
		Widen bridge over Beaver Creek, at Beaver,
		Obsolete equipment and scrap materials stored at Salem, Klamath Falls, Coquille and La Grande Shops.
		Log hauling. Cannon Beach Road. G. R. Van Vleet offers use of his construction equipment for widening road if permission granted him to transport logs thereover at any time of year. Investigation ordered.
		Cannon Beach Road. G. R. Van Vleet offers use of his construction equipment to widen road to permit log hauling thereover.
		Eugene. Delegation confers relative to construction of connection between Pacific Highway and Seventh Street.
9747		Roadway. Delegation confers relative to construction of road from Willamette Highway to Crescent Lake.
		Strategic highways. Selection of highways from military standpoint discussed.
		Baker County. County Judge Charles E. Baird requests several highway improvements.
9748		Awards. Commission announces awards of contracts and sale of scrap material and obsolete equipment.
9749		Maintenance buildings. List of buildings to be approved for construction. Commissioners to review plans.
9750		Picture. Request for state cooperation in cost of airview picture of South Sixth Street District in Klamath Falls approved. State's share \$200.00.
		Salem. Request for discontinuance of detour maintained around highway construction work in South Salem denied.
		Rock. U. S. Fish and Wild Life Service requests permission to obtain rock from state property along Columbia River Highway near Troutdale.
		Trees. Request of A. V. Sundholm to cut trees along Pacific Highway East in front of his auto camp at Harts Pond denied.
		Training classes. Request of National Defense Training Workers to conduct training classes at La Grande Shops denied.

9751 Aug. 23

Wolf Creek Highway. Banks-Duxton Section. Request for oiling to make road available for public use this winter denied. Oswego Highway. Landscaping of Oswego Section discussed. Metarts County Road. Designation as state secondary highway approved if Tillamook County Court will make application. Oregon Roadside Council. Request that Commission intercede with Legislature to secure state funds to finance activities of Council denied.

Trees and shrubs. Request of Multnomah County Roadmaster to remove trees and shrubs adjacent to Pacific Highway West, at intersection of S. W. 13th Street and Capitol Hill, approved. Recreational area. Mrs. Echols suggests state purchase promontory known as Iron Mountain near Agate Beach. No action.

9752

Agreements, et cetera, signed as follows:

Bonneville Power Administration, construction of power lines over and across certain state highways;

Clarence Cox, disposing of claim for damages to property in Linn County;

Bruno Huslik and wife, disposing of claim for damages to property in Bend;

Earl C. Reynolds and wife, additional right of way for Klamath Falls-Malin Section of Klamath Falls-Malin Highway;

City of Albany, culvert installations in Albany;

A. S. Wallace, disposing of claim for extra compensation arising out of Contract No. 2271, Bend-Millican Rock Production;

Amalgamated Sugar Company, disposing of claim for injury and losses sustained by construction of Nyssa Underpass;

Susan Durrell, lease to Mrs. Durrell of state-owned property in Benton County;

Southern Pacific Company, terminating lease of gravel storage site at Wilbur;

9753

Charles B. Short and wife and Fred Williams and wife, payment of damages arising out of construction of Nyssa Undercrossing;

Loring Taylor, Administrator of estate of Albert Hensch, payment of damages arising out of construction of Nyssa Underpass;

Log hauling. Coast Highway Association endorses policy of Commission prohibiting hauling on Saturday afternoons, Sundays, holidays and during hours of darkness.
Rest room facilities. Establishment of facilities at Otter Crest and Depoe Bay requested. Investigation ordered.
Oregon Coast Highway. Marshfield-North Bend Section. Mr. Arch B. Sanders suggests acquisition of right of way now.
Gold Beach Section. Reconstruction discussed. No action.
Oregon City. I. C. Nealeigh requests filling in of right of way in front of his property in Block 11. Mr. Nealeigh offers to furnish material if state will do work.

9876

Albany. Delegation confers relative to routing logging trucks through city.
Engineer recommends designation of Lyon Street from new highway to First Street a state highway route.
Traffic signal. Albany. Installation of beacon at intersection of Lyon and First Streets discussed. No action.
Log hauling. Mr. Jess Dawes granted permit to transport logs in vicinity of Molalla on equipment purchased from Mr. Emil Waldkirch. (See page 9856 re equipment)
Samuel Lancaster. Services with department terminated.
Right of way budget. Attorney's report.
Minutes of meetings held June 13 and 14, June 20, July 18 and 19, August 16 to 23, incl., and September 30 to October 4, 1940, approved.

9877

Real property. Resolutions authorizing acquisition.

9884

Portland. Front Avenue Project. Resolution authorizing acquisition of real property needed for right of way.

9885

Condemnation. Recommended offers. Resolution adopted:
Right of way for West Portland-Tualatin Section;
Multnomah County Line-Scappoose Section; Jefferson County Line-Prineville Section; Forest Boundary-Cottonwood Creek Section, and Nashville Section.

9892

Claim. Payment of \$100 to Mrs. Delma Prewett for damage to her property at Toledo approved.
Boardman-Stanfield Road. Engineer's report on changes proposed by L. A. McClintock. Decision deferred.
Right of way options not to be closed until study made of plans of U.S. War Department to establish munitions dump and bombing range in vicinity of highway.

River Highway, in Yamhill County.

Roseburg, Oregon, August 16, 1940

The State Highway Commission met with W. C. Harding, Secretary of the Roseburg Chamber of Commerce, A. C. Marsters, member, and Carl I. Rynearson, Manager of the Pacific Highway Association, in the dining room of the Unpqua Hotel at 1:00 p. m. for a brief discussion of matters pertaining to the securing of a special allotment of federal funds with which to finance improvements to the Pacific Highway between Roseburg and Grants Pass.

Mr. Harding advised that arrangements have been made for Mr. Rynearson to go to San Francisco within the next ten days to discuss with the Commander of the Ninth Corps Area of the United States Army the question of securing federal funds to improve the Roseburg-Grants Pass Section of the Pacific Highway so as to make it suitable as a military highway for the rapid transportation of troops and motor equipment, and they feel that their cause would be aided greatly if one of the members of the State Highway Commission would accompany Mr. Rynearson on this trip. He suggested that the Commission authorize Commissioner Clough to do this at state expense. The Commission took the matter under advisement.

Henry F. Cabell
Chairman

W. C. Harding
State Highway Engineer

Huron W. Clough
Commissioner

Herman Oliver
Commissioner

Ar. Breasing
Secretary

Gold Beach, Oregon, August 17, 1940

The State Highway Commission met in special session at 9:00 p. m. in the parlor of the Sunset Inn with representatives of the National Parks Service for a discussion of matters pertaining to the establishment of a national park and recreational area along the Oregon coast line, in Curry County. Representing the State Highway Commission were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary
S. H. Boardman, State Parks Superintendent

Representing the National Parks Service were Conrad L. Wirth, Supervisor of Recreational and Land Planning, Washington, D. C.; Mark H. Astrup, Assistant Regional Director, Region No. 4, San Francisco; and Claude E. Greider, State Supervisor, Division of Recreational and Land Planning, San Francisco.

AUG 17 1940

Mr. Wirth advised that the desirability of establishing a national park and recreational area along the coast line in Curry County has been determined and that the proposed bill that has for its purpose the establishment of such park has been approved by the Secretary of the Interior; further, that his visit to Curry County on this occasion is for the purpose of going over the properties involved with a view to the establishment of the ultimate boundaries of this park. He said that any statements that he makes at this meeting are not final but must be confirmed by higher authorities, but he is in hopes that he will be able to reach an informal agreement with the State Highway Commission at this time with respect to matters pertaining to this subject. He further stated that the Federal Government is not particularly interested in the upland area in the proposed park but is primarily interested in the lands along the coast line and sufficient area back of this to protect the main body of the park. Generally, he said, the park should include all of the land between the ocean and the Oregon Coast Highway from Harris Beach on the south to Pistol River on the north, and sufficient land on the east side of the highway to protect the area from encroachments. It was his thought that perhaps a strip from 500 to 1000 feet in width on the east side of the highway would be sufficient for this purpose. He suggested that the state acquire additional land between Pistol River and Meyer Creek so as to consolidate the state's holdings in this section up to a place known as Buena Vista Park. He also suggested state acquisition of additional property between Buena Vista Park and Gold Beach in order to obtain full control of the entire coast line between Gold Beach and Brookings, except certain portions that are chiefly valuable from the farming standpoint. The Federal Government, he said, would provide funds with which to purchase the area within the proposed park but the state would be required to purchase the wayside strips from Pistol River to Gold Beach, making the area jointly owned by the government and the state. However, the participation in the cost by the government and the state is a matter that would have to be agreed upon later.

Chairman Cabell pointed out that the State Highway Commission has only limited funds available for projects of this kind but the Commission is willing to do all that it can to assist, considering the limited amount of funds. It is beyond the power of the Commission, he said, to acquire or maintain such a large area as the Federal Government has in mind for this national park; however, the Commission feels that the idea of the establishment of a national park in Curry County is a very good one and a very desirable one to discuss.

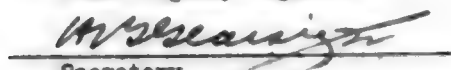

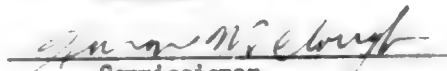

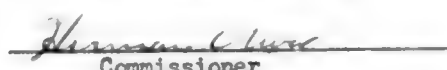

The Engineer pointed out that the present highway through this district is not on permanent alignment and probabilities are that it will have to be relocated at some future time. He inquired whether or not the Federal Government would permit such relocation after the park has been acquired and if the Government would pay any of the expense of relocating the highway.

Mr. Wirth replied that the Government has never had any trouble in ironing out difficulties of this kind with the several states and he anticipated no difficulty in this instance. He advised, however, that the Government would prefer that the highway be not permanently located too close to the coast line.

The matter of permitting stock-grazing on the park area was also discussed. Mr. Wirth stated that the National Parks Service would prefer that stock be not allowed to graze in the park between the highway and the ocean, but would not object to a limited amount of grazing in the area east of the highway. He added that, in cases where property owners are now grazing their stock in the proposed park area, they would be allowed to continue the use of the property for this purpose for a limited length of time, to enable them to adjust themselves to the new conditions.

After further discussion, during which the Commissioners expressed themselves as being in favor of the establishment of this park if satisfactory arrangements can be made for the same, the Engineer was authorized to make a reconnaissance survey through this section to determine the permanent location for the highway. He was instructed to make such survey at once.

The meeting was adjourned at 10:00 p. m.

 State Highway Engineer	 Chairman
 Secretary	 Commissioner
	 Commissioner

Powers, Oregon, August 18, 1940

The State Highway Commission met with a large group of Coos County citizens, particularly from Powers, Myrtle Point, Coquille, and way points, at 4:00 p. m. in the Lodge Room at Powers, for a discussion of matters pertaining to the improvement of the Powers Secondary State Highway. Present were:

Henry F. Cabell, Chairman
 Huron W. Clough, Commissioner
 Herman Oliver, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Heading the local group of approximately one hundred was Mr. Ropper, member of the Myrtle Point Lions Club.

Mr. Ropper presented several petitions signed by numerous residents of Coos County requesting the oiling of this road, and brief summarizing data and information gathered by local citizens, bearing upon the question of the advisability of oiling this secondary highway throughout its entire length from

its junction with the Coos Bay-Roseburg Highway to Powers. There followed a general discussion of the matter, during which numerous arguments were presented in behalf of the improvement.

Chairman Cabell expressed the attitude of the Commission with respect thereto. He advised that the Commission appreciates the need for the improvement of this road and intends to give it very careful consideration in the preparation of its next construction program, but is not in a position at the present time to state just what it can and will do, although the Commission hopes to make a start on the project in the not far distant future. He pointed out that the surfacing on the road at the present time is not suitable for an oil treatment and before any oiling work could be undertaken additional rock to stabilize the present surfacing would have to be applied. The cost of the improvement, he said, is a considerable sum and in view thereof it does not now appear possible for the Commission to do the entire project at one time, although it will be considered. The season is too far advanced, he said, to do any work this summer and the best that the Commission could hope for would be to provide the rock this fall and winter and do the oiling next year. He made it clear that the Commission is not making a definite commitment to the project at this time but intends to give it serious consideration in the preparation of the next construction program.

The meeting was adjourned at 4:30 p. m.

<p><u><i>[Signature]</i></u> State Highway Engineer</p> <p><u><i>[Signature]</i></u> Secretary</p>	<p><u>Henry F. Cabell</u> Chairman</p> <p><u><i>[Signature]</i></u> Commissioner</p> <p><u><i>[Signature]</i></u> Commissioner</p>

Waldport, Oregon, August 19, 1940

The State Highway Commission, all members being present, met at 3:00 p. m. with a number of local citizens, including Mayor Wm. F. Keady, at the small state park on the west side of the Oregon Coast Highway near the south city limits of Waldport.

The committee urged the Commission to authorize an additional expenditure of state highway funds to further improve this small park area by filling in the same so as to make it available for the parking of automobiles, et cetera, and to make it more inviting from the aesthetic standpoint. The Commission took the matter under advisement.

--	--

Nelscott, Oregon, August 20, 1940

The State Highway Commission met with a number of local citizens at the Nelscott post office at 10:00 a. m. for a discussion of matters pertaining to the removal of sand and gravel from the ocean beach area. All members of the Commission, the State Highway Engineer, the Attorney, and the Secretary were present. Local citizens present were Messrs. Earl M. Nelson, Lundeen, Williams, and others. Also present was a Mr. Grigsby, of Newport.

Arguments were presented both for and against the further removal of sand and gravel from the beach areas, principal arguments being in behalf of the preservation of the agate-bearing gravels. The Commission made no decision in the matter, it being considered advisable to make a thorough investigation of the Lincoln County beaches before adopting any policy covering the subject.

The Commission was requested to install a traffic light at the intersection of the Salmon River Highway with the Oregon Coast Highway at Otis. The matter was taken under advisement.

The Commission was also requested to take action as may be necessary to prohibit the burning of drift logs on the Lincoln County beaches. The matter was referred to the Engineer for investigation.

The Commission was urged to purchase for state park and recreational purposes the privately-owned land lying between the Oregon Coast Highway and the Pacific Ocean at the outlet to Devils Lake. The Commission took the matter under advisement.

Portland, Oregon, August 21, 1940

The State Highway Commission met in regular session at 3:30 p. m. in Room 415, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

The Engineer reported the results of an inquiry directed to the State Highway Engineer of California relative to the status of the highway which extends southerly from Klamath Falls to Alturas, California, via Canby, California. According to the information received, a portion of this route, from Hatfield Junction to Canby, is not on the California highway system but is under county jurisdiction and cannot be taken into the state system until completed in its entirety, which will not be done for a number of years. The Commission took no action on the matter.

The Attorney reported receipt of a check from the Maryland Casualty Company in the amount of \$1,678.28, representing complete satisfaction of the Commission's claim against Saxton, Looney & Risley and their surety for failure to execute the contract agreement and the contract bond covering the Warm Springs Agency-Vanora Section of the Warm Springs Highway, in Jefferson County, which contract was awarded to them on December 8, 1939. The Commission ordered the remittance deposited in the State Highway Fund.

The Commission also discussed the failure of Contractor Homer G. Johnson to execute the contract agreement and furnish the contract bond covering the construction of the Germantown Road-Barnes Road Section of the Skyline Boulevard in Multnomah County, which contract was awarded to Mr. Johnson on June 13, 1940. In this connection it was recalled that Mr. Johnson appeared before the Commission at the previous meeting and stated that he did not wish to enter into this contract unless the Commission would authorize the changing of his bid on the asphalt item, it being his contention that the price quoted for such item should have been entered under the tar alternate, the mistake being made by a clerk in his office and not being discovered until after the bids were opened; also, that the Commission informed Mr. Johnson at that time that it could not change the bid, and that, unless he accepted the contract within a reasonable length of time, the Commission would declare him in default and would proceed to collect the amount of the bid bond. The Commission considered that Mr. Johnson has now had sufficient time to give this matter the study required and accordingly declared him in default, inasmuch as he has not yet executed the contract forms. The Attorney was instructed to take action as may be necessary to collect the amount of the bid bond.

The Engineer reported the results of investigations for determining a permanent location for the Hood River Secondary Highway between Dee and Parkdale in Hood River County. He recommended adoption of a route designated as the ABCD route on the reconnaissance survey map of this highway made in February 1940, by J. F. Waller, Locating Engineer, which route is roughly described as follows:

AUG 21 1940

Beginning at point "A", which is at the end of the present paved section of this highway in the town of Dee, at Mile Post 11.7. and extending southerly therefrom, following generally the route of the present highway, to point "B", at Mile Post 14; thence leaving the present highway route and extending in a southeasterly direction across logged-off land to point "C", Mile Post 16, at a turn in the county road known as the Bailey Road; thence south along the Bailey Road to point "D" on the present secondary highway route in the town of Parkdale.

The Engineer estimated the cost of construction of such route at \$142,000.00. After careful consideration the Commission by unanimous vote approved the routing as recommended by the Engineer, subject to the condition that no objections be offered by the Hood River County Court.

The Engineer brought up for discussion the matter of landscaping the right of way at the undercrossing recently completed on The Dalles-California Highway in the city of Bend. He advised that the underpass has been left in its natural rock state without masonry or concrete retaining walls, and, in his estimation, its appearance would be greatly improved by the planting of rock plants in the various rock pockets and crevices. He estimated the cost of the work at about \$800.00 and recommended that it be done by state forces rather than by contract work because it is almost impossible to write a specification for contract work that would insure the proper bedding for each particular plant, and for the further reason that the success of the project is dependent upon the effort that is made in setting out the plants. The plants, he said, would be contracted for in the usual manner. After discussion, the Commission approved the recommendation unanimously.

A report was submitted by the Engineer on the cost to improve the Oregon Coast Highway through the Main Street section of the Ocean Lake district in Lincoln County, by widening the existing pavement or by oiling the full width of the traveled roadway. He said that the section is about 1,300 feet in length through the business section of Ocean Lake and that the improvement would have to include not only the oiling work but construction of storm sewers, catch basins, and rock stabilization. He estimated that the entire improvement would cost about \$4,500.00. The Commission approved the report and ordered that the project be kept in mind for consideration in the preparation of the 1941 budget.

The Engineer reported on the request of L. H. Weathers, Hamlet Route, Seaside, Oregon, for the elimination of two sharp curves on the Wolf Creek Highway about 2 miles south of Cannon Beach Junction. It appears that Mr. Weathers desires to improve his property, which lies adjacent to these curves, but is precluded from doing anything of a permanent nature because the highway is not constructed in its ultimate location. The Engineer advised that the curves referred to by Mr. Weathers are reversing 10-degree and 14-degree curves and that they form the only really poor alignment on the Wolf Creek Highway. The removal of these curves, he said, would make a desirable improvement. He

AUG 21 1940

estimated the cost to reduce them to 8-degree curves at \$12,000.00 and to 6-degree curves at \$15,000.00. After discussion the Commission authorized a location survey of the project to determine more definitely what it would cost to revise the highway on permanent alignment. The Secretary was instructed to advise Mr. Weathers of the action taken.

A request was presented from the town of Nehalem for the oiling of the unpaved strips adjacent to the pavement on the present highway through Nehalem. The Engineer advised that this matter has been investigated and it is estimated that to construct an oil surface full width between curbs in this town, including necessary drainage facilities, would cost about \$3,000.00. He recommended approval of the expenditure in the 1941 construction program. The Commission approved the recommendation.

Reconsideration was given by the Commission to a resolution from Baker County Court requesting the extension of the Sumpter Valley Secondary Highway from its present terminus, about 3 miles northwest of the town of Sumpter, to the town of Granite, in Grant County. The Commission deferred a decision in this matter pending personal inspection of the road on its Eastern Oregon trip tentatively scheduled for the first week in October. The matter of snow removal on this road during the coming winter season was also discussed. In view of the extensive mining operations in the vicinity of Granite and the need to maintain this road for year-round travel, the Commission authorized the Engineer to keep the secondary state highway portion of this road open this winter at state expense. He was also authorized to conduct snow-removal operations on the county road portion if the county courts of Baker and Grant Counties will agree to reimburse the state for the expense thereof.

The matter of placing the Sprague River Road, in Klamath County, on the state secondary highway system was also discussed. The Engineer advised that investigation reveals that the road is 36 miles long and that the cost to construct it to proper standard with a 26-foot grade and with adequate surfacing, oiling, and bridges, is approximately \$654,000.00. The estimated annual maintenance cost, he said, is approximately \$22,000.00. The Commission considered that it was not justified in assuming this expense, particularly in view of the fact that the road is not of state-wide importance. The request of the Klamath County Court for the designation of this road as a state secondary highway was thereupon denied for the time being.

The Engineer was instructed to report to the Commission at the next meeting the solvency quotients for this road and for Secondary State Highway No. 421 around the west side of Upper Klamath Lake, for comparison purposes. The Secretary was instructed to inform the Klamath County Court of the action taken in this matter and to explain to the court the reason for such action.

The Commission discussed a petition from numerous residents of Klamath Falls and Midland requesting the oiling of the Midland Secondary Highway No. 420, south of Klamath Falls. The Engineer estimated that it would cost about \$65,000.00 to construct this road to proper standards, including right of way, grade widening, bridge reconstruction, surfacing, and oiling. The Commission

decided to bear this project in mind in the formulation of its next construction program for secondary highway funds, and instructed the Secretary to so inform the County Court.

The Engineer reported the cost to widen the county road approach to the Coos Bay-Roseburg Highway at Mile Post 7.82, about one mile north of Myrtle Point, as has been requested by the Myrtle Point Chamber of Commerce. He estimated such cost at \$750.00 but recommended against the improvement because, he said, investigation reveals that the present approach is now constructed in accordance with current design standards. The Commission approved the recommendation.

The advisability of reconstructing a section of the Wilson River Highway so as to eliminate a bad curve at a place known as Randalls had the attention of the Commission. The Engineer advised that the permanent location for the highway at this point has not as yet been selected and he recommended that the Commission do not approve this project at the present time but defer consideration of the same until the Wilson River Highway has been opened up for travel throughout its entire length and the need for the revision is more apparent. The Commission approved the recommendation.

A report was rendered by the Engineer on the cost to improve the Silver Creek Falls Secondary Highway from the city limits of Salem to a place known as Four Corners, a distance of about 1.33 miles, as has been requested by numerous users of this road, particularly people residing at Four Corners. He advised that an improvement similar to that now under way on the Pacific Highway West, south of Corvallis, which provides for a 44-foot width roadway with curbs and sidewalk, would cost about \$90,000.00. The Commission considered that the expense involved is far in excess of the amount that it can spare for the purpose at the present time and thereupon denied the request.

A letter was presented from Mr. Victor Olliver, City Attorney, Albany, requesting, on behalf of the City Council, the repair of the streets in Albany heretofore used as state highway routes; also requesting the repair of other city streets. It was their contention that the city is entitled to the improvement of these streets before they are turned back to the city to maintain upon completion of the new highway route through Albany, because the city paid for the original improvements, and the repairs needed now are the result of the use of the streets by state highway traffic. After discussion and upon recommendation of the Engineer, the Commission voted unanimously to repair and put in first-class condition the streets that heretofore have been used as state highway routes. The Commission also authorized the Engineer to make repairs to any of the streets adjacent to the new highway route which streets have been damaged by the state's contractor in connection with the building of a new route through Albany, this being in conformity with the Commission's established policy with respect to matters of this kind.

Reconsideration was given by the Commission to the matter of constructing sidewalks on the Rogue River Bridge on the Pacific Highway at Gold Hill. The Commission approved the construction of a timber sidewalk $3\frac{1}{2}$ feet

AUG 21 1940

wide on one side of the bridge only, which walk the Engineer estimated will cost about \$2,000.00.

The Engineer reported the cost to construct a footpath along the Central Oregon Highway between the town of Burns and the swimming pool near Hines Mill, as has been requested by people of that district. He advised that the footpath would be about 3.84 miles in length and that to construct a sidewalk grade 6 feet wide, with surfacing and oiling 5 feet wide, would cost about \$6,000.00. The Commission decided not to build this walk in view of the cost involved.

The Engineer also reported on the cost to construct a pedestrian walk along the Oregon Coast Highway at Seal Rocks. He said that investigation reveals that the people of this place want a footpath 1.2 miles in length, which will require considerable grading, consisting of high cuts and fills, which he estimated would cost about \$10,000.00. The Commission considered that the volume of pedestrian traffic that would use the walk would not justify the expense and accordingly denied the request.

Reconsideration was given by the Commission to the request of the people of Gearhart and Seaside for the construction of a pedestrian sidewalk between these two towns. The Engineer advised that, as previously instructed by the Commission, a further survey of the project has been made with a view to determining whether or not the volume of traffic that would use the walk during the summer season would justify the expense of the walk. Investigation reveals, he said, that there is considerable pedestrian traffic, but what is more important is the large volume of vehicular traffic over this road, which pedestrians must use between these two places. He estimated the cost of the footpath at about \$6,000.00, and recommended approval of the expenditure. After discussion the Commission approved the recommendation by unanimous vote and authorized construction of the walk in 1941, the work to be done either in connection with some other highway construction project in that vicinity or as a separate project, whichever method is cheaper.

Matters pertaining to the Annual Meeting of the American Association of State Highway Officials which is to be held in Seattle on September 16 to 19, inclusive, particularly the selection of employees who are to represent the State Highway Department at such meeting, had the attention of the Commission. The Engineer gave as his thought that, in view of the fact that Chairman Cabell is President of this Association and that the state expense of having a good representation at this meeting would not be great, the Oregon Highway Department should be well represented. He recommended that all members of the Commission and 17 members of the Highway Department be allowed to attend this meeting at state expense, and that state highway department cars be provided for transportation. After discussion the Commission approved the recommendation unanimously subject to further approval by Governor Charles A. Sprague. The Commission left it with the Engineer to select the personnel, it being understood that those selected would be, in general, employees who are members of subcommittees of the National Association.

AUG 21 1940

The Engineer also recommended that authority be granted to Mr. N. M. Finkbinder, Engineer of Materials, to attend a section meeting of the Committee on Materials of the American Association of State Highway Officials, which is to be held in Seattle on September 13 and 14, just prior to the general meeting. He estimated that Mr. Finkbinder's expenses in attending both meetings would not exceed \$80.00. The Commission approved the recommendation unanimously, subject to the further approval of Governor Charles A. Sprague.

The Assistant Attorney, Mr. J. W. DeSouza, was present and reported on the status of the right of way budget. He advised that the amount budgeted by the Commission for right of way purposes this year was \$600,000.00 and that of such amount approximately \$362,000.00 has been obligated. He gave as his thought that total expenditures this year would not reach the budgeted amount. The Commission approved the report.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is, instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission adjourned at 6:00 p. m., to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, August 22, 1940

The State Highway Commission reconvened in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
 Huron W. Clough, Commissioner
 Herman Oliver, Commissioner
 R. H. Baldock, State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Chairman Cabell made the following public announcement:

"We again have information to the effect that there are one or two bids in our custody in the Salem office, which bids are now on the way up here by messenger. We will once more open and read these bids, even though all of the bids for the particular projects they are for have been read before they arrive. We have always requested that bids be sent here. If they are sent to Salem hereafter they will have to be mailed in time to be received in Salem on the after-

AUG 22 1940

noon before the day of the letting. If they are not received in Salem by that time they will be returned to the bidder unopened."

Bids as follows for highway construction projects were then opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 2:00 p. m. in the same room:

OREGON COAST HIGHWAY
BUNKER HILL SECTION - EXCAVATION FOR SLIDE DRAINAGE DITCH

Martin Petersen	\$ 8,950.00
River Bend Sand & Gravel Company	10,967.50
Leonard & Slate	11,150.00
Coos Bay Dredging Company	11,860.00
H. B. Klineline	14,350.00

OREGON COAST HIGHWAY
BROOKINGS SECTION - GRADING AND BITUMINOUS MACADAM SURFACING
ALSO FURNISH CRUSHED GRAVEL IN STOCK PILES

A. Milne	\$57,089.50
Homer G. Johnson	58,213.50
E. C. Hall Company	58,635.50
Leonard & Slate	64,037.50
Coos Bay Dredging Company	65,706.65
Scheumann & Johnson	84,397.00
Joseph Shaw	85,047.00

SPRAY-WATERMAN ROAD
RECONSTRUCTION OF JOHN DAY RIVER BRIDGE, NEAR SPRAY

Averill & Corbin	\$ 5,468.00
W. H. Philpott	6,056.50
McNutt Bros.	6,380.00

County Judge Nelson B. Higgs of Harney County was present and inquired what action has been taken by the Commission on the request of the people of Burns for footpath construction along the Burns-Hines Mill Section of the Central Oregon Highway for the benefit and safety of children and others who frequent the swimming pool at Hines Mill. He was informed that the Commission discussed this matter on the previous day and decided not to build this footpath because it is an expensive undertaking and the Commission does not feel that it can spare funds for the purpose. Judge Higgs inquired whether the Commission would consider the project if the towns of Burns and Hines Mill would pay a portion of the expense. The Commission took no action on such suggestion.

Judge Higgs also inquired when the Commission expects to call for bids for the construction of the Wright's Point-Narrows Section of the Frenchglen Secondary Highway south of Burns. He was informed that the contracting of this work is dependent upon the Federal Government's approval inasmuch as federal funds are to be used to finance the work, and that the Commission will advertise this project for bids to be received at its meeting in October, if such government approval has been obtained in the meantime. In any event, the Commission will place it under contract as soon as possible.

In this connection Judge Higgs advised that the Hanley Lane Section of this secondary highway is badly in need of resurfacing, as under present conditions it is difficult to maintain travel over the road during the winter season. The Commission expressed regrets that its finances will not permit the reconstruction of this section this year; however, instructed the Engineer to do what is necessary to maintain travel over the same during the winter months.

Judge Higgs also asked for the improvement of the first four or five miles of the Diamond Valley Secondary Highway south of Crane. The Commission agreed to keep the project in mind.

Judge Higgs brought up for discussion the matter of maintaining a directional sign on private property adjacent to the Old Oregon Trail near its junction with the Central Oregon Highway just south of Cairo. He said that in an endeavor to increase travel over the Central Oregon Highway a number of communities along this route have made arrangements to maintain a sign at this junction point and would like now to secure the Commission's approval to the wording of the sign. He submitted a rough diagram of the sign with the proposed wording that will appear thereon. The Commission refused to approve the wording upon advice from the Attorney that it does not comply with the legal

AUG 22 1940

requirements. Judge Higge was informed that the Commission is reluctant to approve the erection of privately owned directional signs along state highways, and its policy in regard thereto is to oppose the maintenance of such signs unless they are worded strictly in conformance with the legal requirements.

A delegation from Deschutes County, consisting of County Judge Charles L. Allen, County Commissioner William Baer, and McKinley Stockton, General Superintendent of the Oromite Company, came before the Commission and requested state aid in the improvement of the county road which extends westerly from the town of Terrebonne and serves the Lower Bridge and Cloverdale Sections of Deschutes County, including the Oromite plant. Judge Allen stated that the Oromite Company's plant was burned down a short time ago and that there is some question as to whether it will be rebuilt, although the chances are quite favorable to that end if the company is assured of a good road over which to transport its products. He asked the Commission to oil the road as a federal aid secondary highway project and offered county cooperation by way of grading the road and making it ready for the oil treatment. Furthermore, he stated, the county will pay all of the costs of the improvement that cannot be paid with federal money. Mr. Stockton confirmed Judge Allen's statement as to the probabilities of the Oromite Company rebuilding its plant. He gave statistics as to the company's operations including annual expenditure by the company for pay rolls, taxes, et cetera. The cost of transporting their products over the existing road, he said, is extremely high because of the poor condition of the road and he gave as his thought that if the company were assured that the road would be improved it would rebuild the plant and resume operations, particularly because such improvement would cut down its transportation costs considerably and would place them in line to meet the existing strong competition.

Chairman Cabell advised that the federal aid secondary highway funds are the only funds that can be used by the Commission to finance this work and that the Commission is not in position today to give a definite answer but will do so as soon as investigation is made by the Engineer, and the Commission passes on his report. Commissioner Baer asked the Commission to make its decision before the first of November so that the county can make provision for the county's share of the cost in the county budget which will be prepared at that time. The Commission agreed to do this and instructed the Engineer to make his report to the Commission at its meeting in October. Judge Allen filed with the Commission a letter from the Bend Chamber of Commerce advising that the Bend Chamber of Commerce and the Redmond Chamber of Commerce are heartily in favor of the improvement of this road.

Judge Allen also asked the Commission to place the Butler Market Road on the state highway system, inasmuch as this road is now oiled throughout its entire length and provides a shorter route into Bend from the Powell Butte district than is now afforded by the Powell Butte Secondary Highway. He suggested that the Commission take over this road and remove from the state secondary highway system that portion of the Powell Butte Secondary Highway which extends from the Central Oregon Highway northerly to the point where it connects with the Butler Market Road; in other words, that the Commission trade the latter-mentioned section, which is 3 miles in length, for the Butler Market Road, which is 6 miles in length. The Commission took the matter under advisement.

Judge Allen presented to the Commission a petition signed by numerous citizens of Deschutes County requesting the oiling of a $3\frac{1}{2}$ -mile section of the Cline Falls Secondary Highway north of Tumalo, and the oiling of the 4-mile section of the Tumalo-Deschutes Secondary Highway from Tumalo to a connection with The Dalles-California Highway. Judge Allen urged approval of this request. The Commission took the matter under advisement.

County Judge W. R. Cook and County Commissioner F. E. Stangland, of Jefferson County, were present in regard to additional construction on the Warm Springs Highway between Warm Springs Agency and the Wapinitia Highway Junction. They urged the Commission to expedite construction of the northerly end of this section as much as possible. They were informed that the Commission is proceeding as rapidly as it can with this road and is as anxious as the County Court for the early completion of the same; also, that it is simply a question of availability of federal funds to finance the work. Judge Cook then thanked the Commission for placing this road on the federal aid system.

County Judge J. H. Allen of Grant County was present and expressed the desire of the citizens of Grant County to entertain the State Highway Commission on its proposed trip into Eastern Oregon. Chairman Cabell thanked him and advised that the Commission would be pleased to accept, if possible.

Judge Allen then brought up for discussion the need for the improvement of the Blue Mountain Springs-Prairie City County Road. He said that this road is in poor condition and they would like to have it placed on the state secondary highway system so the state could improve it. Otherwise, he said, the county would have to resurface the road, which is quite a problem to the county in view of its present financial condition. The Commission took no action on the matter.

The Engineer presented a list of construction projects, being a partial list of projects proposed for letting at the next regular meeting of the Commission. After due consideration, the Commission approved the following projects and authorized the Engineer to advertise them for bids to be received at such meeting:

Blalock-Lang Canyon, Grad., Surf., & Bit. Mac.	40 FA	\$145,000
Marshfield-Bunker Hill, Grad. & Pav.	40 FA	46,000
North Marshfield Section, Grad. & Pav.	41 FA	65,000
Goose Rock Section, Grad., Surf. & Bridge	41 FA	45,000
Troutdale-Oneonta, Riprap & Topping	41 FA	107,000
Okerman Ranch-Sage Hen Hill, Grad., Surf., & Oil	41 FA	98,300
Siletz-Toledo, Grad., Surf., & Oil	39 FAS	33,000
Kimberly-Simas School (V. Unit), Grad. & Surf.	40 FAS	22,000
Wrights Point-Narrows (N. Unit), Grad. & Top.	40 FAS	15,200
Woodburn-Rock Creek, Surf., Oil, & Rock Prod.	40 FAS	21,500
Wasco County Line-Madras, Rock Prod.	State	13,400
Mosier-Seufert, Rock Prod.	State	15,600
Tillamook Rock Production Project	State	13,700
Mud Hollow-Oak Creek, Grad., Surf., & Oil	41 FAS	30,000

The Attorney brought up for discussion the question of permitting property owners to maintain electrically charged stock fences along highway rights of way. He said that ordinarily these fences do not carry sufficient voltage to do any harm to people or stock coming into contact with them but it

AUG 22 1940

has been brought to his attention that there is a possibility of harmful effects in the event something should go wrong, and in view thereof he questioned the advisability of permitting such fences along the edge of the right of way without first notifying the property owners that the Highway Commission will not assume any responsibility or liability in connection with any accidents that might result therefrom. He suggested the preparation of a circular letter to that effect, same to be distributed to the property owners through the offices of the Division Engineers. After discussion the Commission decided to allow the erection of such electrically-charged fences along the highway rights of way provided the property owner will assume all responsibility for accidents that may result therefrom. The Attorney was instructed to prepare and distribute the circular letter in accordance with his suggestion.

The Engineer reported receipt of information from the Secretary of Oregon's World's Fair Commission to the effect that the Fair Commission will be unable to meet its pay roll for September and to promptly meet other expense incurred unless some means are found for considerably expediting payment of the Highway Commission's share of this cost. He suggested that, in order to assist the Fair Commission, the Highway Commission follow the same procedure in the payment of the salaries of the Fair Commission employees as is now being followed in paying the salaries of employees in the State Purchasing Department; also, that reimbursement to the Fair Commission for the cost of supplies and other expense be made by paying the vouchers from the Revolving Fund instead of through the usual channels, as is now being done. The Attorney advised that such procedure is in conformity with the agreement between the Highway Commission and the Fair Commission and that the Commission can approve this method of payment if it so desires. After discussion the Commission approved the Engineer's suggestion by unanimous vote, subject to the condition that the amount to be paid do not exceed the total amount that the Highway Commission has agreed to pay for this undertaking as set out in the said agreement.

The Commission discussed the matter of installing flashing beacons on the Pacific Highway at the intersection of Fourth and B Streets in the city of Drain. The Engineer advised that this is a dangerous intersection and, in his estimation, the beacons should be installed as a safety measure. He estimated the cost of the installation at \$250.00. The Commission approved the recommendation.

The Commission also discussed the matter of installing lights on the Willamette River Bridge and on the Mary's River Bridge, in Corvallis, as has been requested by the City Council, which has agreed to pay the cost of maintaining and operating the same. The Engineer advised that this matter has been investigated and it has been recommended by the Traffic Engineer, in which recommendation he concurs, that sodium vapor lights be installed on these bridges. He estimated the cost of installing 5 sodium vapor lights on the Willamette River Bridge at \$950.00, and 2 similar lights on the Mary's River Bridge at \$475.00. The cost of operating these lights, he said, is estimated at \$131.00 and \$52.00 annually, respectively. After discussion the Commission by unanimous vote approved the installation of lights on both bridges at state expense, provided the City of Corvallis will agree to pay the cost to maintain and operate them.

AUG 22 1940

A letter was presented from the General Construction Company, contractors for embankment construction and culvert pipe installation on the Troutdale-Dodson Section of the Columbia River Highway, State Highway Contract No. 2320, with reference to the executing of a form of indemnity agreement and the furnishing of a bond to the Union Pacific Railroad Company and the Western Union Telegraph Company in the amount of \$20,000.00 to insure compliance with the provisions of the Highway Commission's encroachment agreement with those companies in connection with the above-mentioned project. According to the letter, which was signed by H. A. Dick, Vice President of the General Construction Company, the agreements have been signed by the contractor and returned to the railroad and telegraph companies for further execution. Mr. Dick also explained that, in addition to the bond asked for, the contractor has secured a contractual liability policy from the United States Fidelity and Guaranty Company in order to protect the contractor against the added liability assumed by reason of the signing of the aforementioned agreements. He is asking the Highway Commission to pay the premium on the bond, in the amount of \$200.00, and the premium on the contractual liability policy, amounting to \$240.95, or a total of \$440.95. The Engineer advised that the contract with the General Construction Company did not include provision for the furnishing of this bond and insurance, and it was his thought that, inasmuch as the contractor did not have the benefit of this requirement in submitting his bid for the work, it would be only fair for the state to assume this expense, and he so recommended. The Commission approved the recommendation.

The Engineer reported the results of the study on the recommendations submitted by the committee that was appointed by the Commission to select locations along the Old Oregon Trail for historical markers. He recommended the installation of 25 markers, as a start on this program, and estimated the cost of the same at \$2,600.00. He also submitted a design for a standard marker, as prepared by the Highway Department's architect, which sign is to bear appropriate historical information relative to the site upon which the marker is located. After discussion the Commission by unanimous vote approved the design and authorized the Engineer to proceed with the erection of the 25 markers as recommended.

The Engineer requested authority to purchase the following equipment:

- 12 trucks of Mack and Federal type - 12 old trucks to be traded in as part purchase price. Estimated total cash outlay \$39,600.00
- 13 snow plows for use on Walters trucks. Estimated total cost \$6,000.00
- 20 modern push-type plows. Estimated total cost \$7,000.00
- 6 air compressors. Estimated total cost \$1,050.00
- 1 laboratory crusher. Estimated cost \$250.00

After careful consideration the Commission approved the request by unanimous

AUG 22 1940

vote and instructed the Engineer to purchase this equipment through the State Purchasing Department in accordance with the usual practice.

The Engineer also recommended the purchase of a camera for the Travel and Information Department. He advised that for the past two years the Department has used the privately-owned camera of Mr. Gifford, an employee of the Travel Department, at no cost to the state. He gave as his thought that this is a very unsatisfactory arrangement and suggested either the purchase of this camera from Mr. Gifford or the purchase of an entirely new one. The Commission considered it inadvisable to purchase a second-hand piece of equipment, particularly a piece of equipment that is owned by a highway department employee, because of the precedent that would be established. In view thereof the Commission authorized the Engineer to buy a new camera, which he estimated would cost approximately \$218.00. The Engineer was also authorized to pay Mr. Gifford a reasonable sum for the past rental of his camera.

The Commission considered and denied a request from the O. K. Transfer Company, Klamath Falls, for permission to transport over state highways from Klamath Falls to Nyssa one concrete paving machine having an overall height of 14 feet 8 inches, because there are several impaired bridge clearances on the route proposed and there being rail transportation available.

The Commission had under discussion a letter from the Pierce Auto Freight Lines, Inc., requesting a blanket permit to operate over the Pacific Highway between Portland and the California state line motor vehicle equipment having an overall height of 12 feet, said application being made under Section 55-2702, Subsection B, Oregon Code 1930. The Engineer recommended approval of this request. The Commission approved the recommendation unanimously, subject to the condition that the maximum overall height shall not exceed 12 feet.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p.m. in the same room with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Bunker Hill Slide Drainage Ditch on the Oregon Coast Highway, in Coos County. Approximately 18,000 cubic yards drainage ditch excavation. Martin Petersen, Florence, submitted the low bid for this project in the amount of \$8,950.00. River Bend Sand & Gravel Company, Salem, submitted the second-low bid in the amount of \$10,967.50. There were 3 higher bidders. The Commission awards this contract to the low bidder, Martin Petersen, at his bid of \$8,950.00.

"Brookings Section of the Oregon Coast Highway, in Curry County. 0.73 mile grading and bituminous macadam surfacing; also furnish 8,500 cubic yards crushed gravel in stock piles. Seven bids were submitted for this project, the low one being that of A. Milne, Portland, in the amount of \$57,089.50, and the second-low being that of

Homer G. Johnson, Portland, in the amount of \$58,213.50. The Commission awards the contract to A. Milne, the low bidder, at his bid of \$57,089.50.

"Gold Hill Rock Production Project on the Sams Valley and Pacific Highways, in Jackson County. The low bid for this project was submitted by R. I. Stuart & Sons, Medford, in the amount of \$18,940. The second-low bid was submitted by M. C. Lininger & Son, Ashland, in the amount of \$19,080.00. There were 5 higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Little Butte Creek-Cascade Gorge Section of the Crater Lake Highway, in Jackson County. Furnish approximately 16,300 cubic yards crushed gravel in stock piles. Six bids were received for this project, the low one being that of R. I. Stuart & Sons, Medford, in the amount of \$18,425.00, and the second-low being that of A. S. Wallace, Roseburg, in the amount of \$21,530.00. The Commission awards the contract to the low bidders, R. I. Stuart & Sons, at their bid of \$18,425.00.

"Henley Flume and U.S.R.S. Diversion Canal on the Klamath Falls-Malin Highway, in Klamath County. Reconstruction of Henley Flume and widening of U.S.R.S. Diversion Canal bridge. Angelo Doveri, Klamath Falls, submitted the low bid for this project in the amount of \$8,143.50. Clifford A. Dunn, Klamath Falls, submitted the second-low bid in the amount of \$9,260.00. There were 2 higher bidders. The Commission awards the contract to the low bidder, Angelo Doveri, at his bid price of \$8,143.50.

"Cox Creek Bridge on the Pacific Highway at Albany, in Linn County. Construction of 76-foot reinforced concrete bridge. The low bid for this project was submitted by Barham Bros., Salem, in the amount of \$12,238.00. The second-low bid was submitted by Frank Watt, Portland, in the amount of \$12,750.00. There were 6 higher bidders. The Commission awards the contract to the low bidder, Barham Bros., at their bid of \$12,238.00.

"Eightmile-Dry Creek Section of the Wasco-Hepner Secondary Highway, in Morrow County. 4.92 miles grading and surfacing and 11.82 miles oiling; also furnish 1,500 cubic yards crushed rock in stock piles. Babler Bros., Portland, submitted the low bid at \$43,089.00. The second-low bid on this project was submitted by Edwin C. Gerber, Oregon City, in the amount of \$44,420.00. There were 6 higher bidders. The Commission awards the contract to Babler Bros., the low bidders, at their bid of \$43,089.00.

"Forest Boundary-Warm Springs River Section of the Warm Springs Highway, in Wasco County. 6.06 miles grading. 15 bids were submitted

AUG 22 1940

for this project, the low one being that of the Colonial Construction Company, Spokane, Washington, at \$76,027.00, and the second-low one being that of M. L. O'Neil & Son, Eugene, at \$83,872.50. The Commission awards the contract to the low bidder, Colonial Construction Company, at its bid of \$76,027.00.

"John Day River Bridge on the Spray-Waterman Road near Spray, in Wheeler County. Reconstruction of existing bridge. The low bidder for this project was Averill & Corbin, Portland, at \$5,468.00. The second-low bidder was W. H. Philpott, Portland, at \$6,056.50. There was one higher bidder. The bids for this project were received for and on behalf of the County Court of Wheeler County. The Commission therefore has referred all of them to the Wheeler County Court for consideration."

A delegation from Coos County, headed by County Judge J. E. Norton, came before the Commission and renewed their request for the oiling of the Powers Secondary Highway. Other members of the delegation were Senator George H. Chaney and Albert Powers, of Coquille, Jess Clinton of Myrtle Point, and E. Hull, of Powers. They urged the Commission to oil this entire highway at one time rather than in deferred increments. Chairman Cabell advised that the prospects for oiling this highway at one time are not very good. He pointed out that the federal aid secondary highway funds available to the Commission are very limited but the Commission intends to do a certain amount of oiling work on this road, although it does not know at the present time just how much it can do, and that the best hope for construction in the near future is to finance it with state funds, which the Commission must be very careful in spending.

A delegation from Newport, representing the Chamber of Commerce and consisting of L. C. Smith, who was spokesman; County Judge Franklin E. Gilkey; Mayor James F. Baird of Newport; and H. L. Hull, came before the Commission and urged early reconstruction of the Newport-Otter Rock Section of the Oregon Coast Highway. Judge Gilkey explained that they are not asking the Commission to reconstruct the entire section at one time but would like to have the work done in sections, starting as a first project the section between Newport and a place known as Hutchinson's Mill. Mayor Baird stated that the City of Newport has in mind the improvement of Agnes Street but cannot proceed with this improvement until the highway has been regraded. He also urged the Commission to eliminate a bad dip in the Corvallis-Newport Highway near the city limits.

The delegation was informed that the Commission would be pleased to give their projects due consideration in the formulation of future highway construction programs.

A delegation from Lane County, headed by Mr. H. A. Mitchell, came before the Commission and requested the oiling of the Gillespie Corner-Douglas County Line Section of the Territorial Secondary Highway. There were fifteen members of this delegation, including the following: Roy V. Foster, A. R. King, Thomas B. Mitchell, Harold Foster, E. S. Addison, Hubert Addison, and Victor Chambers. They offered to aid the Highway Commission in any way possible in

order to secure this improvement. Chairman Cabell advised that the Highway Commission is cognizant of the condition of this road and will be glad to give it consideration in the formulation of future highway programs, and expects to allocate funds to finance the improvement of some portion of the Territorial Highway whenever funds are available, although no definite commitment or promise can be made at this time. He pointed out that the Commission has only a limited amount of funds to spend on roads of this type and must be very careful in the distribution thereof because there are many roads throughout the state in the same category and the Commission cannot improve all of them at the same time. He thanked the delegation for its appearance.

A delegation from Waldport, consisting of County Judge Franklin E. Gilkey, Mayor Wm. F. Keady, L. J. Rickard, County Commissioner James C. Barclay, C. A. Moffitt, and John Greenboen, came before the Commission in the interests of the Alsea Highway. They particularly requested the completion of the un-oiled lower end of this highway, about 16 miles in length. The Commission agreed to consider the project in the preparation of the next construction program for forest highway and state funds. Chairman Cabell explained that the Commission appreciates the desirability of this improvement, which has been somewhat delayed because of the fact that the Alsea Highway is not a federal aid highway, hence is not eligible for federal aid funds. He pointed out that it is out of the question to build the road to high standards, so the Commission has it in mind to spend state money to improve the easterly 12-mile unit of this section to make it comparable to the completed improvement easterly thereof, and to program forest highway funds to finance the improvement of the lower 4-mile section. He made it clear that the Commission has not yet committed itself to such a program but is considering it, and inquired as to whether such an improvement would meet with the approval of the people of that district. The members of the delegation expressed themselves as being satisfied with the improvement as outlined.

The Attorney requested instructions relative to the acceptance of deferred payments by Mr. T. R. Maxwell, at Enterprise, who some time ago purchased a building from the State Highway Commission at that place. It appears that Mr. Maxwell agreed to pay \$150.00 quarterly for this building but he became delinquent in his payments and now offers to pay \$100.00 per month, starting on August 20, until the total amount is paid. The Attorney recommended acceptance of the offer. The Commission approved the recommendation.

The Attorney also brought up for discussion the matter of moving houses from property in the Emison Addition to Nyssa, which property has been acquired by the Amalgamated Sugar Company in connection with the Nyssa undercrossing project. He said that the Amalgamated Sugar Company wants to move these buildings over the state highway and has requested permission so to do. He pointed out that if the highway has not been closed by reason of the contractor's construction work, then the State Highway Commission would be responsible for the issuance of the permit. On the other hand, if the highway has been closed by the contract work, then, in his opinion, it would be in order for the Amalgamated Sugar Company to procure its permit from the contractor, inasmuch as the moving of the buildings would be over a portion of the highway

under control of the highway contractor and might interfere with his operations. The Commission referred the matter to the Attorney for further investigation and to determine definitely who is responsible for the issuance of the permit.

The Commission discussed a revised draft of an agreement with the Bonneville Power Administration covering the subject of a perpetual right of the Administration to construct power transmission pole lines over and across certain state highways. After careful consideration of the provisions of this agreement and assurance on the part of the Attorney that the objectionable clauses in the first draft of the agreement have been eliminated, the Commission approved the agreement and thereupon signed the same.

The matter of permitting certain individuals to continue to pump water from one of the borrow pit lakes adjacent to the Pacific Highway near the Southern Pacific Overcrossing at Eugene had the attention of the Commission. The question arose whether it would be advisable to let the persons who are now taking water from the lake continue to do so in view of the fact that the water level at the lake has been lowered several feet, making more or less unsightly the landscaping around the lake. The Commission deferred its decision in the matter pending investigation and report by the Engineer and the Attorney, such report to be rendered to Chairman Cabell, who was authorized by the Commission to pass on the matter and to issue instructions relative thereto.

The Commission discussed briefly matters pertaining to the authority of the State Parks Superintendent with respect to such of his activities as are mingled with federal activities in the development of state parks, but deferred action thereon until a future meeting.

The Attorney reported an offer from one of the employees of the General Construction Company, which is doing contract work for the state along the upper Columbia River Highway, to rent a dwelling situate on the Jordan property, which was acquired by the Commission in connection with the acquisition of right of way for this highway. The Attorney advised that this man has offered to pay \$7.50 per month rental for this building, but recommended that the request be denied. The Commission approved the recommendation as a matter of policy.

The Commission also discussed the offer of Mr. Coleman to purchase certain state-owned property in the wye formed by the junction of the new Pacific Highway East and the old Pacific Highway East, near the Abernethy Creek Bridge in Oregon City. The Commission deferred a decision in this matter pending personal inspection of the premises.

Mr. Charles A. Hart, Attorney for the United Railways Company, the S. P. & S. Company, and the Oregon Electric Company, which are involved in the Front Avenue project in Portland, came before the Commission relative to an item in the Portland newspapers of this date quoting Chairman Cabell as saying that the railroad companies are endeavoring to block the Front Avenue improve-

AUG 22 1940

ment because they do not wish to remove their existing railroad tracks from Front Avenue. Mr. Hart stated emphatically that the railroad companies do not want to keep their tracks on Front Avenue and they resent any statement to that effect; further, that the only thing that the railroad companies have ever told the industries located along Front Avenue is that the railroad companies could not serve them as in the past if the Front Avenue project materialized and the railroad companies were required to vacate.

Chairman Cabell replied that he was glad to have Mr. Hart's statement and that if Mr. Hart would give him his personal assurance that the statement is a fact, he would be glad to accept it. However, the statement made by himself on the previous evening at a conference with members of the City Council was expressed as his firm belief and it would be difficult for him to change his feeling in the matter; further, that it seems to him that City Commissioner Bennett is acting more in the interests of the railroad companies than in the interests of the property owners, because, from statements that have been made to him, it appears that industries can be adequately served by some other means.

The Attorney reported an offer from Newell Wright, Grants Pass, to purchase certain state-owned property at Grants Pass to allow him access to the highway at that place. He inquired whether the Commission wished to sell this property. Action on this matter was deferred pending investigation and report by the Engineer and the Attorney.

The Commission discussed the matter of reconveying unto Thos. M. Gilchrist, Albany, certain property acquired from Mr. Gilchrist in connection with the securing of right of way for the new highway through this city. It appears that Mr. Gilchrist owns property near the intersection of the Pacific and Santiam Highways and that a portion of the same is required as right of way for the proposed traffic separation structure at this point and that the Commission purchased the area needed although it was not intended to construct the traffic separation structure in the near future. It also appears that Mr. Gilchrist wants his property deeded back to him and is willing to pay the Commission the sum that the state paid him for it, because, as conditions now exist, he has no access to the highway. The Engineer advised that plans have been made for an elaborate grade separation structure at this intersection but traffic conditions at the present time do not justify the expense. He suggested, in view of the fact that the state now owns this property, that it be retained and that the Commission give Mr. Gilchrist temporary access to the highway across the same pending use of the property for state highway purposes. The Commission deferred action on this matter pending further investigation by the Engineer.

The Commission discussed and approved the form of agreement disposing of the claim of Bruno Huslik, Bend, for damages arising out of the construction of the Bend Undercrossing Section of The Dallas-California Highway.

The Commission discussed and denied the application of Dr. Joseph D. Sternberg, Albany, to purchase certain state-owned property included within

AUG 22 1940

the wye connection between the old and new routes of the Pacific Highway East, near the north city limits of Albany, it appearing to the Commission that this property is needed for state highway purposes.

The Attorney presented a number of resolutions adopted by various organizations, including chambers of commerce and county courts, along the Oregon Coast Highway, in which resolutions objections were offered to the granting of the application of the Consolidated Freightways, Inc., for a license or permit to carry on fast freight service along the Oregon Coast Highway between marshfield and California points, which matter is now pending before the Interstate Commerce Commission. The Commission ordered the resolutions acknowledged and filed.

The Attorney presented a form of agreement with Peninsula Drainage District No. 1, Multnomah County, covering the construction of a flood wall on the right of way of Swift Secondary Highway, in North Portland. He read aloud the provisions of the agreement, which were approved by the Commission by unanimous vote. The agreement was thereupon signed by the Commission. The Commission thereupon confirmed the resolution covering this matter which was adopted by the Commission at its meeting on July 19, 1940.

Commissioner Clough brought up for discussion matters pertaining to the drainage problem of J. G. Harem, who owns property adjacent to the Pacific Highway just north of Roseburg. It appears that Mr. Harem is dissatisfied with the action previously taken by the Commission on his request for relief in connection with this drainage matter, particularly the action taken by the Commission with respect to the construction of suitable drainage facilities under his approach road to the highway. It was pointed out in the discussion that Mr. Harem has been advised of the Commission's established policy with respect to such matters but is unwilling to accept it, evidently from a misunderstanding. In order to avoid injuring Mr. Harem in any way due to this apparent misunderstanding or lack of knowledge of all of the facts in the case, the Commission decided that it would be advisable for the Attorney and the Division Engineer, K. D. Lytle, to call upon Mr. Harem and go over with him the entire situation on the ground, and it was so ordered.

The Attorney reported on the request of Safeway Stores, Inc., for permission to operate over the Old Oregon Trail, between the Idaho state line and Ontario, certain equipment having dimensions in excess of the height and length limitations specified by the Oregon law. The Attorney advised that inquiry reveals that the company intends to operate this oversized equipment over this one-mile section of the Old Oregon Trail only twice a week, which, in his estimation, can be classified as an occasional movement, and in view of which it would be legal for the Highway Commission to grant the permit if it so desired. He recommended approval of the application. After discussion and in view of the Attorney's opinion, the Commission decided unanimously to grant the request.

Reconsideration was given by the Commission to the claim of the Miles Homer Otis Estate for damages arising out of the death of Mr. Otis in an

AUG 22 1940

accident that occurred on the Corvallis-Newport Highway between Corvallis and Philomath on July 28, 1939. After a resume of all the facts in this case, as previously reported, the Commission concluded that the State Highway Department was not responsible for the accident and thereupon, by unanimous vote, confirmed its previous action denying the claim. The Secretary was instructed to so inform Mr. Lee Lewis, Administrator of the estate.

The Attorney requested authority to condemn certain parcels of real property that are needed for various highway purposes, particularly the following:

Owner	Purpose Needed	Offer Recommended
B. W. McVay (File 8292)	Quarry site for Brookings project in Curry County	\$ 225.00
John L. Caldwell (Trustee) (File 8306)	Hauling Road for Sage Hen Hill-Burns project in Harney County	10.00
F. L. Clark (File 8031)	Hauling Road for Brookings project in Curry County)	1000.00
F. L. Clark (File 8031)	Quarry site for Brookings project in Curry County)	
Heirs of John Troy (File 7877)	Right of Way for Troy Ranch Sec. of Old Oregon Trail, in Baker Co.	1500.00
Heirs of John Troy (File 7877)	Land for Channel Change along Troy Ranch Section, Old Oregon Trail, in Baker County	Nominal
Mildred K. Colvin (File 7308)	Park Site in Curry County	Condemnation to clear title only
Heirs of W.I. Dishman (File 7835)	Right of Way for Jefferson County Line-Prineville project, in Crook County	\$ 509.00

After discussion the Commission approved the request and the offers recommended. The following resolutions in regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting

AUG 22 1940

stations, and is authorized to acquire real property for the appropriation, acquisition or manufacture of road-building materials, approach or hauling roads or for other purposes; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the power of eminent domain real property deemed by the Highway Commission necessary for the accomplishment of any or all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the real property hereinafter described is necessary in connection with the acquisition, appropriation, manufacture, crushing, and other treatment and preparation of roadbuilding materials;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the real property hereinafter described is necessary for the accomplishment of the purposes hereinafter declared, which said real property is described as follows, to wit: real property owned by B. W. McVay and located in Section 5, Township 41 South, Range 13 West, T.M., Curry County, Oregon, more particularly described as follows:

A parcel of land lying in Government Lot 6 (NW $\frac{1}{4}$ of the SE $\frac{1}{4}$) of Section 5, Township 41 South, Range 13 West, W. M., Curry County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to B. W. McVay recorded in Book 21, Pages 484-485, of Curry County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the meander line of the Cheteco River; said point being 1886.7 feet north and 2247.9 feet west of the southeast corner of said Section 5; said point also being the northwest corner of said property; thence east along the north line of said property a distance of 170.0 feet; thence south a distance of 261.8 feet; thence west a distance of 188.3 feet to the said meander line on the east bank of the Cheteco River; thence north 4° 00' east a distance of 262.5 feet to the point of beginning, containing 1.08 acres.

2. That the purpose for which the above described real property is being acquired is for the acquisition, appropriation, manufacture, crushing, and other treatment and preparation of roadbuilding materials to be used in connection with the further improvement and construction of the Brookings Section of the Oregon Coast Highway in Curry County.

3. That the State Highway Engineer be and he hereby is

AUG 22 1940

instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action or suits or actions as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations and quarters and snow fences, and is authorized to acquire and develop quarry sites, gravel pits, storage sites, stockpile sites, weighing station and broadcasting station sites, and is authorized to acquire, appropriate and manufacture road-building materials, and is authorized to construct and maintain approach or hauling roads in connection with highway improvement; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation or by the exercise of the power of eminent domain real property, or any interest therein necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

AUG 22 1940

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned or held by John L. Caldwell, as trustee, which property is located in the Northeast quarter of Section 26, Township 23 South, Range 30 East, W.M., in Harney County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 1, which property is further identified in the Highway Commission's records under File R 8306; *

Real property owned by F. L. Clark and Sarah Clark, which property is located in the Southeast quarter of Section 5, Township 41 South, Range 13 West, W.M., Curry County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 2, which property is further identified in the Highway Commission's records under File R 8031; *

Real property owned by F. L. Clark and Sarah Clark, which property is located in the Southeast quarter of Section 5, Township 41 South, Range 13 West, W.M., Curry County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 3, which property is further identified in the Highway Commission's records under File R 8031; *

Real property belonging to the heirs of John Troy, deceased, which property is located in the South one-half of the Northwest quarter of Section 33, Township 10 South, Range 42 East, W.M., Baker County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as File R 7877; *

Real property belonging to the heirs of John Troy, deceased, which property is located in the Southeast quarter of the Northwest quarter of Section 33, Township 10 South, Range 42 East, W.M., Baker County, Oregon, which property

AUG 22 1940

is more particularly described on the attached sheet and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as File R 7877; and *

Real property owned by Mildred K. Colvin, which property is located in Section 24, Township 37 South, Range 15 West, and Sections 19 and 30, Township 37 South, Range 14 West, W.M., Curry County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 6, and is further identified in the records of the Commission as File R 7308. *

2. The particular purposes for which the above described parcels of real property are being acquired are as follows:

Parcel No. 1 is being acquired for the construction thereover of a hauling road to make possible the acquisition and appropriation of roadbuilding materials to be used in connection with the construction of the Sage Hen Hill-Burns Section of the Central Oregon Highway in Harney County;

Parcel No. 2 is being acquired for the construction thereover of a hauling road to be used in connection with the acquisition and appropriation of roadbuilding materials from Parcel No. 3 in connection with the further construction of the Brookings Section of the Oregon Coast Highway in Curry County;

Parcel No. 3 is being acquired for the purpose of appropriating and acquiring roadbuilding materials therefrom for use in connection with the further improvement of the Brookings Section of the Oregon Coast Highway;

Parcel No. 4 is being acquired for right of way purposes in connection with the further improvement of the Troy Ranch Section of the Old Oregon Trail in Baker County;

Parcel No. 5 is being acquired for the purpose of making possible a channel change in connection with the construction of said Troy Ranch Section of the Old Oregon Trail in Baker County; and

Parcel No. 6 is being acquired for a park or recreational area which is adjacent to the Oregon Coast Highway and is located in Curry County, Oregon.

3. The Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific

AUG 22 1940

purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That this resolution be entered in full in the minutes and records of this Commission.

* (The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 2, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and

AUG 22 1940

is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the power of eminent domain real property deemed by the Highway Commission necessary for the accomplishment of any or all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the real property hereinafter described is necessary for right of way purposes in connection with the construction of the Jefferson County Line-Prineville Section of the Warm Springs Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, as follows:

1. That the Commission does hereby find and declare that the real property hereinafter described is necessary for the accomplishment of the purposes hereinafter declared, which said real property is described as follows, to wit: real property owned by the heirs of W. I. Dishman, deceased, and located in Section 9, Township 14 South, Range 15 East, W.M., Crook County, Oregon, more particularly described on the attached sheet. *

2. That the purpose for which the above described real property is being acquired is for right of way in connection with the construction of the Jefferson County Line-Prineville Section of the Warm Springs Highway.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real property, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real property, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said property be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation

to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed description of the parcel of real property mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 3 under the heading "Real Property Condemnation Resolutions", and said description by this reference is made a part of this minute entry to the same extent as if copied in full herein.)

The advisability of allowing an employee of the state's contractor, Mr. Roy L. Houck, the use of one of the buildings located adjacent to the Pacific Highway at the summit of the Siskiyou Mountains, in Jackson County, during the time that this highway construction work is under way, was discussed by the Commission. The Attorney advised that according to the agreement with the prior owner of the buildings, the state is to obtain possession of them by September 1, 1940; also, that the contractor's employee wants to rent the house for the duration of the job on which he is employed. He recommended that the request be denied. The Commission approved the recommendation as a matter of policy. The question then arose what to do with these buildings. The Attorney advised that the buildings are isolated, being located at the summit of the mountain, and are not saleable, and, in his estimation, are not usable by the Highway Maintenance Department because they are not in a proper location. After discussion the Commission referred the matter to the Engineer to ascertain whether or not the Maintenance Department can use the buildings to advantage. If not, then he was ordered to raze them, using state forces to do the work.

The Assistant Attorney brought up for discussion the question of a change in policy with respect to requiring cities to pay the cost of maintaining and operating flood lights installed by the State Highway Department in cities at points where state highway routes cross railroad tracks at grade. He particularly referred to the state's claim against the City of Roseburg for advancing payment in excess of \$300.00 for electrical energy to operate the flood light at the crossing of the Pacific Highway and the Southern Pacific Railroad in that city. The Assistant Attorney pointed out that, according to the order made by the Public Utilities Commissioner, following the hearing with respect to this grade crossing, the city is to pay this expense, but up to the present time has refused to do so. The Commission decided not to change its policy with

AUG 22 1940

respect to such matters at the present time; however, instructed the Attorney to present the Highway Department's claim to Senator B. L. Eddy of Roseburg, who is City Attorney, with the request that he discuss it with the City Council and secure approval of the same, if possible.

The Commission discussed and referred to the State Parks Superintendent a resolution from Fort Klamath Grange No. 775, requesting the construction of a lookout on Sun Mountain adjacent to The Dalles-California Highway, in Klamath County, where a splendid view of the Wood River Valley is obtainable.

The matter of maintaining on the state highway system the old highway between Pendleton and Adams, in Umatilla County, after completion of the new highway between these points, was discussed by the Commission. The Commission decided to offer this road to Umatilla County for maintenance as a county road.

The Commission discussed the suggestion of the Oregon Roadside Council and former Highway Commissioner E. B. Aldrich for the establishment of a memorial garden adjacent to the proposed state highway near Wilsonville. Action on this matter was deferred by the Commission for the time being. However, the Commission expressed its intention of keeping it in mind for future consideration as a desirable project.

The Attorney reported briefly on the rates charged by the Hartman Abstract Company, Pendleton, for furnishing real property title reports. It appears that the charges made by this company for such service are considerably in excess of the rates charged by other companies. The Commission deferred a decision in the matter pending study of specific cases to be presented by the Attorney at a future meeting.

A letter was presented from R. E. Dugdale, Superintendent, Portland Public Schools, requesting that the brick, lumber, et cetera, salvaged from the buildings along Front Avenue when such project is undertaken, be given to the Portland School District for use in connection with school construction work. The Secretary was instructed to inform Mr. Dugdale that the Front Avenue project is not far enough advanced to permit the Commission to say just what it can or will do with the materials salvaged from these buildings, but the Commission will be glad to consider his request at the proper time.

The Commission discussed briefly and referred to the Engineer for investigation and report the matter of acquiring additional property between the Oregon Coast Highway and the ocean at Agate Beach, so as to maintain an unobstructed view of the ocean shore line at this place.

The Commission, upon recommendation of the Engineer, adopted the following resolutions abandoning as state highways portions of the Kings Valley Secondary State Highway, in Benton County, and a portion of the Alsea Highway, in Lincoln County, which portions are no longer of value for highway purposes, since the highways have been reconstructed on other alignment:

AUG 22 1940

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Kings Valley Highway in Benton County; and

WHEREAS, by reason of said relocation and reconstruction of the Wren-Read Creek Section of said highway there were eliminated and made unnecessary as parts of the permanent highway certain sections or parts thereof, which sections are more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragments or portions of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragments of land confined within the areas of land hereinafter designated, which fragments or parcels of land were formerly within the limits of the right of way of the Kings Valley Highway in Benton County but are now without the limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragments or parcels of land or portions of the old right of way are abandoned as parts of the right of way of said highway, and said fragments or parcels of land or old right of way are, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Benton County for highway or other public purposes as the Court may determine. The fragments or parcels of land affected by this resolution are defined and described as follows, to wit:

All those certain parts of the old right of way of the Wren-Read Creek Section of the Kings Valley Secondary Highway lying on the easterly and westerly side of the right of way required for the reconstructed Kings Valley Highway and lying between Mile Post 23 and Mile Post 26 of said Highway, the beginning and ending points with reference to the Engineer's stations of the reconstructed highway being between Station 417+00 and Station 436+00 on the westerly side of the highway, and on the easterly side of the highway from Station 501+00 southerly to an intersection of the Corvallis-Newport Highway.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blue-

print, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated July 18, 1940, upon which map or exhibit there are reflected the above described parcels of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Benton County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragments of land, and should said abandoned sections of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Benton County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Alsea Highway in Lincoln County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used:

AUG 22 1940

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Alsea Highway in Lincoln County but is now without the limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lincoln County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Waldport-Scott Creek Section of the Alsea Highway lying on the southerly side of the right of way required for the reconstructed Alsea Highway and lying between Mile Post 7 and Mile Post 8 of said highway, and on each side of the Alsea River, the beginning and ending points with reference to the engineer's stations of the reconstructed highway being Station 280+00 on the westerly end and Station 297 on the easterly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated July 17, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

* Map filed in Right of Way Abandonment and Retention File - No. 76

AUG 22 1940

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lincoln County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Lincoln County and beyond any responsibility or supervision by the State Highway Commission.

The Commission discussed a letter from Lewis A. McArthur, President, Oregon Historical Society, requesting the Highway Commission's assistance in cleaning up a small park located about 1½ miles south of the Oregon Coast Highway near Astoria. Mr. McArthur advised that this park is being held in trust by the Oregon Historical Society for the state and that it needs cleaning up, which work the Society is unable to finance. He gave as his thought that the cleanup work will not take more than about one-half day's time of one of the Highway Department's maintenance crews. After discussion the Commission voted unanimously to do this cleanup work if it is a legal expenditure of state highway funds; otherwise, not.

The Commission also discussed and referred to the State Parks Superintendent for investigation and report the matter of naming a timbered strip of state-owned land adjacent to the Fremont Highway south of Lakeview "American Legion Park" as has been requested by the Lakeview Post of this organization.

Consideration was given by the Commission to the matter of construction of a roadway from the Willamette Highway to Crescent Lake, in Klamath County. The Commission appeared favorably inclined to designate this road as a secondary state highway but deferred a decision in the matter pending further investigation of the road by the Engineer and the rendering of his report on the subject. The question of keeping this road open during the winter season was also discussed. The Engineer was instructed to report at the next meeting his recommendations on this matter so the Commission can make its decision at that time.

The Commission discussed a letter from Mr. W. O. Harriman, Forest Supervisor, Fremont National Forest, written in behalf of the Horsefly Cattle Association, Bly, Oregon, inquiring whether or not the Highway Commission would be willing to enter into a cooperative agreement with the Association for the building of fences along the Klamath Falls-Lakeview Highway east of Bly, so as to prevent stock getting on the highway and endangering traffic. The Commission considered that approval of such project would establish a precedent that would eventually cost the state an enormous sum of money, which it can ill afford to spare for such purposes. Furthermore, the Commission felt that this is a problem that the stockmen should work out among themselves. The request was thereupon denied and the Secretary was instructed to so inform Mr. Harriman.

AUG 22 1940

A petition was presented from residents of Lane County requesting the oiling of a 7-mile section of the Territorial Secondary Highway between the town of Elmira and the Siuslaw highway junction. The Commission denied the request for immediate construction but agreed to consider the project in the formulation of future construction programs.

The Commission considered a similar petition from other residents of Lane County, requesting the oiling of this highway between a place known as Central Turn and Lorane. The Commission agreed to consider this project along with the other in the formulation of the 1941 construction program, without making a commitment at this time, and instructed the Secretary to so inform the petitioners.

The Commission discussed and ordered filed a letter from D. O. Denman, Portland, urging early completion of the new highway between Portland and Aurora, via Wilsonville. The Secretary was instructed to inform Mr. Denman that the Commission is making as rapid progress as is possible on this highway with the funds available.

A petition was presented from residents of Bunker Hill, Marshfield, requesting the removal of a knoll located adjacent to the Oregon Coast Highway in the Bunker Hill District, particularly between Newport Avenue and Edwards Street, it being alleged that the knoll is unsightly and is a detriment to adjacent property. The Engineer recommended denial of the request because, in his estimation, the removal of this knoll would accentuate slide conditions along the highway in this vicinity, with which condition the Commission has had considerable trouble since the new highway was constructed at this place. It was his opinion that the knoll now acts as a counter-balance and that its removal would start additional slides which would not only cause the state considerable expense but would also result in inconvenience to the traveling public. In view of the Engineer's report the Commission denied the request.

The Commission considered and ordered filed a letter from C. A. Robertson, Salem, expressing the need for the improvement of state highways in Polk County.

The Secretary presented a letter from the County Court of Umatilla County, requesting the following improvements:

1. Oiling of the secondary highway between Athena and Cold Springs
2. Construction of connection between the Havana-Helix Road and the new highway between Pendleton and Adams at Havana
3. Improvement of the approach road leading to Riverside School.

The Commission deferred action on this matter pending personal inspection of these roads on its proposed trip into Eastern Oregon in October.

The Commission discussed and referred to the Engineer for investigation and report a petition from the Civic Improvement Club of Fort Klamath,

AUG 22 1940

requesting the improvement of the Crater Lak. Highway through this town.

Consideration was given by the Commission to a letter from the City of Scio, Oregon, in which the Commission was requested to complete the oiling of the Albany-Lyons Secondary State Highway between Scio and Thomas Creek, the uncompleted section being about 2 miles in length, and to make provision for such improvement in the Commission's construction program for 1941. The Commission agreed to give this project consideration in the formulation of the 1941 program.

A letter was presented from Albert T. Kommer, attorney, Portland, renewing his request for the widening of the Tualatin Valley Highway for four lanes of traffic between Portland and Forest Grove, particularly between Portland and Beaverton. After discussion the Commission decided that it would at least consider making a start on this project in its program for 1942 funds; however, made no definite commitment to the project.

The Engineer reported that the Public Roads Administration has completed and opened to traffic a new bridge over the Alsea River on the Alsea Highway, in Lincoln County, more particularly at M.P. 27-07.22, hence Alsea Highway traffic is no longer required to use the old bridge which is posted for 15 tons. He further reported that maintenance forces have installed culverts in the place of two log trestles on the Alsea-Deadwood Secondary State Highway in Benton County between Mile Post 201-05.2 and Mile Post 201-05.3, so that it is no longer necessary to maintain the reduced load limit of 10 tons which formerly applied to these two trestles. He recommended, in view thereof, the lifting of the reduced load limits heretofore in effect on these two trestles and on the Alsea River Bridge. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 13th day of January, 1939, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following:

ALSEA HIGHWAY

27-07.22

Alsea River Bridge

15 tons

and

WHEREAS, on the 14th day of June, 1940, at a meeting of the State Highway Commission, two members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on the following state highway bridges:

ALSEA-DEADWOOD SECONDARY STATE HIGHWAY

Mile Post 201.52

small log trestle

10 tons

Mile Post 201.53

small log trestle

10 tons

and

AUG 22 1940

WHEREAS, subsequent to the passage of said resolutions the said above-named bridges have been repaired so that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolutions:

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridges, to wit:

ALSEA HIGHWAY

27-07.22 Alsea River Bridge 15 tons

ALSEA-DEADWOOD SECONDARY STATE HIGHWAY

Mile Post 201.52	small log trestle	10 tons
Mile Post 201.53	small log trestle	10 tons

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridges shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that certified copies of this resolution be furnished the County Clerks of Benton and Lincoln Counties in which counties said bridges are located; and that a certified copy of this resolution also be furnished the Superintendent of the Department of State Police for his information.

The Engineer requested authority to extend the location survey now being made on the Pacific Highway in Josephine County so as to include the section between Wolf Creek and Glendale junction. The Commission approved the request.

The Commission discussed and denied the request of C. W. Henderson, Medford, for permission to conduct gold-dredging operations on state-owned property adjacent to the Pacific Highway, near Bear Creek, in Jackson County.

The Commission discussed the adoption of a policy with respect to the removal of sand and gravel from ocean beach areas under its control and in connection therewith considered the complaint of residents of Newport, Nelscott, and vicinity, that the taking of gravel from the ocean beaches depletes the supply of agates, which is one of their great tourist attractions. The Engineer was instructed to have Division Engineer F. D. Eason and the State Parks Superintendent, S. H. Boardman, inspect the beaches between Waldport and Roads End, in Lincoln County, and select the places where, in their estimation, the beach should not be disturbed, in order to preserve the agate deposits. The Commission will establish a definite policy with respect to such matter when the Engineer's report has been received and discussed.

The Commission authorized the Secretary to sign, in its behalf, an application directed to the Pacific Power and Light Company to furnish

electrical service to the Highway Department's maintenance headquarters located at Rufus, Oregon.

The Commission had under discussion its application now before the United States of America, Department of Interior, for permission to reconstruct the Klamath Falls-Malin Highway across certain irrigation canals and ditches in Klamath County, particularly a request from the Department of Interior for an amendment to the proposed agreement covering matters involved in such application. After due consideration, and upon recommendation of the Engineer and the Attorney, the Commission approved the request. The following resolution relative thereto was offered by Commissioner Oliver who moved its adoption. The motion was duly seconded by Commissioner Clough and was declared by Chairman Cabell to have carried by the unanimous vote of the Commission:

WHEREAS, the Highway Commission heretofore made application to the United States of America for permission to cross certain canals and irrigation ditches in connection with the reconstruction of a state highway known as the Klamath Falls-Malin Highway; and

WHEREAS, an agreement was prepared covering matters involved in said application, which agreement was heretofore approved by the Commission and is now pending before the Department of the Interior in Washington, D. C.; and

WHEREAS, said Department has requested that page 5 of said contract be amended so as to read as follows:

"6. The State shall construct, maintain and operate its said highway at the point of crossing in a good and workmanlike manner and so as not to interfere with the flow of water in said canals and other structures and without injury thereto. Any changes in the said canals or other irrigation structures necessary to be made to effect said crossings shall be made by and at the expense of the State, pursuant to plans and specifications approved by the Chief Engineer of the United States Bureau of Reclamation. The State shall at its own expense construct all bridges or culverts to carry said highway over the above described canals and waterways of the Klamath Project, or construct and install a pipe line, siphon or other conduit under said highway and such structure shall be of such construction, size, material, description, and at such elevation as shall be designated and approved by the Chief Engineer of the United States Bureau of Reclamation. All work under this agreement to be performed by the State at the crossings described herein, shall be performed during the non-irrigation season of each year, and no work shall be performed by the State under this agreement which will interfere with the operation of the said canals and water conduits of the United States during the irrigation season of

AUG 22 1940

any year, including 1940, which irrigation season for the purposes hereof is defined to be the period from April 15 to October 15 of any year.

"7. Should the United States at any time hereafter find it necessary or desirable to enlarge or relocate said canals or other irrigation structures or change the alignment thereof, the State hereby agrees that the United States may occupy, so far as may be necessary for such purpose, the right of way of the State covered by the easement granted hereby. Any expense incident to such enlargement, relocation or change of alignment and due to the existence on the ground of the state highway and right of way or other property shall be borne by the State.

"8. The plans and specifications for state highway crossings over the above listed irrigation structures, drains, and canals, in their present locations and dimensions crasheafter constructed or reconstructed, shall be submitted to the Chief Engineer."

NOW, THEREFORE, BE IT RESOLVED BY THE HIGHWAY COMMISSION, all members being present and affirmatively voting, as follows:

1. That the Secretary of the Interior be and he hereby is authorized to amend page 5 of the agreement proposed for execution by the State of Oregon, by and through its State Highway Commission, and the United States of America, by its Secretary of the Interior, which said agreement covers the subject of highway crossings over irrigation canals in Klamath County, Oregon, which highway crossings are required in connection with the construction of the Klamath Falls-Malin Highway, said amendment to be as above written.

2. That this resolution be entered in the minutes and records of the Highway Commission and that J. M. Devers as attorney for the Commission be and he hereby is instructed to transmit to B. E. Stoutemyer of Portland, Oregon, District Counsel for the Bureau of Reclamation, a duly certified copy of the same.

The Engineer reported the award of contracts as follows. authority for which was previously given him by the Commission, and the conditions of the awards having been satisfied:

Ferry service across the Willamette River, near Wilsonville, Bids taken July 18, contract awarded July 31, 1940, to Leonard & Slate, low bidders.

Veneta-Fisher Road Section of the Eugene-Veneta Road, in Lane County. Bids taken July 18, contract awarded July 25, 1940, to Berke Bros., low bidders.

AUG 22 1940

Construction of Nyssa undercrossing on Old Oregon Trail, in Malheur County. Bids taken July 18, contract awarded July 25, 1940, to Henry L. Horn, the low bidder.

The Commission by unanimous vote confirmed the award of these contracts as reported.

The Commission discussed the matter of issuance of permits from the Division offices. The Engineer gave as his thought that the issuance of permits should be concentrated in the Salem office so as to provide for uniformity in the conditions of the permits, which is the present procedure, and he so recommended. The Commission approved the recommendation.

The Commission discussed the application of the Eugene Daily News for permission to install and maintain within the right of way of state highways in Lane County boxes or receptacles for the depositing of newspapers of subscribers, on which boxes would be painted the name of the paper. In the discussion of this matter the question arose whether the wording on the boxes would conflict with the provisions of the statute which prohibits advertising within the right of way of a state highway. In view of this question, decision on the application was deferred by the Commission pending an opinion from the Attorney General on the matter. The Attorney was instructed to secure such opinion.

A letter was presented from J. H. Sroufe, Portland, pointing out that logging trucks operating over the Wolf Creek Highway and the Oregon Coast Highway between Necanicum Junction and Cannon Beach Junction travel very close together, and as a result it is very difficult and hazardous for other traffic to pass them. He suggested the adoption of a regulation to prohibit logging trucks from traveling nearer than 300 yards apart. In the discussion it was pointed out that the state law requires trucks and motor buses to travel at least 300 feet apart, except in cases where one vehicle is overtaking and passing another, which law the log haulers are evidently not respecting. The Secretary was instructed to bring this to the attention of the State Police Department with the request that these movements be observed and action taken as may be necessary to correct the situation.

The Commission considered and ordered filed correspondence between Charles H. Reynolds, President of the Oregon Trail Association, and Senator Rufus C. Holman, with respect to the possibility of securing a special allotment of federal funds to finance construction of the new Columbia River Highway.

A letter was presented from W. E. Regan, Chairman, Railway Brotherhood Legislative League of Oregon, requesting the cooperation of the State Highway Commission in securing a regulation that will require logging trucks to come to a dead stop before passing over railroad tracks. The Commission concurred in the viewpoint of Mr. Regan and accordingly instructed the Secretary hereafter, in making recommendations to the Public Utilities Commissioner covering applications for permits for log hauling on state highways, to

AUG 22 1940

include in such recommendations a clause requiring logging trucks to stop before crossing railroad tracks at grade.

Reconsideration was given by the Commission to the matter of snow removal on the Oregon Caves Highway and particularly to a letter from Mr. E. P. Leavitt, Superintendent of the Oregon Caves National Monument, urging favorable consideration by the Commission of this matter. The Commission considered that traffic over this road during the winter season is not sufficient to justify the expense of snow-removal operations beyond the point where farming is carried on and accordingly decided not to go to the expense of such operations for the time being.

A letter was presented from J. L. Taylor, Manager of the Vale Chamber of Commerce, suggesting that additional directional and mileage signs be installed along state highways at key points in the State of Oregon calling attention to the availability of the Central Oregon Highway as a new, fast, and direct route across the state. It was Mr. Taylor's thought that the increased use of this route as a main artery of travel would relieve traffic congestion on other cross-state routes. The Commission denied the request as a matter of policy, it being contrary to such policy to maintain signs that would have a tendency to divert traffic from one highway to another discriminately, and it being considered that the Highway Commission's function is simply to advise the traveling public of the alternate routes available to reach a certain destination. The Secretary was instructed to so inform Mr. Taylor.

The Commission discussed a letter from A. L. Amacher, President, Hillsboro Rotary Club, in which inquiry was made whether or not the Highway Commission would consider furnishing one of its standard service club sign-racks to be erected on private property adjacent to the Tualatin Valley Highway about 100 yards east of the Hillsboro city limits. The Commission considered that it did not have legal authority to expend state highway funds to erect sign-racks on private property and instructed the Secretary to so inform Mr. Amacher. The Secretary was also instructed to advise Mr. Amacher that if the service clubs and other eligible organizations in Hillsboro desire sign-racks erected on the highway right of way within the city limits of Hillsboro the Commission will be pleased to furnish and erect the racks if these organizations will agree to maintain them after erection and will comply with the Highway Commission's requirements with respect to such matter.

The Commission discussed briefly and deferred for future consideration the adoption of a policy with respect to the maintenance of city entrance signs, lodge signs, etc., on rights of way of state highways at city entrances.

Communications were presented from the Redwood Empire Association inviting the members of the Commission and staff officers to be the guests of the Association at its 20th annual convention in Ukiah, California, on Saturday, October 26. The Commissioners expressed regrets that they could not attend this meeting; however, authorized the Director of the Travel and Information Department, Mr. Harold B. Say, to represent them.

The Secretary presented a letter from the Orange Belt Mineralogical Society, San Bernardino, California, suggesting the establishment of state parks or state forests at suitable locations in southeastern Oregon and the construction of roadways leading to the same. The Commission took no action on this matter.

The Commission considered and ordered filed a resolution adopted by the Oregon State Grange at its annual session in Salem, June 10-14, 1940, endorsing efforts for the removal of tolls which hamper traffic across the Columbia River between Oregon and Washington.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Location - - -	101-2822 - Sumpter-North Section, Sumpter Valley Secondary Hwy., Baker County.	1st authorization - \$250.00
Plans - - - -	6-2821 - North Bend-Marshfield Section, Oregon Coast Hwy., Coos County.	2nd authorization - \$600.00
		3rd authorization - \$540.00
		Total to date \$1,500.00
Right of Way -	9-2831 - Bend-Horse Ridge Section, Central Oregon Highway, Deschutes County.	1st authorization - \$50.00
Plans - - - -	9-2832 - Third Street Undercrossing Section, The Dalles-California Highway, Deschutes County.	1st authorization - \$500.00
Right of Way -	9-2833 - Sisters School Grounds Section, McKenzie Highway, Deschutes County.	1st authorization - \$50.00
Bench Mark - -	10-2827 - Reedsport-Paradise Creek Section, Unpqua Highway, Douglas County.	1st authorization - \$50.00
Plans - - - -	12-2822 - Town of John Day Section, John Day Highway, Grant County.	1st authorization - \$200.00
Plans - - - -	12-2823 - Dixie Summit-Austin Junction Section, John Day Hwy., Grant County.	1st authorization - \$2,600.00
Plans - - - -	13-2812 - City of Burns Section, Central Oregon Highway, Harney County.	1st authorization - \$500.00
Plans - - - -	115-2825 - Lake Creek-Little Butte Creek Section, Little Butte Sec.Hwy., Jackson Co.	1st authorization - \$1,375.00

Location - - - 18-2841 - Barclay-Terminal City Section, The Dalles-California Hwy., Klamath County. 2nd authorization - \$1,800.00
 Total to date \$5,400.00

Plans - - - - 18-2847 - Scale Site, Klamath Falls-Lakeview Hwy., Klamath County. 1st authorization - \$75.00

Quarry - - - - 119-2824 - Fremont Junction-Adel Section, Warner Secondary Hwy., Lake County. 1st authorization - \$600.00

Right of Way - 21-2839 - Toledo-Eddyville Section, Corvallis-Newport Highway, Lincoln County. 1st authorization - \$50.00

Plans - - - - 22-2822 - Albany Section, Pacific Highway East, Linn County. 2nd authorization - \$300.00
 Total to date \$1,100.00

Plans - - - - 123-2822 - Jordan Valley Section, I.O.N. Highway, Malheur Co. 1st authorization - \$500.00

Plans - - - - 123-2823 - Jordan Creek-McDermitt Section, I.O.N. Highway, Malheur County. 1st authorization - \$400.00

Bench Mark - - 27-2815 - Hebo-Salem Section, Three Rivers, Salmon River, and Salem-Dallas Highways, Polk County. 1st authorization - \$54.00

Plans - - - - 228-2810 - Maryhill Ferry Connection - Sherman County Road, Sherman County. 1st authorization - \$100.00

Plans - - - - 30-2830 - Pendleton-Adams Section, Oregon-Washington Highway, Umatilla County. 1st authorization - \$1,200.00

Slides - - - - 131-2821 - Summit Section - Weston-Elgin Secondary Highway, Union County. 1st authorization - \$120.00

Plans - - - - 33-2825 - Lewis & Clark Monument Section, Columbia River Hwy., Wasco County. 1st authorization - \$100.00

Plans - - - - 133-2826 - He He Butte-Wasco County Line Section, Warm Springs Sec. Hwy., Wasco Co. 1st authorization - \$2,600.00

Plans - - - - 134-2825 - Forest Grove-Banks Section, Nehalem Secondary Hwy., Washington Co. 1st authorization - \$500.00

Test Holes - - 34-2826 - Davies Grade Separation, Wolf Creek Highway, Washington County. 1st authorization - \$200.00

Location - - - 35-2813 - Mitcnell West Section, Ochoco Highway, Wheeler Co. 1st authorization - \$12,750.00

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

D. L. Ashton, Contract No. 2208, covering the construction of a roadside improvement project on the North Roseburg Section of the Pacific Highway, in Douglas County, requested an extension of time from November 30, 1939, to June 19, 1940. He alleged that his failure to complete the project within the specified time limit was due to adverse weather conditions in the fall of 1939 which did not permit construction of the oiling work required. The Engineer advised that this contract was awarded on August 31, 1939, but the work was not started until October 24, 1939; further, that due to the bad weather the work was closed down from November 15, 1939, to May 14, 1940, but it was completed on June 19, 1940. The only reason, he said, that this project was not completed within the specified time limit was the long delay in starting the work after the award of the contract. He recommended, in view thereof, that the extension of time be granted subject to the condition that the contractor be required to reimburse the state for all engineering costs incurred by the state subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. W. and J. R. Hillstrom, Contract No. 2221, for the construction of a bridge over Coalbank Slough on the Oregon Coast Highway, near Marshfield, in Coos County, requested an extension of time from July 31 to August 30, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to changes ordered by the Engineer in the construction of foundation piers and because of an overrun of concrete work. They advised also that they encountered difficulties in obtaining delivery of steel for the job, with the result that the painting of the structure and clean-up work could not be done before July 31, 1940. The Engineer advised that the reasons given by the contractor for failure to complete this project within the specified time limit are correct. He recommended that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Norris Bros., Contract No. 2223, for surfacing and oiling the Butte Falls Section of Butte Falls County Road, in Jackson County, requested an extension of time of 17 days, from June 30 to July 17, 1940, within which to complete this job. They attributed their failure to complete the job within the specified time limit to adverse weather conditions during the months of April and May. The Engineer advised that the principal reason that the contractors did not complete the project within the specified time limit was the fact that they had more contracts under way than they could handle expeditiously, and, in his estimation, no valid reason can be given why the work

AUG 22 1940

should not have been completed within the specified time. He recommended, in view thereof, that the extension of time requested be granted subject to the condition that the contractors be required to reimburse the state for engineering expense incurred subsequent to the specified completion date. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Chester T. Lackey, Contract No. 2236, for furnishing crushed rock in stock piles for the Brothers-Harney County Line Section of the Central Oregon Highway, in Deschutes and Lake Counties, requested an extension of time of 16 days, from June 30 to July 16, 1940, within which to complete this project. Mr. Lackey alleged that the work under the contract was completed on June 28 and that the extension of time is needed for the performance of two work orders issued in connection with this job, one of which called for the reshaping of the stock piles behind the oiling operations and the other was for purchasing and installing culvert pipes in the borrow pits at the stock pile sites. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended the granting of the extension requested without penalty. The Commission approved the recommendation unanimously.

F. R. Hewett, Contract No. 2248, for furnishing crushed rock in stock piles for the Mountain Rest-Mt. Vernon Section of the Pendleton-John Day and Beach Creek Secondary Highways in Grant County, requested an extension of time of one month, from June 30 to July 31, 1940, within which to complete this job. He attributed his failure to complete the project within the specified time limit to adverse weather conditions and difficulties encountered in connection with the operation of the quarry which he was using in connection with another project, viz., the Nye Junction-Long Creek maintenance materials project. The Engineer advised that Mr. Hewett lost some time on the Nye Junction-Long Creek Project because of bad weather conditions which necessitated the ordering of a reduced load limit on the section of highway over which he was operating during the early part of the year and such load limit prevented him from starting work until late in the spring. He further advised that after Mr. Hewett started operating on the Mountain Rest-Mt. Vernon project, for which he is now requesting an extension of time, the work was rushed to completion within three weeks. He recommended, in view of the circumstances, that the extension requested be granted without penalty. The Commission approved the recommendation unanimously.

R. O. Dail & Warren Bros., Inc., Contract No. 2282, for surfacing and oiling and furnishing crushed rock in stock piles on the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, requested an extension of time of 30 days, from July 31 to August 30, 1940, within which to complete this

project. They attributed their failure to complete the project within the specified time limit to breakdown of equipment and to shortage of rock in the quarry. The Engineer advised that he knows of no good reason why the contract should not have been completed within the specified time limit and accordingly recommended the granting of the extension of time requested subject to the condition that the contractor reimburse the state for engineering and supervision expense incurred by the state subsequent to the specified date of completion. The Commission approved the recommendation.

J. C. Papin, Contract No. 2285, for grading, surfacing, and oiling the Bend-Butler Ranch Section of the Butler County Road, in Deschutes County, requested an extension of time of 15 days, from July 31 to August 15, 1940, within which to complete this project. He attributed his failure to complete the job within the specified time limit to bad weather conditions which forced suspension of oiling operations long enough to make it impossible to complete the job by July 31. The Engineer advised that the reason given by Mr. Papin for failure to complete the project on time is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Haigh Bros. & Hughes, Contract No. 2307, for the drilling of a well on state property adjacent to the I.O.N. Highway, in Malheur County, requested an extension of time from June 4 to June 28, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that no water was found at a depth of 200 feet, as was anticipated, and it was necessary for them to drill to a greater depth, which required additional time. The Engineer advised that the reason given by the contractor for failure to complete the contract within the specified time limit is correct, and that an adequate supply of water was not obtained until the well had been drilled beyond the 200-foot depth specified in the contract. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2178, 2208, 2215, 2223, 2224, 2248, 2258, 2271, 2278, 2281, 2283, 2284, 2293, 2297, 2302, 2304, 2307, and 2309, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and

AUG 22 1940

provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2178, with J. A. Lyons, for grading, surfacing, and oiling on the Salt Creek Falls-Odell Lake Section of the Willamette Highway, in Klanath and Lane Counties. Completed July 29, 1940.

Contract No. 2208, with D. L. Ashton, for roadside improvement on the North Roseburg Section of the Pacific Highway, in Douglas County. Completed June 19, 1940.

Contract No. 2215, with A. Milne, for grading, surfacing, and oiling on the Buchanan-Juntura Section of the Central Oregon Highway, in Harney and Malheur Counties. Completed July 12, 1940.

Contract No. 2223, with Norris Bros., for surfacing and oiling the Butte Falls Section of the Butte Falls County Road, in Jackson County. Completed July 17, 1940.

Contract No. 2224, with Rogers Construction Company and J. C. Compton, for grading, surfacing, and oiling the Cottonwood Creek-Lakeview Section of the Klanath Falls-Lakeview Highway, in Lake County. Completed July 2, 1940.

Contract No. 2248, with F. R. Hewett, for furnishing crushed rock on the Mountain Rest-Mt. Vernon Section of the Pendleton-John Day and Beach Creek Secondary Highways in Grant County. Completed July 30, 1940.

Contract No. 2258, with E. C. Hall Company, for surfacing and oiling the Trout Creek-Toll Creek Section of the Santiam Highway, in Linn County. Completed July 27, 1940.

Contract No. 2271, with A. S. Wallace, for furnishing crushed rock for the Bend-Millican Section of the Central Oregon Highway, in Deschutes County. Completed June 29, 1940.

Contract No. 2278, with Averill & Corbin, for repairing the steel bridge over the Willamette River at Corvallis and reconstructing trestle approach thereto, in Benton and Linn Counties. Completed July 31, 1940.

Contract No. 2281, with Triangle Construction Company, for grading, surfacing, and oiling the John Day-Prairie City Section of the John Day Highway, in Grant County. Completed July 31, 1940.

AUG 22 1940

Contract No. 2283, with Warren Northwest, Inc., for grading, surfacing, and oiling the Silver Lake-Chalk Cliff Section of the Fremont Highway, in Lake County. Completed July 3, 1940.

Contract No. 2284, with H. L. O'Neil & Son, for grading, surfacing, and oiling the Fir Creek-Laurel Road Section of the Hillsboro-Silverton Secondary Highway, in Washington County. Completed August 6, 1940.

Contract No. 2293, with Fisher Bros., for grading, surfacing, and oiling the Austin Junction-Baker County Line Section of the John Day Highway, in Grant County. Completed July 20, 1940.

Contract No. 2297, with Norris Bros., for oiling the Weston-McDougal Camp Section of the Weston-Elgin Secondary Highway, in Umatilla County. Completed July 31, 1940.

Contract No. 2302, with Frank Penepacker, for grading the Lamonta-Crook County Line Section of the Warm Springs Secondary Highway, in Jefferson County. Completed August 8, 1940.

Contract No. 2304, with Norris Bros., for oiling the Brothers-Harney County Line Section of the Central Oregon Highway, in Deschutes and Lake Counties. Completed June 9, 1940.

Contract No. 2307, with Haigh Bros. & Hughes, for drilling and casing a well on state property 30 miles north of McDermitt, on the I.O.N. Highway, in Malheur County. Completed June 28, 1940.

Contract No. 2309, with Warren Northwest, Inc., for grading, paving, and pavement widening on the South Milton Section of the Oregon-Washington Highway, in Umatilla County. Completed July 23, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under discussion the setting of a date for its next regular meeting for the receiving of bids, and decided to hold such meeting on Thursday and Friday, October 10 and 11, 1940. The Commission also set the following dates for its regular meetings during the next few months:

AUG 22 1940

Tuesday and Wednesday, November 12 and 13; Tuesday and Wednesday, December 17 and 18, 1940; and Thursday and Friday, January 23 and 24, 1941. The Secretary was instructed to make the usual arrangements to hold these meetings in the auditorium of the Public Service Building.

The Commission also discussed a date for its proposed inspection of highways in Eastern Oregon. This was tentatively set for the first week in October, subject to ratification later.

The Commission adjourned at 6:15 p. m. and reconvened at 7:30 p. m. in Chairman Cabell's home, all Commissioners being present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Commission had under discussion the selection of projects for construction in 1941 on primary and secondary state highways and to be financed with state funds. The Engineer submitted a list of eligible projects from which the Commission, by unanimous vote, selected the following and authorized the Engineer to advertise them for bids to be received as soon as plans and specifications can be prepared for the same:

<u>STATE PROJECTS ON PRIMARY HIGHWAYS</u>			Estimated
County	Highway	Section and Kind of Work	Cost
<u>DIVISIONS 1 AND 2</u>			
Benton	Corvallis-Newport	Blodgett, overcrossing & bridge	\$ 50,000
Lincoln	Alsea	Tidewater, Grade, Surface, & Oil	50,000
Linn	South Santiam	Foster-Cascadia, 11 mi., Grad, Surf, Oil	30,000
		Total, Divisions 1 and 2	\$130,000
<u>DIVISION 3</u>			
Douglas	Pacific	Umpqua River Bridge at Dillard	\$200,000
*Lane	Pacific	Eugene Section, Grad. & Pav.	70,000
		Total, Division 3	\$270,000
<u>DIVISION 4</u>			
Lake	K.Falls-Lakeview	Cottonwood Cr.-Forest Boundary, Grade, Surface, and Oil	\$125,000
*Klamath	K.Falls-Lakeview	Klamath Falls (6th Street)	100,000
		Total, Division 4	\$225,000
<u>DIVISION 5</u>			
*Harney	Burns-Crane	E. Unit, Surface and oil	\$ 40,000
Baker	Baker-Homestead	Flagstaff Hill-Middle Bridge, Grade, Surface, and Oil	120,000
*Baker	Baker-Unity	Hereford-Unity, 11 mi., Surf. & Oil	25,000
*Morrow	Heppner	Jones Hill-Lena, Surface and Oil	70,000
		Total, Division 5	\$255,000

* Projects marked thus were tentatively approved only

AUG 22 1940

The Commission also discussed a budget for the two and one-half-year period commencing January 1, 1941, and ending June 30, 1943, as requested by the State Budget Director, for submission to the Legislature. After full consideration the following budget was adopted by unanimous vote:

BIENNIAL BUDGET, Years 1941, 1942 and 1943
State Highway Fund

	First Half	Fiscal Years	
	1941	1942	1943
<u>RECEIPTS:</u>			
Motor vehicle license fees	\$2,400,000	\$ 3,030,000	\$ 2,870,000
Gasoline tax	4,850,000	11,670,000	11,900,000
Motor transportation fees	513,000	1,168,000	1,207,000
Fines for traffic law violations	15,000	30,000	30,000
Cash discounts	5,000	10,000	10,000
County cooperation	--	4,000	--
1935-38 federal funds	100,000	--	--
1939 federal aid funds	125,000	75,000	--
1939 federal secondary funds	30,000	--	--
1939 federal grade separation funds	50,000	50,000	--
1940 federal aid funds (\$1,639,000)	200,000	200,000	--
1940 FLH funds (\$61,000)	10,000	--	--
1940 federal secondary funds (\$246,000)	20,000	30,000	--
1940 federal grade sep. funds (\$225,000)	50,000	125,000	--
1941 federal funds (\$2,595,000)	415,000	1,435,000	745,000
1942 federal funds (\$2,215,000)	--	1,400,000	700,000
1943 federal funds (\$2,215,000)	--	--	700,000
Estimated total receipts	\$8,783,000	\$19,227,000	\$18,362,000
Less contribution to State Police	176,000	357,000	357,000
Less contribution to counties	393,000	2,470,000	2,500,000
Net receipts for highway purposes	\$8,214,000	\$16,400,000	\$15,505,000
First of year balance	967,000	2,764,000	2,754,000
Estimated total available funds	\$9,181,000	\$19,164,000	\$18,259,000
<u>EXPENDITURES:</u>			
Capital Outlays:			
1935-38 federal projects	\$ 20,000	\$ --	\$ --
1939 federal aid projects	50,000	--	--
1939 federal grade separation projects	25,000	--	--
1940 federal aid projects (\$2,969,000)	300,000	250,000	--
1940 federal secondary projects (\$531,000)	32,000	--	--

	\$9,181,000	\$19,164,000	\$18,259,000

The Commission discussed the matter of placing the Fort Stevens County Road, in Clatsop County, on the state secondary highway system but deferred action thereon pending consultation with the Clatsop County Court.

The Commission discussed the matter of placing on the federal aid highway system the following described highways:

Warm Springs Highway from a point on Federal Aid Road No. 24, about 16.7 miles east of Government Camp, in Clackamas County, and extending in a southerly and easterly direction to a point on Federal Aid Road No. 4, near Madras, in Jefferson County, a gross length of 46.4 miles.

Revision of the Old Oregon Trail, beginning at a point on Federal Aid Road No. 1, at Boardman, in Morrow County, and extending in a southeasterly direction a distance of approximately 25.57 miles to a point on Federal Aid Road No. 1, about 2 miles east of Stanfield, in Umatilla County.

The Commission decided unanimously to place these roads on the federal aid system in order to make available thereto federal aid funds with which to expedite

AUG 22 1940

construction of the same. The following letters directed to the Public Roads Administration requesting such designations were thereupon signed by the Commission:

Public Roads Administration
P. O. Box 3900
Portland, Oregon

Gentlemen:

In order that federal aid funds may be utilized in the building of the important "cut-off" highway between the Wapinitia Highway at Clear Creek and The Dalles-California Highway at Madras the Highway Commission requests that that highway be added to the Federal Aid System.

The gross length of this road is 46.4 miles. Of this, 7.0 miles are in a National Forest and 27.0 miles are in the Warm Springs Indian Reservation. The net federal aid length is, therefore, only 12.4 miles.

The total cost of the 46.4 miles of road is expected to be about \$1,500,000 and, of that amount, about \$600,000 is already expended or under contract. The road will effect a saving in distance of 32 miles for a present traffic of about 200 vehicles per day.

A suggested description for the new road is as follows:

From a point on Federal Aid Road No. 24 about 16.7 miles east of Government Camp, south and east to a point on Federal Aid Road No. 4 near Madras.

A map showing the location of the proposed road is submitted herewith.

Very truly yours,

OREGON STATE HIGHWAY COMMISSION

Mr. W. H. Lynch, District Engineer
Public Roads Administration
P.O. Box 3900, Portland, Oregon

Dear Sir:

In order to provide a more direct and shorter routing for Federal Aid Road No. 1, the Highway Commission requests changes in the Federal Aid Highway System as follows:

1. Adopt as the location for Federal Aid Road No. 1, the straight-line route from Boardman to a point two miles

AUG 22 1940

east of Stanfield which is shown on the accompanying map. This change is 25.57 miles in length and results in a distance saving of 7.57 miles.

2. Retain on the Federal Aid System the roads at present traversed by Road No. 1, by adding the Boardman-Unatilla Unit to Federal Aid Road No. 18 and by assigning a new federal aid road number to the unit between Unatilla and the junction east of Stanfield.

Oregon's present unallocated mileage is 74.20. The change requested will utilize 25.57 miles of this.

Very truly yours,

OREGON STATE HIGHWAY COMMISSION

The Commission adjourned at 9:00 p. m., to reconvene on the following morning in the Public Service Building.

Portland, Oregon, August 23, 1940

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Cloup, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Bids as follows for highway construction projects and for the sale of scrap materials and obsolete equipment were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 2:00 p. m. in the same room:

BAKER-HOLESTEAD HIGHWAY
KEATING ROAD-RUCKLES CREEK SECTION - GRADING AND BRIDGE CONSTRUCTION

Leonard & Slate	\$51,818.00
McNutt Bros.	52,570.00
M. L. O'Neil & Son	55,899.25
E. C. Hall Company	55,903.00
E. L. Rigdon	55,911.80

(Continued on next page)

(Keating Road-Ruckles Creek Section continued)

E. L. Gates	\$60,907.10
Max J. Kuney	62,013.00
Berke Bros.	62,582.00
Tony Marrazzo	62,685.80
Colonial Construction Company	66,335.00
J. C. Papin	67,562.30
Frank Penepacker	75,124.00

OLD OREGON TRAIL

TROY RANCH SECTION - GRADING AND BITUMINOUS MACADAM SURFACING

McNutt Bros.	\$30,921.60
M. L. O'Neil & Son	31,390.10
Leonard & Slate	32,404.00
E. L. Rigdon	34,205.10
Max J. Kuney	34,262.00
Colonial Construction Company	37,421.00
E. L. Gates	37,949.90
Norris Bros.	38,582.80

Babler Bros	12,870.00
J. F. Johnston	13,338.00
Averill & Corbin	13,435.00
Barham Bros.	15,510.00
A. T. Dolan	16,000.00
Frank Watt Construction Company	16,635.00

The Commission also received bids for the purchase of obsolete equipment and an accumulation of scrap materials stored at the Highway Department Shops at Salem, Klamath Falls, Coquille, and La Grande, as previously advertised. These bids were all referred by the Commission to the Engineer with power to sell the various items to the high bidder in each instance if the bids compare favorably with the appraised value of the items. Announcement to that effect was made by the Chairman, Henry F. Cabell.

Mr. G. R. Van Vleet and his attorney, Mr. Carl E. Davidson, came before the Commission in regard to the truck-hauling of logs over the Cannon Beach Road. Mr. Van Vleet stated that he has purchased a large stand of timber east and south of the Cannon Beach Road and, in order to market this timber, it will be necessary for him to transport the logs over this state highway. He said that he would cut logs into 32-foot lengths and would use trucks with cabs built over the motor so as to reduce the overall length as much as possible. He further advised that he is aware of the fact that the Cannon Beach Road is very crooked and would have to be widened at certain places in order to accommodate his hauling. However, he said that he owns certain construction equipment which he would be glad to place on the widening work if the Highway Commission would grant him the privilege of hauling logs over the road at any time of the year. After discussion, the Commission referred the matter to the Engineer for investigation and report as to what it would cost to improve the alignment of the present road to accommodate Mr. Van Vleet's operations. It was understood that the Engineer would contact Mr. Van Vleet after his report has been rendered and passed upon by the Commission.

Messrs. Ed. Turnbull and Fred Brenne, officers in the Eugene Chamber of Commerce, and Fred R. Hall, of Crescent Lake, Oregon, were present and

AUG 23 1940

conferred with the Commission. Mr. Turnbull brought up for discussion the matter of constructing the proposed connection between the Pacific Highway and Seventh Street, in Eugene, which is a part of the Commission's scheme for the rearrangement of the Pacific Highway route through Eugene. He urged the Commission to construct such connection this fall. He was informed by Chairman Cabell that the Commission discussed this matter at its meeting on the previous day but decided to hold the matter in abeyance pending action by Congress on the Federal Aid Bill, which provides for federal funds for the fiscal years 1942-43. The Commission is favorable to this project, he added, but prefers not to make any definite commitment to it until it has had an opportunity to adjust its finances.

Mr. Hail inquired as to the Commission's plans for the construction of a road leading from the Willamette Highway to Crescent Lake. He was informed that the Engineer has not as yet had time to inspect this road but will do so in the near future; also, that the Public Roads Administration contemplates making a location survey of the road soon, but that is the extent of the information that can be given at this time. The Engineer was thereupon instructed by the Commission to contact Mr. H. D. Farmer of the Public Roads Administration and arrange for a joint inspection of the project as soon as possible.

Dr. L. I. Hewes, Chief, Western Region, Public Roads Administration, was present and discussed with the Commission certain highways that have been designated by the Federal Government as strategic highways from the military standpoint. The Commission questioned the selection in certain instances, it being the thought of the Commission that the government officials have selected certain roads that are not so important as others on the state system. After discussion, the Engineer was instructed to forward to the Public Roads Administration a map showing the various selected routes, in color, and to point out the inconsistencies. He was also instructed to make a thorough study of the situation and to file with the Public Roads Administration a supplemental letter recommending changes and substitutions that may appear desirable.

County Judge Charles E. Baird, of Baker County, was present. He asked the Commission for the following improvements: construction on the Baker-Homestead Highway and improvement of the Sumpter Valley Secondary Highway. He said that these two projects are the ones of first importance to the people of Baker County. He also said that the county would like some additional work on the Medical Springs Road but such improvement is secondary to the other two. Judge Baird inquired whether or not the State Highway Commission would cooperate with the county in securing a W.P.A. project on the Sumpter Valley Secondary Highway. He pointed out that mining operations are being carried on quite extensively in the district served by this road and he anticipates that such operations will continue for a long time to come, hence the need for a good road. He also said that Baker County will sponsor the W.P.A. project but would like the Commission to help in any way that it can. The Commission agreed to give the matter consideration.

The Commission adjourned at 12:10 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

AUG 23 1940

Chairman Cabell announced the following awards of contracts and sale of scrap material, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Keating Road-Ruckles Creek Section of the Baker-Homestead Highway, in Baker County. 4.79 miles grading, and construction of a bridge. There were 12 bids received for this project, the low one being that of Leonard & Slate, Multnomah, at \$51,818.00, and the second-low being that of McNutt Bros., Eugene, at \$52,570.00. The Commission awards the contract to the low bidders, Leonard & Slate, at their bid of \$51,818.00.

"Troy Ranch Section of the Old Oregon Trail, in Baker County. 0.73 mile grading and bituminous macadam surfacing. McNutt Bros., Eugene, were the low bidders on this project, at \$30,921.60. M. L. O'Neil & Son, Eugene, were the second-low bidders at \$31,390.10. There were 10 higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Sage Hen Hill-Harney Section of the Central Oregon Highway, in Harney County. Furnish approximately 9,700 cubic yards crushed rock in stock piles. The low bidder for this project was Chester T. Lackey, Ontario, at \$18,835.00. The second-low bidder was R. O. Dail & Warren Bros., Inc., Portland, at \$19,217.50. There were two higher bidders. The Commission awards the contract to the low bidder, Chester T. Lackey, at his bid of \$18,835.00.

"South Newport Section of the Oregon Coast Highway, in Lincoln County. 0.61 mile grading, surfacing, and oiling. A. Lilne, Portland, submitted the low bid for this project at \$23,967.50, based on the use of road oil, with no bid based on the use of tar. McNutt Bros., Eugene, submitted the second-low bid at \$26,961.50, based on the use of road oil, and \$27,063.40, based on the use of tar. There were 4 higher bidders. The Commission awards the contract to A. Lilne, the low bidder, at his bid of \$23,967.50, based on the use of road oil.

"Redrive fenders for Yaquina Bay Bridge on the Oregon Coast Highway, at Newport, in Lincoln County. There were 4 bids received for this project, the low one being that of Tom Lillebo, Reedsport, at \$15,865.00, and the second-low being that of Coos Bay Dredging Company, Marshfield, at \$15,971.60. The Commission awards the contract to the low bidder, Tom Lillebo, at his bid of \$15,865.00.

"King Creek Culvert on the Salem-Dayton Secondary Highway, in Polk County. Reconstruction of 105" x 140' multiplate culvert. J. F. Johnston, Newberg, submitted the low bid at \$5,000.00. Birkenmeier & Saremal, Portland, submitted the second-low bid at \$5,765.00. There were two higher bidders. The Commission awards

the contract to J. F. Johnston, the low bidder, at his bid price of \$5,000.00.

"Beaver Creek Bridge Section of the Oregon Coast Highway, in Tillamook County. Widening of existing bridge over Beaver Creek at Beaver. 9 bids were received for this project, the low one being that of Birkemeier & Sarnal, Portland, at \$11,375.00, and the second-low being that of Clifford A. Dunn, Klamath Falls, in the amount of \$12,270.00. The Commission awards the contract to the low bidders, Birkemeier & Sarnal, at their bid of \$11,375.00.

"Sale of scrap materials at Salem. No bids were received on Items 4 and 5. The tabulation of bids received for the purchase of the other items of material requires further investigation, so they are all referred to the Engineer with power to sell the material to the high bidder in each instance.

"Sale of scrap materials at Coquille. All bids for the purchase of this material were referred to the Engineer with power to sell the material to the high bidder in each instance.

"Sale of scrap materials at Klamath Falls. No bids were received on Items 1, 2, and 3. All bids received for the purchase of the other items of material were referred to the Engineer with power to sell the material to the high bidder in each instance.

"Sale of scrap materials at La Grande. All bids received for the materials listed in Items 1 to 10, inclusive, were rejected. All bids received for the purchase of the other items of material were referred to the Engineer with power to sell the material to the high bidder in each instance."

The Engineer requested authority to advertise for bids for the construction of maintenance station buildings at the following locations:

Job No.	Location	Description	Est. Cost
2720	Madras	32'x101' Maintenance Bldg. (with office)	\$ 11,500
2703	Condon	36'x105' Maintenance Bldg. (with office)	12,500
2707	Newport	32'x101' Maintenance Bldg. (with office)	11,500
5167	Troutdale	36'x105' Maintenance Bldg. (with office))	12,000
2704	Seneca	36'x76' Maintenance Bldg. (2 houses, etc.)	22,000
2705	Prospect	36'x76' Maintenance Bldg. (2 houses, water system, etc.)	24,000
2706	Necanicum Junction	32'x76' Maintenance Bldg. (2 houses, water system, etc.)	22,000
Total			\$115,500

Note: Estimates do not include surfacing of yards. It is tentatively planned that the surfacing will be placed by state forces.

AUG 23 1940

After discussion the Commission approved the request, subject to approval by Commissioner Oliver and subject, further, to a review by the members of the Commission of the plans for the residence buildings involved. The Engineer was instructed to send a set of the building plans to each Commissioner and to secure Commissioner Oliver's reaction to the proposed expenditure.

The Engineer brought up for discussion a request from Klamath County for state aid in securing an airview picture of the South Sixth Street district in Klamath Falls, where improvements of the state highway are contemplated by the Commission. He said that it is estimated that the picture would cost about \$400.00 and that the county is asking the Highway Commission to pay \$200.00 of this expense. He recommended approval of the request. The Commission approved the recommendation.

The Secretary presented a petition signed by numerous residents of South Salem urging discontinuance of the detour that is now being maintained around the highway construction work in South Salem. The Commission considered it best to maintain this detour in the interests of public safety, it being the opinion of the Commission that such interests are paramount to the interests of the local residents, particularly in view of the fact that it is anticipated that the detour will be needed for only a short time.

Consideration was given by the Commission to the request of the U.S. Fish and Wild Life Service for permission to obtain approximately 6,000 cubic yards of rock from land acquired by the Commission from Alice Jordan in connection with a right of way settlement along the Columbia River Highway east of Troutdale. The Commission indicated a reluctance to grant this request because of the scar in the landscape that would result therefrom. However, the Commission approved the removal of the rock if it will not mar the landscape and cause an unsightly appearance along the highway. The Engineer was instructed to refer this matter to the Landscape Engineer for investigation and report.

The Commission discussed a report from Division Engineer E. A. Collier with respect to the trimming of trees along the Pacific Highway East by a Mr. A. V. Sundholm, who owns an auto camp at a place known as Harts Pond. It appears that Mr. Sundholm owns a 265-foot frontage along the highway at this location and that he has trimmed to a height of 12 feet above the ground all of the oak trees growing on the highway right of way in front of this property. Further, that he has requested permission to cut down and remove entirely two oak trees so that his signs may be seen more plainly from the highway. The Engineer recommended that Mr. Sundholm be not permitted to either cut the trees or trim them. The Commission approved the recommendation as a matter of policy and instructed the Attorney to so inform Mr. Sundholm.

A letter was presented from R. S. Goold, Coordinator for the National Defense Training Workers, La Grande, Oregon, requesting the privilege of conducting a training class of such workers in the state highway shops at La Grande. The Commission denied the request as a matter of policy, it being

AUG 23 1940

considered that the use of the state's property for such purpose would react adversely to the best interests of the State Highway Department.

The Commission discussed a letter from the Oregon-American Lumber Corporation requesting the early oiling of the Banks-Buxton Section of the Wolf Creek Highway so as to make this section available for general public use this winter. The Engineer advised that this section will not be completely surfaced until after the first of January, 1941, and that it would be absolutely impossible to oil the section until the weather conditions are favorable next year. Chairman Cabell stated that he would convey such information to the Corporation.

The Engineer brought up for discussion the matter of landscaping the Oswego Section of the Oswego Highway, as has been requested by citizens of that town. He advised that he has not as yet had an opportunity to investigate this matter personally although he plans to do so this coming week and will have a report for the Commission at its next meeting.

The matter of designating the Netarts County Road, in Tillamook County, a state secondary highway was discussed. The Commission decided to so designate this road if the Tillamook County Court will make application for such designation in proper form. The Engineer was instructed to see that the proper form of resolution is forwarded to the court for adoption.

The Commission considered and denied the request of the Oregon Roadside Council that the Highway Commission intercede with the Legislature in its behalf for state funds with which to finance the activities of this Council.

The Engineer reported a request from County Roadmaster George Buck, of Multnomah County, for permission to remove certain trees and shrubs that were planted adjacent to the Pacific Highway west near the city limits of Portland, particularly at the intersection of Southwest 13th Street and Capital Hill Road. It appears that when the highway was constructed at this location no provision was made for a connection with either the Capital Hill Road or Southwest 13th Street, which intersect very close to the highway right of way, and that certain landscaping work, including the planting of trees and shrubs, was performed on the highway right of way at the points where both of these roads enter the highway, it being considered at that time that connections to the highway would never be constructed. However, it now appears that the county intends to fill in these areas and to build up the approaches, and, in order to accommodate such improvement, certain portions of the landscaping work must be removed. In view of the circumstances, the Commission approved the request.

The Attorney reported receipt of a communication from Mrs. Echols, of Agate Beach, suggesting that it would be a fine thing for the State Highway Department to acquire for recreational purposes a promontory known as Iron Mountain, situate a short distance east of the Oregon Coast Highway, near Agate Beach. Mrs. Echols advised, he said, that a third party is seriously considering the purchase of this property for private purposes but, in her estimation, the state should have first refusal of the same because of its

desirability from the state parks standpoint. The Engineer advised that the Highway Department now owns a portion of this mountain, having purchased the same as a source of road-building materials. He questioned the suitability of the area for recreational purposes. The Commission discussed the matter but deferred its decision pending further investigation and report by the Engineer and the State Parks Superintendent.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Bonneville Power Administration covering the construction of electric power transmission lines over and across certain state highways.

Agreement with Clarence Cox, Albany, disposing of his claim for damages resulting to his property described as Lot 17, Waverly Fruit Farms, in Linn County, by reason of the construction of the Airport Road-Albany Section of the Pacific Highway East.

Agreement with Bruno Huslik and wife, Bend, providing for the disposal of their claim for damages to their property, described as Lots 7 and 8, of Block 10, Center Addition to Bend, by reason of a change in grade in Franklin Avenue. Right of Way Transaction 8027.

Agreement with Earl C. Reynolds and wife, Klamath Falls, covering the matter of reconstruction of the Klamath Falls-Malin Section of the Klamath Falls-Malin Highway, in Klamath County, which requires additional right of way from the Reynoldses. Right of Way Transaction 7563.

Agreement with the City of Albany covering certain culvert installations in Albany. Right of Way Transaction 22-1030.

Agreement with A. S. Wallace, contractor, disposing of his claim for extra compensation arising out of his contract No. 2271 for the furnishing of maintenance materials for the Bend-Millican Section of the Central Oregon Highway, in Deschutes County.

Agreement with the Amalgamated Sugar Company disposing of the company's claim for injury and losses that it will sustain by reason of the construction of the Nyssa Underpass in the town of Nyssa.

Agreement with Susan Durrell covering lease to Mrs. Durrell for a period of five years, of certain state-owned property situate in the Northwest Quarter of the Southwest Quarter of Section 13, Township 12 South, Range 5 West, W. M., Benton County. Right of Way Transaction 8125.

Agreement with the Southern Pacific Company terminating lease of a gravel storage site situate on railroad company property at Milbur, Oregon.

AUG 23 1940

Agreement with Charles B. Short and wife and Fred Williams and wife providing for the payment of damages arising out of construction of the Nyssa undercrossing on the Old Oregon Trail, at Nyssa. Right of Way Transaction 7461.

Agreement with Loring Taylor, Administrator of the estate of Albert Hensch, deceased, providing for the payment of damages arising out of construction of the Nyssa Undercrossing Section of the Old Oregon Trail, in Malheur County. Right of Way Transaction 7646.

Agreement with the Southern Pacific Company covering the construction of an 18-inch culvert pipe across a portion of the Southern Pacific Company's right of way in the vicinity of North Bend.

Easement agreement with Gertrude Cox and Ray T. Cox providing for the use of a detour road across the Cox property situate in Section 6, Township 37 South, Range 9 East, W. M., Klamath County, adjacent to The Dalles-California Highway. Right of Way File 8131.

Bargain and Sale Deed conveying unto Walter R. Bradley 16,158 sq. ft. of land situate in the Southwest Quarter of the Southwest Quarter of Section 23, Township 13 South, Range 31 East, W. M., Grant County. Right of Way Transaction 8133.

Agreement with Peninsula Drainage District No. 1., Multnomah County, providing for the construction of a flood wall on the right of way of the Swift Secondary Highway, in North Portland.

Agreement with Mountain States Power Company providing for use of one of the company's poles for suspending cable attachments in connection with traffic light installation at the intersection of Main Street with the Pacific Highway East in the town of Jefferson, Marion County.

Agreement with Henry Semon and wife pertaining to right of way required for the Klamath Falls-Merrill Section of the Klamath Falls-Malin Highway.

There being no further business to come before the Commission at this time, the meeting was adjourned at 3:30 p. m.

Henry F. Cabell

Commissioner

AUG 23 1940

Clarno, Oregon, September 30, 1940

The State Highway Commission met with members of Clarno Grange No. 674 at 1:30 p. m. in the Clarno Grange hall, following a sumptuous chicken dinner provided by the Grange members. Present at such meeting were the following, representing the State Highway Department:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

There were about forty Grange members present, including Buster Burgess, H. R. Kaiser, R. S. Keller, and Mr. Steel of Fossil, Mr. Olson of Shaniko, Barney Rufus of Antelope, and Henry McGreer of Clarno. Mr. Burgess presided.

Mr. Burgess urged the Commission to reconstruct the unimproved portion of the Shaniko-Fossil Secondary State Highway between Clarno and Fossil, to provide a road that can be used throughout the year. He said that they are not asking for a high-class improvement but simply a road that is travelable the entire year. Arguments in behalf of such improvement were presented by Messrs. Kaiser, Steel, McGreer, Olson, and Keller, all of whom endorsed the remarks of Mr. Burgess.

Chairman Cabell advised that the Commission will be pleased to consider this project in the formulation of its next construction program but is not in position at the present time to make any definite commitment or promise in regard thereto. Commissioner Clough endorsed Chairman Cabell's remarks, as did also Commissioner Oliver, who added that the people of this district are entitled to a better road just as soon as the Commission can spare the funds to finance the work. He also pointed out that it will be an expensive undertaking to rebuild the road to proper standards but the Commission will do the best that it can because it appreciates the condition and the need for better road facilities in this district.

The Engineer suggested the possibility of constructing a low-type, low-cost road that would serve the purpose. He pointed out that if the people in outlying districts of the state would be satisfied with improvements of that kind it would then be possible for the Commission to build roads at minimum expense into localities that are not now served by good road facilities.

Mr. McGreer, pioneer of 1876, recited the history of road problems in this vicinity and urged the Commission to respond favorably to their earnest request.

The meeting was adjourned at 2:00 p. m.

The Commission then motored to Pendleton, stopping enroute at the Gilliam County Courthouse in Condon for a brief conference with the County Courts of Gilliam and Morrow Counties relative to local road problems. The

SEP 30 1940

Commission also inspected the Condon-Hempner Secondary State Highway in company with the Morrow County Court.

Henry F. Cabell
Chairman

Herman Oliver
State Highway Engineer

Huron W. Clough
Commissioner

H. B. Glaisyer
Secretary

Herman Oliver
Commissioner

Pendleton, Oregon, September 30, 1940

The State Highway Commission were guests of the Pendleton Chamber of Commerce at dinner in the dining room of the Pendleton Hotel, following which at 8:30 p. m. the Commission discussed highway matters with a number of delegations from Pendleton and outlying districts. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

representing the State Highway Department, and about fifty local citizens. Mr. Donald Robison, President of the Pendleton Chamber of Commerce, presided. He called upon members of the State Highway Commission for remarks.

Responding, Chairman Cabell explained the Commission's financial set-up, including the uncertainty concerning expenditures of federal aid funds. He pointed out that Congress has authorized an appropriation for fiscal years 1942 and 1943 but advised that the amounts authorized are less than those provided for the years 1940 and 1941; also, that the law provides that the roads that are to be improved with such funds must be passed on by the Public Roads Administration and the army authorities who are to select the roads of primary importance from the government and military standpoint. He advised that under the circumstances it is difficult for the Commission to arrange any program for the federal moneys, and the Commission will not know how to allocate the state moneys until it knows how the federal moneys are to be spent. On account of the uncertainty, he added, the Commission is not in position at the present time to make any definite statements with respect to future highway programs but will be glad to give consideration to the projects desired by the various districts of the state at such time as a program is arranged. Commissioners Clough and Oliver concurred in the remarks of Chairman Cabell.

Mr. Robison then called upon the delegations to present their respective projects.

SEP 30 1940

Mr. Irwin, representing a delegation from Pilot Rock, asked for a modification of the rules and regulations governing log hauling on state highways. He said that the sawmills in and around Pilot Rock and Pendleton employ upwards of 500 men who have families and according to the present regulations loggers are practically ruled off the roads. He pointed out that they are required to limit their gross loads to a weight specified by law, whereas there is a great variance in the weight of timber and as a result operators at times transport excess-weight loads and if apprehended by the State Police on such occasions are subject to the penalty of having their permits suspended for a certain length of time, which they really cannot afford. He asked the Commission to modify this ruling.

Mr. Kerns, President of the Pilot Rock Lumber Company, stated that his company is securing its logs from a place 50 miles south of Pilot Rock on the Pendleton-John Day Highway and that they have engaged nine haulers to transport this timber to their Pilot Rock mill. Each of these men, he said, owns his own truck and must make two round trips daily in order to make it pay; but they are handicapped in doing so by the regulations. He advised that there are no facilities to weigh the loads in the woods and as a result trucks are frequently found to be overloaded when weighed by the State Police on the state scales near Pilot Rock, and the hauler is subsequently penalized for overloading. He suggested that, in order to obviate the variance in the weight of logs, the size of the loads be based on scale measure rather than on weight; also, that the present rule be further modified to provide for the weighing of 100 loads of logs by the State Police so as to determine the average weight of logs from any particular district. Mr. Kerns also asked for a modification of the rules so as to permit the transportation of logs for a short period after sundown. He explained that, due to the long distance that the timber has to be transported, the log hauler cannot make two round trips daily at this time of the year during daylight hours, and, because they must make two trips daily in order to make their operations pay, request is made that the operator be allowed to complete his run notwithstanding that he may reach his destination after dark, provided, of course, that the equipment is properly lighted.

Mr. Harris, of the Harris Brothers Logging Company, Pilot Rock, concurred in the remarks of Mr. Kerns and urged approval of Mr. Kerns's suggestions. He also complained of the lack of courtesy on the part of the State Police in dealing with log haulers. Mr. Denning, logger in the employ of Mr. Harris, also endorsed the remarks of the other speakers.

Mr. Phillips, log hauler in the employ of Mr. Kerns, urged modification of the rules to permit night hauling. He said that it is imperative that he make two round trips a day, and the change is necessary because it is not possible to park the load of logs on the side of the road.

Mr. George Carns, Chairman of the Road Committee of the Pilot Rock Chamber of Commerce, and Mr. Pattey, head of one of the logging companies in this district, both endorsed the remarks of the other speakers and urged approval of the suggested modifications.

County Judge Carl W. Chambers, Umatilla County, stated that the County Court is doing all that it can to help out in the situation and will appreciate any help that the State Highway Commission can give.

Chairman Cabell, in response, stated that two big things are involved; viz., the matter of overweight and the matter of operating during hours of darkness, the first of which concerns the maintenance of highways and the second the matter of safety to the public; also, that the Commission appreciates the predicament that the logging operators are in and would like very much to protect the haulers who are carrying on legitimate operations. There are two sides to the problem, he said—that of the log haulers and that of the general public, many of whom are very strong in their convictions that the Highway Commission should rule all of the log haulers off the road. The Highway Commission, he added, is opposed to the method of log scale in determining the size of a load because highways must be built on the basis of definite loadings and not on guesswork. He mentioned the 10 per cent tolerance allowed logging operators by the 1939 Legislature and also referred to the rules of the Washington Highway Department, which provide for trial loads and the estimating of weights by settlement of the truck springs, which method, he said, the Oregon Highway Commission is considering. He expressed a hope that the 1941 Legislature will see fit to modify the present law governing this matter so as to permit greater weights and longer loads over certain highways in this state.

As to hauling after dark, he said that the principal reason that hauling is not allowed during that period is because the Commission feels that it causes an undue hazard to other traffic. However, the Commission will give careful consideration to the arguments presented and will make its decision as soon as possible.

Mr. Lester Hamley, Pendleton, brought up for discussion snow removal on the Tollgate Road between Weston and Elgin. He urged the Commission to make provision to keep this road open during the winter season, at least as far as Tollgate, for the benefit of winter sports enthusiasts. He alleged that the winter sports people contribute \$1,000.00 annually to the state highway fund in going to and from this recreational area and gave as his thought that such sum would go a long way toward the cost of keeping the road open. Chairman Cabell explained that the Commission likes to help the sportsmen out as much as it can but there is a limit to what the Commission can do, and, as far as winter sports are concerned, they must stand on their own merits.

The Engineer advised that it would cost about \$10,000.00 to keep this road open throughout its entire length during the winter season and that it would cost about \$3,500.00 to keep it open between Weston and Tollgate during such period.

Chairman Cabell inquired where the traffic originates and was informed by Mr. Hamley that most of it comes from Pendleton, Hermiston, La Grande, Echo, Walla Walla, Milton, Weston, Athena, and other places in this district. Mr. Cabell then inquired whether or not the people would be

satisfied if the Commission would simply keep open for travel the Weston end of this road as far as Tollgate. Mr. Hamley replied that that would be quite satisfactory for all except for the people that reside in the vicinity of La Grande and Elgin. After further discussion Chairman Cabell advised that the Commission will be pleased to consider the matter but is not in position at this time to give a definite answer.

A delegation from Hermiston, headed by Mr. Frank McKenzie, was present and urged the Commission to reconstruct the Old Oregon Trail between Hermiston and Umatilla by straightening, widening, and eliminating several railroad grade crossings. He said that this is a very important road to Umatilla County and that it carries a large volume of traffic which no doubt will increase in the future on account of the development work that is under way at Umatilla, including the proposed port development and the developments being made by several oil companies. He added that there is every reason to believe that the town of Umatilla will become an important port on the Columbia River and in view thereof the highway improvement is a necessity.

Mr. Roy Rittner, Pendleton, advised that the boundaries of the new Umatilla port district do not include all of Umatilla County as did the original and in his estimation the district will be formed because everybody seems to be in favor of it. He requested favorable consideration by the Commission on Mr. McKenzie's request.

Mr. William Schwitzler also spoke in favor of the improvement and gave statistics showing the amount of oil products that are now being distributed daily to Eastern Oregon points from Umatilla, all of which must be transported over the Umatilla-Hermiston Section.

Mr. Henry Summers, Hermiston, endorsed the remarks of the other speakers. He added that if the Commission could not see its way clear to provide this improvement they would at least like to have the four sharp turns eliminated on the Old Oregon Trail through the town of Hermiston. The Commission took the matter under advisement.

A delegation from Weston urged the Commission to provide a better oiled surface on the Weston-Elgin Road, particularly between Weston and Tollgate. The delegation consisted of C. M. Sly, Principal of the Union High School, Walter Raban, Sim Barnes, and Marvin Price. They declared that traffic over this road has been very heavy and that the improvement recently constructed by the state is showing signs of distress. They gave as their thought that the road should be given immediate attention before it goes to pieces entirely.

Chairman Cabell stated that, due to lack of funds, the Commission was unable to provide a standard oil improvement for this road but will maintain it in as good condition as is possible under the circumstances. He also said that the Commission intends to drive over the road on the following day and will secure first-hand information.

Mr. Barnes suggested a W.P.A. project to eliminate the sharp turns in the road. Mr. Raban inquired as to the Commission's plan for future improvement of the road. He was informed by Chairman Cabell that the Commission is not in position at this time to make any definite statement in regard thereto.

The meeting was adjourned at 10:15 p. m.

Herman Oliver
State Highway Engineer
H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman
Huron W. Clough
Commissioner
Herman Oliver
Commissioner

La Grande, Oregon, October 1, 1940

The State Highway Commission met with a number of delegations at 1:00 p. m. in the dining room of the Sacajawea Hotel. Present, representing the State Highway Department, were:

Henry F. Cabell, Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Commissioner Huron W. Clough was excused from attending this meeting so that he might make a personal inspection of the Wallowa Lake Highway up to its terminus at Wallowa Lake. There were about 50 local people, including delegations from nearby towns, also present at this meeting, which was presided over by Mr. Charles H. Reynolds, La Grande.

At the request of Mr. Reynolds Chairman Cabell explained the status of the highway department finances, particularly calling attention to the uncertainties that surround the expenditure of future federal aid funds. Commissioner Oliver endorsed the remarks of Chairman Cabell. Mr. Reynolds then called upon various delegations to present their respective projects.

The Wallowa County Court, represented by County Judge Ben Weathers, County Commissioners H. O. Harmon and F. W. Hammack, and County Engineer Glen Jacob, was present. Judge Weathers informed the Commission that the most important state highway project in Wallowa County is the further improvement of the Wallowa Lake Highway, and the next in order is the completion of the Enterprise-Lewiston Highway to the Washington state line. He expressed a hope that the Highway Commission could finish this work within the next couple of years. He also asked for the improvement of the southerly end of this highway by straightening, widening, et cetera, and asked the Commission to program such improvement so that it can be completed at the same time that the work at the northerly end is completed. Judge Weathers also asked the Commission to take over, as a state secondary highway, a one-mile section of county road at the head of Wallowa Lake. He said that this road passes through a thickly populated district and serves not only the many people that live there the year

round but also serves people who maintain summer cottages at this point and the summer camp grounds maintained by the Methodist Church and by the Boy Scouts organization several months each summer. He said that the county is asking the state to take this road over because it is in an isolated district and is very inconvenient and difficult for the county to maintain. Judge Weathers also asked for the oiling of the Little Sheep Creek Secondary Highway from the town of Joseph to a place known as Little Sheep Creek Hill.

Mr. Harmon endorsed the remarks made by Judge Weathers and particularly urged early completion of the Enterprise-Lewiston Highway and additional improvements on the Minam Hill Section of the Wallowa Lake Highway. He said that logging operations are being carried on quite extensively along the Enterprise-Lewiston Highway and the trucking of logs over this highway introduces an extreme hazard to other traffic because of the dust created. He alleged that the improvement of this highway is fully justified and as proof of his contention asked the Commission to make a special count of traffic that uses this road.

Mr. Reynolds inquired as to the present status of the Enterprise-Lewiston Highway. Chairman Cabell explained that this highway is on the forest highway system and that it is proposed to construct it with forest highway funds. In fact, he said, the Commission recommended an expenditure of such funds in the last forest highway program as would have financed the final grading work to the state line but it so happened that Congress did not authorize enough money for the purpose. He gave as his thought that the improvement of the south end of this road is a logical project and should be undertaken at the proper time.

As to the improvement of the Minam Hill Section of the Wallowa Lake Highway, Chairman Cabell advised that the Commission is taking bids next week for the reconstruction of a portion of this grade and that it is the intention of the Commission to place under contract for reconstruction adjacent sections when funds become available to finance the work. Relative to extending the secondary state highway at the head of Wallowa Lake, he said that the Commission would give the matter very careful consideration but is not in position at the present time to make a definite statement about it. As to the oiling of the Little Sheep Creek Secondary Highway, he advised that the Commission has not as yet inspected this road and is not in position to make any statements with respect thereto but the Commission intends to look it over at the earliest opportunity. He concluded his remarks by saying that the Commission has the Wallowa County projects in mind and will be pleased to help the county out as much as it can whenever it is possible to do so.

A delegation from Elgin, including Fred Guthrie, Arthur Helgarth, W. E. Moore, and Mr. Reed, was present. Mr. Moore headed the group. They thanked the Commission for the Minam Hill reconstruction project, for which the Commission is receiving bids the following week. They also asked the Commission to conduct snow-removal operations on the Weston-Elgin Secondary Highway so traffic can use this road throughout the entire year. They asserted that the people of this district insist and demand that the road be kept open during the winter season because it is needed for commercial as well as for recreational purposes and there is urgent need for travel over this road during the winter season as well as during the summer months.

Chairman Cabell replied that the Commission is now studying the matter of snow removal on mountain roads and, in connection therewith, is considering the adoption of a formula which will be applied to each such road as a basis in determining whether or not there is justification in keeping a road open during the winter months. The State Highway Department cannot keep all of these roads open, he said, but the Commission intends to give each fair and equitable consideration. He added that this is a problem that cannot be easily answered, hence no decision can be given today.

The County Court of Union County was represented by County Judge U. G. Couch, County Commissioners Chris Johnson and Alex McKenzie, and County Engineer S. B. Morgan. Judge Couch asked Mr. Reynolds to present the matters in behalf of the county court.

Responding, Mr. Reynolds first asked for additional improvements on the North Powder River Road between North Powder and a place known as Davies Ranch. He stated that this is a county road and that they would like to have it further improved as a federal aid secondary highway project; also, that the county would maintain the improvement after construction. He also explained that this road connects with the Haines-Anthony Secondary Highway, in Baker County, and, in the county's estimation, is justified from that standpoint. Mr. Jim Wilson and Mr. Moore, North Powder, endorsed Mr. Reynold's remarks. Mr. W. Perkins also endorsed the project and asked for the improvement of the 5-mile section of the Haines-Anthony Secondary Highway, including a bridge over the North Powder River, to facilitate travel to the Anthony Lakes recreational and winter sports area.

Mr. Reynolds then requested, in behalf of the county court, the extension of the Starkey Secondary Highway from its present terminus at Starkey southwesterly a distance of about 7 miles to the national forest boundary line where it would connect with a forest development road already constructed by the forest service, and that the Commission cooperate with the forest service in the improvement of the road from that point to a connection with the Pendleton-John Day Highway near Ukiah. He pointed out that the distance from Hilgard to Ukiah by such route is practically the same as the distance from Pendleton to Ukiah over the Pendleton-John Day Highway, and the opening up of this new route will provide a saving of about 46 miles between Hilgard and Ukiah.

A delegation from Ukiah was present and endorsed this request. This delegation consisted of Lloyd Bowman, spokesman, F. Dunfield, Bill Arbuckle, and Oscar Hare. Mr. Bowman urged the improvement so as to provide a road over which natural resources can be transported. He said that they do not want a scenic road but just a good travelable road to allow them to reach the timber in the district, which must be marketed soon. He alleged that the road can be constructed at water grade, avoiding mountain summits, and that it would not only serve the timber interests but it would also open up for general public use certain valuable mineral springs in that vicinity.

Mr. Kinzel, of the Mt. Emily Lumber Company of La Grande, also urged favorable consideration of this project. The construction of the 7-mile

section mentioned by Mr. Reynolds, he said, will connect the present Starkey Secondary Highway with the forest development road already constructed in the national forest, which road, he said, is in as good condition as the present road between Hilgard and Starkey. He gave as his thought that it would not cost more than \$10,000.00 per mile to build this 7-mile section.

Mr. Reynolds also asked for the modernization of the Wallowa Lake Highway from Rock Creek Bridge at the mouth of Wallowa River Canyon to Island City, a distance of approximately 41 miles. He said that this highway is heavily traveled, being the principal route of travel to and from Wallowa County points, and is important from both business and recreational standpoints; also, that the present road is old-type construction, not suited for present-day travel. He asked serious consideration by the Highway Commission of this matter in behalf of both Union and Wallowa Counties, and suggested a definite program of reconstruction, with allocations each year of sufficient amounts to complete the improvement in the shortest time possible.

Mr. Reynolds also asked for the widening and the non-skidding of the Island City-La Grande Section of the Wallowa Lake Highway, and for the construction of a pedestrian lane or walk along this section for the benefit of pedestrians.

Chairman Cabell explained that the Commission is now endeavoring to work out a formula to apply to all requests for sidewalk construction and hopes to be able to say within a short time just what it can or cannot do with the many requests that the Commission has received for this type of work. The Commission has it in mind, he added, to construct a few sidewalks each year but they will be built in the order of their priority, based on the formula.

Mr. Reynolds also asked for the improvement of the Hunters Lane County Road and that this road be placed on the state secondary highway system. The importance of this road to the La Grande community, he said, cannot be overestimated. It carries heavy travel for an uncoiled road and must have immediate attention because the rock surfacing is about worn out. He also mentioned the Medical Springs Secondary Highway and gave as his understanding that the Commission intends to complete the oiling of this highway in 1941. He was informed by the Engineer that the Commission has approved this project for the 1941 program and that the work will be done in 1941 unless something unforeseen arises in the meantime. Mr. Reynolds concluded his presentation by asking the Commission to allocate larger amounts hereafter to improve a greater mileage of highways in their district. He presented a statement showing the amounts heretofore expended by the state on primary and secondary highways in Union County and gave as his thought that Union County is entitled to favorable consideration of its request.

Chairman Cabell explained the status of the Highway Commission's funds. He particularly pointed out that, because of the fact that funds available to the Commission are limited, a large construction program cannot be carried on and for that reason the Commission must be very careful in the allocation of its funds and must distribute them in limited amounts over a large territory, and particularly must the Commission be very careful in assuming

new obligations, such as the Hunters Lane County Road and others in that category.

The meeting was adjourned at 2:00 p. m., following which the Commission conferred privately with a delegation from the town of Union consisting of the following: G. I. Hess, Dick Richards, Tony Smith, Murton Davis, and L. H. Braunwell.

Mr. Hess headed the group and acted as spokesman. He urged the Commission to improve the Union-North Powder Section of the Old Oregon Trail. He alleged that this section is badly in need of repair and that it is the only section of the Old Oregon Trail in that part of the state that has not as yet been improved. He inquired as to the plans of the Commission with respect thereto.

The Engineer advised that the improvement of this section has been deferred pending a decision by the Commission on the proposed rerouting of the Old Oregon Trail through Ladd Canyon and he explained that if the Commission elects to proceed with the construction of the Ladd Canyon route as the main route of the Old Oregon Trail then it would not be necessary to reconstruct the present route to the high standards of a main arterial highway.

Mr. Hess advised that the people of the town of Union are cognizant of the fact that the Highway Commission has been considering the Ladd Canyon cutoff, and, because of this prospective change in the highway, developments in the town of Union are being deferred. Furthermore, the uncertainties of the situation are adversely affecting the sale of properties in this town. He urged the Commission to make a definite decision as soon as possible and particularly asked the Commission to retain the present route of this highway.

Chairman Cabell explained that there are a number of places throughout the state where similar conditions obtain and where the Commission is confronted with the problem of reconstructing certain sections of highways on permanent alignment that will bypass certain cities and towns. In such cases, he said, the Commission must balance the interests of all, both for and against the proposed changes, and its decision is based on the result or outcome of the studies of each problem by itself. The Commission regrets, he said, that in some instances the changes work adversely to the best interests of the people of the local community and in the case of the proposed cutoff through Ladd Canyon no doubt numerous people along the present highway will be disappointed because, if the change is approved, the permanent highway will not pass through their communities. The improvements along the Old Oregon Trail, he said, have advanced to a point where it appears now that serious consideration must be given to the Ladd Canyon cutoff and the Commission will take action on the matter as soon as it can.

There followed a general discussion during which other members of the delegation expressed their desire for the retention of the present route of this highway through Union and Telocaset. Upon conclusion of the same the Engineer was instructed by the Commission to commence the study of the situation, if this meets with the approval of Commissioner Clough who was not present at this meeting.

The delegation also asked the Commission to construct the unimproved section of the Cove Secondary State Highway between Cove and Union, a distance of about 8 miles. Mr. Hess advised that this road carries practically all of the local products and is badly in need of improvement. He asked the Commission to bear the project in mind for early construction. The Engineer advised that this road has no rock surfacing and there is no question that it needs improvement because at certain places it is impassable during the spring months. The Commission took the matter under advisement.

Mr. Kinsel of the Mt. Emily Timber Company was present and again urged the Commission to extend the Starkey Secondary State Highway and to make certain improvements to the existing road between Hilgard and Starkey, particularly the stabilization of the road with rock where it passes through some low meadows, and the elimination of a certain section where the road passes over a couple of hills and where traffic hazards exist. The Commission took the matter under advisement.

The meeting was adjourned at 2:30 p. m.

J. W. Hess
State Highway Engineer

H. B. Glaisyer
Secretary

Henry F. Cabell
Chairman

Herman Oliver
Commissioner

Baker, Oregon, October 1, 1940

The State Highway Commission conferred with a number of delegations in the Baker Hotel at 8:30 p. m. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Mr. Fred Moes, President of the Baker Chamber of Commerce, called the meeting to order. Mr. Lynn Vermillion, Chairman of the Road Committee, took charge of the meeting in behalf of Mr. Moes. There were about 30 residents of Baker County present.

A delegation from Huntington was present, consisting of Mr. Clint Garrison and Mr. Romeo. Mr. James T. Donald was also present with this delegation, acting as spokesman and chief counsel for the city. He stated that the City of Huntington has recently suffered considerable loss due to a cloudburst which flooded this town and that people are of the opinion that the damage was directly attributable to the inadequacy of highway culverts at the east and west city entrances, and the thing that the city is now asking of the Highway Commission is that it construct larger culverts at these two points so that

OCT 1 1940

hereafter when cloudbursts and heavy rains occur the highway will not act as a dam, causing the flooding of their town. He said that cloudbursts frequently occur at this location and reiterated that the installation of the culverts would to a large measure obviate the damage. He also said that the city has plans to raise some money to finance repairs to the city's ditch at the west end of town but its expenditures to that end would be of no value unless the Highway Commission will increase the size of the existing culverts or will construct new ones big enough to adequately take care of the water.

Chairman Cabell advised that it is beyond the reach of the State Highway Commission to provide drainage facilities to take care of cloudburst water in the districts where cloudbursts occur, as that would be a very costly undertaking; however, if investigation reveals that the highways in those localities where cloudbursts frequently occur are responsible for damage to private property, then the State Highway Commission should cooperate in the remedy of the situation. The Commission, he said, does not now have full information with respect to the situation at Huntington but will be pleased to inspect the premises on the following day enroute to Ontario. It was thereupon arranged that the Commission would meet with the delegation at 10:00 a. m. on October 2, in Huntington.

Mr. A. V. Quine, General Manager of the Cornucopia Gold Mining Company, was present and asked that the county road between Halfway and Cornucopia be redesignated a secondary state highway and that it be improved as such. He said that they are not asking that the road be constructed to high standards but simply that they be given a passable road to allow movement of their concentrates to the railroad at Robinette. He pointed out that this road was on the state highway system at one time but was taken off by the Legislature when the Pine Creek route from Halfway to Homestead was placed on the highway system. He gave statistics concerning their operations, showing that they move over this road 180 tons of concentrates daily, and they anticipate that their operations will continue for many years; further, that the road will not only serve the mining company but will also serve many people that live adjacent to the road. He alleged that this road carries more traffic than any other road in the county.

Mr. W. J. Evans and Mr. Fred Mackison, stage operator, Halfway, were present. Mr. Evans endorsed Mr. Quine's request for the improvement of the road to Cornucopia. He also asked for the improvement of the secondary state highway which extends from the Baker-Homestead Highway at a place known as Timber Canyon to the town of Robinette on the Snake River, a distance of about 11 miles. As to the latter road, Mr. Evans stated that it is in bad condition, is narrow, contains many curves, and is unsafe for travel. He urged the widening and straightening of the same from the safety standpoint.

Mr. Vermillion brought up the matter of the improvement of the road leading to the Anthony Lakes playground area and called upon Mr. Blaine Halleck, President of the Anthony Lakes Playground Association, Mr. Don Smith-peter, President of the Evergreen Ski Club, and Mr. Grant of the United States Forest Service, for remarks pertaining thereto. Mr. Halleck stated that the Anthony Lakes Playground Association has been endeavoring for the past two

years to secure W.P.A. funds to finance the improvement and development of the Anthony Lakes Recreational Area, and just recently their request was denied. However, they are still carrying on and expect to be successful in their efforts in the not far distant future. He urged the Commission to improve the Shady Lane Section of the secondary highway leading to the area, the condition of which, he said, is fair during the summer months but is practically impassable during the spring period when frost leaves the ground. He also asked the Commission to cooperate in the cost of snow removal operations on the upper end of this road to permit travel to the winter sports area and in this connection stated that he appreciates the fact that this is not strictly a state highway matter but they are in hopes the Commission will give their request early and favorable consideration to the end that state aid may be secured both financially and physically.

Messrs. A. S. Grant, attorney, Baker, and A. E. Murray, Granite, asked that the Sumpter Valley secondary State Highway be extended to the town of Granite; also, that this extension, 3 miles of which lie in Baker County and 8 miles in Grant County, be improved so as to permit the transportation of gold concentrates over the same the year round. They included in their presentation a request for snow removal on this road during the winter season. They pointed out that pay rolls of mining companies in the vicinity of Granite now aggregate more than one-half million dollars annually, with only the high-grade properties being operated, although with a good road it would be possible to put low-grade properties into production.

Mr. James T. Donald, attorney, Baker, also spoke in behalf of the project. He stated that their main problem at this time is to keep the road open during the winter months. If the Highway Commission will cooperate in this work, he said, it will assure a continuance of mining operations during that period, which under present conditions is impossible because their concentrates cannot be transported to the railroad. Mr. Murray said that mining operations in the Granite area would last at least for 12 years.

County Judge Charles E. Baird presented the following projects in behalf of Baker County and urged favorable consideration of the same by the Commission:

1. Completion of the oiling of the Baker-Homestead Highway between Baker and Homestead. He urged that this work be completed in 1941
2. Extend the Sumpter Secondary Highway to Granite, improve the same, and authorize snow-removal operations during the winter
3. Consider designation of a new route from Sumpter to Austin and Prairie City via Whitney. He alleged that this route would provide a saving of 14 miles in distance between Baker and Prairie City
4. Complete the oiling of the Medical Springs Secondary Highway between Baker and Union
5. Improve the Anthony Lakes Road

OCT 1 1940

6. Resurface the Shady Lane Section of the Haines-Anthony Secondary Highway, which he alleged is impassable during the spring months
7. Improve the 1-mile section of the county road which connects the Haines-Anthony Secondary Highway in Baker County with the North Powder River Road in Union County, at the Baker-Union County line
8. Widen the Timber Canyon-Robinette Section of the Robinette Secondary State Highway to provide greater safety to traffic. In this connection he advised that this road carries a large volume of traffic, including freight, livestock, and concentrates, and that there are numerous places along this road where cars are unable to pass with safety
9. Redesignate the road between Halfway and Cornucopia a state highway and improve the same. He recited the history of this road and advised that if the Commission would not place it on the state highway system the county would ask the Legislature to do so and to remove therefrom the Halfway-Homestead connection
10. Construct adequate culverts at the east and west entrances of the Old Oregon Trail into Huntington as an aid to remedy the cloudburst situation

Mr. Vermillion endorsed in behalf of the Baker County Chamber of Commerce all of the projects mentioned by Judge Baird and the other delegations.

Chairman Cabell advised that the Highway Commission will be glad to give consideration to these projects in the formulation of future construction programs. However, he pointed out that the funds at the disposal of the Highway Commission are provided by the motorists of the state and must be spent in a manner that will provide the greatest amount of benefit to the general public. He said that the Commission appreciates the importance of the mining industry and that the mines must be provided with good transportation facilities but before the Commission can spend much money for improvement of roads into such districts it must consider carefully the continuity of traffic as well as the continuity of the mining operations. The state, he added, should pay its share of the cost if investigation reveals that the traffic and the mining operations justify the expenditure. As to the relocation of the Baker-Unity Highway via Sumpter and Whitney to Austin and Prairie City, Chairman Cabell pointed out that this is a tremendous undertaking, but a casual inspection of the map reveals that there is some argument for it.

The meeting was adjourned at 10:00 p. m.

Commissioner

OCT 1 1940

Huntington, Oregon, October 2, 1940

The State Highway Commission inspected the cloudburst condition in Huntington at 10:00 a. m. in company with several local citizens, including Mr. Clint Garrison, who appeared before the Commission the previous evening in Baker. All three members of the Commission were present as were also the State Highway Engineer, the Attorney, and the Secretary.

Such investigation revealed possibilities that the condition could be improved by changing the natural drainage channel at the west end of the town, which involves the diversion of water to a point farther east and the construction at that point of a new bridge under both the highway and the railroad. It was thought that such construction would at least materially improve existing conditions. However, it was pointed out that nothing could be done unless the railroad company would cooperate. After considerable discussion the matter was referred to the Engineer for detailed investigation and report. He was instructed to contact the railroad officials relative thereto and arrange for a conference on the ground with the railroad company engineers in an endeavor to work out a satisfactory solution.

The Commission thereupon motored to Ontario, where luncheon was taken with the Ontario Kiwanis Club at 12:30 p. m., Mountain Time, in the Moore Hotel.

The Honorable George Aiken, Mayor of Ontario, presided at the meeting following the luncheon. No special requests were made of the Highway Commission at this meeting. Chairman Cabell explained the status of the Commission's finances and the uncertainties that confront the Commission with respect to the expenditures of future federal aid appropriations. Brief statements were also made by Commissioners Clough and Oliver, who concurred in the remarks of the Chairman. R. H. Baldock, State Highway Engineer, explained briefly the basis of allocation of funds to the various districts throughout the state. The meeting was adjourned at 1.30 p. m., Mountain Time.

James O. Oliver
Commissioner

Vale, Oregon, October 2, 1940

The State Highway Commission met with the County Court of Malheur County in the courthouse at 2:30 p. m., Pacific Time, following an inspection of highways south of Ontario. All three members of the State Highway Commission

were present at such meeting, as were also the State Highway Engineer, the Attorney, and the Secretary. The County Court was represented by County Judge David F. Graham and County Commissioners L. P. Peterson and C. A. Marshall. Mr. Taylor, Secretary, Vale Chamber of Commerce, was also present.

Judge Graham asked the Commission to replace on the secondary state highway system the Sucker Creek Road which extends south from the Homedale Spur Secondary Highway to Jordan Valley. He was informed by Chairman Cabell that the Commission has previously gone on record as being opposed to making this road a secondary state highway because it is not considered the economical thing to do.

The County Court then asked the Commission for the improvement of Lytle Boulevard, a county road which extends southeasterly from Vale to Adrian, and for the improvement of the Vale West Secondary State Highway (Graham Boulevard). They stated that these projects are of first importance to the people of Malheur County and urged the Commission to undertake them at the earliest possible time. Mr. Taylor endorsed the request in behalf of the Chamber of Commerce and concurred in the statement of the County Court that such projects, in the opinion of the Chamber of Commerce, are of first importance.

The meeting was adjourned at 3:00 p. m., following which the Commission motored to Burns.

Burns, Oregon, October 2, 1940

The members of the State Highway Commission and party were the guests of the Burns Chamber of Commerce at dinner in the Arrowhead Hotel, following which at 8:30 p. m. a short meeting was held, during which the Chamber of Commerce presented a brief, outlining certain highway improvements desired by the people of this community. Mr. Morgan Timms, President of the Chamber of Commerce, presided at this meeting.

Mr. Carroll Jordan, Secretary of the Chamber of Commerce, presented a brief which he read aloud, in which the following projects were requested:

1. Construction of a seal coat on the recently oiled section of the Central Oregon Highway between Buchanan and Juntura, so as to strengthen this road and improve the riding qualities thereof

OCT 2 1940

2. Improvements to state highways and county roads in Harney County as follows, portions of which roads are in an impassable condition for travel during certain times of the year:
 - a. Pave the Burns-Crane Highway easterly from Burns to a point where the diagonal section cuts off for Crane, approximately 3 miles
 - b. Oil the Burns-Crane Highway from Lawen to Crane
 - c. Grade and surface the Hanley Lane Section of the Frenchglen Secondary Highway from its connection with the Burns-Crane Highway to and beyond Wrights Point
 - d. Grade and surface a 7-mile section of the Diamond Valley Secondary Highway immediately south of its junction with the Burns-Crane Highway
 - e. Construct a pedestrian lane along the Central Oregon Highway between Burns and Hines
 - f. Complete at an early date improvement of the John Day-Burns Highway (Three Flags Highway) between Burns and the foot of Canyon Creek grade

Responding, Chairman Cabell advised the status of the Commission's finances and explained the difficulties confronting the Commission in regard to the programming of the future federal aid funds, in view of the possibility that the Government will demand that these funds be expended for the improvement of certain highways that are particularly important from the military standpoint. Commissioners Clough and Oliver concurred in the remarks of Chairman Cabell.

The meeting was adjourned at 9:30 p. m., following which the Commission conferred in the office of the Arrowhead Hotel with Mr. Nic Monte and Mr. Paul Stafford of the Federal Grazing Department relative to construction of stock fences along state highway rights of way, and other matters. Present at such conference were all three members of the State Highway Commission, the Engineer, the Attorney, and the Secretary.

The State Highway Engineer explained that some time ago, in accordance with the usual practice, an application was filed with the Department of the Interior for highway right of way 200 feet wide across public lands at Picture Rock Pass on the Fremont Highway in Lake County, and that in response thereto a letter was received from Mr. Nic W. Monte, Acting Regional Grazier of the United States Grazing Service, saying that he would recommend favorable action on this application if the State Highway Department would agree to certain stipulations, as follows: that the Indian writings on the rocks at the Pass be protected and preserved, and that both sides of the right of way be fenced by the state to allow stock access to a certain spring located just

north of the right of way without getting on the highway, and that a gate be installed on the south side of the road to allow vehicles to go to and from the corral located on that side. A similar application, he said, was filed for a 200-foot right of way across public lands along the Flagstaff-Middle Bridge Section of the Baker-Homestead Highway, in Wallowa County, the response in that instance being that the application would be recommended for approval if fences were constructed on both sides of the highway and if the state would install gates, cattle guards, and stock underpasses at certain locations; further, that the state would agree to maintain the fences.

He read aloud Mr. Monte's letters with respect to both projects and requested instructions in view of the fact that the requirements appear to be a wide departure from previous practice in the securing of right of way across public lands, and will establish a precedent that will involve the state in a huge expenditure of funds hereafter in connection with highway construction. He said that heretofore the State Highway Department has not been required to accept stipulations of this kind in the acquisition of right of way across public lands, although the Department has paid private parties for fences in some instances as a right of way consideration, with the understanding that the property owners would maintain the fences at their own expense. He added that so far as the Indian writings are concerned the stipulation is satisfactory, because it conforms with the Commission's established policy with respect to such matters. Mr. Monte explained that the State of Oregon is not being asked to do any more than is now being done in other states and particularly referred to the State of Idaho. He said that the fencing is really needed in connection with both of the projects under discussion because the highway in each instance cuts the stock-grazing area in two. He also said that the fences are also required to properly allot the government lands.

The matter of cattle guards and stock passes was also discussed. The Attorney advised that, according to his interpretation of the law, it would be illegal to construct cattle guards on state highway rights of way. Mr. Monte stated that cattle passes should have openings 19 feet wide because range cattle will not use passes that are constructed of pipe. After considerable discussion the following mutual arrangement was reached:

1. Where fences are required the state will furnish the wire and staples for the same in sufficient amount to build a 4-strand fence requiring approximately 17 spools of wire to the mile. The Government will furnish all other materials, including posts, and will construct the fences and will maintain them after construction at no expense to the state.
2. No cattle guards shall be constructed on state highway rights of way and when constructed at other points, such as at side road approaches, they shall be built and paid for by the United States Grazing Service.
3. Cattle passes shall be constructed and paid for by the state and shall be installed at locations decided on by the State highway

OCT 2 1940

Engineer and the District Grazier, or their representatives. after joint inspection on the ground.

4. It was mutually agreed that this arrangement shall obtain only in cases where new highways are to be built across public lands. Where fences, cattle guards, and stock passes are required along existing highways they shall be constructed and maintained by the United States Grazing Service at no expense whatsoever to the state. The Engineer was instructed to direct a letter to Mr. Monte outlining in writing the understanding reached at this meeting.

Mr. Monte requested authority from the Commission to paint on the surface of paved and oiled highways in the stock district the following wording: "Prevent Range Fires", which he thought would aid materially in the prevention of fires. He said the work would be done by C.C.C. forces at no expense whatsoever to the state. The Engineer gave as his thought that it would be better to maintain board signs along the sides of the highway where they could be easily seen and read by the motoring public and would not have to be renewed as often as would the wording on the traveled roadway. He also suggested that it would be advisable for the Highway Commission to make the signs so as to provide for uniformity in sign design. Mr. Monte said that he would be glad to make the signs as well as erect them if furnished with specifications of the Commission's standard design. The matter was referred to the Engineer, who is to confer with the Traffic Engineer relative thereto and advise Mr. Monte by letter when a decision has been reached.

Mr. Monte also brought up for discussion the matter of furnishing powder and culverts in connection with C.C.C. work that is being done along the newly designated secondary state highway between Princeton and Rome, in Harney and Malheur Counties. He advised that the Highway Commission has already entered into an agreement with the Federal Government with respect to this project, in which the Commission agreed to contribute the sum of \$7,000.00 of state funds for culverts and powder. The federal requirements, he said, will not permit him to purchase these items, so he is asking the Commission to make the purchases, credit of course to be given the state for such expenditure on its cooperative share of the project as outlined in the agreement. He said that if the state would purchase this material he would see to it that it is delivered to the job. He also said that this material is needed now because the work is under way and he wants to continue operations through the winter season so as to expedite the completion of the project as much as possible. After discussion the Commission by unanimous vote approved Mr. Monte's request and instructed the Engineer to purchase culvert pipe and powder up to the amount of the state's obligation. It was understood that Mr. Monte would advise the Engineer of the type and size of culverts to be furnished and the kind and amount of powder that would be needed. When furnished with such information the Engineer is to purchase the items and forward them to Mr. Monte. A complete and detailed record of such purchases is to be kept by the Engineer. It was also agreed that the state would furnish engineering work for this project.

Mr. Monte requested a modification of the permit furnished him by the State Highway Commission for acceptance covering the matter of construction of fences along certain state highway rights of way. He said that the form of permit is satisfactory insofar as he personally is concerned but there are certain conditions in the form that he cannot accept because of federal restrictions. He suggested the use of a special form prepared by the Federal Government covering such matters and submitted a copy of the same for inspection. The Attorney advised after study of this form that he could see no special objections to the use of the same for the purpose intended and recommended approval of Mr. Monte's request. The Commission approved the recommendation unanimously. This concluded the conference with Mr. Monte, who then retired from the meeting.

The State Highway Engineer brought up for discussion the request of County Judge Charles B. Baird of Baker County for state maintenance of a stock drift fence along the John Day Highway through the national forest between Unity Junction and Austin. He said that this section of the highway was constructed by the Bureau of Public Roads in 1925 and was on a line which intersected a drift fence that had been constructed by the Cattle and Horse Growers Association, Baker County, under permit from the forest service for the purpose of making a better division of the cattle and sheep ranges and for the control of the feed on the range within the forest area. The fence, he said, was built about 15 years ago and is approximately 11 miles long, extending approximately $5\frac{1}{2}$ miles on each side of the highway. He also said that the fence has never been maintained by the State Highway Department because it was considered that it was not the state's obligation, and there appears to be no agreement covering it in the Commission's records, although the files do disclose a letter signed by Mr. William Doby, former Chairman of the State Highway Commission, dated October 19, 1925, giving as his thought that, inasmuch as the state destroyed the usefulness of the drift fence, the state should maintain fences along the highway if the state builds them, so long as the stockmen maintain their fence; also a letter dated October 20, 1925, from Mr. Roy A. Klein, who was then State Highway Engineer, to Mr. C. H. Purcell, who was then District Engineer of the Bureau of Public Roads, authorizing him, in view of Chairman Doby's letter, to proceed with the construction of fences on both sides of the highway from the drift fence to the private lands east of the forest boundary in preference to the original proposal to construct a cattle guard with a gate at the side of the road for horse-drawn vehicles and horseback travel. He inquired whether or not the Commission wishes to assume this obligation in view of the circumstances. It appeared to the Commission that the state is more or less obligated in the matter. However, a definite decision thereon was deferred pending further investigation by the Engineer to ascertain just what is required and what it will cost to do the work.

The meeting was adjourned at 11:00 p. m.

1940

Burns, Oregon, October 3, 1940

The members of the State Highway Commission and party made a personal inspection of the Frenchglen Secondary State Highway, the Diamond Valley Secondary State Highway, and the Burns-Crane Highway in company with members of the Harney County Court, starting at Burns at 8:30 a. m. and returning to Burns at 1:30 p. m.

The Commission then motored to the town of John Day where an overnight stop was made at the home of Mr. Herman Oliver, State Highway Commissioner. After an excellent dinner, prepared under the direction of Mrs. Oliver, the Commission met informally in the living room with a number of local citizens, several of whom expressed to the Commission their sincere thanks and gratitude for the highway improvements made by the State Highway Commission in this vicinity. Those speaking were the Honorable D. J. Hughes, Mayor of the town of Prairie City; Jake Paulis, President of the Prairie City Chamber of Commerce; Chet Bennett, President of the John Day Chamber of Commerce; Bill Ford, Chairman of the Highway Committee of the John Day Chamber of Commerce; Dan Gleason, Chief of Police of John Day; and F. B. French, County Commissioner, Prairie City. Chairman Cabell responded.

Henry F. Cabell
Chairman

W. H. Baldock
State Highway Engineer

Huron W. Clough
Commissioner

H. B. Glaisyer
Secretary

Herman Oliver
Commissioner

Prineville, Oregon, October 4, 1940

The State Highway Commission took luncheon with the Prineville-Crook County Chamber of Commerce in the Ochoco Inn and immediately thereafter conferred with local citizens relative to highway problems in this vicinity. Present, representing the State Highway Commission, were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Oliver was excused from attending this meeting.

Mr. Asa W. Battles, President of the Chamber of Commerce, presided. There were about 40 persons present at the meeting, including Charles R. Jackson, County Commissioner of Wheeler County; Chester Williams, L. L. Meizner,

OCT 4 1940

L. Johns, and Ray Jones, all of Mitchell; M. A. Lynch, former State Highway Commissioner, Redmond; Jack Houck, Prineville; County Judge A. R. Bowman and County Commissioners Charles T. Brown and Carl E. Fischer, of Crook County; W. B. Morse, Mayor, Prineville; Frank Poulsen, Supervisor of the Ochoco National Forest; and Harold Baldwin.

Mayor Morse thanked the Commission for the improvements under way in the city of Prineville and then asked the Commission to continue construction of the new highway between Prineville and Madras, including a new bridge over the Crooked River. He also asked the Commission to expedite completion of the Ochoco Highway between Prineville and Mitchell, which he said is badly needed. Mr. Jackson endorsed Mr. Morse's remarks with respect to the Ochoco Highway and urged the speeding up of this project as much as possible. He asked for the construction of the West Branch Creek-Forest Boundary Section as the next project on this road.

Mr. Poulsen urged the construction of the Marks Creek Section of this highway so as to facilitate the marketing of timber in this district. He said that the United States Forest Service plans to make this a very scenic section and intends to leave a stand of timber along each side of the road so as to preserve the natural scenic effect. Furthermore, their plan includes provision for elimination of pole lines along this section, which, in their estimation, will make for a more attractive highway.

Mayor Morse, speaking again in behalf of this project, stated that several of the timber companies have purchased timber in the Marks Creek District and in accordance with the provisions of their contracts must start cutting this timber within the next year; but they hesitate to begin operations until they know where the highway is to be permanently located, because they want to make their cuttings conform with the highway improvement and do not want to cut the timber along the highway route.

Chairman Cabell responded by saying that the Highway Commission contemplates awarding another contract this winter for additional construction on the road between Prineville and Madras; also, as to the Ochoco Highway, that he agrees that every effort should be made to complete the entire remaining link as rapidly as is possible when the work is started. He suggested that it might be possible to expedite the improvement by using both federal and state funds to finance it, and pointed out that a survey is now being made west from Mitchell to connect up with the survey made by the forest highway engineers. When the survey is completed and the Engineer's report rendered and studied, the Commission will then take action, but in accordance with the usual practice will give the local people an opportunity to discuss the plans before they are adopted. Commissioner Clough concurred in the remarks of Chairman Cabell.

Mr. Lynch also urged serious and favorable consideration by the Commission for the early completion of the Ochoco Highway. He also brought up for discussion the matter of acquisition of the privately-owned lands within the boundary of the recreational area recently acquired by the Highway

Commission from the Federal Government at the confluence of the Deschutes, Crooked, and Metolius Rivers at a place known as "The Cove", in Jefferson County. He was informed by the Chairman that the Commission has this matter under advisement.

Mr. Baldwin expressed appreciation for the assistance rendered by the State Highway Commission in the development of their view point at the top of the hill just west of Prineville, where an excellent panoramic view of the district may be obtained. Mayor Morse also expressed thanks for the aid furnished by the Commission in this matter and stated that, in order to make this place complete and convenient for the public, the parking area and the road leading to the view point should be given an oil treatment. He asked the Commission to do this work. The Commission took no action on the matter.

The meeting was adjourned at 2:00 p. m., which concluded the Eastern Oregon trip.

W. B. Devers
State Highway Engineer

W. B. Devers
Secretary

Henry F. Cabell
Chairman

Huron W. Clough
Commissioner

Portland, Oregon, October 9, 1940

The State Highway Commission met in regular session at 8:00 p. m. in Room 415 (Imperial Room) of the Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Herman Oliver was excused from attending this meeting.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth; and

OCT 9 1940

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon; and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is, instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

After discussion the Commission approved the request and by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stock-pile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain, real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly

and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Edward T. Garre, which property is located in Lot 5, Block 25, of Nasburg's Addition to Marshfield, in Coos County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 1, which property is further identified in the Highway Commission's records under File R 8068; *

Real property owned by Ernest A. Snyder and Anna J. Snyder, which property is located in Lot 9, Block 21, Nasburg's Addition to Marshfield, Coos County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 2, which property is further identified in the Highway Commission's records under File R 8063; *

Real property belonging to the heirs of Goldsmith Hammer, deceased, and Lurissa Anna Hammer, deceased, which property is located in Lots 1, 2, 3, and 4, Block 22, Nasburg's Addition to Marshfield, Coos County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 3, which property is further identified in the Highway Commission's records under File R 8065; *

Real property owned by the Texas Company, which property is located in Lots 1, 2, 3, and 4, of Block 5, Flat "H" Addition to Marshfield, in Government Lot 3 of Section 22, Township 25 South, Range 13 West, W. M., Coos County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as File R 8055; *

Real property owned by the Union Oil Company of California, which property is located in Government Lot 3 of Section 22, Township 25 South, Range 13 West, W. M., Coos County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as File R 8052; *

Real property owned by Eldon J. Smith, which property is located in the south half of the north half of the southwest quarter of the southwest quarter of Section 17, Township 39 South, Range 19 East, W. M., Lake County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 6, and is further identified as File R 7584 in the records of the Highway Commission; *

Real property owned by A. T. Freeman and Edith Freeman, which property is located in the north half of the south half

OCT 9 1940

of the northeast quarter of the northeast quarter of Section 21, Township 39 South, Range 19 East, W. M., Lake County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 7, and is further identified in the records of the Highway Commission as File R 7593; *

Real property owned by Harry Banks, which property is located in the southwest quarter of the southeast quarter of Section 31, Township 39 South, Range 2 East, W. M., in Jackson County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as File R 8298; *

Real property owned by Ole M. Jetson, et al, which property is located in the northeast quarter of Section 35, Township 17 South, Range 5 West, W. M., Lane County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 9, and is further identified in the records of the Highway Commission as File R 8156; *

Real property owned by Edward Donnelly, which property is located in the northwest quarter of the northeast quarter of Section 4, Township 15 South, Range 40 East, W. M., in Malheur County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 10, and is further identified in the records of the Highway Commission as File R 8442; *

Real property owned by Sidney E. Chilcott and Florence R. Chilcott, which property is located in Government Lot 4 (NW $\frac{1}{4}$ of the NW $\frac{1}{4}$) and in the south half of the northwest quarter and in the northwest quarter of the southwest quarter of Section 14, Township 34 South, Range 6 West, W. M., in Josephine County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 11 and Parcel No. 12, and is further identified in the records of the Highway Commission as File R 8370; *

Real property owned by William E. Campbell, which property is located in the southeast quarter of the southeast quarter of Section 15, Township 39 South, Range 18 East, W. M., Lake County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 13, and is further identified in the records of the Highway Commission as File R 7576; *

Real property owned by A. V. Smith, which property is located in Lots 14 and 15, Block 34, Necarney City, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 14, and is further identified in the records of the Highway Commission as File R 7313; *

Real property owned by Lawrence Sandberg and the unknown heirs of Albert Crawford, deceased, which property is located in Lots 6

to 11, inclusive, Block 37, and in Lots 16 to 21, inclusive, Block 37, Necarney City, Tillamook County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 15, and is further identified in the records of the Highway Commission as File R 7314; *

Real property owned by Nick J. Haniges, which property is located in Lot 24, Block 37, Necarney City, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 16, and is further identified in the records of the Highway Commission as file R 7315; *

Real property owned by S. E. Combs and Matilda G. Combs, which property is located in Lot 10 and the north one-half of Lot 12 of Block 1, Seabright, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 17, and is further identified in the records of the Highway Commission as File R 7317; *

Real property owned by Stella Hays, which property is located in Lots 14 and 15, Block 1, Seabright, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 18, and is further identified in the records of the Highway Commission as file R 7319; *

Real property owned by Emma Drake, which property is located in Lot 8, Block 3, Seabright, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 19, and is further identified in the records of the Highway Commission as file R 7323; *

Real property owned by Fred Kaul, which property is located in Lot 10, Block 4, Seabright, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 20, and is further identified in the records of the Highway Commission as file R 7325; *

Real property owned by the heirs of Margaret M. Gordon, deceased, which property is located in Lots 8 and 9 and the south one-half of Lot 6 and the north one-half of Lot 11, Block 4, Seabright, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 21, and is further identified in the records of the Highway Commission as File R 7324; *

Real property owned by William Kennard, which property is located in Lots 9, 10, and 11, Block 1, Sunset Beach; Lot 16, Block "I", Nehalem Bay Park; and Lots 9, 10, 11, and 12, Block 23, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 22, and is further identified in the records of the Highway Commission as File R 7331; *

OCT 9 1940

Real property owned by John Kohler, which property is located in Lot 21, Block 1, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 23, and is further identified in the records of the Highway Commission as File R 7332; *

Real property owned by Harry W. Borham, which property is located in Lot 7, Block 7, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 24, and is further identified in the records of the Highway Commission as File R 7339; *

Real property owned by Harriet E. Cook, which property is located in Lot 8, Block 7, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 25, and is further identified in the records of the Highway Commission as File R 7340; *

Real property owned by Dora Bingham, which property is located in Lot 15, Block 7, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 26, and is further identified in the records of the Highway Commission as File R 7341; *

Real property owned by Edna Lowry, which property is located in Lot 1, Block 18, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 27, and is further identified in the records of the Highway Commission as File R 7342; *

Real property owned by Axilda Jette, which property is located in Lot 2, Block 18, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 28, and is further identified in the records of the Highway Commission as File R 7343; *

Real property owned by Lydia L. Ellis, which property is located in Lot 8, Block 21, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 29, and is further identified in the records of the Highway Commission as File R 7344; *

Real property owned by Alex Horne, which property is located in Lot 11, Block 22, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 30, and is further identified in the records of the Highway Commission as File R 7345; *

Real property owned by Frances Brooks, which property is located in Lot 21, Block 22, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet

and designated as Parcel No. 31, and is further identified in the records of the Highway Commission as File R 7346;*

Real property owned by Emma J. Keys, which property is located in Lot 23, Block 22, Sunset Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 32, and is further identified in the records of the Highway Commission as File R 7347;*

Real property owned by Evelyn J. Roberts, which property is located in Lot 15, Block 1, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 33, and is further identified in the records of the Highway Commission as File R 7353;*

Real property owned by E. L. Dakin, which property is located in Lot 10 and Lot "L", Block 14, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 34, and is further identified in the records of the Highway Commission as File R 7355;*

Real property owned by L. Asher, which property is located in Lot 5, Block 15, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 35, and is further identified in the records of the Highway Commission as File R 7356;*

Real property owned by Earl D. Walkon, which property is located in Lot 6, Block 15, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 36, and is further identified in the records of the Highway Commission as File R 7357; *

Real property owned by Edgar J. Robertson, which property is located in Lots 24 and 25, Block 15, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 37, and is further identified in the records of the Highway Commission as File R 7358;*

Real property owned by Carrie L. Dixon, which property is located in Lots 1 to 12, inclusive, and Lots 15 to 28, inclusive, Block 17; Lots 1 to 11, inclusive, and Lots 13 to 16, inclusive, and Lots 18 to 28, inclusive, all in Block 19; Lots 1 to 11, inclusive, and Lots 15 to 28, inclusive, Block 21; Lots 1 to 21, inclusive, and Lots 29 and 30, Block 31, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 38, and is further identified in the records of the Highway Commission as File R 7359;*

Real property owned by I. J. Everell, which property is located in Lot 12, Block 19, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 39, and is further identified in the records of the Highway Commission as File R 7360; *

Real property owned by R. Thomas Hughes and Bess L. Hughes, which property is located in Lot 18, Block 20, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 40, and is further identified in the records of the Highway Commission as File R 7361; *

Real property owned by A. V. Smith and D. B. Smith, which property is located in Lots 5 and 6, Block 23, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 41, and is further identified in the records of the Highway Commission as File R 7365; *

Real property owned by Anita McIntyre Peterson, which property is located in Lot 11, Block 23, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 42, and is further identified in the records of the Highway Commission as File R 7366; *

Real property owned by Mabel Bishop Shepherd, which property is located in Lot 12, Block 23, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 43, and is further identified in the records of the Highway Commission as File R 7367; *

Real property owned by Blanche Reed, which property is located in Lots 13 and 14 and the north half of Lot "R", Block 23, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 44, and is further identified in the records of the Highway Commission as File R 7368; *

Real property owned by H. F. Clark, which property is located in Lot 17, Block 23, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 45, and is further identified in the records of the Highway Commission as File R 7369; *

Real property owned by May Cecilia Cheldelin, which property is located in Lot 21, Block 24, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 46, and is further identified in the records of the Highway Commission as File R 7370; *

Real property owned by Earl F. Bethards and Agnes Bethards, which property is located in Lot 18, Block 25, Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 47, and is further identified in the records of the Highway Commission as File R 7371;*

Real property owned by Jennie C. Young, which property is located in Lot 15, Block "I", Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 48, and is further identified in the records of the Highway Commission as File R 7372;*

Real property owned by H. S. Allen, which property is located in Lot 29, Block "T", Nehalem Bay Park, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 49, and is further identified in the records of the Highway Commission as File R 7378;*

Real property owned by Martha A. Bequeath, which property is located in Lots 29 and 30, Block 6, Nehalem Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 50, and is further identified in the records of the Highway Commission as File R 7381;*

Real property owned by Charles Vogt, which property is located in Lots 8 and 9, Block 7, Nehalem Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 51, and is further identified in the records of the Highway Commission as File R 7382;*

Real property owned by Mattie Bequeath, which property is located in Lot 9, Block 13, Nehalem Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 52, and is further identified in the records of the Highway Commission as File R 7383;*

Real property owned by M. R. Bishop, which property is located in Lot 1, Block 14, Nehalem Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 53, and is further identified in the records of the Highway Commission as File R 7384;*

Real property owned by Anselm Boskowitz, which property is located in Lot 8, Block 16, Nehalem Beach, Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 54, and is further identified in the records of the Highway Commission as File R 7385;*

Real property owned by Fred J. Johnson and Marie Johnson, which property is located in the southwest quarter of the southwest

OCT 9 1940

quarter of the southeast quarter of Section 32, Township 3 North, Range 10 West, W. M., Tillamook County, Oregon, and which property is more particularly described on the attached sheet and designated as Parcel No. 55, and is further identified in the records of the Highway Commission as File R 7386. *

2. The particular purposes for which the above described parcels of real property are being acquired are as follows:

Parcels Nos. 1, 2, 3, 4, and 5 are being acquired for right of way purposes in connection with the North Bend-Marshfield Section of the Oregon Coast Highway in Coos County;

Parcel No. 6 is being acquired for right of way purposes in connection with the further improvement of the Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway in Lake County;

Parcel No. 7 is being acquired for right of way purposes in connection with the further improvement of the Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway in Lake County;

Parcel No. 8 is being acquired for right of way purposes in connection with the further improvement of the Neil Creek-Barron Creek Section of the Pacific Highway in Jackson County;

Parcel No. 9 is being acquired for the construction thereover of a hauling road to haul material from the state's quarry to the Eugene-Mapleton Highway in Lane County;

Parcel No. 10 is being acquired for the storage of maintenance materials on the Ironside-Brogan Section of the John Day Highway in Malheur County;

Parcels Nos. 11 and 12 are being acquired for right of way purposes in connection with the further improvement of the Sexton Mountain Section of the Pacific Highway, in Josephine County;

Parcel No. 13 is being acquired for a park or recreational area which is adjacent to the Klamath Falls-Lakeview Highway and is located in Lake County, Oregon;

Parcels Nos. 14 to 55, inclusive, are being acquired for a park or recreational area which is in close proximity to the Oregon Coast Highway and to the Pacific Ocean and is located in Tillamook County.

3. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the state is required for the specific purposes hereinabove set

OCT 9 1940

forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That this resolution be entered in full in the minutes and records of this Commission.

* (The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 4, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Commission discussed the advisability of continuing to pay annual rental for certain lands now under lease from the Government for recreational purposes. The State Parks Superintendent, who was present, advised that the state is now paying the Government annually the sum of approximately \$875.00 for such leases. He suggested the purchase of these tracts outright so that the state will have title to them at the expiration of the lease

OCT 9 1940

periods. Otherwise, he said, the state would have nothing to show for its expenditure. The Commission concurred in the viewpoint of the Parks Superintendent and decided to purchase a few of these tracts each year until all have been acquired. The Parks Superintendent was instructed to submit to the Commission at its next meeting a complete list of such properties, together with a recommendation as to the order in which the purchases should be made.

The Attorney reported receipt of a letter from Mr. A. L. Mills, Portland, Western Representative of the Miami Timber Corporation of Chicago, relative to the sale to the state of timber strips along the Salmon River Highway. He read aloud such letter and particularly pointed out that Mr. Mills is recommending to the Chicago office a continuation of the agreement heretofore reached with respect to the purchase of the balance of this timber, at the rate of \$3.00 per thousand, which timber is situate on the north side of the highway between Highway Engineer's Station 630 on the west and 772 on the east, and joins the strips heretofore purchased by the Commission. After discussion Chairman Cabell and Commissioner Clough approved the purchase of this timber with state funds, subject to further approval by Commissioner Oliver. (The State Parks Superintendent reported on the following day that he discussed this matter with Commissioner Oliver over the phone and that Mr. Oliver approved the expenditure for this purpose, making the action unanimous.) The Parks Superintendent was authorized by the Commission to employ a cruiser to make a joint cruise of the timber on the tract with a representative of the Miami Corporation so as to ascertain definitely the amount that is to be paid to the Company.

In this connection the State Parks Superintendent reported that Mr. Mervin Boyer, who resides in this locality, owns a 3.2-acre tract of land abutting on the Salmon River Highway at this point, which property acts as a wedge in the tract that the state is buying from the Miami corporation. When Mr. Boyer purchased this tract, he said, he really intended to purchase sufficient land to include a certain sulphur spring; however, when the property line was established it was found that the spring was not included and now Mr. Boyer wants to exchange the property described in his deed for state property on which the spring is located. He recommended against such exchange and gave as his thought that it would be highly desirable from the state's standpoint to buy Mr. Boyer's acreage so as to eliminate private holdings within the boundaries of the state's property. The Commission concurred and authorized the Right of Way Department to conduct negotiations with Mr. Boyer for the purchase of his 3.2-acre tract.

The matter of using federal aid funds for the purchase of wayside strips was also discussed, the Commission having particularly in mind using such funds for the acquisition of timber strips along the Pendleton-John Day Highway as heretofore recommended by the State Parks Superintendent. Action on such matter was deferred by the Commission pending receipt of the federal requirements that are to govern the expenditure of the government moneys. The Engineer was instructed to ask the Public Roads Administration for such information.

The Attorney also presented a letter from Mr. A. L. Mills, repre-

senting the Miami Timber Corporation, in which it was stated that the company would sell to the Commission, at the rate of \$5.00 an acre, 320 acres of logged-off land along the Salmon River Highway. The company, however, wished to reserve the right to construct necessary logging roads or railroads on such property for use in connection with its operations on other land owned by the company. The Attorney was instructed to bring to the Commission for approval the formal deed or contract of sale.

The Attorney read aloud a letter from Mr. George W. McMath, Right of Way Engineer for the Union Pacific Railroad Company, outlining several conditions under which the company is willing to sell to the state right of way across its holdings as may be necessary in connection with the construction of the Front Avenue project in Portland. It appears that the company desires to sell to the state the surface rights only and to reserve unto the company all mineral rights and oil rights. The Commission considered that the conditions of the sale are not particularly objectionable from the state's standpoint and thereupon authorized the inclusion of such provisions in the deed of conveyance.

The Parks Superintendent reported on the following matters:

Letter from County Judge A. H. Boice, Curry County, relative to the establishment of a national park adjacent to the Oregon Coast Highway in Curry County:- The Parks Superintendent advised that a letter has been received from Judge Boice requesting, on behalf of the County Court, that the Highway Commission take no steps toward the establishment of said proposed park and that the Commission oppose the acquisition of lands for this park by the Federal Parks Service because they believe that the taking of several thousand acres of land off the tax rolls would place the county in a much worse condition financially than it is now in. After discussion the Commission ordered that Judge Boice be informed that the State Highway Commission has not at any time taken the initiative in promoting this national park, which the Commission believes would eventually result in much benefit to Curry County; hence the Commission must decline to make any recommendations that may be taken as an objection to the establishment of such park; further, that the Commission declines to make any promise or statement to the effect that it will not do anything to promote or help establish this park.

Authority of State Parks Superintendent to sign C.C.C. Camp applications, et cetera:- The Parks Superintendent advised that the National Parks Service has made inquiry as to his authority to sign, on behalf of the Commission, C.C.C. Camp applications, contractual C.C.C. instruments, et cetera. He said that he has been signing such documents for the past seven years and no question has been raised as to his authority until recently, and he would like the Commission to act on the matter so that he can pass the information on to the National Parks Service. After discussion it was decided that the Commission should sign all papers in connection with C.C.C. state park development matters in which the Commission and the Federal Government are working cooperatively. In cases of emergency, where immediate action is required, it was decided that the State Parks Superintendent should contact Chairman Cabell for instructions, Chairman Cabell's action on the matter to

OCT 9 1940

be ratified by the Commission at its next meeting. In cases involving action in conformance with a policy that has been established by the Commission, Chairman Cabell was empowered to pass on the matter personally without ratification by the other members of the Commission. To enable the Commission to keep advised of state park matters and particularly of expenditures made by the State Parks Department, the Parks Superintendent was instructed to file with the Commission at frequent intervals, not exceeding six months, a complete report on his activities. The Attorney was instructed to prepare a resolution in conformance with the above for adoption by the Commission at a future meeting.

Addition to Cape Lookout State Park in Tillamook County:- The Parks Superintendent advised that some time ago he secured an option from Alek Donaldson to purchase 26 acres of land as an addition to Cape Lookout State Park, this being a key tract that is badly needed in order to properly develop the existing park. This option, he said, was for \$7,500.00 and is effective for a period of six months, which period will soon expire. He requested authority from the Commission to take up the option. The Attorney advised that the tract has been investigated by one of his right of way agents, who considers that the price asked by Mr. Donaldson is fair and would be sustained in condemnation. After discussion the Commission approved the purchase of this tract at the price quoted. In this connection the Parks Superintendent pointed out that, in order to completely fill out this park, it will be necessary to buy a small tract of land containing 19.9 acres situate in Lot 4, Section 36, Township 2 South, Range 11 West, W. M., from the owner, Mr. W. K. Smith. He requested authority to negotiate for the purchase of this tract, which he thought could be acquired at the rate of \$5.00 per acre. The Commission approved the request.

Redwood and myrtlewood tracts along the Chetco River, in Curry County:- The Parks Superintendent requested instructions relative to the purchase of these tracts, there being two which contain a fine growth of myrtlewood trees and one containing a good stand of redwood trees, the myrtlewood tracts belonging to Elmer Bankus and Alfred Loeb of Brookings, and the redwood tract belonging to the O. & C. Company, Crescent City, California. These tracts were inspected by the Commissioners in person on their trip over the Oregon Coast Highway in August of this year. The Commission decided, after discussion, not to purchase these tracts because they are situated a considerable distance from the state highway and are served by a very poor county road which the Commission would be compelled to reconstruct if the areas were acquired.

Proposed park adjacent to the Oregon Coast Highway at the Oregon-California state line:- The matter of purchase of the property owned by Mr. Fritz, situate between the Oregon Coast Highway and the Pacific Ocean at the California state line, was brought up by the Parks Superintendent. The Commission decided not to purchase this tract because there are so many other tracts throughout the state which have priority in the state parks program.

Rogue River bridgeheads:- The Parks Superintendent also brought up for discussion the matter of acquiring property controlling both the north

OCT 9 1940

and the south bridgeheads of the Rogue River bridge at Gold Beach. The Commission considered it advisable to protect these bridgeheads and accordingly authorized the Right of Way Department to secure options on private properties that are needed for this purpose.

Rogue River Mouth fishing frontage:- The Parks Superintendent presented for the consideration of the Commission the matter of purchase of lands bordering on the Rogue River below the Rogue River bridge at Gold Beach. He said that this is one of the best fishing points along the entire Rogue River, the mouth of the river being quite narrow, permitting fishermen to cast their lines about half way across the river at this point; further, that the river bed and the bank slopes are of sand, making ideal casting conditions, and a more perfect fishing setup does not exist. It was his thought that the Commission should acquire frontage on the river at this point so as to protect the rights of the fishermen and to permit people to fish from the banks of this noted fishing stream without trespassing on private property. The Commission questioned its authority to expend state funds to purchase this property for the purpose intended. The Commission also questioned the advisability of acquiring a freeway for fishermen because it would establish a precedent in such matter which might work to the disadvantage of the Commission later. In view thereof the purchase of the areas was held in abeyance for the time being.

Proposed park at Crofts Lake, near Bandon:- The Parks Superintendent advised that the Westcott Grange, Bandon, had recommended the purchase of property at Crofts Lake as a state recreational area. He said that he has inspected the area and considers that it will not fit properly into the state parks picture because lands bordering the lake have been developed by private individuals for their own recreational purposes and it would cost the state a large sum of money to purchase the interests of these people. Furthermore, it would be necessary to construct a road to the area approximately 4 miles long. He recommended against the purchase of this property. The Commission approved the recommendation.

Proposed park at Agate Beach Lighthouse, Lincoln County:- The Parks Superintendent reported an offer received from Fred Williams, Salem, and the Ira Wade Estate, Toledo, to sell to the state for park purposes at the rate of \$200.00 per acre, 66 acres of land overlooking the ocean, near Agate Beach lighthouse. He said that the owners have had other offers to purchase the property but would prefer to sell to the state if the state wants it. The Commission decided not to buy this property in view of the numerous obligations that it now has with respect to the acquisition of additional areas for purposes of this kind.

Addition to Crooked River State Park:- The Commission discussed the acquisition of private holdings contained within the boundaries of the state park located at the confluence of the Deschutes River, the Crooked River, and the Metolius River, in Jefferson County, at a place known as The Cove, and decided to purchase such properties in the event they can be secured at reasonable cost. The Attorney was instructed to negotiate options for the same.

OCT 9 1940

Request of Lake County American Legion Post for establishment of American Legion Park south of Lakeview:- The State Parks Superintendent advised that this matter has been investigated by Division Engineer W. E. Chandler, who advises that the state owns no timber strips along the highway south of Lakeview and accordingly has no timbered area to name, and that it is quite evident that what they have in mind is the naming of a section along the Quartz Mountain Section of the Klamath Falls-Lakeview Highway, which was previously considered by the Commission and was denied. The Attorney was instructed to so inform the American Legion Post at Lakeview.

The Commission adjourned at 11:45 p. m., to reconvene in the auditorium of the Public Service Building on the following morning.

Portland, Oregon, October 10, 1940

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the sale of buildings were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 p. m. in the same room:

County Commissioner Wm. Baer, of Deschutes County, and Don Peoples, Secretary of the Bend Chamber of Commerce, came before the Commission and inquired as to the Commission's plans for the further improvement of the Warm Springs Highway between Warm Springs Agency and Wapinitia Junction. They were informed that the Commission has already placed under contract all of the work provided for in the current program; further, that the Commission has not as yet adopted a program for the new federal aid moneys and probably will not do so until it is known definitely just what the Federal Government will require

with respect to allocations to finance improvements on roads that are considered of greatest value from the military standpoint.

Chairman Cabell explained the status of funds and advised that the Federal Government may require that priority be given to roads that are of strategic military importance. Mr. Peoples gave as his understanding that the United States Reclamation Service has plans to establish new C.C.C. camps along The Dalles-California Highway between Terrebonne and Madras to work on the irrigation canals in this vicinity. He gave as his thought that the Commission should have this information, inasmuch as there is a possibility that the canal construction will affect the proposed highway improvements in this locality. The Commission referred the matter to the Engineer for investigation.

Mr. Peoples also brought up for discussion the matter of oiling the uncoiled section of the Santiam Highway and suggested that the section of most importance is that between Suttle Lake and Hogg Pass. He was informed by Chairman Cabell that the current forest highway program contains an amount to finance the oiling of this section but work cannot go forward this year because of the lack of congressional appropriation. Chairman Cabell further stated that the Commission considers the project mentioned by Mr. Peoples as being of most importance and that it should be completed at the earliest possible time.

Mr. W. C. Calder of Baker, and W. M. Huntington, Portland, attorney for Mr. Calder and for the Arch Cape Land Company, Portland, came before the Commission in regard to a claim for damages arising out of construction of the Oregon Coast Highway at the south end of Arch Cape tunnel, in Tillamook County. They alleged that the construction of the highway at this point has caused an unstable condition in the terrain and has caused considerable slide material to be deposited on their property and they consider that it is the obligation of the state to pay certain damages and to clean up the premises of debris, et cetera. The Engineer suggested that a solution of this problem might be the purchase of additional right of way from these owners. Mr. Huntington stated that his clients would be pleased to consider selling to the state additional right of way if the state will arrange to clean up the premises surrounding it. Mr. Calder also stated that he would be glad to discuss with the Commission the sale of a portion of his property that is affected by the slide but he wants the balance of his property cleaned up and the slide debris removed therefrom. After considerable discussion the Commission instructed the Engineer to make a survey to determine the exact boundaries of the slide and the area of the same. He was also instructed to investigate the matter of the debris on these private properties and the allegations of Mr. Calder and Mr. Huntington that material is still sluicing from the highway into a small lake on their property, and to submit a report on this matter, together with an estimate of cost to clean up the slide area and the adjoining areas, at the November meeting of the Commission. It was arranged that Mr. Calder would contact Resident Engineer J. H. Scott, at Nehalem, on the following Monday and with him make a joint inspection of the premises.

Reconsideration was given by the Commission to the proposal of the

OCT 10 1940

Crown-Zellerbach Corporation, Portland, to lease certain Willamette River frontage along the newly constructed Pacific Highway East, in Oregon City, for which the corporation previously offered to pay a reasonable sum. After discussion the Commission decided to call for bids for the lease of this area for a period of three years or so; reserving, however, from the area to be leased a certain cove opposite the courthouse, in which it is proposed to construct and maintain a wharf for use of fishermen in tying up their boats. The Attorney was instructed to prepare an appropriate advertisement to be published, calling for bids, and he was instructed to include in the lease, if and when it is prepared, a clause providing for the revocation of the lease at any time that the Commission may see fit, it being considered advisable to have such provision in the lease in view of the possibilities that certain factions will object to the use of the frontage for purposes intended by the Crown-Zellerbach Corporation if such use detracts from the natural scenic view. The Engineer was instructed to contact the city officials of Oregon City relative to the operation of the cove for the benefit of fishermen. The Attorney was instructed to inform the Crown-Zellerbach Corporation of the action taken by the Commission.

The matter of permitting the mooring of boathouses along the bank of the Willamette River at this location was also discussed. It was the thought of the Commission that this matter would be automatically taken care of upon the leasing of the river frontage at this place.

The Secretary presented a letter from the Multnomah Anglers and Hunters Club suggesting that the state acquire tracts of land along coastal streams so as to provide access to these streams by fishermen without trespassing on private property. The Commission considered that solution of this problem is the function of the State Fish Commission and not the Highway Department, hence declined to take any action on the matter.

The Commission considered and approved two resolutions from Lake County Court, one of which pertains to the abandonment of the Hunter Hill-Lakeview Section of the Fremont Highway and the other relates to the abandonment of a portion of the Klamath Falls-Lakeview Highway and the retention of other portions of such highway for county purposes. The Engineer explained that these resolutions are the result of the abandonment by the State Highway Commission of the sections of highway referred to because of a relocation of the highway on other alignment. He recommended approval of the resolutions. The Commission approved the recommendation.

The Engineer reported that the Klamath Falls-Lakeview Highway between Engineer's Station 1229+95 and Station 1332+00, in Sections 14, 15, and 22, Township 39 South, Range 19 East, W. M., Lake County, has been reconstructed on new alignment, hence the old highway between these points is no longer of value from the state's standpoint. He recommended that the Commission take action to turn the old section back to Lake County for future maintenance.

He also reported that a portion of the Williams Highway-Fruitdale Road Section of the Pacific Highway, in Josephine County, has been relocated

and reconstructed on new alignment, particularly between Mile Post 279.6 and 282, so that the old highway between these points is no longer of value for state highway purposes. He recommended that the old right of way be turned back to the county to maintain. After discussion the Commission approved the Engineer's recommendation in both instances and by unanimous vote adopted the following resolutions pertaining thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Klamath Falls-Lakeview Highway in Lake County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Klamath Falls-Lakeview highway in Lake County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Lake County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Klamath Falls-Lakeview Highway in Sections 14, 15 and 22, Township 39 South, Range 19 East, W. M., Lake County, lying on the northerly side of the right of way required for the reconstructed Klamath Falls-Lakeview Highway, said section also lying between Mile Posts 85.4 and 87.5 of said highway; the beginning and ending points with reference to

OCT 10 1940

the engineer's stations of the said reconstructed highway being Station 1229+95 on the westerly end and Station 1331+00 on the easterly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated September 21, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lake County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Lake County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Williams Highway-Fruitdale Road Section of the Pacific Highway in Josephine County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

*Map filed in Right of Way Abandonment and Retention File - No. 77

OCT 10 1940

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Williams Highway-Fruitdale Road Section of the Pacific Highway but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Josephine County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Williams Highway-Fruitdale Road Section of the Pacific Highway, in Sections 19, 20, 21, 28 and 29, Township 36 South, Range 5 West, W. M., Josephine County, lying on the southerly side of the right of way required for the reconstructed Pacific Highway; said section also lying between Mile Posts 279.6 and 282 of said highway; the beginning and ending points with reference to the engineer's stations of the said old highway being Station 19+60 on the westerly end and Station 147+66 on the easterly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated October 8, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red. *

Map filed in Right of Way Abandonment and Retention File - No. 78

OCT 10 1940

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguard as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Josephine County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Josephine County and beyond any responsibility or supervision by the State Highway Commission.

The Commission discussed the controversy with Mrs. J. R. Prewett, Toledo, Oregon, arising out of a right of way settlement in connection with the improvement of the Corvallis-Newport Highway at Toledo. The Attorney advised that this matter is of long standing and that at one time a satisfactory settlement with Mrs. Prewett was reached. However, she now appears to be dissatisfied with the settlement and has filed a claim for additional payment. He further advised that the Commission some time ago approved an additional payment to Mrs. Prewett in the amount of approximately \$75.00 and that this offer was conveyed to Mrs. Prewett, who refused it because she felt she was entitled to compensation in a larger sum. He recommended the payment of the amount previously offered Mrs. Prewett, but no more. The Commission approved the recommendation and instructed the Attorney to renew the offer to Mrs. Prewett as settlement in full of her claim and to let the matter drop if she refuses to accept same.

The Commission had under discussion the matter of exchange of certain property with the State Board of Control at the Highway Department's shops in Salem, such exchange being necessary in order to facilitate the development of properties of both departments. The Commission indicated approval of such exchange provided the Highway Department is given the right to maintain a sewer line which has been constructed and installed on the tract that is to be conveyed to the Board of Control. The Commission, however, deferred definite action until the next meeting when all Commissioners are present.

OCT 10 1940

The Commission authorized the private sale of a residence building on the former Charles M. Casad property at Brookings, together with a portion of the lot outside the standard highway limits, to James H. Harris, for a consideration of \$350.00. The Assistant Attorney advised that this sale is immediately necessary in order to permit the moving of buildings now owned by James H. Harris, some of which are to be placed on the former Charles M. Casad property.

The Assistant Attorney reported that at the time of the settlement on the T. W. Panter property at Bandon there was a mutual misunderstanding, in that Mr. Panter and the right of way agent anticipated that the reconstructed highway would be at approximately the same level as the existing highway, so there would be no material impairment of access to his service station. It has developed, however, that the new highway is about five feet lower than the old highway and access to Mr. Panter's property is very materially impaired. The Commission authorized the reopening of this settlement with the idea of endeavoring to work out a plan, either for payment of damages or for the purchase of adjacent lots and the moving of the service station thereon, which would leave the former owner in as good position as he was at the time of the original negotiations.

The Commission discussed the matter of disposal of a small three-cornered parcel of state-owned land lying between the Tualatin Valley Highway and the Southern Pacific Railroad right of way near a place known as Aloha, in Washington County. The Attorney explained that this small parcel was originally part of a dedicated street that has been vacated by the Washington County Court and left to revert to the adjacent property owners, which is the reason that the state now owns it; also, that the owner of the property abutting on this tract wants to obtain possession of it for his personal use. He inquired whether the Commission wished to dispose of it. The Commission decided to keep the property. The following resolution pertaining thereto was adopted by the Commission by unanimous vote:

WHEREAS, the County Court of Washington County by resolution duly and regularly adopted on March 15, 1939, recorded on page 183, Book 179, Washington County Deed Records, abandoned for public right of way purposes the following described parcel of real property:

Beginning at the Southwest corner of Lot 191 in Johnson Estate Addition to Beaverton-Reedville Acreage in Washington County; thence North 81° 37' West, 227 feet along the north line of Southern Pacific Railway right of way to the south line of the Tualatin Valley Highway; thence easterly along said south line to the west line of said Lot 191; thence south 24 feet to the point of beginning;

AND, WHEREAS, said resolution, among other things, contained the following:

"It is further ordered and adjudged that as a result of the vacation aforesaid the title to the land shall fall

OCT 10 1940

to the owners of land abutting upon the north side of said dedicated roadway and none to the Southern Pacific."

AND, WHEREAS, the said tract of land is bordered on the north by a state highway and by reason thereof the State of Oregon, by and through its State Highway Commission, as the abutting owner is vested with title to the above described parcel of land by reason of the vacation proceedings promoted and adopted by the County Court of Washington County; and

WHEREAS, it is the judgment of the State Highway Commission that said parcel of land should be preserved by the State for public purposes:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and voting affirmatively, as follows:

1. That the Highway Commission does hereby declare and find that the above described parcel of land is necessary and will be useful in connection with public highway construction and maintenance, and the Commission does therefore declare and order that said parcel of land shall be preserved by the State for such use as it may serve in connection with highway construction, maintenance, beautification, landscaping or other uses.

2. That the State Highway Engineer be and he hereby is instructed to properly inclose said area with a fence or otherwise define the borders thereof so that the same will be clearly marked and designated as state property.

3. There is attached hereto and made a part hereof a blueprint or map, marked "Exhibit A", on which there is shown shaded in red the area of land described in this resolution.

The Engineer reported on the request of Fort Klamath Grange No. 775 that the state construct a view point on Sun Mountain adjacent to The Dalles-California Highway, near Fort Klamath. He said that this matter has been investigated by Division Engineer W. E. Chandler, who recommends the acquisition of a small tract at this point, which is opposite Mile Post 241.2, because it will afford an excellent view of the beautiful Wood River Valley, and also recommends the development of the same, which he estimated would cost about \$800.00. He said that he concurs in Mr. Chandler's recommendation. The Commission approved the recommendation unanimously.

The Commission recessed at 12:00 noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

Messrs. Roy Swenson, Swisshome, and Earl J. Muir, Eugene, came before the Commission and requested the improvement of the Eugene-Swisshome

OCT 10 1940

State Secondary Highway. Mr. Muir stated that Mr. Swenson has purchased from him about 80 million feet of timber adjacent to this highway and in order to truck the logs to market must use several miles of the state secondary highway between Walton and Swisshome, which is in very bad condition. The Engineer advised that this matter has been investigated by Division Engineer K. D. Lytle who states that it will cost about \$4000.00 to place this road in condition that will permit log hauling during the winter months, and in addition some of the bridges would have to be repaired. The present road, he said, will not stand up under logging traffic and unless the road is stabilized the probabilities are that the Commission will have to close it entirely for such traffic in order to keep it open for other traffic. Mr. Muir advised that he has discussed this matter with Lane County Court, which has agreed to pay one-third of the cost of the repair work; and has discussed the matter also with Mr. Swenson, who is willing to contribute an equal share of the cost if the state will pay the difference. The Engineer then suggested that such proposition might be acceptable if, after the repair work has been done, Lane County will consent to the removal of the Walton-Swisshome Section from the state secondary highway system and to the substitution therefor on such system of the Eugene-Veneta Section of the so-called Route "F" Highway. The Commission appeared favorably inclined toward such suggestion and instructed the Engineer to discuss the matter with the County Court and report the results thereof at the November meeting of the Commission.

A delegation, representing the Coast Highway Association, and consisting of the following members came before the Commission in the interests of the Oregon Coast Highway: Arch B. Sanders, Manager of the Association; County Judge A. H. Boice of Curry County; County Judge J. E. Norton of Coos County; W. E. Kelley of Port Orford; H. G. Kern and E. L. Peterson, of North Bend; C. H. Coe of Marshfield; County Judge Franklin E. Gilkey of Lincoln County; and County Commissioner James C. Barclay; H. L. Hull of Newport; J. W. Lundin of Nelscott; Al T. Walker of Ocean Lake; Edw. G. Smith of Gleneden Beach; County Judge Harland M. Woods and Commissioners E. G. Anderson and E. H. Lindsey, of Tillamook County; John Aschim, Chas. A. Ross, and A. T. Dolan, all of Tillamook; and S. G. Reed of Neahkahnie. Mr. Sanders headed the group and acted as spokesman. He referred to a program previously presented to the Commission by the Association, particularly to the following projects mentioned therein:

(1) Improvement of the Oregon Coast Highway from the south end of the Rogue River Bridge to the southerly limits of Gold Beach. Mr. Sanders said that the feeling of the people of this district is now against the rerouting of the highway and that they consider that it would be much better to simply improve the present highway, for which the property owners are willing to donate additional right of way 20 feet wide. He further stated that lack of approval by the Commission of a definite plan for the highway improvement at this place has delayed development in this town because the people are reluctant to spend their money to improve their properties without knowledge as to where the permanent highway is to be. Chairman Cabell outlined briefly the projects that the Commission now has under consideration in this vicinity; viz., the improvement at Bandon, which is now under way; the improvement at Brookings, which is also under contract; and the proposed improvement at Gold

OCT 10 1940

Beach, which, he said, the Commission has found it necessary to defer because of lack of funds and a decision as to where the highway is to be located. He also mentioned the proposed improvement at Port Orford, advising that this work also had to be postponed because it is a forest highway project and funds to finance the work have not been provided by the Federal Government.

(2) Complete the reconstruction of the Bunker Hill Section and continue the improvement to Coquille; also, rebuild the section between Marshfield and North Bend:- Mr. Sanders asked the Commission to give particular consideration to the Marshfield-North Bend improvement and to outline the work involved so there will be no gaps of inactivity until the entire project is completed. He suggested continuing projects as the best arrangement.

(3) Relocation of the highway between Newport and Otter Rock:- Mr. Sanders stated that the members of the Coast Highway Association are agreed that this project is of first importance when the Neahkahnie Mountain project is completed in northern Tillamook County. Chairman Cabell stated that this is a reasonable suggestion and that the Commission would give it careful consideration.

(4) Proposed relocation at Gleneden Beach:- Mr. Sanders advised that this project is not particularly important from the Association's standpoint and that they would prefer that the project be indefinitely postponed. He said that Mr. Carey, who owns considerable property at Gleneden Beach, has offered to give land as may be required to properly flatten the curve in the present highway at this point if the Commission will retain the present route.

Mr. Edward G. Smith, Gleneden, also urged the Commission to retain the present route of the highway past Gleneden Beach. He added that if the Commission feels that it must change the location, then they would like the work done as soon as possible so they can adjust their properties accordingly. Judge Gilkey endorsed Mr. Smith's remarks and stated that Lincoln County Court would prefer that the Highway Commission spend its money elsewhere.

Chairman Cabell replied that since he has been a member of the State Highway Commission it has been his policy in the laying out of new highways and in the reconstruction of old highways to provide for permanency, and the proposed realignment of the highway at Gleneden Beach is in conformity with such policy, and, so far as he personally is concerned, the adoption of the new line at Gleneden Beach is a closed issue because he believes that such location is best. He also said that the Commission many times is required to locate roads that result to the disadvantage of certain individuals but the Commission must look at these matters from the general public standpoint and must make its decisions in harmony therewith, which has been done at Gleneden Beach.

(5) Mr. Sanders then asked the Commission to authorize a location survey for the realignment of the Oregon Coast Highway south from the city of Tillamook to a point known as Pleasant Valley. He declared that the realignment of the highway at this location is imperative in the interests of motor-ing safety. He also inquired when the Commission intends to contract

the surfacing work on the Neahkahnie Mountain project and suggested that the Commission do not open this section for general public use until all of the surfacing and oiling work has been completed. He was informed by the Engineer that the construction season in this vicinity is short and it is doubtful that the road will be open for travel before the fall of 1941. However, the present plans are to take bids for the final project in November of this year.

The Attorney inquired about the extra right of way that will be required at Gold Beach in the event that the Commission elects to retain the present highway at that place, particularly as to the moving of buildings. Judge Boice gave as his understanding that the property owners are willing to donate right of way 20 feet wide on the east side of the highway, but expect the state to move the buildings. The Attorney then inquired as to the moving of the pole lines along this section. Judge Boice stated that he is not in a position to make any suggestions relative to this feature but that the County Court will cooperate with the Commission fully, to the end that a satisfactory solution may be reached.

Tillamook County Court, represented by County Judge Harland M. Woods and County Commissioners E. H. Lindsey and E. G. Anderson, conferred with the Commission relative to the federal aid secondary highway funds that have been programmed by the Commission for the improvement of the Fairview-Clemens Corner County Road. They gave as their understanding that the Commission proposes to improve the section of this road which extends northerly from Clemens Corner toward the Trask River Bridge, and asked the Commission to reconsider this decision and reallocate the funds to improve a section of what is known as the Long Prairie Road, beginning at the Oregon Coast Highway at a point known as Pels Corner and extending easterly about 2 miles to a junction with the Fairview-Clemens Corner Road, thence northerly to the crossing of the Trask River, or as far as funds will permit. They advised that the Long Prairie Road carries more traffic than the other and now has a right of way 60 feet wide, whereas the Fairview-Clemens Corner Road is not that wide and the county has no funds budgeted for purchase of additional right of way, a considerable amount of which would be needed because this road would have to be realigned.

The Engineer advised that the Long Prairie Road is not included in the partial system of federal aid secondary highways heretofore recommended to the Public Roads Administration, and it might require considerable time to secure approval of the change. Mr. T. M. Davis, Senior Highway Engineer of the Public Roads Administration, was present and suggested that the proposed change could be made if traffic justifies. After due consideration the Commission voted unanimously in favor of the change and instructed the Engineer to take action as may be necessary to secure the Government's approval thereto, provided no good reason can be found within the next few days for not doing so. The County Court was informed that they would be notified shortly if the change could not be made.

Judge Woods then inquired whether or not the Commission has as yet passed on the county's request for the designation of the Netarts Road as a

OCT 10 1940

state secondary highway. He was informed by Chairman Cabell that the Commission has not as yet acted on this matter but will do so when all three Commissioners are present.

Mrs. Victor C. Follenius and Mrs. P. L. Manser, of Hood River, came before the Commission as representatives of the Hood River Valley Garden Club and asked the Commission to select several sites along the Mount Hood Highway, between Hood River and Parkdale, for the establishment of roadside parks. They particularly asked for such parks at a place known as "View Point" and at "Moss Acres", near Odell. They said that if the Commission will acquire these sites the Garden Club will assume the responsibility for planting the areas, although it would expect the state to maintain them. They also suggested that the Commission acquire a small tract containing some lovely trees situate adjacent to the Mount Hood Highway at a place known as Fikes Corner. It was their thought that this area could be acquired by the state at small expense and that it could be developed very cheaply. They were informed that the Commission cannot give them an answer today but will refer the matter to the State Parks Superintendent for investigation and recommendation, and will let the Garden Club know as soon as a decision has been reached.

At 3:30 p. m. Chairman Cabell announced the award of contracts and sale of buildings, as follows, such awards having been previously approved by the Commission by unanimous vote:

"Rice Hill-Turkey Hill Section of Pacific Highway, in Douglas County. 2.22 miles grading and paving. Roy L. Houck, Salem, submitted the low bid for this project in the amount of \$116,456.00. Leonard & Slate, Multnomah, submitted the next-low bid in the amount of \$121,973.50. There were 3 higher bidders. The Commission has awarded this contract to Roy L. Houck, the low bidder, at his bid of \$116,456.00.

"Oakerman Ranch-Sage Hen Hill Section of the Central Oregon Highway, in Harney County. 6.88 miles grading, surfacing, and oiling. The low bid received on this project was that of E. L. Rigdon, Lapine, in the amount of \$89,198.25. The next-low bid was that of M. L. O'Neil & Son, Eugene, in the amount of \$108,939.15. There were 8 higher bidders. The Commission has awarded this contract too E. L. Rigdon, the low bidder, at his bid of \$89,198.25.

"Construction of maintenance building on The Dalles-California Highway, at Madras, in Jefferson County. Birkemeier & Saremal, Portland, submitted the low bid for this work, in the amount of \$9,589.50. Hart Building Company, Redmond, submitted the second-low bid in the amount of \$10,152.50. There were 2 higher bidders. This contract is awarded to the low bidders, Birkemeier & Saremal, at their bid of \$9,589.50.

"Sexton Mountain Section of the Pacific Highway, in Josephine County. 1.91 miles grading. The low bid submitted for this work

was that of M. L. O'Neil & Son, Eugene, in the amount of \$194,922.50. The next-low bid was that of Roy L. Houck, Salem, in the amount of \$246,782.50. There were 14 higher bidders. The Commission awards this contract to M. L. O'Neil & Son, the low bidders, at their bid of \$194,922.50.

"Bryant Hill-Trout Creek Section of the Santiam Highway, in Linn County. 4.21 miles grading, surfacing, and oiling. The bid of Fisher Bros., Oregon City, in the amount of \$79,195.50, using tar, was the low one submitted for this work. The second-low bid was that of E. C. Hall Company, Eugene, in the amount of \$80,988.50, also based on the use of tar. Neither of these contractors submitted a bid based on the use of asphalt. There were 5 higher bidders. The Commission awards this contract to the low bidders, Fisher Bros., at their bid of \$79,195.50, using tar.

"Tillamook Rock Production Project on the Oregon Coast and Wilson River Highways, in Tillamook County. Furnish approximately 8,800 cubic yards crushed rock or crushed gravel in stock piles. F.C. Feldschau, Tillamook, submitted the low bid for this work, in the amount of \$11,880.00. A. T. Dolan, Tillamook, submitted the next-low bid in the amount of \$12,672.00. There were 2 higher bidders. This contract is awarded to the low bidder, F. C. Feldschau, at his bid of \$11,880.00.

"Follett Ranch-Gold Canyon Section of the Wallowa Lake Highway, in Union County. 1.67 miles grading, surfacing, and oiling. The low bid received for this project was that of the Colonial Construction Company, Spokane, Washington, in the amount of \$99,351.00. The next-low bid was that of Leonard & Slate, Multnomah, in the amount of \$113,963.00. There were 6 higher bidders. This contract is awarded to the low bidder, the Colonial Construction Company, at its bid of \$99,351.00.

"Mosier-Seufert Rock Production Project on the Columbia River Highway, in Wasco County. Furnish approximately 9,000 cubic yards crushed rock or crushed gravel in stock piles. Rogers Construction Company, Dayton, Washington, submitted the low bid for this project, in the amount of \$12,977.60. M. L. O'Neil & Son, Eugene, submitted the second-low bid in the amount of \$13,502.00. There were 5 higher bidders. The Commission awards this contract to the low bidder, Rogers Construction Company, at its bid of \$12,977.60."

Sale of Buildings

"Sale, and removal from right of way, of residence building formerly owned by T. B. Garrison, situate on the west side of the Pacific Highway approximately 3 miles north of Oakland, Douglas County. No bids were received for the purchase of this building.

"Sale, and removal from right of way, of residence building

OCT 10 1940

formerly owned by Alice W. Jordan, situate on the east side of the Sandy River, approximately one-quarter mile east of Troutdale, Multnomah County. The Commission received only one bid for this building, it being that of Ralph T. Johnson of Troutdale, in the amount of \$60.00. The Commission approves the sale of this building to Mr. Johnson at his bid of \$60.00.

"Sale of restaurant property and equipment at Bandon, more particularly being the Koffee Kup Cafe and tract on which it is now established on the west side of the new Oregon Coast Highway at 3rd Street, Bandon. The Commission received no bids for the purchase of this property."

A committee from Oregon State College, consisting of S. M. P. Dolan, Associate Professor of Civil Engineering; Professor Fred O. McMillan, Head of the Electrical Engineering Department; and Burton Hutton, came before the Commission with regard to the Highway Commission's participation in radio broadcasts over the college station, KOAC. They thanked the Commission for assistance given during the past summer, making it possible for them to continue their activities during the period June 10 to September 10, and submitted a condensed report of the programs conducted over their station under the title "Oregon on Parade". Mr. Hutton, as director of the college radio station, reviewed in detail the work accomplished under this program and particularly pointed out that the appropriation authorized by the Commission to help defray expenses was not all used, there remaining a balance of \$292.00. Professor McMillan advised that the Highway Commission's cooperation was of considerable benefit to them in securing approval of their application from the Federal Communication System for an increase in power for their station from 1000 to 5000 watts. The work in changing over the station, he said, is now under way and must be completed by April 14, 1941. Professor Dolan asked the Commission to continue its participation in this work next year. It was his thought that much good could be accomplished for the state and the State Highway Department if the Commission would participate in one program each week during the school year and would repeat next summer the cooperation extended this year. He asked the Commission for an answer as soon as possible so they can arrange their programs accordingly.

The Engineer gave as his opinion that much good was accomplished by the "Oregon on Parade" program as conducted last summer and that the State Highway Commission has received much benefit therefrom. This is evident, he said, from numerous letters of approval that have been received from all parts of the state. After discussion, Chairman Cabell advised that the Commission would take this matter under advisement and would let the committee know as soon as possible whether or not it would continue to cooperate in this endeavor.

Messrs. A. F. Harvey and John Carlin, of the office of the Public Utilities Commissioner, were present and discussed with the Commission the matter of requiring log haulers to bring their trucks to a dead stop before crossing railroad tracks. Mr. Harvey stated that they have received from the

OCT 10 1940

Highway Commission a request that a clause be inserted in all special carrier permits issued hereafter requiring logging trucks to stop before crossing railroad tracks and that they would be pleased to comply therewith, but it will require the reprinting of all their forms, which they question is justified, because they do not believe that the loggers would read the conditions. He suggested, as an alternate method of notifying the loggers, the posting of signs at all railroad crossings. The Engineer objected to the signs as being too complicated and not workable. The Attorney gave as his thought that this is a matter for the legislature to pass on.

Mr. Harvey suggested that the order be not put into effect until after the meeting which has been called by the Public Utilities Commissioner for Monday, October 14, when matters pertaining to log hauling on public roads of this state are to be discussed by representatives of the various state departments who are interested. The suggestion was approved by the Commission, and the Engineer was instructed to attend such meeting and to report the outcome of the same at the Commission meeting to be held in November.

Mr. Harvey brought up for discussion the matter of fastening logging trailers on logging trucks when enroute from the dumping point to the woods. It was his thought that some provision should be made for securely fastening the trailer to the truck so it cannot fall off, as occurred recently in a logging operation in Coos County when a trailer fell off a truck as it was rounding a curve and smashed into a passing automobile, resulting in the death of the driver of the automobile. He suggested that provision be made in permits hereafter issued by the Public Utilities Commissioner for the fastening of the trailers to the trucks more securely, to avoid the recurrence of such an accident. The Commission approved the suggestion and referred the matter to the Engineer with instructions to work up a plan of remedy and report the same to the Commission at the next meeting.

Mr. E. J. Knutson, Oregon Agency Manager of the California Western States Life Insurance Company, was present and presented a plan of group insurance coverage for State Highway Department employees. The matter was discussed at some length and was referred by the Commission to Mr. J. W. DeSouza, Assistant Attorney, for investigation and report at the next meeting. He was authorized by the Commission to give Mr. Knutson a complete list of Highway Department employees.

The following persons, representing the Oregon State Federation of Labor and affiliated organizations, came before the Commission: D. E. Nickerson, Executive Secretary, B. R. Mathis, President, Portland Building and Construction Trades Council; F. W. Griffith, representing the Portable Engineers; E. Harland, representing Highway Crafts; John O'Neil, representing the Iron Workers; and Wallace Cramer, representing Truck Drivers. Mr. Nickerson headed the group. They asked the Commission to revise its wage scales and its classification of employees to conform more closely with the Union rates and classifications. Mr. Nickerson presented a copy of a resolution, being Resolution No. 52, adopted at the 33th Annual Convention of the Oregon State Federation of Labor, in which the Convention went on record " * * * supporting legislation to amend the law covering the Highway Department to the effect

that they include in their specifications covering all highway work done direct by the Commission or let by contract the Union rate for each craft employed on highway work; * * * * " He also presented a resolution, being resolution No. 26, in which " * * * * The Oregon State Building and Construction Trades Council appoint a committee of three and request the Oregon State Federation of Labor and the Portland Central Labor Council to approve this resolution and appoint a like committee to meet with the Governor of Oregon as soon as possible and prevail upon him to use his influence to assist us in having the Oregon State Highway Commission place the prevailing scale in all contracts let by the Commission."

This matter was discussed at considerable length with all members of the delegation expressing themselves relative thereto. Chairman Cabell advised that the State Highway Commission does not want to adopt the Union wage scale in connection with state highway work, although the Commission is willing to adopt a scale that will approach the Union scale. He further advised that the Commission will give this matter very careful consideration. The matter was thereupon referred to the Engineer for investigation and report.

Messrs. Joseph Woerndle and E. G. Bradle, Oregon City, were present and asked the Commission to allow them access to the new highway in Oregon City from the alley in Block 12, between 13th and 14th Streets, across state-owned property. Mr. Woerndle said that this is the only place in Oregon City where this condition exists and all that they are asking is simply permission to drive onto the highway from the alley, which means crossing a strip of state-owned property about 15 feet wide between the highway and the alley.

Chairman Cabell advised that this highway was constructed by the state to facilitate motor transportation through Oregon City and, in the opinion of the Commission, the best interests of the motorists would be served if access to the highway at this particular point were prohibited. He explained that when a highway is so constructed that access from adjacent private property is cut off, then it is the practice of the State Highway Commission to pay the property owner a certain amount as damages. However, he pointed out that such is not the case in this particular instance because the highway does not touch Mr. Woerndle's property but is separated therefrom by the alley, and his property is in exactly the same relative position with respect to the alley as it was before the highway was constructed. He further advised that the Commission, in acquiring right of way for this highway improvement, purchased land on the east side of the highway between 11th Street and Abernethy Creek bridge, beyond the limits of a standard-width right of way and now has under contemplation the landscaping of such area so as to improve the attractiveness of this section. Were the Commission now to allow access to the highway at this place, he added, it would not only defeat the purpose of the landscaping work but would also introduce additional hazards to highway traffic; hence the Commission is inclined to deny the request. Mr. Bradle presented a petition signed by eight owners of property in Block 12 of Oregon City, all of whom ask the Commission to grant this privilege of access to the highway. He suggested that if the Commission could not see its way clear to grant access from each lot, perhaps it would be willing to grant access for every two lots, and he offered to cooperate in the landscaping work if the

Commission would approve such alternate proposition. The Commission agreed to include this matter in its study of the landscaping project and to let Mr. Woerndle know as soon as a decision has been reached.

The Commission adjourned at 5:45 p. m., to reconvene the following morning in the same room.

Portland, Oregon, October 11, 1940

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building, with the same persons present and participating. Bids as follows for highway construction projects and for the installation of a traffic signal system in Klamath Falls were opened and read, in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 p. m. in the same room:

OREGON COAST HIGHWAY
NORTH MARSHFIELD AND MARSHFIELD-BUNKER HILL SECTIONS
GRADING AND PAVING

Roy L. Houck	\$101,373.30
Coco Bay Dredging Company	108,443.95

Tinling & Powell	19,482.00
Clifford A. Dunn	20,449.00

County Judge Nelson B. Higgs of Harney County was present and asked for the early improvement of the Hanley Lane Section of the Frenchglen Secondary Highway south of Burns, which, he said, is in particularly bad condition just now. He also renewed the county's request for other improvements which were brought to the attention of the Commission at its meeting in Burns on October 2, 1940. He was informed that the Commission will bear these projects in mind for consideration in the formulation of future construction programs. As to Hanley Lane, the Engineer was instructed, to keep this section in as good condition as is possible with maintenance crews.

Mr. V. B. Harroun, Carlton, Oregon, came before the Commission and requested reinstatement of his log-hauling permit which was cancelled by the Commission some time ago for violation of the provisions of the law and the rules and regulations of the Commission with respect to log hauling on state highways. It appears that Mr. Harroun was engaged in the transportation of logs on the Pacific Highway West during hours of darkness and was involved in an accident; and, due to the fact that his permit did not allow him to haul logs after dark, the Highway Commission recommended to the Public Utilities Commissioner the cancellation of the permit, which was done. Mr. Harroun said that he owns a number of trucks engaged in this class of service and that it is imperative that he be allowed to resume his hauling. He also said that these trucks have been out of service for more than two weeks. After discussion the Commission authorized reinstatement of the permit, with the understanding that a more drastic penalty will be imposed upon Mr. Harroun if he again violates the law or the regulations.

A delegation from McMinnville, consisting of Eugene Marsh, Lars Bladine, Ed Bayliss, Charles Ludeen and Art Baird, came before the Commission in the interest of the McMinnville-Sheridan Section of the Salmon River High-

OCT 11 1940

way. Mr. Marsh headed the group. They urged the Commission to reconstruct this section immediately because they are afraid that the highway will go to pieces entirely this winter, which will necessitate the posting of the road for reduced loads and will stop all log hauling, which is one of the main industries in their district.

Chairman Cabell explained the status of the Highway Department's funds and the plans of the Commission for the improvement of this highway, which, he said, include reconstruction of the highway from Portland to McMinnville before starting improvements west of that place. The Highway Commission, he said, is cognizant of the need of improvement to the McMinnville-Sheridan Section and expects to give the project fair consideration for construction next year but is not in a position to make any definite statement today in regard thereto because of the uncertainties existing with respect to federal aid funds which the Government may require be spent on roads of its choice from a military strategic standpoint. However, the Commission will do the best that it can. The Engineer advised that he would do everything possible to keep this road open for travel during the coming winter.

A delegation from Silverton was present and asked the Commission for assistance, financial and otherwise, in reconstructing the Silverton Section of the Cascade Secondary Highway, particularly where it extends over the hill in Silverton. Mr. R. B. Duncan headed the group, which included the following: Harry V. Carson, Glenn Briedwell, R. A. McClanathan, L. A. Standard T. T. Leonard, and Mrs. Zetta Schlador, the Mayor. They stated that the present highway right of way is 60 feet wide but the pavement is only 20 feet wide and that they have it in mind to secure a W.P.A. project to widen the grade and construct retaining walls, the present road being quite crooked, if the state will widen the pavement 5 feet on each side. He said that they are asking this to provide greater safety to traffic, and the city is not able to finance this undertaking alone, although it will sponsor a W.P.A. job. They suggested that all the state would be required to do is to furnish material for widening the pavement in order to take up the 25 per cent share of the cost that the city must provide. After considerable discussion the Engineer was instructed to make an investigation of the project sufficiently broad to ascertain whether or not the alignment of the highway is satisfactory and to determine the probable cost of the improvement. He was also instructed to discuss the matter further with the city officials and with the officials of the Works Progress Administration.

The Engineer reported the cost to construct the Terrebonne-Lower Bridge County Road from its junction with The Dalles-California Highway, at Terrebonne, westerly toward Lower Bridge, a distance of about 7 miles, as previously instructed by the Commission at the request of Deschutes County Court. He estimated the cost of this improvement at approximately \$41,580.00 and recommended approval of the improvement as a federal aid secondary highway project if the Public Roads Administration will offer no objections thereto, and provided the Cromite Company, which is served by this road, rebuilds its plant that was recently destroyed by fire, and provided further that Deschutes County will pay all the costs that cannot be paid with federal funds, including right of way. After discussion the Commission approved the recommendation and instructed the Secretary to so inform the County Court.

OCT 11 1940

The Commission adjourned at 11:45 a. m., to reconvene at 2:30 p.m. in the same room.

The Commission took luncheon with members of the Advisory Board on Publicity matters in the Oak Room of the Benson Hotel, following which, at 1:30 p. m., the Commission conferred with such committee in the Tyrolean Room of this hotel. Present at such meeting were Henry F. Cabell, Huron W. Clough, R. H. Baldock, H. B. Glaisyer, and Harold B. Say, representing the State Highway Department. Representing the Advisory Board were Merle Chessman, Chairman; Donald J. Sterling, Frank Jenkins, Charles H. Reynolds, Hugh Ball, R. R. Cronise, and E. B. McDaniel. Mr. Chessman asked to be excused on account of another engagement. Following his departure Mr. Sterling presided. He reported the action taken by the Advisory Board on the 1941 budget for the Travel and Information Department and advised that the Board recommends to the Commission a budget for 1941 in the amount of \$100,000.00, and also recommends the retention of the services of Botsford, Constantine, and Gardiner to carry on publicity work next year as in the past. He stated that the Board has given very careful consideration to these matters and recommends that, if the Highway Commission approves the \$100,000.00 budget for 1941, the money be spent approximately as follows: \$66,000.00 in magazine and newspaper advertising; \$22,650.00 for necessary literature, moving pictures, displays, postage, et cetera; and \$11,000.00 for salaries and miscellaneous office expense. He presented a recommendation of the Board, in writing, and advised that it was adopted by the board members by unanimous vote. Mr. Sterling also presented a letter from the Advisory Board stating that the Board has gone on record unanimously as being of the opinion that the present Non-Resident Registration Law is obsolete and should be repealed.

Chairman Cabell thanked the members of the Board for the excellent service rendered by them and advised that the Commission is very glad to have their recommendations and will give them due consideration at the earliest possible time. (The Commission approved the recommendations during the afternoon session, subject to concurrence by Commissioner Oliver, which was secured over the telephone later.)

The meeting was adjourned at 2:30 p. m., following which the Commission returned to its meeting in the Public Service Building.

The State Highway Commission reconvened at 2:30 p. m. in the auditorium of the Public Service Building with the same persons present and participating.

A delegation from Jackson County, representing the Jackson County Chamber of Commerce, was present. They were headed by Mr. Frank Hull, Manager, and the group included the following: County Judge J. B. Coleman and County Commissioners Ralph Billings and William Perry; George Howard, S. M. Tuttle, Earl Ulrich, S. M. Green, Ralph Koozer, Frank Van Dyke; and T. S. Wiley, Mayor of Ashland. They requested the following improvements:

Continued reconstruction on the Tiller-Trail Secondary Highway:--1.

OCT 11 1940

this connection they asked the privilege of meeting with the Commission when the next program is arranged for forest highway funds. They said that they are vitally interested in this road because it is an important outlet for timber products. They particularly asked the Commission to keep this road open during the winter season. They also asked the Commission for snow removal on the Diamond Lake Secondary highway from Union Creek to the junction with The Dalles-California Highway so the people of their district may have the benefit of the newly-constructed Willamette Highway during the winter months. They asked for immediate consideration of this request and an early decision by the Commission.

Additional improvement to the Little Butte Creek Secondary State Highway was also requested and snow removal on this road for the benefit of winter sports enthusiasts. County Engineer Paul B. Rynning gave as his understanding that the Commission is now making a survey for a possible project on this road, beginning at the end of the completed section, and advised that they consider such project of secondary importance and would greatly prefer that the Commission construct a 4-mile section further up in the mountains, which is impassable at certain times of the year. He also said that the road carries a large volume of traffic, and logging operations are being carried on quite extensively on the upper section, and improvement of the 4-mile section referred to is badly needed now so that the timber can be hauled to market. He also mentioned the need for a good road into the Lake of the Woods district where many people from the Medford district maintain summer homes. He pointed out that construction of this section would reduce the distance from Medford to the Lake of the Woods by some 13 miles. County Commissioner Perry endorsed Mr. Rynning's remarks. He described the 4-mile section mentioned by Mr. Rynning as the section between Soda Springs and the Butte Falls Road.

Chairman Cabell pointed out that there are already numerous roads through the Cascade Range, some of which are in an uncompleted stage, and the Commission is reluctant to construct any more roads across these mountains until the others are completed. He pointed out that this road serves a comparatively small amount of traffic; and whereas the Lake of the Woods district is a lovely place, the Commission does not feel that it can improve the road beyond Soda Springs because that is the end of the farming area and the limit to which federal aid secondary highway funds can be expended.

Mr. Van Dyke asked for the removal of the bottleneck on the Pacific Highway at the Plaza Corner in Ashland. He urged the Commission to make a careful study of this matter as soon as possible so that relief from the existing situation may be obtained expeditiously. Chairman Cabell advised that the Commission appreciates the need for this improvement but hesitates to start the project because of the precedent that would be established of doing work where the right of way cost involved greatly exceeds the construction costs. However, the Commission will be pleased to reconsider the project and will discuss it in the formulation of the next construction program if it appears that the establishment of such precedent can be avoided. County Commissioner Billings offered, on behalf of the County Court, free right of way for this project across county-owned land. Mr. Van Dyke added that he did not

OCT 11 1940

believe the Commission would experience much difficulty in acquiring right of way because the property owners have indicated they would be very fair in dealing with the Commission.

The Engineer at this time reported on the cost of snow-removal operations on the highways that are kept open each winter by the State Highway Department. He said that during the winter of 1939-40 the cost to keep the Old Oregon Trail open in the vicinity of Heacham was about 10 cents per car, based on the number of cars that traveled this section; while at Government Camp the cost was 35 cents per car. At Hogg Pass, on the Santiam Highway, the cost was 98 cents per car, and at Siskiyou Summit, on the Pacific Highway, where the volume of traffic is much heavier, the cost was 2 cents per car. He estimated that it would cost about \$8,000.00 to keep the Diamond Lake road open to travel from the middle of December to the middle of April, a period of 4 months; and, estimating traffic at 10 cars per day, which figure is based on the record kept by the officials at Crater Lake National Park, this would make the cost per vehicle approximately \$6.66 compared with the gasoline tax revenue from each vehicle of not more than 35 cents. He did not believe that the cost per car could be reduced below \$3.50 by any manner of calculations.

Chairman Cabell advised that the Commission is now studying the snow-removal problem and hopes in the not distant future to arrive at an answer that will be satisfactory, and whether or not any particular project is approved by the Commission will depend upon the Commission's investigation of such project and the results of the application of the yardstick that the Commission expects to set up for use in passing on projects of this kind. He inquired whether or not the delegation's request for snow removal on the Diamond Lake Road is based on the use of the road for recreational purposes only or for both recreational and commercial use. Mr. Hull replied that the basis of their request is on both types of traffic. Their primary purpose, he added, is to secure an outlet to the Willamette Highway because traffic over the road is increasing daily and cars and trucks are taking this route in preference to the Pacific Highway. Chairman Cabell concluded the discussion by stating that the Commission is favorably inclined to assume a reasonable subsidization of snow-removal projects but cannot say now just what it will or will not do to that end because there are so many of them throughout the state that must be considered. He reiterated that the Commission is studying the matter and will give them a final answer as soon as possible.

A Mr. Bryant of Sixes, Oregon, came before the Commission and asked the privilege of transporting logs over the Oregon Coast Highway from Sixes River to Bandon during Saturday afternoons and Sundays. The Commission denied the request and instructed the Secretary to consider such decision as final insofar as the Oregon Coast Highway is concerned throughout its entire length, and to give the same answer to all others requesting similar privileges on this highway.

At 3:30 p. m. Chairman Cabell announced the following awards of contracts for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

OCT 11 1940

"North Marshfield and Marshfield-Bunker Hill Sections of the Oregon Coast Highway, in Coos County. 1.25 miles grading and paving. Roy L. Houck, Salem, was the low bidder for this work, his bid being in the sum of \$101,373.30. The Coos Bay Dredging Company of Marshfield submitted the next-low bid in the amount of \$108,443.95. There were 2 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Mud Hollow-Oak Creek Section of North Umpqua County Road, in Douglas County. 1.24 miles grading and 1.65 miles surfacing and oiling. A. Milne, Portland, submitted the low bid on this project in the amount of \$27,774.00. Coos Bay Dredging Company, Marshfield, submitted the next-low bid in the amount of \$28,713.00. There were 2 higher bidders. The Commission awards this contract to the low bidder, A. Milne, at his bid of \$27,774.00.

"Blalock-Lang Canyon Section of the Columbia River Highway, in Gilliam County. 2.80 miles grading, surfacing, and bituminous macadam wearing surface; also widening of a concrete bridge. The low bid for this project was that of Roy L. Houck, Salem, in the amount of \$118,530.00. The second-low bid was that of K. L. Goulter, Seattle, Washington, in the amount of \$127,699.00. There were 9 higher bidders. This contract is awarded to the low bidder, Roy L. Houck, at his bid of \$118,530.00.

"Construction of maintenance patrolmen's headquarters on the John Day Highway, at Seneca, Grant County. The bid of Fife & Company, Nyssa, in the amount of \$19,532.25, was the low one received for this work. Babler Bros., Portland, submitted the next-low bid in the amount of \$21,287.75. There were 2 higher bidders. This contract is awarded to the low bidder, Fife & Company, at its bid of \$19,532.25.

"Burns Section of the Central Oregon Highway, in Harney County. 0.40 mile grade widening and surfacing. Only 2 bids were received for this work, that of Chester T. Lackey, Ontario, being the low one, in the amount of \$9,168.00. The other bid was that of A. Milne, Portland, in the amount of \$10,433.00. The Commission awards the contract for this work to the low bidder, Chester T. Lackey, at his bid of \$9,168.00.

"Wasco County Line-Madras Rock Production Project on The Dalles-California Highway, in Jefferson County. Furnish approximately 8,400 cubic yards crushed rock in stock piles. M. L. O'Neil & Son submitted the low bid for this project in the amount of \$10,539.00. Rogers Construction Company, Dayton, Washington, submitted the second-low bid in the amount of \$11,460.00. There were 7 higher bidders. The Commission awards this contract to M. L. O'Neil & Son, the low bidders, at their bid of \$10,539.00.

"Ironsides-Brogan Rock Production Project on the John Day Highway, in Malheur County. Furnish approximately 7,500 cubic yards crushed rock in stock piles. The low bid received for this project was that of M. L. O'Neil & Son, Eugene, in the amount of \$12,144.00. The second-low bid was that of A. S. Wallace, Roseburg, at \$13,260.00. There were 3 higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Troutdale-Coeur d'Alene Section of the Columbia River Highway, in Multnomah County. 4.2 miles rock roadbed topping and 2.8 miles rock embankment slope protection. The bid of K. L. Goulter, Seattle, Washington, in the amount of \$67,935.00, was the low one received for this work. That of Berke Bros., Portland, in the amount of \$72,938.00, was the second-low bid received on this project. There were 11 higher bidders. This contract is awarded to K. L. Goulter, the low bidder, at his bid of \$67,935.00.

"Construction of three culverts on the Lower Columbia River Highway, the Tualatin Valley Highway, and the Beaverton-Aurora Highway, respectively, in Multnomah and Washington Counties. G. L. Potts, Portland, submitted the low bid for this work in the amount of \$5,615.00. Lindstrom Bros., Portland, submitted the second-low bid in the amount of \$5,779.00. There were 6 higher bidders. All bids for this project have been referred by the Commission to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Installation of traffic signal system in the City of Klamath Falls, Klamath County. Three bids were received for this installation. The bid of Trowbridge & Flynn Electric Company, Medford, was the low bid received, being in the amount of \$17,324.00. Tinling & Powell, of Spokane, Washington, submitted the second-low bid in the sum of \$19,482.00. The other bidder was Clifford A. Dunn, of Klamath Falls. The Commission rejects all the bids received for this work and has ordered the project readvertised."

Mr. Henry S. Coleman, Portland, came before the Commission in regard to the purchase of a small parcel of state-owned property situate between the old highway and the new highway near the Abernethy Creek Bridge, in Oregon City, and particularly situate in Block 14. He said that he has it in mind to purchase the privately-owned property which lies between the state's property and Main Street but before doing so must know whether or not he can obtain the state property because he needs both parcels in his plan of development, which includes the construction of a service station thereon with display rooms, et cetera. After considerable discussion Mr. Coleman was informed that the Commission would sell to him the desired property provided he would relinquish any rights that he might have to access to the new highway

OCT 11 1940

at this point. The Engineer pointed out a possible approach to the property via 15th Street, which would probably serve the purpose and would avoid the necessity of construction of a special approach across property that the Highway Commission plans to landscape. Chairman Cabell explained the plan of the Commission for the landscaping project. Mr. Coleman asked for time to study the matter. The Commission approved and instructed the Engineer to prepare a map of the situation and have the outline staked on the ground for Mr. Coleman's benefit. The action of the Commission in this matter was based upon the assumption that the owner of the private property situate between the highway right of way and Main Street was of the opinion, when he sold the rest of his property to the state, that he would have access to the highway as well as to Main Street, which places the matter in a different category from the Woerndle matter previously discussed at this meeting, in view of the fact that Mr. Woerndle's property was not disturbed and was not affected by the highway improvement.

Consideration was given by the Commission at this time to recommendations made by the Advisory Board on Publicity Matters at the noon conference. After discussion the Commission approved the recommendations by majority vote, subject to confirmation by Commissioner Oliver.

The matter of renewing of contracts with the several hospital associations that serve state highway department employees had the attention of the Commission. In connection therewith the Assistant Attorney reported receipt of a letter from the National Hospital Association wherein such association proposes to revise its agreement with the Commission covering the ensuing year so as to provide for the elimination of its obligation to furnish medicine, except in hospitalization cases, because of the losses that it has suffered in the past on this account. He advised that similar action is being taken by the other associations, and recommended renewal of the contracts for another year on such basis. The Commission approved the recommendation.

The Engineer requested instructions relative to the display of the American flag over highway department buildings. He advised that at the present time flags are flown only over the main shop buildings. He gave as his thought that they should also be displayed over the other buildings. The Commission concurred in the viewpoint of the Engineer and authorized him to make arrangements for the display of the flag over all highway department buildings, except the maintenance sheds.

A letter was presented from the Edward Hines Lumber Company in which the Commission was requested to authorize one of the state's oiling crews to do certain patching work on the runways of the Edward Hines Lumber Company's mill at Burns, at the company's expense. The Commission denied the request as a matter of policy.

Reconsideration was given by the Commission to the matter of reconstructing the Oregon Coast Highway through the town of Gold Beach. It was the Commission's decision, in view of the fact that objections have been raised by the local people to the proposed change in the highway route through this town, that it would be inadvisable to improve the highway on permanent alignment west of the present highway at this time, but to limit the new construction to a minimum highway project that would not involve the rerouting

OCT 11 1940

through the business district. The Engineer was instructed to prepare alternate plans for this improvement on such basis and report the same to the Commission at a future meeting together with an estimate of cost involved.

The Commission discussed the claim of Mrs. E. J. Wright, Sams Valley, Oregon, in the amount of \$15.00, covering the loss of ten turkeys which she alleges were trapped in road oil dumped by highway department forces in a borrow pit adjacent to the Sams Valley Secondary Highway near her home. The Engineer advised that this matter has been investigated and the allegations made by Mrs. Wright found to be correct. However, he explained that the oil was dumped in the borrow pit a number of years ago when the Department was not as careful about covering up waste oil deposits, and that it could not happen again under present rules and regulations. He recommended payment of the claim. The Commission approved the recommendation.

The advisability of adopting a policy with respect to the use of the Highway Department's scales in isolated districts for the weighing of privately owned trucks in determining the weight of such vehicles for use in obtaining licenses, was discussed by the Commission. The Engineer explained that, according to law, the license fee that must be paid for the registration of a truck is based upon the light weight of the vehicle, and it appears that in some isolated districts where no privately owned scales are immediately available, trucks must be driven a considerable distance to be weighed if the state's scales cannot be used for this purpose. He cited an instance in Curry County where it appears that the State Police refuse to weigh privately owned trucks on the state scales south of Bandon, and advised that when a truck is driven to a private scale the operator must pay the regular P.U.C. ton-mile tax for the trip, even though the truck is not loaded and the trip is entirely without profit to the owner. He requested instructions from the Commission as to the use of the state's scales in cases of this kind. A decision in the matter was deferred by the Commission pending consultation with Superintendent Charles P. Pray of the Department of State Police. The Engineer was instructed to discuss the matter with Mr. Pray.

The Engineer reported that, in conformance with authority previously granted him by the Commission, he has awarded the following contracts, the conditions of the awards having been satisfied:

Grading and bituminous macadam surfacing on the Troy Ranch Section of the Old Oregon Trail, in Baker County. Bids taken August 23, contract awarded September 10, 1940, to McNutt Bros., the low bidders.

Furnishing crushed gravel in stock piles for the Gold Hill Rock Production Project on Sams Valley and Pacific Highways, in Jackson County. Bids taken August 22, contract awarded August 28, 1940, to R. I. Stuart & Sons, low bidders.

The Commission confirmed the awards as reported.

The matter of changing the hour of opening of bids from 9:00 a. m. to 10:00 a. m. or 11:00 a. m. was discussed by the Commission. The Commission

OCT 11 1940

decided to make no change in the present practice of opening bids at 9:00 a.m.

The Engineer requested authority to purchase the following equipment:

- 1 electric lighting plant for Meacham maintenance headquarters. Estimated cost \$800.00.
- 1 jackhammer and auger, with necessary bits, for use in tunnel construction. Estimated cost \$240.00.
- 1 electric bench grinder. Estimated cost \$100.00.
- 1 electric drill for sign crew. Estimated cost \$45.00.
- 2 automobiles of Buick type for Construction Engineer H. G. Smith and Division Engineer K. D. Lytle, replacing worn-out cars. Estimated total cost, with trade-in allowance, \$1,600.00.

Also, radio equipment as follows:

- 1 50-watt radio transmitter for the Odell Lake maintenance headquarters. Estimated cost \$500.00.
- 14 new receiving sets, 14 old-type station receiving sets to be traded in. Estimated total cost \$1,820.00.
- 1 Hickok Model No. 155 Traceometer, for measuring defects in receiving sets. Estimated cost \$125.00.
- 1 R.C.A. model 312A portable field strength meter for measuring and comparing efficiency of transmitters, locations, and antennas. Estimated cost \$200.00.

The Commission authorized the purchase of all of such equipment and ordered that the purchases be made through the offices of the State Purchasing Agent in accordance with the usual practice.

In this connection the Engineer reported serious damage to two of the Highway Department's trucks engaged in work on the Wolf Creek Highway. One of them, he said, was tipped over a bank, completely wrecking the cab and the instrument board; and the other was damaged by fire which burned the entire cab and the instrument board. He estimated that it would cost about \$1,800 to rehabilitate the first of these trucks and about \$1,500 to rehabilitate the second one, and that it would require about 90 days to put them back in workable condition. He suggested that it would be advisable to trade in one of these trucks as part purchase price on a new one and that an attempt be made to collect from the Board of Control, under the provisions of the Restoration Act, the value of the one that was burned. The Commission approved the suggestion and so ordered.

OCT 11 1940

The Engineer rendered a brief report on the cost to construct the Wilson River Highway tunnel under contract, as compared with construction as a W.P.A. project. The Commission deferred a decision in the matter until next year.

A letter was presented from G. R. Van Vleet requesting permission to truck-haul logs on the state highway from Arch Cape, south of Cannon Beach, to Youngs River, south of Astoria. The Engineer reported that investigation has been made of the highway that Mr. Van Vleet must use in this operation and it appears that it would be possible, with care, to truck haul logs 40 feet overall in length over this route, which includes the section between Cannon Beach Junction and the town of Cannon Beach, where the highway contains many sharp curves. He recommended the granting of a permit to Mr. Van Vleet with the understanding that his loads will not exceed in length the 40-foot overall limit and that he will do no hauling whatsoever over the section between Cannon Beach and the Cannon Beach Junction during the period June 1 to September 15 of any year, when beach traffic is heavy. After discussion the Commission approved the recommendation unanimously and so ordered.

The Engineer reported the results of investigations to improve the parking area adjacent to the Oregon Coast Highway at the mouth of Devils Lake, in Lincoln County, which involves the construction of a sea wall. He estimated the cost of a timber sea wall and parking area at \$30,000 and a sea wall of concrete at \$47,000. In view of the cost involved the Commission decided unanimously not to assume any responsibility in connection with this matter and thereupon denied the request of local citizens for this improvement.

The Engineer reported on investigations for the proposed extension of the Odell Secondary State highway, in Hood River County. He said that traffic counts taken over two main routes between Odell and the Hood River Secondary State Highway, one of which passes through a place known as Summit and the other joins the Hood River Secondary Highway at Tucker Bridge, reveal that the Odell-Tucker Bridge route carries more than twice as much traffic as the other. He recommended adoption of the Tucker Bridge route when the Commission is ready to extend this secondary state highway. The Commission approved the report and indicated that it would place this road on the state secondary highway system in the near future when all commissioners are present.

The Commission discussed a proposed revision in the plans for the ultimate routing of the Pacific Highway through Eugene, particularly the suggestion for two-way traffic along High Street between East Broadway and Sixth Avenue, along which section the original plan provided for one-way traffic. The Engineer advised that the proposed change has been investigated and it is estimated that the right of way for the same will cost approximately \$75,000, whereas the estimated cost of construction is about \$30,000. He recommended against the change. The Commission approved the recommendation unanimously and decided not to make any change unless that is considered advisable after the one-way traffic arrangement has been given a trial.

The Engineer reported the cost to reconstruct the Crater Lake Highway through the town of Fort Klamath, as has been requested by the Civic

OCT 11 1940

Improvement Club of that place. He said that drainage conditions in Fort Klamath have been bad for a number of years and many complaints and requests for improved conditions have been received from local people. He estimated that to entirely remedy the condition would cost about \$10,000.00, which would include raising and widening the present oiled surface and installing suitable drainage facilities. Temporary relief from the condition, he said, would be obtained by the installation of three culverts, which would cost about \$400.00. He recommended that he be authorized to proceed with the construction of the culverts. The Commission approved the recommendation.

The Commission discussed briefly a report from the Engineer on investigations that have been made of the ocean beach areas in Lincoln County, between Waldport and Roads End, for the establishment by the Commission of a policy with respect to the removal of sand and gravel from such areas. The Commission deferred a decision in the matter until a later meeting when all commissioners are present. The Secretary was instructed in the meantime to send a copy of the report to each commissioner for his advance information.

A request was presented from the office of Governor Charles A. Sprague for the installation of a traffic signal on the Oregon Coast Highway at its intersection with the road leading to Camp Clatsop, in Clatsop County, as a safeguard for highway traffic during the time that troops are concentrated at this camp. The Engineer recommended the installation of a flashing beacon at this point, which he estimated would cost about \$130.00. The Commission approved the recommendation.

The Engineer also recommended the installation of a fixed time signal at the intersection of First and Ellsworth Streets in the city of Albany, provided the city will pay one-half the cost of the equipment and installation and the entire cost of operating the same. He estimated the cost of the installation at \$1,400.00. He explained that this intersection is at the Albany end of the Willamette River Bridge and is near the center of the Albany business district where there is very heavy traffic congestion, hence, in the opinion of the Traffic Engineer, the signal is really needed. He also advised that the proposed installation has been approved by the city authorities and that the city has tentatively budgeted sufficient funds to pay its share of the cost. After discussion the Commission approved, by unanimous vote, the installation of this signal as recommended by the Engineer and ordered that the matter be covered by appropriate agreement between the city and the state.

A letter was presented from the Lake of the Woods Summer Home Association, Klamath Falls, urging the Commission to complete, at an early date, construction of the highway extending from Eagle Point, in Jackson County, through the Lake of the Woods district, to Klamath Falls. The Commission deferred action on this matter pending its inspection of the road.

The Commission discussed a request from the City of Amity for a traffic-controlled school crossing and an overhead flashing beacon installation at the intersection of the Pacific Highway West with the secondary state highway in Amity, and for fill widening and footpath construction along the Pacific Highway West in the northern part of their town. The Engineer

OCT 11 1940

advised that the Traffic Engineer, Mr. John Beakey, has been in consultation with the city officials relative to the installation of the traffic signals and it now appears that they have changed their attitude with respect thereto. He further advised that the matter of constructing the fill and footpath has been investigated by Division Engineer, F. D. Eason, who estimates that such improvement would cost about \$1,500.00. He requested instructions. The Commission deferred a decision in this matter pending study of the Engineer's report on a state-wide footpath or sidewalk construction program. The Engineer was instructed to render such report at the next meeting, when the Commission will consider the selection of a few of such projects for construction in 1941.

A petition was presented from residents of Creswell, Oregon, and vicinity, requesting the oiling of the Springfield-Creswell Secondary State highway from the Coast Fork Bridge to the Cloverdale Bridge, east of Creswell. The Engineer advised that investigation indicates that such improvement will cost about \$32,000.00. In view of the expense involved and the shortage of funds available, the Commission decided that it could not undertake this improvement now, and thereupon denied the request.

A request was presented from the Warner Timber Company for the improvement of a 5-mile section of the Siletz Secondary Highway, in Lincoln County, from Kernville southerly toward the town of Siletz, so as to provide road facilities over which to truck-haul logs from this district. The Commission decided to consider this project in the formulation of its next construction program and instructed the Engineer to bring it to the Commission's attention at that time.

A letter was presented from South Tillamook County Chamber of Commerce, Cloverdale, Oregon, requesting the improvement of the 1½-mile section of the Little Nestucca Secondary Highway from its junction with the Meda Loop County Road to its junction with the Oregon Coast Highway. The Engineer advised that this road carries a large volume of traffic consisting mostly of logging trucks, and that the present road is not in condition to withstand such traffic. The Commission decided to give this road consideration in the formulation of future highway construction programs.

The Engineer requested authority to enter into a contract agreement with the Burroughs Adding Machine Company with respect to the servicing of a special type of bookkeeping machine that is in use at the State highway Department's Shops in Salem. He advised that the annual rate of furnishing such service is \$45.80. The Commission approved the request and authorized the Engineer to sign the contract in behalf of the Commission.

A letter was presented from the Waterford Lumber Company, Marshfield, requesting reimbursement in the amount of \$283.92 for cash expended in connection with the maintenance of the 5-mile section of the Coos River Secondary Highway north of Allegany, which section was added to this highway some time ago pursuant to agreement with Coos County when the county decided to the state certain property now known as Golden Falls State Park. The Company alleges that when this property was conveyed to the state the state

agreed, in writing, to spend approximately \$10,000.00 for the improvement of this 5-mile section but has not fulfilled its obligation. The Engineer advised that the company's statement is erroneous because the records disclose that the Highway Department spent \$10,054.84 on this section during the winter of 1936-37, and additional sums for maintenance during subsequent years. He recommended, in view thereof, that the Commission refuse to pay this claim. The Commission considered that its obligation in this matter has been fulfilled and instructed the Secretary to so inform the company.

The Commission discussed a petition signed by 94 employees of the State Highway Department residing in Coos and Curry Counties, requesting a 10% increase in wages per hour because of the excessive costs of living in that part of the state. The Engineer advised that according to a survey conducted by the National Youth Association some time ago there are six localities in the state where living costs are higher than they are at Marshfield; further, that it would be practically impossible to adjust wages throughout the state on the basis of living costs. If any increase in wages is allowed at all, he said, it should be state-wide in character and not for the benefit of any particular locality. However, he recommended against such increase at this time. After due consideration of the matter the Commission approved the recommendation and instructed the Secretary to inform the petitioners that their request had been denied by the Commission because investigation of living conditions throughout the state indicates that those in Coos and Curry Counties compare favorably with those in other parts of the state.

A request was presented from the Corvallis Park Board for assistance from the State Highway Department in the design of a bridge to span Marys River, which will provide a connection along 15th Street in Corvallis with the city park, known as Avery Park. The Engineer explained that the Board is simply asking the Highway Department to design this structure, which he estimated would cost about \$75.00. He recommended approval of the request. The Commission approved the recommendation if an expenditure of state funds for the purpose is legal.

The Commission authorized the Secretary to sign permits in favor of the Avondale Construction Company and Drake, Wyman & Voss, authorizing each of these contracting firms to occupy narrow strips along the north side of Court Street, between Liberty Street and Commercial Street, in Salem, during the reconstruction of certain business buildings at this location, such areas being required by these contractors upon which to maintain a sidewalk for the use of pedestrians during the time that construction work is under way. In this connection the Engineer gave as his thought that the Commission should adopt a policy to be followed hereafter when cases such as the two now being considered arise, and suggested that blanket authority be granted to issue permits for the occupation of space that is used in the parking of automobiles parallel with the curb. The Commission approved the suggestion and so ordered.

The Commission discussed a complaint from Warren-Northwest, Inc., protesting the assessment of the engineering penalty imposed upon them for failure to complete their contract No. 2180 covering the construction of the

OCT 11 1940

Deschutes Oiling Project within the specified time limit. The Engineer advised that the penalty amounts to \$215.80 and represents extra engineering expense incurred by the state on this job between August 1 and August 19, 1939, after the expiration of the completion date, July 31, 1939, specified in the contract. He further advised that he has investigated this complaint and is satisfied that the contractor did everything possible to complete the job on time and does not deserve the penalty, although the Public Roads Administration, which is concerned because federal funds are being used to assist in financing the work, insists that the penalty be imposed. Otherwise, the state will have to assume the expense without any possibility of securing reimbursement from the Government. After discussion the Commission decided to reduce the penalty 50 per cent and to take its chances on securing reimbursement from the Government.

The matter of granting to the Standard Stations, Inc., an extension of time for the removal of its buildings from the right of way of the Pacific Highway West at the Denver and Union Avenue intersection in Portland, had the attention of the Commission. The Engineer pointed out that no decision has yet been reached as to whether the proposed highway revision at this point will be in the form of channelization of traffic or grade traffic separation, so the company is at a loss to know just how to reestablish its buildings and hesitates to do anything about the matter until a definite plan for the highway improvement has been adopted. He gave as his thought that a final decision will be reached by the Commission within the next six months and recommended, in view thereof, that the Standard Stations, Inc., be granted an extension of time of six months, or until March 29, 1941, in which to move its buildings. The Commission approved the recommendation and so ordered.

The Commission discussed, but deferred action on, the matter of allowing so-called "soap-box Derby" contests to be conducted along 82nd Street, in Portland, the route of the Cascade Secondary Highway.

A letter was presented from Mr. Walter E. Koch, Brightwood, Oregon, requesting the privilege of trucking logs over the new highway in Oregon City from 14th Street to Main Street, enroute to the paper mills at this place, because he has been prohibited by the city from hauling logs along Main Street between these points. It was the thought of the Commission that the truck-hauling of logs over either of these routes is very objectionable from the public safety standpoint and that an undesirable hazard would be introduced to highway traffic if logging trucks were allowed to enter the new highway at 14th Street. However, the Commission recognized the necessity of delivering the logs to the mill. The suggestion was made that the hazard created by trucks entering the highway at 14th Street could be avoided by the installation of a traffic signal at such intersection. After discussion the Commission approved the suggestion and instructed the Engineer to install the signal as soon as possible. The Secretary was instructed to inform Mr. Koch of the action taken and to advise him that the Commission would authorize him to haul logs over this highway between 14th Street and Main Street after the traffic light has been installed; but in the meantime he must endeavor to make arrangements for the use of Main Street.

OCT 11 1940

A letter was presented from Ralph E. Ray, Coburg, Oregon, requesting the reinstatement of his permit allowing him to transport logs over the Pacific Highway south of Springfield, Lane County, which permit was canceled because of Mr. Ray's failure to remove from the state highway right of way some logs dropped from his truck. The Secretary advised that Mr. Ray has now removed the logs, so has complied with the ruling of the Commission in that respect; further, that Mr. Ray's truck has been out of service for 26 days. The Commission considered that Mr. Ray has been punished sufficiently for this first offense and thereupon authorized reinstatement of the permit.

The matter of continuing the W.P.A. landscaping project on the Canyon Road, in Portland, was considered by the Commission. The Commission approved the project, providing for a total expenditure of \$28,467.00, of which amount \$21,037.00 represents the contribution to be made by the W.P.A. for labor and miscellaneous supplies, and authorized the Engineer to sign the necessary papers.

The Commission approved the granting of a permit to the Arrow Transportation Company to move one combination tank truck and trailer, 60 feet overall in length, over state highways enroute from the State of Washington to the State of California and return, provided the company will furnish insurance coverage in the customary amounts.

A request from the Arrow Transportation Company, Portland, for renewal of the permit granted by the Commission last winter authorizing an overload of 700 pounds on each of its trucks, being the weight of certain equipment that is used in the sanding of pavements when slippery, was discussed and referred to the Engineer for investigation and recommendation.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Plans - - - -	2-1422 -	Blodgett Section, Newport-Corvallis Highway, Benton County	1st authorization - \$600.00
Quarry - - - -	103-1427 -	Marion County Line-Kaylor Corner Section, Cascade Highway, Clackamas Co.	1st authorization - \$105.00
Plans - - - -	103-1424 -	Clackamas Grade Separation, Cascade Highway, Clackamas County.	2nd authorization - \$500.00
			Total to date \$1,500.00
Bench mark - -	4-1437 -	Warrenton-Hebo Section, Oregon Coast Highway, Clatsop County.	1st authorization - \$185.00
Plans - - - -	4-1436 -	Hug Point-Manzanita Junction Section, Oregon Coast Highway, Clatsop Co.	1st authorization - \$460.00

OCT 11 1940

Plans - - - - 4-1438 - Mecanicum Maintenance Headquarters, Mecanicum Highway, Clatsop County. 1st authorization - \$150.00

Plans - - - - 4-2821 - Sunset Camp-Nehalem Section, Wolf Creek Highway, Clatsop County. 3rd authorization - \$500.00
Total to date \$1,600.00

Plans - - - - 4-1439 - Valmer Creek Section, Wolf Creek Highway, Clatsop County. 1st authorization - \$300.00

Plans - - - - 104-1440 - Truck Scales Site, Nehalem Highway, Clatsop County. 1st authorization - \$100.00

Location - - - 4-1441 - Cannon Beach Junction-Hug Point Section, Oregon Coast Hwy, Clatsop Co. 1st authorization - \$2,150.00

Plans - - - - 4-1442 - Astoria-Svenson Section, Columbia River Highway, Clatsop County. 1st authorization - \$92.00

Plans - - - - 5-1422 - Columbia City-St. Helens Section, Columbia River Hwy, Columbia County. 1st authorization - \$500.00

Reconn. - - - - 7-1413 - Sisters-Redmond-Prineville Section, McKenzie & Ochoco Highways, Crook Co. 1st authorization - \$1,950.00

Reconn. - - - - 8-1414 - Gold Beach-Brookings Section, Oregon Coast Highway, Curry County. 1st authorization - \$4,810.00

Right of Way - 9-1434 - Redmond-Bend Section, The Dalles-California Hwy, Deschutes County. 1st authorization - \$500.00

Tests - - - - 109-1435 - Lava Falls-East Forest Boundary Section, Century Drive Hwy, Deschutes Co. 1st authorization - \$200.00

Plans - - - - 109-1436 - Lava Falls-East Forest Boundary Section, Century Drive Hwy, Deschutes Co. 1st authorization - \$480.00

Tests - - - - 9-1437 - Millican-Brothers Section, Central Oregon Highway, Deschutes County. 1st authorization - \$350.00

Right of Way - 9-1438 - Sisters Scale Site, McKenzie Highway, Deschutes County. 1st authorization - \$75.00

Location - - - 10-1428 - Glendale Junction - Wolf Creek Section, Pacific Highway, Douglas County. 1st authorization - \$8,500.00

Plans - - - - 11-1411 - Maintenance Headquarters at Condon, John Day Highway, Gilliam County. 1st authorization - \$50.00

Plans - - - - 114-1416 - Dee-Parkdale Section, Hood River Highway, Hood River County. 1st authorization - \$4,200.00

OCT 11 1940

Plans - - - - 18-2848 - Klamath Agency-Hodoc Point Section, The Dalles-California Hwy., Klamath Co.
1st authorization - \$800.00

Aero - - - - 18-1450 - Klamath Falls and vicinity, Klamath County.
1st authorization - \$450.00

Tests - - - - 18-1451 - Klamath Falls Vicinity, Various Highways, Klamath County.
1st authorization - \$600.00

Location - - - 18-1452 - Hodoc Point-Barclay Springs Section, The Dalles-California Hwy., Klamath Co.
1st authorization - \$3,200.00

Plans - - - - 21-1440 - Yachats-Lane County Line Section, Oregon Coast Hwy., Lincoln County.
1st authorization - \$50.00

Plans - - - - 21-1441 - Scott Creek-Benton County Line Section, Alsea Highway, Lincoln County. 1st authorization - \$5,650.00

Lighting - - - 26-1446 - Union Avenue, Portland; Pacific Highway, Multnomah County.
1st authorization - \$150.00

Plans - - - - 26-1438 - East End Steel Bridge, Portland; Pacific Highway West, Multnomah Co. 2nd authorization - \$2,000.00
Total to date \$4,000.00

Location - - - 31-1418 - Cricket Flat-Minam Section, Wallowa Lake Highway, Union County. 3rd authorization - \$1,500.00
Total to date \$6,500.00

Location - - - 33-1427 - Big Eddy-Dune Section, Columbia River Highway, Wasco County.
1st authorization - \$1,950.00

Right of Way - 135-1415 - Service Creek-Mitchell Section, Service Creek-Mitchell Highway, Wheeler Co. 1st authorization - \$100.00

Right of Way - 35-1414 - Mitchell-Grant County Line Section, Ochoco Highway, Wheeler County. 1st authorization - \$100.00

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

E. C. Gerber, Contract No. 2155, for bituminous macadam surfacing on the Mecanicum-Mehalem River Section of the Wolf Creek Highway, in Clatsop County, requested an extension of time from September 30, 1939, to July 14, 1940, within which to complete this project. He gave no reason for failure to complete the work within the specified time limit. The Engineer advised that this contract was awarded to Mr. Gerber on January 26, 1939, and that the date of

OCT 11 1940

completion specified was September 30, 1939. He further advised that in his estimation there is no valid reason why the contract should not have been completed within the time limit specified. He recommended, in view thereof, that the extension of time now requested be granted but that Mr. Gerber be charged with all engineering supervision expense incurred by the state subsequent to the date of completion specified in the contract except that incurred during the period October 13, 1939, to May 31, 1940, when, because of adverse weather conditions, the work was shut down on orders from the State Highway Department. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Porter W. Yett, Contract No. 2220, for grading and paving the Warren-Scappoose Section of the Columbia River Highway, in Columbia County, requested an extension of time of 30 days, from August 31 to September 30, 1940, within which to complete this project. Mr. Yett stated that the paving work, including the shoulder construction, was finished on August 24 and that the road was completely open for traffic on that date. However, the Engineer subsequently ordered additional paving on the North Scappoose Bridge, which operation required until September 6 to complete, and that the only other work remaining is the burning of some brush, which will be accomplished as soon as he can obtain a fire permit. The Engineer advised that this contract was awarded on September 28, 1939, and the date of completion specified was August 31, 1940. The grading and paving work, he said, was completed on August 24, prior to the specified date of completion, and the road has been open to traffic throughout since that time. All of the work on the job, he said, was completed on September 17, 1940, the overrun in time limit being required to install sight posts and mail boxes, place additional pavement material on the North Scappoose Bridge, and clean up brush and ditches, which clean-up work could not be done until a fire permit had been obtained. He asserted that he knew of no valid reason why the contract should not have been completed within the specified period and accordingly recommended that the extension of time requested be granted subject to the condition that the contractor reimburse the state for engineering supervision expense incurred by the state subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Gus Reichow, Contract No. 2238, for rock production on the Waldport Section of the Oregon Coast and Alsea Highways, in Lincoln County, requested an extension of time from May 31, 1940 to June 8, 1940, within which to complete this contract. He gave no reason for failure to complete the work within the specified time limit. The Engineer advised that this contract was awarded on November 2, 1939, and that May 31, 1940, was specified as the date of completion of the project. He pointed out that the extension of time requested amounts to only 8 days and recommended, in view of the fact that

OCT 11 1940

failure of the contractor to complete the contract within the specified time limit did not inconvenience or discommode traffic and did not materially increase the state's expense for engineering supervision, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

R. I. Stuart & Sons, Contract No. 2254, for grading and paving the Reedsport (12th Street to 15th Street) Section of the Umpqua Highway, in Douglas County, requested an extension of time of 3 days, from July 31 to August 3, 1940, within which to complete this project. They alleged that the job was actually completed within the specified time period but they could not perform the necessary clean-up until the pavement had properly cured, which necessitated an over-run of time of 3 days. The Engineer advised that the principal reason for failure of the contractor to complete the project within the specified time was the difficulty in securing prompt shipments of cement. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Tidepoint Company, Contract No. 2264, for surfacing and oiling the Summit-Mist Section of the Mist-Clatskanie Secondary Highway, in Columbia County, requested an extension of time of 30 days, from August 31 to September 30, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to adverse weather conditions which interfered with the oiling operations. The Engineer advised that this contract was awarded on January 11, 1940, but work was not started until a considerable period of time had elapsed after the award, which is the principal reason that the contract was not completed within the specified time. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be charged with the expense incurred by the state for engineering supervision subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Barham Bros., Contract No. 2269, for construction of a partial viaduct on the Water Street route of the Pacific Highway East, in Oregon City, Clackamas County, requested an extension of time of 35 days, from August 31 to October 5, 1940, within which to complete this project. They attributed their failure to complete the job within the specified time limit to the fact that they were not permitted to commence work until March 13, 1940, and that there were several changes made in the retaining wall and sidewalks which caused additional delay. The Engineer advised that the contract was awarded on January 12, 1940, but that the contractor was not allowed to commence work until March 13, 1940, because of the failure of the house-moving contractor to remove several buildings which occupied the site, over which work Barham Bros. had absolutely no

OCT 11 1940

control. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

R. O. Dail & Warren Bros., Inc., Contract No. 2282, for surfacing and oiling the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County, requested an additional extension of time of 30 days, from August 30 to September 30, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that it took a little longer to complete their contract, No. 2277 (surfacing and oiling the Miles Bridge-Baker and Baker-Salisbury Sections of the Medical Springs Secondary and Baker-Unity Highways, in Baker County), than was anticipated, and that they lost an additional 4 days of time in doing a small oiling job for Mr. Guy Norris at Joseph, Oregon, all of which work the Division Engineer in that district desired completed as soon as possible. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct and that it was with his approval that the contractor completed the Baker County work before finishing the Warm Springs Highway project. He pointed out that the Commission, at its meeting on August 22, 1940, extended the time limit on the project from July 31, the specified date of completion, to August 30, 1940, subject to the condition that the contractor reimburse the state for engineering expense incurred subsequent to the specified date of completion. However, at that time the real reason for the delay was unknown inasmuch as the work upon which the contractor was employed was located in two different divisions. He recommended, in view of the circumstances, that the penalty previously imposed be canceled and that the extension of time from July 31 to September 30, 1940, be granted without penalty. The Commission approved the recommendation.

J. C. Compton, Contract No. 2286, for oiling the Service Creek-Branson Creek Section of the John Day Highway, in Grant and Wheeler Counties, requested an extension of time of 3 days, from July 31 to August 3, 1940, within which to complete this job. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the 3-day overrun of time limit was occasioned by the fact that he ordered the contractor to place the binder course on the Union-Catherine Creek project, in Baker County, where the roadbed was raveling badly, before doing the oiling work on the Service Creek-Branson Creek project. He recommended, in view of the circumstances and for the further reason that the traveling public has not been inconvenienced by the delay, that the extension of time now requested be granted without penalty. The Commission approved the recommendation.

Norris Bros., Contract No. 2287, for surfacing and oiling the

OCT 11 1940

Lick Creek-Salt Creek Section of the Little Butte Secondary Highway, in Jackson County, requested an extension of time of 45 days, from July 31 to September 14, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulty encountered by Rogers Construction Company, subcontractors, in working their gravel pit in connection with the Butte Falls Project, State Highway Contract No. 2223, and to bad weather conditions during April and May which prohibited the moving of heavy crushing equipment to the job. The Engineer advised that this contract was awarded on February 16, 1940, and provided that the work should be done by July 31, 1940. However, the contractors did not start operations until July 8, 1940, the reason being that they contracted to do more work than they could handle expeditiously. He said that he knows of no reason why the contract should not have been completed within the specified time limit and recommended the granting of the extension of time now requested subject to the condition that the contractor reimburse the state for engineering expense incurred subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

J. C. Compton, Contract No. 2289, for oiling the Union-Catherine Creek Section of the Medical Springs Secondary Highway, in Union County, requested an extension of time of 30 days, from July 15 to August 15, 1940, within which to complete this project. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the failure of the contractor to complete this project within the specified time was due to the fact that he had several other oiling jobs under way which had to be completed before he could move his equipment onto this job. The traveling public, he said, has been caused some inconvenience, as it was necessary to travel a gravel road a month longer than if the project had been oiled within the specified time; also, the state has incurred a small amount of extra expense for engineering supervision on account of the delay. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be charged with the engineering costs incurred by the state subsequent to the specified date of completion. The Commission approved the recommendation.

Norris Bros., Contract No. 2299, for grading, surfacing, and oiling the Castor Ranch-Joseph Section of the Hurricane Creek County Road, in Wallowa County, requested an extension of time of 7 days, from August 31 to September 7, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the nature of the material pit, which proved to be much more difficult to work than was anticipated, and uncertainty as to when the oiling work could be performed. The engineer advised that in his opinion the material pit, while difficult to handle, was no more so than should have been anticipated inasmuch as test holes were excavated to show the nature of the pit;

OCT 11 1940

further, that no uncertainty should have resulted as to the time of the oiling if the grading and surfacing work had been completed on time. It was his thought that the real reason for the failure of the contractors to complete the project within the specified time was negligence on their part in failing to commence the work at an earlier date. He recommended, in view thereof, that the extension of time requested be granted but that the contractors be required to reimburse the state for extra engineering expense incurred subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Jacobsen-Jensen Company, Contract No. 2303, for grading and paving the Astoria (Taylor Avenue-Astor Street) Section of the Oregon Coast Highway, in Clatsop County, requested an extension of time of 35 days, from August 31 to October 5, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to labor problems and to difficulties in handling materials. The Engineer advised that the difficulties encountered by the contractors, necessitating an extension of time, in his estimation could have been overcome if handled properly. Furthermore, the contractors could have avoided the overrun in the time limit had they started the work sooner, the records showing that the contract was awarded on May 2 but that work was not started until May 19. He recommended that an extension of time of 30 days, from August 31 to September 30, be granted subject to the condition that the contractors reimburse the state for extra engineering expense incurred subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

E. L. Rigdon, Contract No. 2305, for grading, surfacing, and oiling the Horse Ranch Section of the Fremont Highway, in Lake County, requested an extension of time of 15 days, from August 31 to September 15, 1940, within which to complete this job. He attributed his failure to complete the project within the specified time limit to trouble in securing an oiling crew. The Engineer advised that the reason given by Mr. Rigdon for failure to complete the project within the specified time limit is correct, that the oiling work was to have been done by contractor J. C. Compton, who had several other oiling jobs in this vicinity and who was obliged to complete them before starting on Mr. Rigdon's project. The delay, he said, has not inconvenienced the traveling public and has not caused the state any appreciable extra cost for engineering supervision. He recommended that the extension of time requested be granted without penalty; however, pointed out that the Public Roads Administration does not concur therein because it does not feel that there is justification for not invoking the penalty clause. A letter was presented from the Public Roads Administration approving the extension of time subject to the payment by the contractor of the

OCT 11 1940

engineering costs incurred subsequent to the completion date specified in the contract. After discussion the Commission voted unanimously to approve the extension of time subject to the penalty, as recommended by the Public Roads Administration.

Averill & Corbin, Contract No. 2323, for construction of the Fishers Millrace Bridge on the Pacific Highway West, south of Corvallis, in Benton County, requested an extension of time of 30 days, from September 30 to October 30, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that they were required to place the foundations for this structure much deeper than was anticipated and in so doing encountered materials that were extremely difficult to handle. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Babler Bros., Contract No. 2329, for bituminous macadam surfacing on the Rock Creek-Molalla Section of the Woodburn-Sandy Secondary Highway, in Clackamas County, requested an extension of time of one day, from August 31 to September 1, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that the original quarry which they planned to use proved to be unsatisfactory and that the quantities of material actually furnished were in excess of the amounts mentioned in the contract. The Engineer advised that the work that necessitated this one-day extension of time consisted of sanding work and cleanup, which has not inconvenienced the traveling public nor increased the state's expense for engineering supervision. He recommended the granting of the extension of time requested without penalty. The Commission approved the recommendation.

City Motor Trucking Company, Contract No. 2331, for grading and paving the Rainier (6th Street East-3rd Street West) Section of the Columbia River Highway, in Columbia County, requested an extension of time of 30 days, from August 31 to September 30, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the following: (1) delays caused by the local water company in repairing and renewing water mains and private house connections; (2) delay caused by the power company in the removal and reconstruction of its pole lines. The Engineer advised that he knows of no reason why this contract could not have been completed within the specified time limit, had the contractor started his operations within a reasonable length of time after having been awarded the contract. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be charged with the extra engineering costs incurred by the state subsequent to the specified

OCT 11 1940

date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Contracting & Sales Company, Inc., Contract No. 2336, for replacement of wire rope on the Interstate Bridge over the Columbia River between Portland and Vancouver, Washington, requested an extension of time of 45 days within which to complete this project. They attributed their failure to complete the project within the specified time limit to reasons beyond their control, particularly delay in receiving a shipment of cables from factories in the East, such delay being caused by the urgency to fill the Government's orders in connection with its preparedness program. The Engineer pointed out that the contract calls for the furnishing and replacement of some special cables which had to be ordered from the East, and there was delay in receiving this material, due, as alleged by the contractor, to large orders placed by the Federal Government for war materials. It was his thought that the replacement of the cables would be entirely complete by October 15, which is the date to which the contractor desires an extension of time, and he recommended the granting of an extension of time to that date without penalty. The Commission approved the recommendation unanimously.

Jacobsen-Jensen Company, Contract No. 2338, for grading and paving the Warrenton (Massachusetts Avenue-Market Street) Section of the Fort Stevens County Road, in Clatsop County, requested an extension of time of 35 days, from August 31 to October 5, within which to complete this project. They attributed their failure to complete the project within the specified time limit to delay in the award of the contract, right of way difficulties, and difficulties encountered in holding certain equipment in waiting until they were allowed to proceed with construction. The Engineer advised that the Commission took bids on this project on June 13 but that the contract was not awarded until July 12, 1940, because of right of way settlements. The contractor started operations, he said, on July 22, 1940. He recommended that the extension of time requested be granted but that the contractor be required to reimburse the state for extra engineering expense incurred during the last 16 days of such extension, the first 19 days of the extension to be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2155, 2207, 2209, 2210, 2220, 2234, 2236, 2239, 2246, 2254, 2264, 2268, 2269, 2280, 2282, 2285, 2286, 2289, 2291, 2298, 2299, 2303, 2305, 2316, 2322, 2329, 2330, 2331, and 2332, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution acceting, the

OCT 11 1940

above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2155, with Edwin C. Gerber, for bituminous macadam surfacing on the Necanicum-Nehalem River Section of the Wolf Creek Highway, in Clatsop County. Completed July 13, 1940.

Contract No. 2207, with O. C. Yocom, for surfacing, oiling, and furnishing crushed rock on the Jewell-Banzer Bridge Section of the Nehalem Secondary Highway, in Clatsop and Columbia Counties. Completed July 27, 1940.

Contract No. 2209, with Roy L. Houck, for grading the North Unit, Siskiyou-Bear Canyon Section of the Pacific Highway, in Jackson County. Completed June 30, 1940.

Contract No. 2219, with McNutt Bros., for grading and paving the Dundee-West Dayton Section of the Pacific Highway West, in Yamhill County. Completed August 24, 1940.

Contract No. 2220, with Porter W. Yett, for grading and paving the Warren-Scappoose Section of the Columbia River Highway, in Columbia County. Completed September 17, 1940.

Contract No. 2234, with Leonard & Slate, for grading, surfacing, and construction of bituminous macadam, also furnishing crushed rock in stock piles on the Lang Canyon-Arlington Section of the Columbia River Highway, in Gilliam County. Completed August 20, 1940.

Contract No. 2236, with Chester T. Lackey, for furnishing crushed rock in stock piles on the Brothers-Harney County Line Section of the Central Oregon Highway, in Deschutes and Lake Counties. Completed July 16, 1940.

Contract No. 2239, with Roy L. Houck, for paving the Butteville Road-White School Section of the West Portland-Hubbard Highway, in Marion County. Completed August 31, 1940.

Contract No. 2246, with E. C. Hall Company, for grading, surfacing, and oiling the Muddy Creek-Haines Section of the Old Oregon Trail, in Baker County. Completed August 23, 1940.

Contract No. 2254, with R. I. Stuart & Sons, for paving the Reedsport (12th Street-15th Street) Section of the Uapqua Highway, in Douglas County. Completed August 3, 1940.

Contract No. 2264, with Tidepoint Company, for surfacing, oiling, and furnishing crushed rock in stock piles on the Summit-Mist Section of the Mist-Clatskanie Secondary Highway, in Columbia County. Completed September 23, 1940.

Contract No. 2268, with Edlefsen-Weygandt Company, for grading and paving the South Unit, Oregon City Section of the Pacific Highway East, in Clackamas County. Completed September 4, 1940.

Contract No. 2269, with Barham Bros., for construction of a partial viaduct and retaining wall on the South Unit, Oregon City Section of the Pacific Highway East, in Clackamas County. Completed September 30, 1940.

Contract No. 2280, with A. S. Wallace, for furnishing crushed rock in stock piles on the Mussel Creek-Myers Creek Section of the Oregon Coast Highway, in Curry County. Completed August 31, 1940.

Contract No. 2282, with R. O. Dail & Warren Bros., Inc., for surfacing, oiling, and furnishing crushed rock in stock piles on the Warm Springs Agency-Vanora Section of the Warm Springs Secondary Highway, in Jefferson County. Completed September 15, 1940.

Contract No. 2285, with J. C. Papin, for grading, surfacing, and oiling the Bend-Butler Ranch Section of the Butler County Road, in Deschutes County. Completed August 15, 1940.

Contract No. 2286, with J. C. Compton, for oiling the Service Creek-Branson Creek Section of the John Day Highway, in Grant and Wheeler Counties. Completed August 3, 1940.

Contract No. 2289, with J. C. Compton, for oiling and furnishing crushed gravel in stock piles on the Union-Catherine Creek Section of the Medical Springs Secondary Highway, in Union County. Completed August 10, 1940.

Contract No. 2291, with Jacobsen-Jensen Company, for construction of the Tigard Overcrossing and the Fanno Creek Bridge on the Pacific Highway West, at Tigard, in Washington County. Completed October 5, 1940.

Contract No. 2298, with Denten & Young, for construc-

tion of the Catherine Creek Bridge Section of the Medical Springs Secondary Highway, in Union County. Completed August 31, 1940.

Contract No. 2299, with Norris Bros., for grading, surfacing, and oiling, also construction of bridges, on the Castor Ranch-Joseph Section of the Hurricane Creek County Road, in Wallowa County. Completed September 7, 1940.

Contract No. 2303, with Jacobsen-Jensen Company, for grading and paving the Astoria (Taylor Avenue-Astor Street) Section of the Oregon Coast Highway, in Clatsop County. Completed September 26, 1940.

Contract No. 2305, with E. L. Rigdon, for grading, surfacing, and oiling the Horse Ranch Section of the Fremont Highway, in Lake County. Completed September 15, 1940.

Contract No. 2316, with Leonard & Slate, for grading and paving the East Unit, Grants Pass-Green Creek Section of the Pacific Highway, in Josephine County. Completed October 3, 1940.

Contract No. 2322, with A. Milne, for surfacing and oiling the Fir Grove-Albany Section of the Independence-Albany County Road, in Benton County. Completed September 30, 1940.

Contract No. 2329, with Babler Bros., for bituminous macadam surfacing on the Rock Creek-Molalla Section of the Woodburn-Sandy Secondary Highway, in Clackamas County. Completed September 1, 1940.

Contract No. 2330, with A. Milne, for surfacing and oiling the Elsie-Sunset Tunnel Section of the Wolf Creek Highway, in Clatsop County. Completed August 31, 1940.

Contract No. 2331, with City Motor Trucking Company, for grading and paving the Rainier (6th Street E.-3rd Street W.) Section of the Columbia River Highway, in Columbia County. Completed September 21, 1940.

Contract No. 2332, with Birkemeier & Saremal, for the North Canal Bridge Widening Project on The Dalles-California Highway at the north city limits of Bend, in Deschutes County. Completed August 7, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

OCT 11 1940

The Engineer reported delivery by the Feenaughty Machinery Company on June 17, 1940, of a Bay City power shovel. He recommended acceptance of the same by the Commission at this time, in order to establish a definite date for the termination of the bond which was furnished by the company, guaranteeing the shovel for a period of one year from and after its delivery to the State Highway Commission and its acceptance by the Commission. The Commission approved the recommendation.

The Engineer also reported completion of the state force work on the John Day Highway in the town of John Day, in connection with which certain equipment was rented from Mr. Elmer Powell, La Grande. He said that this particular work was completed on August 15, 1940, and that the rented equipment was returned to the owner on that day. He asked the Commission to accept the project in order to establish a definite date for the release of the bond which was furnished by Mr. Powell for the protection of the Commission in the event that claims should arise out of the use of this equipment on this work. The Commission thereupon declared August 15, 1940, as the date of completion of the project and acceptance of the same by the Commission.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with the Estate of Bettie La Frenz, deceased, providing for payment of damages to property situate in Lots A and B, Block 12, original townsite of Nyssa, by reason of change in grade of the Old Oregon Trail at this place. Real Property Transaction No. 7459.

Agreement with Douglas County providing for the maintenance by the county of the North Umpqua County Road between a point 8.17 miles east of Roseburg and a point 9.41 miles east of Roseburg after construction of the same by the state as a federal aid secondary highway, same being designated as Project PAS 14-C(1).

Agreement with contractor Clifford A. Dunn, Klamath Falls, disposing of his claim for extra compensation arising out of his contract No. 2310 for the construction of a bridge over the Warm Springs River on the Warm Springs Highway, in Wasco County.

Agreement with A. I. Johnson, Prairie City, relating to the moving of Mr. Johnson's garage adjacent to the John Day Highway, in the town of Prairie City. Right of Way Transaction No. 8384.

Agreement with Mrs. Hazel Breshears, et al, providing for condemnation under one action in circuit court of six parcels of land that are needed as right of way for the Scotts Butte-Jordan Valley Section of the I.O.N. Highway, in Malheur County.

Agreement with the United Railways Company covering construction of the Davies Overcrossing Project on the Wolf Creek Highway, in Washington County.

OCT 11 1940

Permit granting to the Bonneville Power Administration authority to construct its pole lines over certain state highways.

Agreement with Northwest Telephone Company providing for use of one of the company's poles in the city of Willamina, Yamhill County, in connection with the suspension of a traffic signal cable attachment.

Bargain and Sale Deed conveying unto Ed Capps and Claud L. Capps 1372 square feet of land situate in Lots 8 and 9, Block 8, Woodland Addition to Bandon. Right of Way Transaction No. 8145.

Bargain and Sale Deed conveying unto Pearl Burton, Trustee, 3045 square feet of land situate in Lots 3 and 4, Block 22, South Albany Addition to Albany. Right of Way Transaction No. 6396.

Bargain and Sale Deed conveying unto Standard Oil Company of California certain state-owned property situate in Lots 12 and 13 of Block 7, Woollen Mills Addition to Bandon. Right of Way Transaction No. 8174.

Agreement with R. R. Clark providing for the renewal of a lease of certain property in Douglas County which is needed as a source of roadbuilding materials. Real Property Transaction No. 4424.

There being no further business to come before the Commission at this time, the meeting was adjourned at 6:00 p. m.

W. H. Seavoy
State Highway Engineer

W. H. Seavoy
Secretary

Henry F. Cabell
Chairman

Thos. M. Elmer
Commissioner

Portland, Oregon, October 18, 1940

The State Highway Commission met at 2:00 p. m. in Room 415, Imperial Hotel. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. H. Devers, Attorney
E. B. Glaisyer, Secretary

The Commission conferred with Messrs. W. H. Lynch, District Engineer, T. M. Davis, Senior Highway Engineer, and H. D. Farmer, Senior Highway Engineer, of the Public Roads Administration, relative to the selection of state highways for a strategic military highway system. The Engineer exhibited a map prepared by the Public Roads Administration outlining in color certain highways recommended by the federal government as being highways of first priority, second priority, and third priority from a military standpoint. He advised that in certain instances the routes recommended by the government officials do not represent the best strategic military routes in this state and suggested certain changes which, he said, are being recommended for adoption after very careful study, considering the value of the routes from the peacetime and motor users' standpoint as well as from the military standpoint. He exhibited a map, prepared in his office, showing the routes recommended by him. After a lengthy discussion of this matter the Commission approved the routes recommended by the Engineer and thereupon authorized him to recommend to the federal authorities the adoption of such routes as the strategic military highway system in Oregon. The Engineer was instructed to forward a copy of the map to the Public Roads Administration with a letter of transmittal, giving reasons for the suggested changes. (See map filed in general files under caption "Construction, Federal Aid, Strategic Military Highways")

The Commission discussed the question whether to readvertise the Sexton Mountain Project, for which bids were taken at the last meeting, or to award the contract to the second-low bidder, Roy L. Houck, Salem, on the basis of his bid submitted on October 10, 1940. The Engineer explained that the Commission, at such meeting, awarded this contract to H. L. O'Neil & Son, the low bidder, at their bid price of \$194,922.50 which was \$51,860.00 lower than the bid submitted by Mr. Houck, but H. L. O'Neil & Son have refused to enter into the contract for the work and have paid into the state highway fund the amount of their bid bond, \$9,746.13, because they feel that their bid is entirely too low and that they will suffer serious loss if they undertake to do the work at such bid price. The Commission decided unanimously after careful consideration that it would be inadvisable and unwise to award the contract to the second-low bidder because it would establish a very undesirable precedent, and thereupon ordered the Engineer to readvertise the project for new bids.

Matters pertaining to the proposed Front Avenue Project in Portland were discussed by the Commission. Present and entering into the discussion of this matter were Messrs. Ben Morrow, City Engineer, and Ralph Regan, City Right

of Way Buyer, representing the Portland City Council. The Attorney advised that the city council contemplates taking action on Thursday, October 24, 1940, as may be necessary to authorize the condemnation of certain properties that are needed for right of way for this improvement and the principal matter before the Highway Commission at this time is the approval of the options heretofore taken and the amount of damages that have been allowed in connection therewith. The city wants to proceed as rapidly as possible, he said, to close the options and will authorize the sending of notification to each of the grantors as soon as the amounts of the options and the settlements have been approved by the Highway Commission and the city council. The State Highway Engineer presented a written report from the City Engineer on this subject which included a tabulation of all the settlements agreed upon. After considerable discussion, the matter of approval of such settlements was referred by Commissioners Clough and Oliver to Chairman Cabell to pass on the individual items, it being understood that the Commission would confirm the action taken by Chairman Cabell on such matters at the Commission's next regular meeting.

Chairman Cabell advised that in his study of this matter he would consider claims for damages entirely separate from the claims for land and buildings, and would allow damages only in cases where land and buildings are not concerned and where lease tenants occupy buildings with long-term leases and will suffer real damage by reason of the highway improvement. He explained that a standard price has been set for land at one and one-fourth times the assessed value thereof and that a standard price of one and one-half times the assessed value of buildings has been established for such property. Commissioners Clough and Oliver approved this method of classification.

The Engineer reported receipt of a letter from the Union Pacific Railroad Company and the Southern Pacific Company, joint owners of the Steel Bridge over which it is proposed to route Front Avenue traffic when the Front Avenue project has been completed, which letter sets forth certain conditions under which the railroad companies are willing to allow the use of the upper deck of this bridge as a state highway route. He read this letter aloud. (See letter dated October 2, 1940, from F. N. Finch, General Manager, Union Pacific Railroad Company and E. L. King, Superintendent, Southern Pacific Company, directed to Mr. Henry F. Cabell, Chairman of the Oregon State Highway Commission, for details). He particularly pointed out that the railroad companies are willing to grant to the state the right to use the upper deck of this bridge for highway purposes for a period of 30 years at an annual rental of \$75,000 and if, in addition thereto, the state will maintain the upper deck surface, sidewalks and appurtenances down to the supporting steel and will maintain the streetcar tracks; further, will pay the cost of lighting the upper deck, wages of gatemen and other employees required in connection with the use of the upper deck for highway purposes, and provided the state shall also defend and hold the owners of the bridge harmless on account of personal injuries and property damage resulting from the use of the upper deck by vehicles and pedestrians. The Engineer also pointed out that the railroad companies are willing for the state to retain all payments made for the use of the upper deck by holders of franchises such as streetcar companies and companies operating trackless trolleys.

The Engineer gave as his opinion that the conditions and stipulations set forth in this letter, with two exceptions, are satisfactory in principle, the two exceptions being, first, the annual rental of \$75,000.00, and, second, the obligation that the state shall defend and "hold harmless the owners on account of personal injuries and property damage resulting from the use of the upper deck by vehicles and pedestrians". He said that he has gone very carefully into the history of this bridge, including costs, et cetera, and is unable to justify a rental in excess of \$65,000.00 plus the obligation of maintenance of the upper deck surface, et cetera. He recommended acceptance of the proposition offered by the railroad companies if they will agree to a reduction of the annual rental charge from \$75,000.00 to \$65,000.00 and will modify their requirements with respect to protection against personal injury and property damage, and will accept such protection as the Commission may lawfully offer. He read aloud a suggested form of letter directed to the railroad companies to that effect. After considerable discussion the Commission approved the letter by unanimous vote and thereupon signed the same. (See letter dated October 18, 1940, directed to Mr. Finch and Mr. King.)

The Engineer requested authority for Mr. Harold Say, Director of the Travel and Information Department, to attend at state expense the annual meeting of the Pacific Northwest Tourist Association which is to be held in Spokane, Washington, on November 1, 1940. He said that Mr. Say's expenses would probably not exceed \$15.00. The Commission approved the request subject to confirmation by Governor Charles A. Sprague.

Mr. L. A. McClintock, Fendleton, was present and discussed with the Commission matters pertaining to the proposed revision of the Old Oregon Trail between Stanfield, in Umatilla County, and Boardman, in Morrow County. Mr. McClintock stated that he owns considerable property that would be severed by this proposed cutoff, and suggested a revision in the proposed alignment, which, in his estimation, would serve the purpose equally as well as that adopted by the Commission and would increase the distance between Stanfield and Boardman by only 0.4 of a mile. He particularly pointed out that he grazes a lot of cattle on his property and if the alignment is not changed he will be forced to make a demand for a number of cattle passes as a right of way consideration; further, that the alignment adopted by the Commission disrupts his system of irrigation canals and ditches, whereas that feature could be avoided by adopting the plan that he suggests. He urged the Commission to make the change and offered to give free right of way across his property if the Commission will approve the same. After considerable discussion the Commission instructed the Engineer to investigate the matter thoroughly at once and report his findings to the Commission at the next meeting.

A letter was presented from Mr. Fred A. Williams, Attorney, Salem, renewing his offer to sell to the state 22 acres of ocean frontage between Agate Beach and the Yaquina Head Lighthouse Reservation in Lincoln County. Mr. Williams states in his letter that a short time ago he refused a very attractive offer for a portion of this property which was desired as a quarry site and he did not sell it because he felt that the entire tract should be preserved as a state park. He offered to sell the tract to the state at the rate of \$200.00 per acre and advised that he would accept from \$500.00 to

OCT 16 1940

\$1,000.00 as down payment, the balance to be paid over a period of two or three years, to suit the convenience of the state. The Commission expressed appreciation of Mr. Williams's offer but decided not to purchase the property at this time in view of its many park obligations. The Attorney was instructed to so inform Mr. Williams.

Reconsideration was given by the Commission to the action taken on August 22, 1940, with respect to placing on the federal aid system the proposed cutoff highway between Boardman and Stanfield. The Engineer recalled that the Commission at such meeting directed a letter to the Public Roads Administration requesting the rerouting of federal aid road No. 1 from Boardman to a point near Stanfield, and further requesting that the present route of federal aid road No. 1 between Boardman and Umatilla be renumbered federal aid road No. 18, and that the section of the present federal aid road No. 1 between Umatilla and Stanfield be retained on the federal aid system and be given an entirely new number. He advised that in response to such communication a letter has been received from the Public Roads Administration indicating that the proposed revision of federal aid road No. 1 from Boardman to Stanfield, and the extension of federal aid road No. 18 from Umatilla to Boardman would be approved but that the Public Roads Administration objects to the retention of the Umatilla-Stanfield Section on the federal aid system because, after the construction of the Boardman-Stanfield revision, the Umatilla-Stanfield road would be of secondary importance and also because of its close proximity to federal aid road No. 36 between Pendleton and Cold Springs.

The Commission discussed the matter at considerable length and decided, by unanimous vote, in view of the objections offered by the Public Roads Administration, that it would be inadvisable to retain the Umatilla-Stanfield Section as a federal aid highway and agreed to its removal therefrom. The Engineer was instructed by the Commission to convey such information to the Public Roads Administration.

The Commission discussed the matter of dedicating for certain specific uses certain lands acquired by the Commission in connection with the securing of right of way for the Water Street Section of the Pacific Highway East in Oregon City between 11th Street and 16th Street. It was the Commission's decision that all of those certain portions of Blocks 10, 11, 12, 13, and 14 of Oregon City, lying westerly of the line parallel to and 40 feet distant easterly from the reconstructed center line of this highway, should be dedicated and set apart as right of way and that all of the remaining land acquired by the state in said blocks be set aside and dedicated for roadside development and landscaping purposes. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, for the purpose of making possible a proper location of the highway through Oregon City the Highway Commission found it advisable and necessary to acquire many parcels of real property; and

WHEREAS, in many instances it was deemed to be in the interests of the public and to the advantage of the owner, where

a lot or separate tract was severed, to acquire the entire lot or tract; and

WHEREAS, the acquisition of whole tracts or lots resulted in the state having possession of and title to a greater area than is necessary for right of way purposes; and

WHEREAS, it is the established policy of the Highway Department wherever practicable or advisable to landscape, improve and otherwise develop roadside strips or areas; and

WHEREAS, it is deemed wise that the areas acquired in Oregon City be segregated and that portion necessary and desirable for right of way purposes be so dedicated and the portion or area outside of the established right of way be dedicated to and for landscape and other roadside development:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the following described real property be and the same hereby is declared to be necessary for right of way purposes and the same hereby is set apart and dedicated as a part of the right of way of Water Street in the City of Oregon City, and the same shall be available for such purpose, to wit:

All those certain portions of Blocks 10, 11, 12, 13 and 14 of Oregon City, lying westerly of a line parallel to and 40 feet distant easterly from the reconstructed center line of the Pacific Highway East.

2. That the following described parcels of real property which border upon the above described right of way be and the same hereby are declared to be useful for roadside development and landscaping and said parcels of land hereby are set aside and dedicated for such use and purpose:

All those certain parcels of land to be used for roadside development in Blocks 10, 11, 12, 13 and 14 of Oregon City, and lying easterly of a line 40 feet distant easterly from and parallel to the center line of said highway, the location of said parcels being more particularly described as follows:

Parcel No. 1:

Beginning at the most westerly corner of said Block 10; thence southeasterly along the southwestern line of said block 45 feet; thence running in a straight line northeasterly through said block to a point 90 feet southeasterly of the most northerly

OCT 18 1940

corner of said block 10; thence northwesterly along the northeasterly line of said block to a point which is 40 feet distant easterly from (when measured at right angles to) the center line of said highway; thence southwesterly parallel to and 40 feet distant from said center line to the northwesterly line of said Block 10; thence southwesterly to the point of beginning.

Parcel No. 2:

Beginning at the most southerly corner of Lot 5, Block 11; thence northeasterly along the southeasterly line of Lots 5, 6, 7 and 8 of said block to the most easterly corner of said Lot 8; thence northwesterly along the northeasterly line of Block 11 to a point which is 40 feet distant easterly from (when measured at right angles to) the center line of the said highway; thence southwesterly parallel to and 40 feet distant from said center line to the southwesterly line of said Block 11; thence southeasterly to the point of beginning.

Parcel No. 3:

Beginning at the most southerly corner of Lot 7 of the Tooze Subdivision of Block 12, Oregon City; thence northeasterly along the southeasterly line of Lots 7, 9 and 10 of said subdivision to the most easterly corner of said Lot 10; thence northwesterly along the northeasterly line of said Block to a point which is 40 feet distant easterly from (when measured at right angles to) the center line of the said highway; thence southwesterly parallel to and 40 feet distant from said center line to the southwesterly line of said block; thence southeasterly to the point of beginning.

Parcel No. 4:

Beginning at the most southerly corner of Lot 5, Block 13, Oregon City; thence northeasterly along the southeasterly line of Lots 5, 6, 7 and 8 of said Block 13 to the most easterly corner of said Lot 8; thence northwesterly along the northwesterly line of said block to a point which is 40 feet distant easterly from (when measured at right angles to) the center line of the said highway; thence southwesterly parallel to and 40 feet distant from said center line to the southwesterly line of said block; thence southeasterly to the point of beginning.

Parcel No. 5:

Beginning at the most southerly corner of Lot 5, Block 14, Oregon City; thence northeasterly through Lots 5 and 6 to a point on the southwesterly line of Lot 7, and 15 feet westerly from the most southerly corner of said Lot 7; thence southeasterly along the southwesterly line of Lot 7 and Lot 2 to a point on the westerly right of way line of the existing highway; thence northerly along said westerly right of way line to a point which is 40 feet distant easterly from (when measured at right angles

to) the center line of said highway; thence southwesterly parallel to and 40 feet distant from said center line to the southwesterly line of said block; thence southeasterly to the point of beginning.

3. That there is attached hereto and made a part hereof a map marked "Exhibit A", on which map is shown shaded in green the area first herein described, and shaded in orange the area second herein described, which said exhibit by this reference is made a part of this resolution.

4. That the Engineer be and he hereby is instructed to properly mark upon the ground by stakes or other monuments the several areas herein described so that their boundaries may be easily ascertained.

5. That the Engineer and the Landscape Engineer be and they hereby are instructed to prepare and submit to the Highway Commission for approval a plan and scheme for roadside development or landscaping appropriate for said location or surroundings.

The Commission considered the matter of acquiring timber strips along the Pendleton-John Day Highway but deferred a definite decision thereon until it has been informed of the Government's requirements with respect to the expenditure of federal aid funds for the purchase of such wayside strips. The Commission instructed the Engineer to secure a copy of the Government's regulations pertaining thereto.

In this connection the State Parks Superintendent, who was present, requested authority to employ a cruiser to cruise the timber standing on these strips. The Commission granted the request.

The Commission also approved the employment of a cruiser to cruise the timber on the Salmon River Highway strips that the Commission proposes to acquire from the Miami Timber Company.

The Engineer reported that on October 15, 1940, in accordance with authority previously granted him by the Commission, he awarded to M. L. O'Neil & Son the contract for the Ironsides-Brogan Rock Production Project on the John Day Highway, in Malheur County, for which work this contractor submitted the low bid on October 11, 1940, the conditions of the award having been satisfied. The Commission by unanimous vote approved the award of this contract as reported.

The Commission by unanimous vote approved and confirmed the resolutions adopted by the Commission on June 13, 1940, permanently routing the Pacific Highway through the city of Eugene, and the routing of the Front Avenue Highway in Portland, and authorized the Secretary to forward certified copies of such resolutions to the cities concerned.

OCT 16 1940

The Commission considered the request of the Arrow Transportation Company for authority to transport a 700-pound overload, consisting of special sanding equipment, on each of its trucks operating on state highways during the coming winter, as they were permitted to do last winter. The Engineer explained that the special equipment referred to is an attachment for the carrying and sprinkling of sand on the highway under the wheels of the truck when the pavement is slippery from ice or snow, and the company wants to use this equipment as a safeguard against accidents but cannot do so without the Commission's approval unless they cut down their pay load, which they do not like to do because they would lose certain profits. He gave as his thought that the sanding equipment is a good one and will aid greatly in reducing the number of accidents that occur due to slipperiness of the highway. After discussion of this matter the Commission voted unanimously to grant the Arrow Transportation Company the permit requested as a temporary emergency proposition only, to be effective until adjournment of the 1941 Oregon Legislature.

Reconsideration was given by the Commission to the application of Barkheimer Manufacturing Company of Seattle, Washington, to move over state highways certain truck equipment the overall length of which exceeds the statutory limit by about $2\frac{1}{2}$ feet. It was explained that the Commission, at its meeting in Pendleton on October 1, 1940, granted this company permission to use this equipment over a limited number of state highways during the month of October only, it being understood at that time that the company was hard pressed to make some emergency deliveries of its products, and that as soon as these deliveries were made the company would make certain alterations in its equipment to comply with the state law. However, it now appears that the company wants a blanket permit authorizing the use of this equipment without alteration for the balance of the year. The Commission considered that it does not have legal authority to grant such permit and thereupon denied the request.

The Engineer presented to the Commission a legend prepared and recommended by the Old Oregon Trail Historic Marker Committee for use on certain markers that are to be installed on the Pacific Highway at Oregon City for the benefit of people who are interested in the historic McLoughlin Memorial Home located at that place. He inquired whether or not the wording of the legend meets with the Commission's approval and if so whether or not he should proceed with the erection of the markers and the fingerboard signs, pointing the way to the Home. After discussion the Commission instructed the Engineer to present the legend to the committee in charge of the McLoughlin Memorial Home for its approval. He was authorized by the Commission to erect the markers and signs as soon as such approval has been obtained.

The Secretary requested instructions whether or not to order the cancellation of the special carrier permit of Emil Waldkirch who has been arrested on four different occasions for transporting over state highways loads of logs weighing in excess of the statutory weight limits, the overload in each instance being 1165 pounds, 2460 pounds, 5200 pounds, and 2300 pounds, respectively. He said that in each instance the penalty of suspension of the permit was imposed. However, it now appears that Mr. Waldkirch, in order to avoid the 20-day penalty for the last offense, has transferred title to his

equipment from himself to Mrs. Waldkirch, who tried to secure a new permit from the Public Utilities Commissioner, but was denied. It appeared to the Commission from the evidence submitted that Mr. Waldkirch has little or no regard for the law covering his operations and that he is a habitual violator of the same and of the rules and regulations promulgated by the Commission pertaining thereto, and, in view thereof, the Commission decided unanimously that the permit should be cancelled and that the use of Mr. Waldkirch's equipment should not be allowed in this class of service hereafter, and it was so ordered.

The Secretary presented a resolution from the Hood River County Court requesting the designation of an extension of the Odell Secondary Highway No. 282 from its present terminus near the town of Odell westerly and northerly via Market Roads 1, 4, and 9, a distance of about 2.6 miles, to a connection with the Hood River Secondary Highway at a point known as Tucker Bridge. The Commission approved the request and thereupon by unanimous vote adopted the following resolution so designating this extension:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Hood River County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Hood River County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

An Extension of the Odell Secondary Highway No. 282:

Beginning at a point approximately 0.9 mile westerly from the Mt. Hood Highway near Odell; thence westerly

and northerly via Market Roads 1, 4, and 9, to a connection with the Hood River Secondary State Highway at a point near Tucker Bridge, a distance of approximately 2.6 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Commission discussed the matter of extending the Corvallis-East-side Secondary Highway, in Linn County, a distance of approximately 0.2 mile from its junction with the Pacific Highway East (old route) to a connection with the new route of this highway in Albany but deferred a definite decision in the matter pending a report from the Attorney as to the width of the right of way on this section, and inspection of the proposed extension by the Commission.

The matter of designating the Fort Stevens County Road, Clatsop County, a state secondary highway had the attention of the Commission but action thereon was deferred pending the ascertaining of the status of this highway from the strategic military standpoint.

The Commission also discussed the matter of designating as a state secondary highway the old route of The Dalles-California Highway between Modoc Point and Klamath Agency, in Klamath County. It was pointed out in the discussion of this matter that the Commission previously promised the Klamath County Court that it would so designate this road when the new road between Modoc Point and Klamath Agency was completed. In view thereof the Commission decided unanimously to approve such designation in the event Klamath County Court will make proper application for the same.

The matter of designating a state secondary highway connecting the Wolf Creek Highway at Elsie with the Nehalem Secondary State Highway at Fish Hawk Falls, in Clatsop County, was discussed. Action on this matter was deferred by the Commission pending a report from the Engineer on the cost to reconstruct to proper standards the Nehalem Secondary Highway from Fish Hawk Falls to Astoria.

The Commission also deferred definite action on the request of the Tillamook County Court for the designation as a state secondary highway of the county road which extends westerly from Tillamook City to Netarts and Ocean-side, in Tillamook County. It was the thought of the Commission that an investigation should be made to ascertain the width of the right of way of this section before jurisdiction over the road is assumed by the state. The Attorney was thereupon instructed to make such investigation.

A letter was presented from Mr. A. B. Sanders, Manager of the Oregon Coast Highway Association, inviting the members of the Commission and its

staff to be present at the annual convention of the association which is to be held in Tillamook on October 20 and 21, 1940. Chairman Cabell stated that he would represent the Commission at this meeting inasmuch as he has accepted an invitation to speak to the group. The Secretary was instructed to thank Mr. Sanders for the invitation.

An invitation was also presented from the Redwood Empire Association in which the Commission and its staff were asked to be the guests of the association at its annual meeting in Ukiah, California, on Saturday, October 26, 1940. The Commissioners expressed regrets that they could not attend this function; however, authorized Mr. Harold Say, Director of the Travel and Information Department, to represent them. The Secretary was instructed to so inform the association.

The Commission discussed the matter of the exchange of properties with the State Board of Control at the highway department shops in Salem so as to permit proper development of the highway department facilities at this location. Such transfer of property was recommended by the Engineer and the Attorney. The Commission approved the recommendation and thereupon adopted and signed a resolution providing for the transfer of 12,802 square feet of state highway property to the Board of Control upon receipt from the State Board of Control of a corresponding or companion resolution transferring 12,820 square feet of property under the control of said Board. The Secretary was instructed not to enter the Commission's resolution in the minutes of the Commission until delivery has been made to the Commission of a certified copy of the said resolution adopted by the State Board of Control.

The Secretary presented a request from the South Bay Logging Company, Charleston, Oregon, to transport logs over the Cape Arago Secondary Highway from a point 3 miles south of Charleston to the company's mill about 3 miles north of Charleston during Saturday afternoons and Sundays. The Engineer recommended the granting of this request. The Commission approved the recommendation.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

R. O. Dail & Warren Bros., Inc., Contract No. 2277, for surfacing and oiling the Miles Bridge-Baker and Baker-Salisbury Sections of the Medical Springs Secondary Highway and the Baker-Unity Highway, in Baker County, requested an extension of time from July 15 to August 23, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the following: high water in the gravel pit used on the Medical Springs Highway and difficulties in obtaining clean rock for the crusher because of clay content of the pit. The Engineer advised that the statements given by the contractor for failure to complete the project within the specified time limit are correct; that the contractor started the work early enough to complete it within the specified time but spent over a month trying to get the pit in a workable condition to produce acceptable material. The

OCT 18 1940

traveling public, he said, has not been unduly inconvenienced by the delay and the state has incurred no extra expense for engineering supervision. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Mid-Columbia Sand & Gravel Company, Contract No. 2296, for grading and surfacing the South Unit of the Fulton Canyon Section of the Fulton Canyon-Wasco County Road, in Sherman County, requested an extension of time of 10 days, from July 31 to August 10, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delays in securing certain materials for construction of cable guard fence. The Engineer advised that the reason given by the contractor for failure to complete this project within the specified time is correct and recommended the granting of the extension requested without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2238, 2240, 2245, 2277, 2296, and 2310, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2238, with Gus Reichow, for furnishing crushed rock in stock piles for the Waldport Rock Production Project on the Oregon Coast and Alsea Highways, in Lincoln County. Completed June 8, 1940.

Contract No. 2240, with G. D. Lyon Company, for rock embankment construction on the Multnomah Falls-Oneonta Section of the Columbia River Highway, in Multnomah County. Completed October 4, 1940.

Contract No. 2245, with Leonard & Slate, for grading and paving the West Unit, Grants Pass-Green Creek Section of the Pacific Highway, in Josephine County. Completed October 3, 1940.

Contract No. 2277, with R. O. Dail & Warren Bros., Inc., for surfacing and oiling the Miles Bridge-Baker and Baker-Salisbury Sections of the Medical Springs

Secondary and Baker-Unity Highways, in Baker County. Completed August 23, 1940.

Contract No. 2296, with Mid-Columbia Sand & Gravel Company, for grading, surfacing, and construction of culverts on the South Unit, Fulton Canyon Section of the Fulton Canyon-Wasco County Road, in Sherman County. Completed August 10, 1940.

Contract No. 2310, with Clifford A. Dunn, for construction of a bridge on the Warm Springs River Bridge Section of the Warm Springs Secondary Highway, in Wasco County. Completed September 26, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Pacific Power & Light Company providing for the use of two of the company's poles in the suspension of an overhead flashing beacon at the intersection of the Oregon Coast Highway with the road leading to Camp Clatsop, in Clatsop County.

Agreement with Eugene F. Hugg, Sr., providing for the lease of certain property at Elgin which is to be used as a site for the maintenance headquarters.

Agreement with the Portland Gas & Coke Company wherein the company agrees to reimburse the State Highway Commission for additional costs due to changes in design of the culvert at Mile Post 05.80 on the Lower Columbia River Highway, which changes are being made to accommodate existing gas mains.

Letter directed to Thomas H. McDonald, Commissioner of Public Roads, Washington, D. C., authorizing each of the following: R. H. Baldock, State Highway Engineer; C. B. McCullough, Assistant State Highway Engineer; S. H. Probert, Office Engineer; and J. W. Nash, Assistant Office Engineer, to bind the State Highway Department by his signature to reimbursement vouchers submitted to the United States Bureau of Public Roads for federal highway funds as fully as if said vouchers were signed by the majority of the members of the State Highway Commission.

Resolution providing for exchange of properties with the State Board of Control at the Highway Department shops, in Salem.

OCT 10 1940

Petition directed to Columbia County Court for vacation of a portion of the alley in Block 4, West Rainier; also, in connection with such matter, Order for Consent to Vacation of said alley; also Notice of Application to Vacate said alley; vacation of said alley being necessary to facilitate the use by the state of adjacent property for the storing of machinery, crushed rock, and other road materials.

Certificate with respect to the payment of \$25.00 by the Government for an easement over some state-owned property known as the Lawler property, in Hood River County.

The meeting was adjourned at 5:15 p. m.

Herman Oliver
Commissioner

Portland, Oregon, November 12, 1940

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

Huron W. Clough, Acting Chairman
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Chairman Cabell was excused from attending this meeting.

Bids, as follows, for highway construction projects and sale of buildings, were opened and read in conformance with previously published notice following which Commissioner Clough, as Acting Chairman, announced that the award of contracts would be made at 3:00 p. m. in the same room:

ALSEA HIGHWAY
LINCOLN COUNTY LINE-ALSEA MOUNTAIN ROCK PRODUCTION

NOV 12 1940

The County Court of Jackson County, represented by County Judge J.B. Coleman and County Engineer Paul E. Rynning, came before the Commission in the interests of the Little Butte Creek Secondary Highway. They renewed their previous request for the improvement of a 4-mile section of this highway beyond the Lake Creek Junction rather than the proposed extension of the improvement heretofore made on this highway west of this junction. The Commission took the matter under advisement, however, advised that it is questionable whether or not the Federal Government would approve the project for federal secondary highway funds because it is beyond the limits of the agricultural district.

A delegation from Deschutes County, consisting of the members of the County Court, Judge Charles L. Allen and Commissioners Wm. Baer and E. E. Varco; M. A. Lynch of Redmond, and D. F. Dyrsmid, Chief Engineer of the Oronite Company, came before the Commission relative to the improvement of the county road between Terrebonne and Lower Bridge. They asked the Commission to authorize a location survey of this road to determine a close estimate of cost of the work. They recalled that the Commission previously indicated that it would approve such project if the County would cooperate in the cost thereof and if the Oronite Company would rebuild its plant that was recently destroyed by fire. Judge Allen stated that the County would grade and surface the road and would contribute county funds in the amount of \$5,000 to help defray the cost of the oiling; furthermore, would acquire right of way as may be needed for the improvement.

Mr. Dyrsmid advised that the Oronite Company has already awarded a contract for the rebuilding of its plant and has ordered equipment for the same from manufacturers in the East, so there is no uncertainty that the Highway Commission's requirements will be met in that respect. The State Highway Engineer recommended that the Commission authorize the survey if the County Court and the Oronite Company will confirm their statements, in writing. Commissioners Clough and Oliver approved the recommendation subject to confirmation by Chairman Cabell. (Commissioner Cabell on the following day approved the action taken, thereby making the decision unanimous.)

Judge Allen then asked the Commission to oil the unoiled section of the Cline Falls Secondary Highway north of the town of Tumalo. The Commission took the matter under advisement.

The County Court of Klamath County, represented by County Judge U.E. Reeder and County Commissioners William F. B. Chase and Jack E. Benner, and County Engineer Frank Z. Howard, was present and asked the Commission to conduct snow removal operations on the Crescent Lake County Road from the Willamette Highway Junction to Crescent Lake so as to maintain travel over this road during the winter season. They said that the road is isolated from other County roads and that the County could not do the work economically, hence their request; also, that the County would reimburse the State for the expense thereof. The Commission approved the request subject to the condition that the County Court will confirm, in writing, its offer to reimburse the State for expenditures made in this connection.

The Engineer requested approval of a WPA project for development of a parking area adjacent to the Wolf Creek Highway at a place known as Bear Springs. He estimated the total cost involved at approximately \$5,000, of which amount the State's share would be about \$1,100. He advised that the Commission previously approved this project in the blanket WPA authorization for the Wolf Creek Highway and his object in bringing the matter to the Commission's attention at this time is simply to secure the Commission's approval of the detail. The Commission authorized the improvement.

The matter of caring for street-car traffic on the Hawthorne Avenue bridge, in Portland, during the reconstruction of the approach to this structure incident to the proposed Front Avenue improvement, had the attention of the Commission. The Engineer advised that in a recent conference with the Portland Traction Company with respect to the Hawthorne Bridge Project, the Commission agreed to take care of the trolley bus traffic during the construction period, however, no mention was made of the additional cost to carry streetcar traffic during such period, and to provide for such traffic would require the shifting of the company's tracks on the existing approach structure and the installation of a pipe handrail. The extra cost of such rail over an ordinary timber rail, he said, is about \$130.00. He recommended that the Highway Commission assume this expense, provided the trustees of the streetcar line will assume the responsibility and cost of shifting the tracks to provide the necessary additional clearance. The Commission approved the recommendation.

The Engineer reported that in connection with the proposed realignment of the Madras-Terrebonne Section of The Dalles-California Highway, inquiry has been made of the U. S. Reclamation Service as to its plans with respect to the definite location of the irrigation canals, and it appears that nothing definite in this regard is available and the Reclamation Service is of the opinion that it will be at least two years before their work is sufficiently advanced to provide such information. He suggested, in view of the fact that the proposed highway improvement would be undertaken before the final plans of the Reclamation Service have been adopted, that it would be advisable for the Commission to proceed with the acquisition of the right of way needed for the highway. The Commission approved the suggestion and authorized the Attorney to proceed with the securing of options for such right of way.

Letters were presented from Messrs. Ed Potter, Waterman, Oregon, and George Dukek, attorney, Fossil, Oregon, requesting repairs to the bridge over the John Day River on the Service Creek-Mitchell Secondary Highway, so as to permit transportation thereover of loads weighing up to the legal weight limit, such bridge being now posted for a 10-ton limit. The Engineer advised that this bridge was built about 35 years ago and consists of timber and steel combination spans; further, that the timbers are badly decayed and that three years ago certain repair work was done but it still is unsafe for loads weighing more than the limit for which it is posted. He also said that there is considerable traffic over the bridge, consisting of logging and lumber trucks, and that incident to the trucking of cattle and stock, and it is alleged that it will be impossible to reduce the weight of the loads to the 10-ton limit.

He recommended, in view of the circumstances, a temporary improvement to the structure, costing about \$2,000, which would serve the purpose until the Commission is able to finance the construction of an entirely new bridge at this point. The Commission approved the recommendation.

The Commission also discussed the repair of the Nehalem River Bridge on the county road at Elsie, in Clatsop County. The Engineer advised that this road, including the bridge, was used as a detour for state highway traffic during the construction of the Wolf Creek Highway in this vicinity but state maintenance of the bridge was stopped about February 1st of this year, when the Wolf Creek Highway was opened to travel; further, that the bridge was inspected by one of the Bridge Engineers on June 27, 1940, at which time there was no indication that there was any particular disintegration of the structure, but a more recent inspection made on September 27th revealed that the ends of several of the floor beams are in bad condition and that a number of the stringers are cracked rendering the structure unsafe for travel and necessitating the closing of the same to public use. Request has been made, he said, that the State repair this structure. He estimated the cost of the new structure at \$10,000 and the cost to rehabilitate the present structure so that it can be reopened to traffic at about \$6,200. He recommended against any expenditure whatsoever because evidence shows that the bridge was in good condition when it was turned back to the County and that its condition at the present time is due to overloading by logging trucks since the County reassumed maintenance of the structure. The Commission concurred in the viewpoint of the Engineer and thereupon decided to let the matter rest in status quo unless and until the Clatsop County Court revives it.

The Commission discussed briefly matters pertaining to the reconstruction of the Ochoco Highway between Prineville and Mitchell and decided that the persons inquiring as to the Commission's plans with respect to such improvement should be informed that the Commission intends to continue the improvement from the westerly end rather than from the Mitchell end.

The matter of providing electrical energy for operating the Interstate Bridge between Portland and Vancouver was discussed. The Engineer advised that for many years electrical service for the operation of this bridge has been furnished by the Portland Electric Power Company, this being possible by reason of the Company's facilities installed and operated in connection with its street-car service over this bridge. However, the street-car service has been stopped and the company wants to discontinue the service for the bridge operation and alleges that if it were to provide such service it would necessitate either the maintenance of 8,000 feet of trolley wire, at a cost that is not justified, or the construction of new facilities, which are estimated to cost about \$10,325. The motors for operating the movable span of the structure, he said, are all of the direct current type and upon discontinuance of the service now rendered by the street-car company, no such current will be available and to replace them with alternating current motors would cost about \$50,000, whereas, it would be possible to convert the available alternating current with a motor generator set at a cost of about \$10,000. He referred to a letter from T. O. Russell, Chief Engineer for the Public Utilities Commissioner, in which Mr. Russell advises

that in the opinion of the Public Utilities Commissioner the street-car company cannot be required to maintain the present service because of the expense thereof and the small return that it would receive. He recommended, in view of the circumstances, that the Commission authorize the expenditure of \$10,000 for the purchase and installation of a motor generator set to convert the available alternating current energy to direct current. The Commission approved the recommendation under the condition that the State of Washington, joint owner of this bridge, will pay one-half the cost.

The Commission discussed the claim of J. E. Johnson, Milton, who alleges that the operation by the State of a gravel pit near his residence property has caused the well which supplied water for domestic use in his home, to dry up, necessitating the drilling of a new well at a cost of \$105.00. He asked the Commission to reimburse him for such expense. The Engineer advised that investigation of this matter reveals that the allegations of J. E. Johnson are substantially correct. He recommended approval of the claim. The Commission approved payment of the claim provided it is a legal expenditure of state funds.

The Engineer rendered a brief report on profits and losses incurred by contractors on state highway work during the past two years which indicated that the total net profit realized by 41 contractors on 124 contract jobs during such period amounted to only \$765.00. The Commission took no action on this matter.

The Attorney reported the results of his efforts to secure reimbursement from the City of Roseburg for the cost of electrical energy to operate the flashing beacon at the crossing of the Pacific Highway with the Southern Pacific Railroad, in Roseburg. He advised that, as instructed by the Commission, he contacted the City Attorney, Mr. E. L. Eddy, relative thereto and ascertained that Mr. Eddy, who appeared on behalf of the City at the Public Utilities Commissioner's hearing on this grade crossing matter when it was agreed that the City should pay the cost of operating this light, had no authority to bind the City in the matter, hence the City Council feels that it is not obligated to pay this expense. The Attorney advised that while the City is morally obligated to pay such costs the Highway Commission has no way to collect if the city refuse to do so. The Engineer suggested that the state pay the account but that an effort be made to secure the benefit of the city's electric light rate from the Power Company. The Commission approved the suggestion and so ordered.

The Commission adjourned at 12:30 p. m. and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

A delegation was present from the town of Cottage Grove in regard to the closing of certain city streets that connect with the newly-constructed highway in this town, particularly the connections at 7th and Jefferson Streets and at 8th and Washington Streets. The delegation was headed by Mr. H. W. Lombard, City Attorney, and included the following: L. W. Coiner, City Recorder; Loren Schroeder, President, Chamber of Commerce; Jess Lansing,

Mr. Thumb, George Mathews, W. L. Workman, and Joseph Saflev, all city councilmen; Mrs. Laura Turner; Mr. Fred E. Smith, attorney for the property owners; and Mr. Brown and Mrs. Julia Brown.

Mr. Lombard recited the history of the Cottage Grove improvement case and particularly stated that the City Council, in adopting the resolution approving the Highway Commission's plans for the improvement, had no idea that it was obligating itself by such resolution to vacate and close certain streets entering the new highway, and would not have assumed any such obligation had it known that the highway improvement was contingent upon such action by the council. He pointed out that, according to the city charter, the city council cannot act on the vacation of any street unless two-thirds of the property owners abutting on such street agree thereto and, in this instance, the people affected do not want the streets closed. Furthermore, the members of the city council, even if they had the authority, are not inclined to order the closing of the streets in view of the objections offered by the local citizens. He urged the Commission to revise its plans for this improvement so as to allow traffic to enter the highway at the points mentioned. Mr. Smith read aloud a copy of the resolution which was adopted by the city on April 1, 1940, approving the Highway Commission's plans for this project. He gave as his legal opinion that the resolution does not bind the city or the property owners with respect to the closing of the streets and, in view thereof, asked the Commission to remove the barricades now in place, which barricades, he said, are causing all the trouble. He also said that the city would pay part of the costs involved. Mr. Brown stated that he is appearing before the Commission as a property owner and also as a representative of the Union Oil Company, with whom he is negotiating for the lease of his property, which is located at the intersection of 8th and Washington Streets. The completion of the lease, he said, is being held up pending the Commission's final decision on the matter of the street closure. He urged an early decision in the matter and stated that he personally would be satisfied if only the Washington Street connection were left open. Mr. Schroeder stated that he was present at the conference when an agent of the State Highway Commission told the city council that the state would prepare necessary papers to secure the vacation of the streets under discussion but the State has not as yet fulfilled its obligation in that regard. His remarks were confirmed by Mr. Lansing. Mr. Thumb stated that, if the Commission cannot see its way clear to leave all of these street connections open, he would be satisfied if the Commission would allow one opening along Washington Street. He also endorsed the remarks of the other speakers.

Mrs. Brown recommended the closing of all of the streets except 8th Street. Mr. Lombard concluded the presentation by again urging the Commission to leave all of the streets open.

Commissioner Clough closed the discussion by stating that the State Highway Commission is a public body and in making its decisions tries to be fair and equitable in every way and to act in accordance with what it considers the best interests of the general public and, in this particular instance, it was the opinion of the Commission that the closing of the streets in question was necessary from the standpoint of the general public safety. He also said

that the Commission will be pleased to give the arguments presented at this meeting fair consideration in the further discussion of the matter, but no decision can be given at this time because of Chairman Cabell's absence. He told the delegation that it could expect an early decision.

At 3:30 p. m. Commissioner Clough announced the following awards of contracts and sale of buildings for which bids were taken at the morning session, such awards having been previously approved by the unanimous vote of the Commissioners present:

"Lincoln County Line-Alsea Mountain Rock Production Project on the Alsea Highway, in Benton County. Furnish approximately 8,000 cu. yds. crushed material in stock piles. F. C. Willard of Eugene, submitted the low bid for this work, his bid being in the amount of \$11,920.00. A. O. Skstrom of Portland, submitted the second-low bid in the amount of \$12,800.00. There were 3 higher bidders. The Commission awards this contract to the low bidder, F. C. Willard, at his bid of \$11,920.00.

"Hug Point-Manzanita Section of Oregon Coast Highway, in Clatsop and Tillamook Counties. 9.07 miles bituminous macadam surfacing. The low bid received for this project was that of Rogers Construction Company, Dayton, Washington, in the sum of \$110,107.50. The next low bid was that of Fisher Bros., Oregon City, in the amount of \$110,351.00. There were 11 higher bidders. The Commission awards this contract to Rogers Construction Company, the low bidder, at its bid of \$110,107.50.

"East Unit, Dixie Summit-Austin Section of the John Day Highway, in Grant County. 4.3 miles grading, surfacing and oiling. The low bid submitted for this work was that of Leonard & Slate, Multnomah, in the amount of \$115,532.00. The next low bid was that of E. L. Gates, Trail, in the amount of \$125,236.75. There were 3 higher bidders. The Commission rejects all bids received on this project and has ordered it re-advertised.

"Goose Rock Bridge Section of the John Day Highway, in Grant County. Bridge construction over John Day River. C. J. Eldon of Portland submitted the low bid for this work, his bid being in the amount of \$44,651.00. McNutt Bros., Eugene, submitted the second-low bid, in the amount of \$45,125.50. There were 5 higher bidders. The Commission has rejected all bids for this work and has ordered the project re-advertised.

"Sexton Mountain Section of the Pacific Highway, in Josephine County. 1.91 miles grading. The bid of McNutt Bros., Eugene in the amount of \$236,390.00, was the low one received for this work. That of M. L. O'Neil & Son, Eugene, was the second-low bid, being in the amount of \$239,261.00. There were 6 higher bidders. This project is awarded to the low bidders, McNutt Bros., at their bid of \$236,390.00.

"Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway, in Lake County. 4.3 miles grading, surfacing and oiling; also construction of two composite type pile trestle bridges and three concrete culverts. The low bid received for this work was that of Jacobsen-Jensen Company, Portland, in the amount of \$127,173.00. The next low bid was that of E. C. Hall Company, Eugene, in the amount of \$129,944.50. There were 6 higher bidders. All bids have been rejected on this project and the Commission has ordered it re-advertised.

"Cottage Grove Section of the Pacific Highway, in Lane County. 0.80 mile roadside improvement. E. L. Gates, Trail, submitted the low bid for this project, in the amount of \$2,811.50. Blair T. Alderman, Eugene, submitted the next low bid in the amount of \$3,352.60. There were 2 higher bidders. The Commission awards this contract to the low bidder, E. L. Gates, at his bid of \$2,811.50.

"Nashville Bridge Section of the Eddyville-Blodgett Secondary Highway, in Lincoln County. Bridge construction over the Yaquina River at Nashville. J. F. Johnston, Newberg, submitted the low bid for this work, in the amount of \$14,032.80. Edlefsen-Weygandt Company, Portland, submitted the next low bid in the amount of \$14,479.75. There were 9 higher bidders. This contract is awarded by the Commission to the low bidder, J. F. Johnston, at his bid of \$14,032.80.

"Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah, Washington, and Clackamas Counties. 3.55 miles grading and surfacing. Jacobsen-Jensen Company, Portland, submitted the low bid for this work, in the amount of \$88,792.50. Leonard & Slate of Multnomah, submitted the next low bid in the amount of \$91,424.00. There were 11 higher bidders. The Commission has referred all bids received for this work to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"La Grande Rock Production Project on the Wallowa Lake and Old Oregon Trail Highways, in Union County. Furnish approximately 8,000 cu. yds. of crushed gravel in stock piles. D. C. & A. L. Williams, Condon, submitted the low bid for this work, with their bid of \$10,236.40. Hart Construction Company of La Grande, submitted the next low bid, in the amount of \$13,454.90. There were 5 higher bidders. This contract is awarded to D. C. and A. L. Williams at their low bid of \$10,236.40."

Buildings at Brookings

"Building No. 7700 (formerly owned by Brookings Land & Townsite Company). The only bid submitted for the purchase of this building was that of Kenneth Dodd of Eugene, who bid .26.55. The Commission rejects this bid.

"Building No. 7701 (formerly owned by Leavenworth Kyle). Fred W. Flynn, of Harbor, submitted the high bid for the purchase of this building, his bid being in the amount of \$110.00. Kenneth Dodd of Eugene submitted the next high, and only other bid, in the amount of \$20.00. The Commission accepts the bid of Fred W. Flynn and sells this building to him at his high bid of \$110.00.

"Building No. 7707 (formerly owned by Fanny T. Pedriele). The only bidder for the purchase of this building was Jim Jarvis of Brookings who bids for the salvage value only. This bid is rejected by the Commission.

Buildings at Marshfield:

"Building No. 8086 (formerly owned by Lillian Madden). Two bids were received for the purchase of this building, that of Kenneth Dodd of Eugene being the high one, in the amount of \$106.55. Ed Lorsung, Marshfield, was the other bidder. His bid was in the amount of \$76.00. The Commission rejects both these bids.

"Building No. 8091 (formerly owned by G. L. Curtiss and Eliza E. Condron). Only two bids were received for the purchase of this building, that of Glen Wm. Curtis of Marshfield, being the high one, in the amount of \$40.00 and that of Kenneth Dodd, Eugene, in the amount of \$16.00, the second high. The Commission rejects both these bids.

Lodge and Service Station Buildings at Siskiyou Summit:

"Building No. 7183 (formerly owned by Wm. B. Norris). The only bid received for the purchase of this building was that of Kenneth Dodd, in the amount of \$26.55. The Commission sells this building to Mr. Dodd at this price."

Mr. Lawrence Nelson and his attorney, Irving C. Allen, Seaside, came before the Commission and requested the reinstatement of Mr. Nelson's permit for truck hauling logs over state highways, which permit was previously cancelled because of traffic law violations committed by Mr. Nelson, including the hauling of logs during the hours of darkness, the overloading of his truck, and failure to respect and obey certain orders given him by the State Police officer who caused his arrest. Mr. Allen stated that Mr. Nelson's permit was revoked on October 3, some 6 weeks ago, and that his truck has not been in operation since that time, causing loss to him up to the present time of more than \$1,000. It was his thought that Mr. Nelson has been sufficiently penalized for this offense. After discussion, the Commission authorized the reinstatement of Mr. Nelson's permit under the condition that he would not violate the laws, rules and regulations again, and with the warning that if he is again arrested the penalty imposed will be more severe.

The following members of the Eugene Junior Chamber of Commerce were present and urged the Commission to conduct snow removal operations on the McKenzie Highway this winter up to a point known as Pole Bridge, for the benefit of winter sports enthusiasts: Hal G. Thompson, President; Dr. Norman Lee, and Robert Swenness. Mr. Thompson headed the group. He presented, in support of his oral arguments, a communication from the Winter Sports Committee of the Junior Chamber of Commerce urging the Commission to spend for snow removal on this highway this winter at least as much as was spent for the same purpose last winter. Mr. Swenness advised that their committee has made an exhaustive investigation for suitable skiing grounds adjacent to the Willanette Highway but has been unsuccessful in finding anything that would serve the purpose within 6 miles of the highway and, unless the Commission will keep the McKenzie Highway open up to the point requested, they will be forced to either give up their snow sports or go excessive distances to other winter playgrounds. The Commission deferred a decision in the matter pending consideration of its proposed state-wide snow removal program.

Messrs. P. H. Sayre, Aurora, and Dr. C. P. Shewey, Canby, members of Aurora Post, American Legion, were present and inquired as to the possibilities of purchasing a small parcel of state-owned property situate between the old and new routes of the Pacific Highway East just north of the Pudding River Bridge, Aurora. They stated that Aurora Post is considering the construction of a Legion Home for the benefit of its members and they will need about one-half acre of ground for such purpose and that the tract above-described would suit their requirements admirably. The Engineer pointed out that the Commission has plans to revise the alignment of this highway at this point when the proposed new bridge over the Pudding River is constructed and, in all probability, will need in connection therewith at least a portion of the ground desired by the American Legion. He suggested, in view thereof, that the Commission defer its decision in the matter pending completion of the highway project, when it will be known definitely just how much land there is available for disposal. This arrangement was approved by all concerned and it was understood that the Aurora Post, American Legion, would be given the first opportunity to purchase the tract when the highway work is done.

Messrs. Donald Rogers of the Rogers Construction Company, highway contractors, and Russell Olsen, of Norris Bros., contractors, came before the Commission in regard to the penalty imposed by the Commission on Norris Bros. for failure to complete two highway contracts within the time limit specified; viz., contract No. 2287 for surfacing and oiling the Lick Creek-Salt Creek Section of Little Butte Secondary Highway, in Jackson County, and contract No. 2223, for surfacing and oiling the Butte Falls Section of Butte Falls County Road, in Jackson County.

The Engineer advised that contract No. 2287 was awarded to Norris Bros. on February 16, 1940, and the specified date of completion was July 31, 1940. However, the work was not completed until October 5, 1940, which resulted in the increase in engineering expense amounting to \$842.85. Contract No. 2223, he said, was awarded on September 28, 1939, and the date of comple-

tion specified was June 30, 1940, although the work was not completed until July 17, 1940, resulting in extra engineering expense amounting to \$380.13. In both instances, he said, the Commission granted extensions of time subject to payment by Norris Bros. of the extra expense incurred by the State for engineering supervision subsequent to the specified date of completion.

Mr. Rogers stated that Rogers Construction Company subcontracted certain work in connection with both of these jobs and the reason that they failed to complete the projects within the specified time limit was due to the fact that they encountered difficulties in connection with the Lick Creek-Salt Creek project which not only prevented their completing this job within the specified time limit but also made it impossible for them to move onto the other job and, as a result, they encountered bad weather. He urged the Commission to reconsider previous action and to relieve them from payment of at least a portion of the penalty. The Engineer explained the purpose of the setting of a definite time for the completion of a project and the reasons why the Commission feels it necessary to exact a penalty from the contractor for overrunning the specified time limit. He further stated that a study of the field engineer's reports on both of these jobs indicates that bad weather was not responsible for the contractor's failure to complete the projects on time but, on the other hand, the reports do show that the contractor had difficulty in operating one of the quarries. He expressed the thought that the penalties imposed may be somewhat excessive for jobs of this kind and recommended that they be reduced 50 per cent in each instance. Mr. Rogers expressed himself as satisfied with such compromise, whereupon the Commission approved the recommendation and so ordered.

Mr. Arch B. Sanders, Manager of the Coast Highway Association, was present and presented a resolution from the Association endorsing the policy of the Commission which prohibits the truck-hauling of logs on state highways during Saturday afternoons, Sundays, holidays, and during the hours of darkness. Mr. Sanders also asked the Commission to provide rest room facilities along the Oregon Coast Highway at Otter Crest and Depoe Bay, particularly at Depoe Bay where many people congregate. The matter was referred to the Engineer for investigation and report.

Mr. Sanders also suggested that if the Commission has it in mind to complete the reconstruction of the Oregon Coast Highway between Marshfield and North Bend in the near future, in his estimation, considerable saving in right of way costs could be realized if the right of way were purchased now. He was informed that this project has not advanced far enough to authorize right of way negotiations.

The matter of reconstructing the Oregon Coast Highway through Gold Beach was also discussed briefly but no action was taken.

Mr. I. C. Nealeigh, Oregon City, came before the Commission and asked for the filling in of the highway right of way in front of his property in block 11, Oregon City, so as to eliminate the depression between his property and the highway. He said that he is not seeking an entrance to

NOV 12 1940

the highway, inasmuch as he now has a connection via an existing alley, but he has a buyer for his property who intends to erect a two-story, fire-proof building and the filling in of the highway in front of it would make for a more attractive appearance. He also agreed to furnish material for the fill if the State would do the construction work. The matter was referred by the Commission to Chairman Cabell with power to act. Mr. Nealeigh agreed to write the Commission and state fully all the facts in the case so that the Commission would know clearly just what he wants done.

A delegation from Albany, representing the city council and consisting of Messrs. Victor Olliver, city attorney; A. B. Coates and Fred Forrester, city councilmen; G. M. Junkin, superintendent of streets, and Mr. Clark, log hauler, came before the Commission with regard to the routing of logging trucks through the city to dumps in the Willamette River. Mr. Olliver headed the group. He said that continuous heavy pounding that is being given their city streets by logging trucks is causing considerable damage and that the city is unable financially to pay the cost to maintain them, hence they feel that the State should take over these streets as state highway routes and assume maintenance obligations. He particularly referred to Lyons Street from the new highway to the dumps at the foot of this street and at the foot of Montgomery Street; First Street from Ellsworth Street to Main Street, and Main Street from First Street to a connection with the new highway near 8th Street. The Engineer advised that the Commission has not yet abandoned First Street and Main Street as the state highway route, hence such streets are still under state maintenance. He recommended that Lyons Street from the new highway to First Street be designated an alternate state highway route if the city will adopt an ordinance making this a through street requiring traffic to stop before entering the same, which is in conformity with the Commission's policy with regard to such matters. He pointed out that a designation of Lyons Street as a state highway route would require the installation of a flashing beacon at its intersection with First Street for the protection of traffic. After considerable discussion, the delegation stated its approval of the arrangement suggested by the Engineer and agreed to have the necessary ordinance adopted at the next council meeting with respect to both the designation of Lyons Street as a through street and the installation of the beacon toward which the city will contribute one-half the cost.

Mr. Jess Dawes, Gladstone, came before the Commission and requested authority to transport logs over certain state highways in the vicinity of Molalla. He explained that he has purchased the truck of a Mr. Emil Waldkirch whose log hauling permit was cancelled by the Public Utilities Commissioner upon request of the State Highway Commission on account of violation of traffic laws, and he expects to engage in the business of log hauling himself. However, request for a permit to transport extra long loads, using Mr. Waldkirch's equipment, and the engaging of Mr. Waldkirch as the driver of the same, has been refused on the grounds that the Commission is penalizing the equipment as well as the owner of the same. He said that the purchase of Mr. Waldkirch's equipment by him is a bona fide transaction and is not simply for the purpose of avoiding the penalty imposed. After considerable discussion, the Commission approved the granting of the permit to Mr. Dawes and the employ-

ment by him of Mr. Emil Waldkirch to operate the truck, with the understanding that two of the previous violations committed by Mr. Waldkirch should be charged to this equipment, in the event of future violations.

The Commission adjourned at 6:00 p.m. to reconvene at 8:00 p.m. in the Imperial Hotel.

The Commission reconvened at 8:00 p.m. in Room 415, Imperial Hotel, with all members, the State Highway Engineer, the Attorney, and the Secretary present.

The Commission discussed the employment of Mr. Samuel Lancaster and decided, in view of the fact that Mr. Lancaster's services cannot be used to good advantage on account of his age and health, that there was no justification for continuing him on the State's payroll and it was ordered that his services be terminated.

The Assistant Attorney reported the status of the right of way budget for 1940, stating that of the \$600,000 which the Commission budgeted for expenditure for real property purchases this year, \$356,450.00 has been obligated and it appears that the expenditures for such purposes this year will not exceed the amount of the budget.

The Commission approved the minutes of the meetings held on June 13 and 14, June 20, July 18 and 19, August 16 to 23, incl., and September 30 to October 4, 1940, inclusive.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the State. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Commission approved the request and, by unanimous vote, adopted the following resolution covering the matter:

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that

the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to-wit:

Real property owned by the heirs of Sarah Agnes Young, deceased, which property is located in the northeast quarter (NE $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 36, Township 1 South, Range 1 West, W.M., Washington County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 3645, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by Rosa Goldberg, which property is located in Lots 19 to 26, inclusive, Block 15, West Portland Heights, Washington County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 5475, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by Wm. R. Lacey, which property is located in Block 5, Lake Forest, in Section 7, Township 2 South, Range 1 East, W. M., Clackamas County, Oregon, which property is more particularly described on the attached sheet and designated as Parcels Nos. 3, 4, and 5 and is further identified in the records of the Highway Commission as files R 4643 and R 4084, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by S. H. Forshaw, which property is located in Lot 8, Kable Acres, situated in Section 12, Township 2 South, Range 1 West, W. M., Washington County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 6 and is further identified in the records of the Highway Commission as file R 4086, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by Paul Studensky and Esther Studensky, which property is located in Lot 80, Tualatin Valley Homes, of Section 13, Township 2 South, Range 1 West, W. M., Washington County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 7 and is

further identified in the records of the Highway Commission as file R 4827, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by John H. Davies, which property is located in Lot 4, Block 25, West Portland Heights, Washington County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 5478, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by John W. Roppel, which property is located in Lot 3, Block 25, West Portland Heights, Washington County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 9 and is further identified in the records of the Highway Commission as file R 7222, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by Robert A. Dorcheus and Mildred Dorcheus, which property is located in Lot 6, Block 5, Lake Forest, in Section 7, Township 2 South, Range 1 East, W. M., Clackamas County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 10 and is further identified in the records of the Highway Commission as file R 6712, and which property is being acquired for right of way purposes in connection with the West Portland-Tualatin Section of the West Portland-Hubbard Highway;*

Real property owned by Bessie Enyart, which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 24, Township 3 North, Range 2 West, W. M., Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 11 and is further identified in the records of the Highway Commission as file R 8316, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway;*

Real property owned by C. O. Anderson and Madeliene Anderson, which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 24, Township 3 North, Range 2 West, W. M., Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 12 and is further identified in the records of the Highway Commission as file R 8317, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-

Scappoose Section of the Columbia River Highway;*

Real property owned by Alberta L. Thomas and Herbert Thomas, which property is located in the southeast quarter (SE $\frac{1}{4}$) of Section 24, Township 3 North, Range 2 West, W.M., Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcels Nos. 13 and 14 and is further identified in the records of the Highway Commission as file R 8323, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway;*

Real property owned by G. F. Neff and Anna Neff, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 13, Township 3 North, Range 2 West, W. M., Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 15 and is further identified in the records of the Highway Commission as file R 8389, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway;*

Real property owned by The Board of Directors of School District No. 1 Joint of Columbia and Multnomah Counties, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 12, Township 3 North, Range 2 West, W. M., Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 16 and is further identified in the records of the Highway Commission as file R 8350, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway;*

Real property owned by Union High School District No. 4 of Columbia County, Oregon, which property is located in Block 1 of Wathome Addition to Scappoose, in Section 12, Township 3 North, Range 2 West, W. M., Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 17 and is further identified in the records of the Highway Commission as file R 8351, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway;*

Real property owned by First Congregational Church of Scappoose, which property is located in Wathome Addition to Scappoose, situated in Section 12, Township 3 North, Range 2 West, W. M.,

Columbia County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 18 and is further identified in the records of the Highway Commission as file R 8353, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway;*

Real property owned by Howard H. Harker and Elsie Harker, which property is located in the southwest quarter ($SW\frac{1}{4}$) of Section 25, Township 14 South, Range 15 East, W. M., Crook County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 19 and is further identified in the records of the Highway Commission as file R 7733, and which property is being acquired for right of way purposes in connection with the Jefferson County Line-Prineville Section of the Warm Springs Highway;*

Real property owned by Roy E. Earwood and Mae M. Earwood, which property is located in the southeast quarter ($SE\frac{1}{4}$) of Section 9, Township 14 South, Range 15 East, W. M., Crook County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 20 and is further identified in the records of the Highway Commission as file R 7836, and which property is being acquired for right of way purposes in connection with the Jefferson County Line-Prineville Section of the Warm Springs Highway;*

Real property owned by Oregon & Western Colonization Company, with a contract to purchase held by Mike McCabe, which property is located in the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 5, Township 14 South, Range 15 East, W. M., Crook County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 21 and is further identified in the records of the Highway Commission as file R 7670A, and which property is being acquired for right of way purposes in connection with the Jefferson County Line-Prineville Section of the Warm Springs Highway;*

Real property owned by Elwood W. Roberts and the Unknown Heirs of Walter E. Litsey, deceased, which property is located in the north half ($N\frac{1}{2}$) of the northeast quarter ($NE\frac{1}{4}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 21, Township 39 South, Range 19 East, W. M., Lake County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 22 and is further identified in the records of the Highway Commission as file R 7590, and which property is being acquired for right of way purposes in connection with the Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway;*

Real property owned by Clyde R. Gillette and Mary A. Gillette, which property is located in the south half (S $\frac{1}{2}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 36, Township 10 South, Range 8 West, W. M., Lincoln County, Oregon, which property is more particularly described on the attached sheet and designated as Parcel No. 23 and is further identified in the records of the Highway Commission as file R 8555, and which property is being acquired for right of way purposes in connection with the Nashville Section of the Eddyville-Blodgett Highway No.180.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*(The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original re-

NOV 12 1940

solution on file in the office of the State Highway Commission, Sales, being Resolution No. 5, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported a compromise settlement with Mrs. Delma Prewett disposing of her claim for extra compensation for damages to her property at Toledo arising out of the reconstruction of the Corvallis-Newport Highway at that place. He said that the Commission previously offered to pay Mrs. Prewett \$75.00 as settlement in full, which amount was refused. Also, that the Commission owes Mrs. Prewett an additional \$10.00 for some right of way. He stated, however, that Mrs. Prewett is now willing to settle both claims with the Commission for the sum of \$100.00. The Commission voted unanimously to pay her such sum as settlement in full for both claims.

The Commission discussed the Engineer's report on the changes proposed by Mr. L. A. McClintock, Pendleton, for the proposed Stanfield-Boardman project to avoid cutting up his cattle range and the reconstruction of the irrigation ditches and canals. The Engineer recommended against the change because it would introduce inferior alignment in the highway and would cost the State considerably more than construction on the originally-proposed alignment. The Commission indicated approval of the Engineer's recommendation but deferred a definite decision until the next meeting.

In this connection Chairman Cabell presented a letter from Donald T. Robinson, President of the Pendleton Chamber of Commerce, suggesting that the Commission carefully consider before adopting the route for this highway, the plans of the U. S. War Department to establish a munitions dump and a bombing range in this vicinity. It was the thought of the Commission that construction of the highway, as proposed, would act as a benefit to the munitions dump rather than as a detriment. Also, that the bombing range should not have to be taken into consideration because, according to information available, the site for the same is located many miles south of the proposed highway. However, the Commission ordered that right of way options for this project should not be closed until these matters have been studied thoroughly.

The Commission adjourned at 11:45 p.m. to reconvene on the following morning in the auditorium of the Public Service Building.

Portland, Oregon, November 13, 1940

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the lease of riparian rights along the Willamette River in Oregon City were opened and read in conformance with previously-published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 p. m. in the same room:

WOODBURN-MOLALLA-SILVERTON ROCK PRODUCTION

Crown Zellerbach Corporation	\$250.00

W. H. Lynch, District Engineer, Public Roads Administration, was present in regard to the financing of the oiling on the I. O. N. Highway, in Malheur County. He particularly referred to the State Highway Engineer's letter dated October 21, 1940, suggesting an arrangement for the financing of the bituminous surface treatment on the Owyhee-Nevada State Line Section of this highway by the advancement of state funds to pay the initial cost of the work, with the understanding that reimbursement would be received later from the Federal Government for the cost of the work performed on public lands if and when additional Public Lands Funds are provided by Congress for such purpose, such arrangement being similar to the arrangement heretofore effected for work on this highway in 1939. He said that the proposal is acceptable to the Public Roads Administration and that he would approve the allocation of all or any part of the balance of the 1940 Federal Lands Funds that may be appropriated by Congress and apportioned to Oregon, and such part of the 1942 Federal Lands Funds that may likewise be apportioned to Oregon, as are necessary for the proposed work on this project, subject to the condition that the Federal Government would not be called upon to reimburse the State for expenditures if the Federal funds are not appropriated and apportioned. Subject to written acceptance of these

conditions by the State Highway Commission, he said, the proposed work may be tentatively programmed for the 1941 fiscal year funds and construction of the project may be authorized, with the understanding that the project agreement will not be executed until the federal funds have been appropriated and are available for disbursement. He pointed out that of the 1941 fiscal year Public Lands Funds authorized by Congress only about one-half has as yet been appropriated, leaving a balance yet to be provided amounting to \$64,601.00.

After discussion, the Commission voted unanimously to accept Mr. Lynch's proposition and thereupon authorized the Engineer to proceed with the advertising of this project for bids to be received at the December meeting of the Commission.

Mr. Lynch also brought up for discussion the matter of revising the program for 1941 Forest Highway Funds insofar as it pertains to additional construction on the Santiam Highway. He pointed out that the program now contains an item of \$100,000 for the North Santiam Highway where it was contemplated work would be done between Detroit and Niagara in cooperation with the U. S. War Department, but it now appears that the funds will not be required on this highway until the fiscal year 1942. He suggested, in view thereof, that this amount be reallocated for additional work on the Santiam Highway between Hogg Pass and Suttle Lake so as to expedite the completion of the oiling on this highway. He also suggested that the State contribute toward this work an additional sum of \$50,000 which is needed to finance certain widening work on this section in order to provide a standard improvement, inasmuch as there are no Forest Highway Funds available to pay such expense. After considerable discussion, the Commission approved the arrangement proposed by Mr. Lynch and it was agreed that the matter would be covered by joint letter to the Chief of the Forest Service and the Commissioner of Public Roads. (Letter signed later in this session.)

Mr. Lynch also brought up for discussion the matter of conducting surveys for access roads at Fort Stevens. He asked the Commission to authorize such surveys and advised that the Federal Government would reimburse the State for the cost thereof from federal aid funds. The Commission, by unanimous vote, authorized the State Highway Engineer to make such surveys and also authorized him to confer with the U. S. Army Engineers relative to the proposed roads under discussion.

The Commission discussed the proposed landscaping project along the Pacific Highway East within the city limits of Oregon City and authorized the Engineer to proceed with the preparation of plans for this project and to advertise the same for bids as soon as plans are completed, omitting therefrom landscaping work in front of property owned by Mr. Jerry Hemingway, in Block 11, because it appears that when right of way was acquired from Mr. Hemingway he was given to understand that he would have right of access to the highway from his property.

The matter of the sale of certain property in Oregon City to Mr. Harry S. Coleman, which property is located on the easterly side of the highway near the Abernethy Creek Bridge was reconsidered by the Commission. The

Attorney advised that the arrangement suggested by the Commission to Mr. Coleman at the previous meeting for entrance to this property, if purchased by him, apparently is not satisfactory to Mr. Coleman and, unless the Commission will grant him right of access to the highway at the place that he wants, the probabilities are that he will not complete his deal for the purchase of the remaining property in this block, which is owned by the Crown Willamette Paper Company. Further, that in conversation with Mr. Frumm, of such company, Mr. Frumm asked that, if the Commission will not permit access to the highway, the State buy the company's property for \$7,000, which is the amount that Mr. Coleman previously agreed to pay for it. The Commission considered that \$7,000 is far more than it is justified in paying to bar access to the highway and decided to let the entire matter rest in status quo. However, the Engineer was instructed to set right of way stakes clearly outlining the State's property at this location.

The Secretary presented resolutions from the County Courts of Klamath County, Lane County, Tillamook County, and Linn County, requesting the following secondary state highway designations:

1. Old route of The Dalles-California Highway between Klamath Agency and Modoc Point, in Klamath County.
2. Connecting road between the Pacific Highway and Route "F" Highway near the westerly city limits of Eugene, being more particularly between extensions of 6th Street and 11th Street, Eugene, Lane County.
3. Netarts County Road between the City of Tillamook and the town of Oceanside, in Tillamook County.
4. Extension of the Corvallis-Eastside Secondary Highway from the old Pacific Highway route to the new Pacific Highway route in Albany, Linn County.

The Commission approved the requests inasmuch as they are in conformity with understandings previously had with the respective County Courts and thereupon adopted the following resolutions with regard thereto:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Klamath County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose

of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Klamath County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Klamath Agency-Modoc Point Secondary State Highway No. 427:

Beginning at the intersection of the formerly located, constructed and traveled Dalles-California Highway with the relocated and reconstructed Dalles-California Highway near the Klamath Agency; thence in a southerly direction via the formerly located, constructed and traveled Dalles-California Highway to an intersection of the formerly located, constructed and traveled Dalles-California Highway with the relocated and reconstructed Dalles-California Highway at Modoc Point, a distance of 12.66 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Lane County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways

heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Lane County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Secondary State Highway No. 224:

Beginning at a point in the Pacific Highway approximately 1,130 feet southerly from the south end of the viaduct crossing over the Coos Bay Branch of the S.P.R.R.Co.; thence in a southerly direction to the extension of West 11th Street at a point approximately 1,000 feet westerly of the west city limits of Eugene and near the intersection of Hayes Street with the extension of West 11th Street, a distance of approximately 0.821 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Tillamook County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Tillamook County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Netarts Secondary Highway No. 131:

Beginning at a point on the Oregon Coast Highway in the City of Tillamook; thence westerly via Netarts to Oceanside, a distance of approximately 9.8 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Linn County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Linn County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved

as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

An Extension of the Corvallis-East Side Secondary State Highway No. 210:

Beginning at the intersection of the former Pacific Highway (East) southwest of Albany with the Corvallis-East Side Secondary State Highway No. 210; thence in an easterly direction to an intersection with the reconstructed Pacific Highway (East), a distance of approximately 0.20 mile.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

The Commission discussed, and referred to the State Parks Superintendent, a letter from R. M. Nance, Portland, urging the Commission to purchase certain timber strips along the newly-designated secondary highway known as the Metarts Road, in Tillamook County.

The Secretary presented a request from the County Court of Columbia County for the designation as a state secondary highway of the county road which extends from the Nehalem Highway at Treharne to a connection with the Wolf Creek Highway at Sunset Camp. The Commission denied the request.

The matter of allowing a Mrs. E. Martin to continue occupancy of certain state-owned property adjacent to the Salmon River Highway in the vicinity of Boyer had the attention of the Commission. It was reported that Mrs. Martin is now occupying the property under arrangement made by her late husband with the Miami Corporation which owned the property before it was acquired by the State, such arrangement allowing him occupancy of the premises during his lifetime. Further, that Mr. Martin died some time ago but Mrs. Martin, who is elderly, continues to occupy the premises under the belief that she has such right to do so under the arrangement made by her husband with the Miami Corporation. It was also reported that Mrs. Martin is conducting a service station business on the property and that a number of her relatives are also maintaining their residences on state property nearby, although they have obtained no special permission so to do. The Attorney advised that he contacted Mrs. Martin relative to vacating the premises and the purchase of her service station but she stated her unwillingness to move unless paid the sum of \$500.00. He also said that he contacted the other people who are maintaining homes on the state's property and all have indicated that they will vacate as soon as ordered to do so by the State Highway Commission.

After full discussion of this matter the Commission decided to allow Mrs. Martin to maintain her residence and service station on the property dur-

ing the balance of her lifetime, limiting the space to be occupied to the area necessary for this purpose, and it was also decided to order the other people to vacate the premises within a period of six months.

The Attorney presented a provision which the State of Michigan incorporates in its deeds and easements controlling advertising signs on private property adjacent to highway rights of way where portions of such property have been acquired for highway right of way purposes. The Commission evidenced approval of the provision for inclusion in deeds and easements for highway right of way in Oregon but decided not to take definite action on the same until after the meeting of the 1941 Legislature.

The Commission discussed an exchange of properties south of Waldport in Lincoln County with a Mr. J. A. Davenport. The Attorney advised that a 10-foot strip of Mr. Davenport's land is needed for widening the highway right of way and that Mr. Davenport is willing to deed this property to the state provided the state will deed to him, as consideration, a short section of the right of way of the old Spruce Production Railroad at the rear of his premises which same is 30 feet wide, and that Mr. Davenport has agreed to move the buildings from the strip that is to be deeded to the state. He recommended approval of the transaction as did also the State Highway Engineer. The Commission approved the recommendation by unanimous vote subject to the condition that Mr. Davenport will move the buildings at his own expense and will re-establish them at a location that will not require people to park their cars on the highway right of way when doing business in his establishment.

The matter of selling to Mr. O. D. Keiffer certain state-owned property adjacent to the Salem-Dayton Secondary Highway near Grubb College was also discussed by the Commission. The Engineer advised that he has inspected this property and that it is his recommendation that the tract be sold to Mr. Keiffer, except a 10-foot strip along the front of the same which should be retained by the state for future highway development. The Commission approved the recommendation.

The Commission considered a request from Mrs. Wm. Wamsley, Eugene, to either purchase or rent a residence building owned by the State Highway Department adjacent to the maintenance headquarters in Eugene. The Engineer recommended denial of the request because the building can be used to good advantage as headquarters for the sign painting crew. The Commission approved the recommendation.

The Attorney reported receipt of two offers to purchase the residence building on the T. B. Garrison property north of Oakland which building was advertised for sale at the last meeting of the Commission but no bids were received. The present offers, he said, are those of Mrs. Bert Pound, Oakland, at \$25.00, and Mr. Kelly Cooper, Oakland, at \$20.00. He recommended acceptance of the offer of Mrs. Pound. The Commission approved the recommendation.

The Attorney reported receipt of a letter from the Southern Pacific

Company requesting early settlement with the company for right of way needed for the proposed Front Avenue Project in Portland. The Commission denied the request because it does not fit in with the method adopted for financing of right of way for this project.

The matter of purchase of the Elisabeth C. Coleman property adjacent to the Oregon Coast Highway at the north end of the Coos Bay Bridge had the attention of the Commission. The Attorney explained that Mrs. Coleman's building burned some time ago and in all probability the Commission now would be able to purchase her land at reasonable cost. He recommended negotiations because the property is desirable for protection of the bridgehead. The Commission authorized the Attorney to secure options for the purchase of the tract and report the same at the next meeting.

Mr. W. C. Calder, Baker, and his attorney, Mr. W. M. Huntington, Portland, came before the Commission in regard to Mr. Calder's land situate at Arch Cape which was damaged by reason of the sliding of the highway embankment at this location. Mr. Calder stated that he was present when the highway department's engineer made a survey of the damaged area and is personally satisfied with the same. The slide area, he said, contains about three acres of land. He gave as his thought that the state should not only purchase such area but sufficient land beyond the toe of the slide to insure against future damage to his property. He also said that he would like to retain the level land along the south side of the surveyed tract because it is the only level land in the vicinity suitable for building sites. He presented a statement of recent sales of real property in the vicinity of Arch Cape and advised that on the basis of such sales he would deed to the state the land included in the slide area for the sum of \$5,000 provided the Commission would clean up the fallen timber and other debris that resulted from the slide. The Commission took the matter under advisement, however indicated to Mr. Calder that it considers his offer exorbitant.

Messrs. Ed Turnbull and Fred Brenne of the Eugene Chamber of Commerce came before the Commission and inquired as to the probabilities of securing early construction on the proposed realignment of the Pacific Highway between Eugene and Springfield. They were informed that uncertainty still exists relative to the federal funds with which the Commission proposes to finance this work, hence no new information is available.

Mr. Turnbull asked the Commission to proceed with the acquisition of right of way for the proposed 7th Street approach of the Pacific Highway into Eugene from the north. The Commission, after discussion, authorized the Attorney to proceed with the securing of options for such right of way and for right of way needed for the newly designated secondary highway between 6th Street and 11th Street, including sufficient area at 11th Street to accommodate a traffic grade separation structure.

The Assistant Attorney presented the request of Monrad Underland that settlement be made for certain lots belonging to him which had been isolated by the slide occurring on the Bunker Hill project near Marshfield. The

Commission authorized the taking of an option for the purchase of these lots if a satisfactory price can be secured.

The Commission reconsidered and confirmed its previous action approving renewal of agreements with the several hospital associations providing service to state highway department employees during 1941, with a modification eliminating therefrom the obligation to furnish medicine in all but hospitalization cases. In this connection the Attorney advised that the Multnomah Medical Service Bureau desires to substitute its standard contract agreement for the form prepared by the state highway department. He recommended against the substitution because it is inconsistent with the agreements with the other hospital associations and would place the responsibility for the payment of the monthly premiums on the state highway department. The Commission approved the recommendation.

The Engineer recommended the abandonment of a portion of the Tiller-Trail Highway, in Jackson County, and the Pendleton-Adams Section of the Oregon-Washington Highway, in Umatilla County, where these highways have been reconstructed on new alignment rendering the old sections valueless from the state highway standpoint. The Commission approved the recommendation and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Tiller-Trail Highway in Jackson County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Trail Creek-Trail Section of the Tiller-Trail Highway but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land

or portion of the old right of way abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Jackson County for highway or other public purposes as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that portion of the sixty-foot right of way of the Tiller-Trail Highway (as originally established by resolution) between a point on said highway approximately 800 feet north of the south line of Section 17, Township 33 South, Range 1 West, W. M., and the westerly right of way line of the Crater Lake Highway in the northwest quarter (NW $\frac{1}{4}$) of Section 3, Township 34 South, Range 1 West, W. M., lying outside of the limits of the right of way as established on the revised alignment of said highway in 1939 and 1940.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of K. D. Lytle, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated October 11, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Jackson County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Jackson

*Map filed Right of Way Abandonment and Retention File - No. 80

County and beyond any responsibility or supervision by the State Highway Commission.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate the Pendleton-Adams Section of the Oregon-Washington Highway in Umatilla County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Pendleton-Adams Section of the Oregon-Washington Highway in Umatilla County, but is now without the limits of the right of way of said highway as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway. The portion of the right of way of said highway within the corporate limits of the City of Adams and which by this resolution is abandoned is left to revert to the abutting owners or to the City of Adams for such public use as the City may elect to make of the same, and the portion of the right of way which by this resolution is abandoned and which is not within the city limits of the City of Adams is left to revert to the abutting property owners or to the control and supervision of the County Court of Umatilla County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Pendleton-Adams Section of the Oregon-Washington Highway lying on the northerly side of the right of way required for

the reconstructed Oregon-Washington Highway; the beginning and ending points with reference to the engineer's stations of the said reconstructed highway being Station 37+00 on the westerly end and Station 640+00 on the easterly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of W. C. Williams, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated October 15, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red *

2. Since the highway as now located does not traverse any of the existing streets of said City and especially does not traverse any portion of Preston Street, Main Street or Commercial Street, which heretofore were designated by the Highway Commission as streets of the City of Adams over which there was routed traffic using the Oregon Washington Highway. Said original designation hereby is vacated and annulled and state traffic will no longer by order of the Highway Commission be directed or routed over any of said streets.

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned highway, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

4. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Umatilla County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land which lies outside the city limits of the City of Adams, and a certified copy thereof promptly delivered to the Mayor of the City of Adams, together with a copy of said map or exhibit, for such action as the City authorities may desire to take with respect to said abandoned section of highway within said City of Adams; and should said abandoned portion of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of

*Map filed Right of Way Abandonment and Retention File - No. 81

Umatilla County or the municipal authorities of the City of Adams, as the case may be, and beyond any responsibility or supervision by the State Highway Commission.

The Commission also considered and by unanimous vote adopted the following resolution outlining the activities and authority of the State Parks Superintendent:

WHEREAS, as a part of the powers and responsibilities imposed upon the Highway Commission by the provisions of Chapter 529, Oregon Laws, 1939, and acts prior thereto, the Commission is authorized to acquire by purchase, agreement, donation or by the exercise of the power of eminent domain real property necessary or deemed necessary for the maintenance and development of parks, parking places, auto camps, campsites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road user; and

WHEREAS, by said statute the Commission is authorized to determine and adopt the general policy of the Highway Department, to decide all questions relating to the administration of the Department and to make such rules and regulations as it may deem necessary for the accomplishment of the purposes of said law; and

WHEREAS, the Commission is authorized to appoint an engineer to be known as the Highway Engineer, and said Highway Commission is also authorized to employ such other engineers, technical assistants and such other help as may be deemed necessary for the proper administration of the act; and

WHEREAS, the Commission has heretofore, pursuant to the recommendation of the Engineer, employed S. H. Boardman and has designated him as State Parks Superintendent; and

WHEREAS, it has been and still is the policy of the Oregon State Highway Commission to cooperate with the Federal Government in the acquisition and development of parks, recreational grounds, camps and other places of recreation and amusement; and

WHEREAS, under the law, the Highway Commission is authorized to develop, construct, improve, operate and maintain its parks, parking places, recreational areas, resorts and other places of attraction and amusement and pay the cost thereof out of state highway funds; and

WHEREAS, for the purpose of expediting some of the work connected with state parks and state recreational areas it is the desire and purpose of the Commission to vest in the said S. H. Boardman certain authority and responsibility:

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That S. H. Boardman in his capacity as State Parks Superintendent hereby is, subject to the conditions and limitations hereinafter stated, instructed to cooperate with the Federal Government in matters having to do with the construction, improvement and maintenance of state parks and other recreational grounds or places, and in such capacity may cooperate with representatives of the Federal Government in the selection and designation of locations for C. C. C. Camps, and may recommend for improvement with C. C. C. forces or other government forces or funds the state parks or recreational areas to be developed with such forces and such funds.

2. Upon selection or designation of a location for the establishment of a C. C. C. camp and upon the selection or designation of a state camp or state recreational area recommended for any type of improvement or development, whether the same be with state funds alone or with state and/or federal funds, he shall submit such project to the Highway Commission for approval and ratification.

3. The said State Parks Superintendent shall prepare and submit to the Highway Commission quarterly a general report of the work accomplished during the period covered by such report, including the funds disbursed, whether state or federal, which report shall be made with sufficient detail to give to the Commission a comprehensive understanding of the work done, the location of the same, and the amount of funds expended in connection therewith.

4. In the event of an emergency requiring a prompt decision on the part of said superintendent with respect to any matter coming under his jurisdiction he shall contact the Chairman of the State Highway Commission by telephone or otherwise for instructions, and in the event the matter or matters submitted are deemed by the Chairman of sufficient importance to require immediate decision the Chairman may instruct the said Superintendent in the premises, and thereafter the matter shall come to the attention of the Highway Commission for ratification at its next meeting.

5. This resolution may be rescinded, modified, enlarged or otherwise changed from time to time as in the opinion of the Commission the circumstances warrant.

6. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof shall be furnished to the Public Roads Administration and other federal agencies having to do with the supervision of C. C. C. camps, and state parks or other recreational areas.

The Attorney brought up for discussion a controversy with the Hartman Abstract Company, Pendleton, with respect to charges made for the furnishing of title reports on real property that is to be purchased by the state highway department for right of way and other purposes. He said that he has gone over thoroughly the several items making up the claim of this company and is recommending for payment every item that he could find any reasonable justification for payment which reduces the aggregate of the Company's claim from \$179 to \$88. He submitted a list of the several claims (see letter dated November 9, 1940, directed to Oregon State Highway Commission) and explained the circumstances surrounding each item listed thereon. It was his recommendation that settlement be made with the company on the basis of the reduction in the aggregate amount. The Commission approved the recommendation unanimously.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p.m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Engineer discussed with the Commission matters pertaining to the proposed improvement of the Oregon Coast Highway between North Bend and Marshfield, particularly the relocation of the Southern Pacific Railroad Company's tracks along Railroad Avenue and Tremont Avenue in North Bend, and along Front Street and Tremont Street in the district between North Bend and Marshfield. He exhibited a map showing the proposed alignment which necessitates removal of the railroad tracks so as to provide a highway of sufficient width to carry traffic conveniently and with safety. He explained the plans for the project in detail and suggested that inasmuch as the railroad company is occupying its present location by reason of a limited franchise, an equitable method of handling the moving of the tracks would be for the State to purchase new right of way for the railroad and construct a suitable grade thereon for the tracks, giving to the railroad company a perpetual easement for the use of the same. Under this arrangement, he said, the railroad company would be required to do the actual work of re-establishing its tracks on the new right of way. He requested authority from the Commission to submit the maps and plans to the railroad company for its approval in view of the fact that the reconstruction of the Oregon Coast Highway between North Bend and Marshfield is scheduled for the not distant future. After discussion, the Commission approved the Engineer's request by unanimous vote.

The Commission discussed its proposed inspection trip to Klamath Falls and decided to make such trip during the week starting December 2, 1940.

The Commission also discussed an invitation from the Ashland Chamber of Commerce to be the Chamber's guests at a celebration, either during the last week in November or during the first week in December, 1940, to dedicate the recently completed Siskiyou Section of the Pacific Highway. Chairman Cabell and Commissioner Oliver expressed regrets that they could not attend this function if it is held any time before the week following the Klamath Falls Trip. Commissioner Clough stated that he would be pleased to represent the Commission if the celebration is held before the week of the Klamath Falls trip. The Engineer was instructed to so inform the Chamber of Commerce.

The Engineer reported on investigations that have been made of conditions which have contributed to a controversy among people in Lincoln County relative to the taking of gravel from the ocean beaches. (Written report dated September 30, 1940, directed to F. D. Eason, Division Engineer, and signed by Paul Van Scoy and F. D. Thompson, representing the construction and parks departments). He stated that this matter has been given very careful study and that numerous local citizens have been interviewed with respect thereto and it is the consensus of opinion of nearly all that, if the Commission would prohibit the taking of gravel and sand in large quantities necessitating the use of power loaders and scraping equipment, the main objections would be satisfied. He read aloud the report of Messrs. Van Scoy and Thompson on this subject and pointed out that these Engineers recommend the maintenance of signs at the following locations: Roads End, Oregon Coast Highway Mile Posts 127.0, 128.8, 137.3, 146.7, 150.3, 152.03, and 165.5, prohibiting the use of power loading or scraping equipment in the taking of gravel or sand from the beaches at these points and further prohibiting the taking of rock larger than 5" in diameter. He also pointed out the recommendation that no gravel be taken from the beaches at these locations for use either in state highway contract work or state force account work and advised that he concurs in the recommendation. After discussion the Commission approved the recommendation unanimously and instructed the Engineer to see that the signs are erected in accordance therewith.

A letter was presented from the Farmers' Union, Pedee, Oregon, requesting the oiling of the uncompleted two-mile section of Secondary Highway No. ~~223~~¹⁹⁰, in Polk County, so as to connect up sections previously oiled. The Engineer advised that this project is already included in the tentative budget for next year's construction. The Secretary was instructed to so inform the Union.

A letter was also presented from the North Bend Chamber of Commerce asking for the early completion of the Deadman's Curve Project on the Cape Arago Secondary Highway. The Engineer advised that this work was started during the past summer but was not completed because of adverse weather conditions, however it is planned to finish it as early as possible next year with state forces. The Secretary was instructed to so inform the Chamber of Commerce.

A request from Cottage Grove School District No. 25J for the con-

struction of a turn-around for school busses on the Pacific Highway near the Lane-Douglas County line had the attention of the Commission. The Engineer advised that this matter has been investigated by Division Engineer Lytle who advises that in order to provide for the turn-around additional right of way will have to be acquired. He estimated the cost of the right of way at about \$75 and construction of the turn-around, including re-establishment of property fences, at \$248. The Commission deferred a decision in the matter until the next meeting and instructed the Attorney in the meantime to secure an option for the right of way.

The Secretary presented requests as follows for sidewalk construction on state highway rights of way: (1) request of the City of Amity for sidewalk construction on the Pacific Highway West; (2) request of the City of Reedsport for sidewalk construction along Winchester Avenue from Scholfield Bridge to the city limits; (3) request from residents of Toledo for sidewalk construction along the Corvallis-Newport Highway in Toledo for a distance of about one-half mile. Action on these requests was deferred by the Commission until the next meeting. The Engineer was instructed to submit his report on the state-wide program of sidewalk construction at that time.

A delegation from Cascade Locks, consisting of Mayor L. L. Amoth, W. N. Keller, President of the Chamber of Commerce, J. Flaucher, Manager of the City Light Plant, and S. P. Ness, City Attorney, was present. Mr. Flaucher headed the group. They stated that the City of Cascade Locks has been severely criticised by newspapers of the state for causing the arrest of autoists who drive their cars through their city at a rate of speed in excess of 40 miles per hour; also that, while they do not want to appear to be too harsh on traffic, in their opinion 40 miles per hour is too fast to travel through a built-up community such as theirs. He asked the assistance of the Commission in solving this problem and particularly requested the maintenance of 35-miles-per-hour speed-limit signs and the installation of two flashing beacons over the highway, one at the school and the other at the intersection leading to the fire station. He said that the city would pay for the traffic lights if the Commission would authorize them to be maintained over the highway. They also asked for the painting of pedestrian lanes across the highway at certain locations, and that the sight distance at a curve near the east city limits be improved by the removal of brush from the highway right of way. After considerable discussion the Commission advised that it would have the signs erected if the city would adopt an ordinance establishing a 35-mile-per-hour speed limit through the city. The Engineer was instructed to investigate the justification for installing flashing signals and the painting of the pedestrian lanes. He was also instructed to investigate the matter of improving the sight distance at the curve east of town.

Mr. Keller then requested authority for the city to do certain work on the state highway right of way as may be required in connection with the construction of new street connections. He requested particularly that the city be given authority to cut the concrete curb at such intersections, all

of which work is to be done as a WPA project. The Commission approved the request unanimously provided the work is done in conformance with state highway standards and without interference with highway traffic and under the condition that the city would assume responsibility for any obligation that might be incurred by reason of traffic accidents that might occur as a result of its operation, and will clean up the premises when the work is completed. The Secretary was instructed to confirm the approval in writing.

Dr. F. W. Starring, Dr. C. S. Tunnell, and W. O. Sias, members of the Baptist Church Conference, appeared before the Commission relative to the removal of the Baptist Church recreational facilities from land that the State Highway Commission has in mind to purchase from a Mr. Giesendorfer at Cascadia for state park purposes. They advised that since discussing this matter with the Commission at a previous meeting they made diligent search in the vicinity of Cascadia for a suitable site on which to re-establish their facilities but have been unsuccessful although they did find a suitable site about 40 miles from Portland. The objection to this site, they said, is that it is so far removed from Cascadia which would prevent them from moving their facilities from that point unless the Commission would allow them an extra payment of \$500 over and above the \$4,000 heretofore tentatively agreed upon. The Commission took the matter under advisement and informed them that they would be notified within a few days as to the action the Commission may take. (This matter was reconsidered by the Commission later in the session at which time the Commission decided in view of the complications involved in this transaction to make an offer of a flat sum of \$20,000 for the property free and clear of all incumbrances including the Baptist Church recreational facilities and the caring for Mr. Giesendorfer in his old age. In the event an offer on such basis is refused then the matter is to be dropped entirely.)

Mr. R. L. Sprague, representing the Waitsburg Welding Company of Waitsburg, Washington, and Mr. L. S. Kuhn, representing the Bethlehem Steel Company, Portland, came before the Commission on behalf of the request of the Waitsburg Welding Company to operate over a short section of the Old Oregon Trail between the Washington State Line, near Wallula, and Maryhill Ferry, truck and semi-trailer equipment having an overall length in excess of the 35-foot limit specified by Oregon statutes for such equipment. Mr. Sprague stated that his company frequently has occasion to transport structural steel from Portland to Waitsburg and, in order to avoid a roundabout route and to save many miles of travel over highways in the State of Washington, they have been entering the State of Oregon on the Columbia River Highway near Wallula and using the Oregon highways as far as Maryhill Ferry, where they cross back into the State of Washington. Their equipment, he said, is legal in the State of Washington but it is not legal in the State of Oregon and he has been refused a permit from the Salem office of the Commission to operate the same in Oregon. He urged the Commission to authorize the granting of this privilege. Otherwise, he said, it would be necessary for them to do business in Seattle and advised that they would not haul more than one or possibly two loads per month. The Commission approved the request at least until the 1941 Legislature meets.

County Judge Bert Johnson of Morrow County was present and inquired whether or not the Commission has as yet made a decision with respect to the oiling of the section of the Oregon-Washington Highway between Heppner and Lena. He was informed that the Commission has not had an opportunity to discuss this matter but would do so at the next meeting.

Inquiry was made of Judge Johnson as to how the Heppner-Lena reconstruction project rates with other proposed highway projects in Morrow County. Judge Johnson replied that the Heppner-Lena improvement is first in priority insofar as the County Court is concerned and he urged the Commission to give it every consideration in the next program.

The matter of adopting a permanent route for the Oregon-Washington Highway between Milton and the Washington State Line was brought up for discussion by the Engineer who recommended the following described route which, he said, connects with the Washington Section of this highway as surveyed by the Washington Highway Department:

Beginning at the intersection of the North and South center line of the West $\frac{1}{2}$ of Section 12, T. 5 N., R. 35 E., W. M., and the center line of Main Street, in the Town of Milton; thence North along the North and South center line of the West $\frac{1}{2}$ of Sections 12 and 1 of T. 5 N., R. 35 E., and Sections 36, 25, 24 and 13 of T. 6 N., R. 35 E., to the boundary line between the State of Oregon and the State of Washington.

He presented a map showing the proposed alignment, which map is dated November, 1940, and bears the signature of himself and that of James A. Davis, Acting Director of Highways for the State of Washington. After discussion, the Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the Oregon-Washington Highway is defined and located as follows: Beginning at a junction of the Old Oregon Trail in Pendleton, northeasterly by way of Adams, Athena, Weston, Milton and Freewater to the Oregon-Washington state line; and

WHEREAS, it is the purpose of the Highway Commission to relocate a portion of said highway so that there may be made possible the construction of a highway having a better alignment and one that will be more serviceable for the general public.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and affirmatively voting, as follows:

1. That the route and location of the Oregon-Washington Highway between Milton and the Oregon-Washington state line shall be as follows:

Beginning at the intersection of the north and south

center line of the West one-half of Section 12, Township 5 North, Range 35 East, W. K., and the center line of Main Street in the Town of Milton; thence north along the north and south center line of the West one-half of Sections 12 and 1 of Township 5 North, Range 35 East and Sections 36, 25, 24 and 13 of Township 6 North, Range 35 East to the boundary line between the State of Oregon and the State of Washington.

2. That the above defined and described route and location shall be and the same hereby is adopted as the permanent route and location of the Oregon-Washington Highway between said termini.

3. That until a highway over the said new route has been constructed and made available for public travel the present or existing highway route between said termini shall be continued and maintained by the Highway Department for public use.

4. When a highway over the new and permanent route has been constructed and thrown open for public traffic, then an appropriate resolution shall be adopted and entered in the minutes and records of the Commission by which the Commission will declare and define the future status of the present existing route.

5. That the blueprint bearing the date of November 13, 1940, and the signatures of R. H. Baldock, State Highway Engineer of the State of Oregon, and Jas. A. Davis, Acting Director of Highways for the State of Washington, be and said map hereby is approved and adopted as a map showing in detail the location of said highway as relocated and defined.*

6. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the Public Roads Administration and a like copy to Umatilla County, and a like copy to the Director of Highways in the State of Washington, together with a copy of the above mentioned map.

The Engineer also brought up for discussion the matter of allowing vacations to Highway Department employees who are paid on the hourly basis. He gave as his thought that such employees are entitled to a certain amount of time off each year, with pay, as are allowed employees who are paid on a monthly basis, and recommended approval of such an arrangement for the benefit of employees who have worked a total of 1500 hours or more during the year, the number of hours allowed off with pay to be computed at the rate of 4 per cent of the total hours worked. Also, in view of the fact that some of these employees are paid at several different rates during the year, that the rate to be used in computing the amount due each such employee be determined by using the average of his hourly rates. The Commission approved the Engineer's recommendation and set July 1, 1940, as the starting date for the recording of hours worked, so as to give the employees an opportunity to

*Map filed Adoption of New Highway Routes File - No. 16

secure vacations after July 1, 1941.

The Commission discussed the matter of payment of the proposed sewer assessment against state-owned property in the town of Ontario and authorized the payment of such assessment in the event investigation reveals that the State Highway Department will receive benefits from the sewer.

Consideration was given by the Commission to the claim filed by a Mr. Dage, Canyonville, who alleges that the highway department maintenance crew damaged his fence and deposited debris on his land. Commissioner Clough advised that he is personally familiar with this claim but considers it entirely out of proportion to the damage, although Mr. Dage is entitled to some consideration. After discussion, the Commission authorized the Engineer to negotiate a settlement with Mr. Dage on the basis of cleaning up the material deposited on his land by state highway forces and the repairing of his fence to the extent necessary to place it in as good condition as it was before the damage was done.

The Commission discussed and approved a form letter presented by the Attorney for distribution to property owners who maintain electrified fences along highway rights of way, and authorized the Secretary to sign such letters on behalf of the Commission. (See copy of letter in general correspondence file dated December 5, 1940)

A letter was presented from the Honorable Walter E. Pearson, State Treasurer, suggesting a cooperative arrangement between his office and the State Highway Department for the employment of a man to investigate the collection of delinquent traffic fines and the determination of the liability for such fines in cases of doubt. He suggested a renewal of the arrangement previously in effect between these departments, which provided for the payment of the salary of the employee 50 per cent by the State Treasurer and 50 per cent by the State Highway Department, and for payment by the State Highway Department of that part of his traveling expenses which are incurred entirely in connection with the examination of dockets of Justices of the Peace, Circuit Court journals, and other records in connection with accountability of Justices of the Peace of all counties for traffic fines owing the State. He proposed that the salary of such employee be set at \$200 per month. The Engineer recommended approval of this arrangement. The Commission approved the recommendation by unanimous vote subject to the condition that it may be terminated at any time that the Highway Commission deems advisable and will be reconsidered under any law bearing on the matter that may be enacted by the State Legislature.

Consideration was given by the Commission to the matter of continuing the arrangement had during the past summer with Oregon State College for broadcasting highway information over Radio Station KOAC. The Engineer recommended renewal of this arrangement for the summer 1941 but that the College's request for State Highway Department participation in broadcasting during the winter season be denied. The Commission approved the recommendation.

The Commission discussed a request from contractor S. S. Montague for relief from the payment of penalty assessed against him for failure to complete his contract No. 2184, construction of the Read Creek-Wren Creek Section of the Kings Valley Secondary Highway, in Polk County, within the specified time limit. The Engineer advised that this contract was awarded on May 26, 1939, and that the date of completion specified therein was September 30, 1939. However, Mr. Montague was unable to finish the job during 1939 on account of adverse weather conditions which did not permit oiling operations until the spring of 1940. Further, that the Commission previously approved an extension of time subject to the condition that the contractor reimburse the State for extra engineering expense incurred subsequent to the specified date of completion and would also pay \$50.00 per month for maintenance operations during the shut-down period. Investigation discloses, he said, that very little engineering work was performed on the job during the winter season although the cost records indicate an expenditure of \$197.50 for the month of November, 1939, which was determined by pro-rating engineering expenses for this month over several different jobs, whereas, such expense, in his estimation, should have been charged only to the jobs that were actually under way. He recommended, in view thereof, that Mr. Montague be relieved of the payment of the engineering expense, amounting to \$197.50, incurred during the month of November. The Commission approved the recommendation and so ordered.

The Engineer reported receipt of a letter from Dr. Warren D. Smith, Head of the Department of Geology, University of Oregon, relative to the securing of concise descriptions of interesting geological features along various state highways for general public information. He said that if the Commission desired to cooperate in this matter it would be necessary to employ an extra man to do the work because he could not spare anyone from his present force, and inquired whether or not the Commission is sufficiently interested to authorize the payment of the cost involved. The Commission deferred a decision in the matter pending further report from the Engineer after consulting with Dr. Smith.

The Commission discussed a letter from the City of Salem requesting ratification of its resolution No. 4444, passed by the City Council on October 7, 1940, designating North Capitol Street and 12th Street, in Salem, a through route for truck traffic. Also, requesting the State Highway Department to furnish and maintain appropriate signs along such route from the intersection of North Capitol Street with the Fairgrounds Road, to the junction of South 12th Street with the Pacific Highway West, south of Salem. The Engineer advised that this route described comes under three classifications; viz.: (1) State highway along North Capitol Street southerly to Court Street, thence easterly to 12th Street, thence southerly to State Street; (2) City Street along South 12th Street from State Street to the city limits; (3) County road, being an extension of South 12th Street, from the city limits to the junction with the Pacific Highway West.

He pointed out that the City's resolution has no legal standing until ratified by the State Highway Commission, insofar as it pertains to the state highway, and by the County Court with respect to the county road. He

recommended approval of the request and that he be authorized to erect signs in conformance therewith, provided Marion County Court will also ratify the City's resolution. The Commission approved the recommendation unanimously.

The Engineer requested authority to purchase the following equipment:

12 automobiles of Ford and Chevrolet type to replace 12 old cars - estimated cash outlay with trade-in of old cars, \$7,500

1 forward-dump truck, with drum attachment, for use on Wolf Creek Highway - estimated cost \$1,800

1 long-wheelbase truck chassis for sign crew - estimated cost \$900 plus \$400 to construct special body

5 hand-operated, $\frac{1}{2}$ H.P. spray paint machines for sign crew - estimated total cost \$750

1 cab-over-engine truck for traffic line crew - estimated cost \$1,000 plus \$100 to construct body

1 long-wheelbase truck for bridge crew - estimated cost \$850 plus \$100 to construct body

1 long-wheelbase truck for bridge crew - one old truck to be traded in as part purchase price - estimated cost \$850

2 4-H.P. dragsaws for use at Santiam Junction and Odell Lake maintenance headquarters - estimated total cost \$220

After discussion, the Commission approved the request by unanimous vote and instructed the Engineer to make the purchases through the State Purchasing Agent in accordance with the usual practice.

The Engineer reported that in conformance with authority previously granted him by the Commission he awarded to contractor G. L. Potts, on October 21, the contract for the construction of three culverts on the Lower Columbia River Highway, the Beaverton-Aurora Highway and the Tualatin Valley Highway, the conditions of the award having been satisfied, and Mr. Potts' bid being the low one submitted to the Commission on October 11, 1940, for such work. He also reported that on November 9, 1940, he awarded to contractor Roy L. Houck the contract for the construction of the North Marshfield and Marshfield Bunker Hill Sections of the Oregon Coast Highway, the conditions of the award having been satisfied and Mr. Houck's bid being the low one submitted for this work on October 11, 1940. The Commission, by unanimous vote, approved the awards as reported by the Engineer.

The Commission considered the request from J. R. Morris for a per-

mit authorizing him to transport logs over the Columbia River Highway between Mosier and Hood River, necessitating the use of Mosier Tunnel. The Engineer recommended that the request be denied. The Commission approved the recommendation.

The Commission also considered the application of the J. E. Flurry Lumber Company, Ashland, for permission to truck-haul logs over the $\frac{1}{2}$ -mile section of the Green Springs Highway near its junction with the Pacific Highway, during Saturday afternoons and Sundays. The Engineer recommended the granting of the request until May 1, 1941. The Commission approved the recommendation.

A request from Wentworth and Irwin, Portland, to operate over the Old Oregon Trail from Ontario to Portland, trucks carrying loads having an overhang of 2 feet in excess of the limits permitted by statute, had the attention of the Commission. The Commission granted the request as an emergency proposition until the 1941 Legislature convenes.

The Commission considered the request from Mr. Stanley Currington for reinstatement of his log hauling permit which was recently suspended for a period of 15 days because of three arrests for overloading. The Commission denied the request and ordered that the State Police Department be instructed to retain Mr. Currington's PUC plates until November 19, 1940, when the 15-day period expires.

The Commission also considered a request from Mrs. Daisy M. Whitlow for reinstatement of her log hauling permit which was recently cancelled because of transporting logs during hours of darkness, which is in violation of the rules and regulations covering operations of this kind. The Secretary advised that Mrs. Whitlow's permit was cancelled by the Public Utilities Commissioner on October 18 and that her truck has not been used in log hauling since that time. Further, that her truck has been involved only once previously in a traffic-law violation, that being for a slight axle overload. After discussion, the Commission considered that Mrs. Whitlow has been sufficiently punished for the present offense and authorized the reinstatement of her permit on Monday, November 18, 1940.

The Engineer requested authority for Assistant State Highway Engineer C. B. McCullough to attend, at state expense, the meeting of the Highway Research Board which is to be held in Washington, D. C., during the week of December 2, 1940. He estimated the expense involved would not exceed \$200. After discussion the Commission approved the request by unanimous vote subject to concurrence by Governor Charles A. Sprague.

At 3:30 p. m. Chairman Cabell announced the award of contracts as follows, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Woodburn-Molalla-Silverton Rock Production Project in Clackamas and Marion Counties. Furnish approximately 7,900 cu.yds. crush-

ed rock or crushed gravel in stock piles. A. S. Wallace of Roseburg submitted the low bid for this project, being in the amount of \$12,245.00. E. H. Itschner of Molalla submitted the next low bid in the amount of \$12,798.00. There was only 1 higher bidder. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, A. S. Wallace, when certain conditions have been fulfilled.

"Scappoose-Multnomah County Line Section of the Columbia River Highway, in Columbia County. 3.09 miles grading and paving. The low bid received for this work was that of Roy L. Houck of Salem, in the amount of \$87,492.00. The next low bid was that of Porter W. Yett, Portland, in the amount of \$94,603.30. There were 3 higher bidders. The Commission has referred all bids on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Millican-Brothers Rock Production Project on the Central Oregon Highway, in Deschutes County. Furnish approximately 7,000 cu. yds. crushed gravel in stock piles. The low bid submitted on this work was that of A. S. Wallace, Roseburg, in the amount of \$9,030.00. Rogers Construction Company of Dayton, Washington, submitted the next low bid, in the amount of \$10,801.00. There was only 1 other bid received on this project. The Commission refers all three bids to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Third Street (Bend) Undercrossing Section of The Dalles-California Highway, in Deschutes County. 0.22 mile roadside improvement. The low bidder on this project was Blair T. Alderman, Eugene, with his bid of \$2,732.50. The next low bidder was E. L. Gates of Trail, with his bid of \$2,775.00. There were 2 higher bidders. This contract is awarded to Blair T. Alderman, the low bidder, at his bid of \$2,732.50.

"Siletz-Toledo Section of the Siletz Secondary Highway, in Lincoln County. 5.4 miles grading and 7.8 miles surfacing and ciling. The bid of Homer G. Johnson, Portland, in the amount of \$90,320.00, using tar, was the low one received for this project. That of Berke Bros., Portland, in the amount of \$91,569.60, also based on the use of tar, was the second-low bid. Neither of these contractors bid on the use of asphalt. There were 5 higher bidders. The Commission awards this contract to the low bidder, Homer G. Johnson, at his bid of \$90,320.00, using tar.

"Pendleton-Pilot Rock Rock Production Project on the Pendleton-John Day Highway, in Umatilla County. Furnish approximately 6,000 cu. yds. crushed rock in stock piles. Rogers Construction Company of Dayton, Washington, submitted the low bid for this project, their bid being in the amount of \$8,747.50. A. S. Wallace,

Roseburg, submitted the next low bid which was in the amount of \$9,000.00. There were 5 higher bidders. This contract is awarded to the low bidders, Rogers Construction Company, at their bid of \$8,747.50.

"Minam Hill Viaduct on the Wallowa Lake Highway, in Union County. The bid of the Colonial Construction Company of Spokane, Washington, in the amount of \$26,425.00, was the low one received on this project. That of Lindstrom Bros., Portland, was the second low bid received, being in the sum of \$28,557.00. There was only 1 higher bidder. The Commission awards this contract to the Colonial Construction Company, the low bidders, at their bid of \$26,425.00.

"Lease of Riparian Rights in Oregon City. The only bid for the lease of Location "A" was that of Hawley Pulp & Paper Company of Oregon City, in the amount of \$60.00, yearly rate. This bid is rejected by the Commission. Crown Zellerbach Corporation of Portland was the only bidder for the lease of Location "B", its bid being in the amount of \$250.00, yearly rate. The Commission also rejects this bid."

Consideration was given by the Commission to the matter of granting a lease of the riparian rights in the Willamette River in Oregon City, particularly locations "A" & "B", as described in the proposal form covering the sale of such leases, in connection with which bids were received at this meeting. The Commission decided, in view of the fact that the bids received at this letting were unsatisfactory and were rejected, it would be advisable to negotiate the sale of such leases privately rather than to readvertise for bids for the same. The Attorney was thereupon authorized to carry on such negotiations privately with interested parties with the understanding that the Commission will not accept less than \$125.00 annually for the lease of Tract "A" and not less than \$650.00 annually for the lease of Tract "B".

Mr. H. D. Farmer, Senior Highway Engineer, Public Roads Administration, was present and conferred with the Commission in regard to revision of the Forest Highway Program for 1941 Forest Highway funds, as was suggested by W. H. Lynch, District Engineer, earlier in the session. After careful consideration of this matter, the Commission approved the revisions suggested, and thereupon signed the following joint letter with Mr. Lynch and the Regional Forester, directed to the Chief of the Forest Service and the Commissioner of Public Roads, Washington, D. C., relative thereto:

November 13, 1940

Gentlemen:

The following changes in the fiscal year 1941 Oregon Forest Highway Program approved by the Secretary March 28, 1940, are submitted with recommendation for approval. Funds to finance the

changes are available by virtue of elimination of certain projects as hereinafter noted, by additional cooperation proffered by the State Highway Department and from the Oregon Forest Highway contingent fund.

Projects in the approved program which are now to be revised

<u>No.</u>	<u>Project</u>	<u>Length</u>	<u>Funds</u>		<u>Remarks</u>
			<u>F.H.</u>	<u>Coop.</u>	
10-D1	Oregon Coast Hwy. Reconstr. Grad.	2.0	\$20,000	\$50,000	
17-B3	Crater Lake Hwy. Trail Cr.Br.Reconstr.	.03	35,000		
24-A2	North Santiam Hwy. Reconstr.Grad.,Surf.,& Br.	2.0	100,000		
	Surveys		<u>10,000</u>	<u> </u>	
			\$165,000	\$50,000	

Recommended revisions and additions

<u>No.</u>	<u>Project</u>	<u>Length</u>	<u>Funds</u>		<u>Remarks</u>
			<u>F.H.</u>	<u>Coop.</u>	
10-D1,E	Oregon Coast Hwy. Reconstr.Grad. & Surf.	1.3	\$70,000	\$50,000	
17-B3	Crater Lake Hwy. Trail Cr.Br.Reconstr.	.03	(35,000)		To be eliminated
23-E2,G4	Santiam Hwy. Reconstr. Gr. & Surf.	7.0	100,000	50,000	
24-A2	North Santiam Reconstr. Grad., Surf., & Bridges	2.0	(100,000)		To be eliminated
	Post Construction		4,000		
	Surveys		<u>30,000</u>	<u> </u>	
	TOTAL		\$204,000	\$100,000	

Oregon Coast Hwy., Reconstr. Grad. & Surf. Proj. 10-D1,E 1.3 mi.

Upon completion of surveys the construction on the first unit to be improved proved to be heavier than preliminary estimates had indicated, and the length involved in the project to be less than estimated. The project is on the military strategic system, and it is considered important to make it available for use with a minimum of delay. Accordingly, it is recommended that additional funds

be allocated to complete the improvement between termini which will permit connection to be made with the existing road. In order to make the road immediately usable, we have now included in the project the item of surfacing which accounts for a part of the increased cost. It becomes necessary to extend the project slightly beyond the limits of Section D in order to make a proper contact with the existing road. For this reason the designation has been changed from that in the originally approved program.

Crater Lake Hwy., Trail Creek Bridge, Reconstruction, Proj. 17-B3 .03 mi.

It is recommended that the above project be cancelled and the funds be returned to the State Contingent Fund, thus making it possible to program additional funds to project 10-D1, E.

Santiam Hwy., Reconstr., Grad. and Surf., Proj. 23-E2, G4 7 mi.

Our recommendations for the fiscal year 1941 program cited a possible transfer of funds from the North Santiam to the Santiam Highway to finance a second unit on the latter route in the event that the money was not required this year to finance a proposed improvement of the North Santiam Highway in cooperation with the War Department. On the basis of the terms of the tentative cooperative agreement locally agreed upon and recently submitted for approval, it now appears that Forest Highway funds will not be required on the North Santiam Highway until the fiscal year 1942. It is, therefore, recommended that the sum of \$100,000 Forest Highway Funds and an additional \$50,000 cooperative funds be approved to finance the improvement of the Santiam Highway from Hogg Rock to a point in the vicinity of Suttle Lake. The grading work contemplated is stabilization of slopes and widening the subgrade sufficiently to obtain a 20 ft. paved surface with two foot minimum shoulders on top of surfacing. Provision will also be made to obtain 8 ft. shoulders alternating at approximate two mile intervals. This project is on the strategic system (third priority).

North Santiam Hwy., Reconstr. Grad., Surf. & Bridges, 24-A2, 2 mi.

It is recommended that this project be cancelled and fund returned to the State Contingent fund making it possible to program the improvement of Project 23-E2, G4.

Post Construction and/or Betterments

It is recommended that \$4,000 be allocated from the State Contingent for Post Construction and/or Betterments on projects now under maintenance. Authority is requested to allot \$2,500 of this sum to complete the program of cutting dangerous trees and snags on the North Santiam Route. Funds previously approved for this purpose were diverted to items of greater emergency on the same route,

leaving the original approved work incomplete. The balance of \$1,500 would be held as a contingent to be used if and when emergencies demand items of work classifying as Post Construction or Betterments which would be authorized only on specific written authority.

Location Surveys

Funds recommended are planned to finance the necessary surveys and P.S. & E. on routes listed in the fiscal year 1941 program as well as on routes which have been approved in earlier programs and which are as yet incomplete. In addition, it is planned to use the funds in conducting location surveys on the following routes on the strategic system on which data may be required.

McMinnville-Tillamook Hwy.
Oregon Coast Hwy.
Siuslaw Hwy.
Redwood Hwy.
Pacific Hwy.
Dalles-California Hwy.
Ochoco Hwy.
Columbia Hwy.
Warm Springs Hwy.

ANALYSIS OF FUNDS

Funds to finance the increase in the program are available as follows:

Unobligated contingent balance old Forest Highway	
Funds (prior to F.Y. 1941)	\$21,379.31
(1) Unobligated contingent balance F.Y. 41 funds	<u>63,067.12</u>
Total State Contingent	\$84,446.43
Net increase in program recommended above	<u>39,000.00</u>
Remaining Contingent	\$45,446.43
(1) F.Y. 41 10% A & E	\$116,755.00
Present obligations	<u>53,687.88</u>
Balance	\$63,067.12

The State Parks Superintendent was present and discussed with the Commission the matter of creation of two State game reserves, one located on Saddle Mountain, in Clatsop County, embracing Saddle Mountain State Park and

adjoining privately-owned lands, and the other located adjacent to the Oregon Coast Highway near Yachats and being an addition to the present game reserve, known as the Grass Mountain Game Reservation. The Commission considered that it is not within its province to initiate the creation of game reserves, it being the Commission's thought that such matter is the function of the State Game Commission, which should secure the necessary legislation. The Parks Superintendent was instructed to so inform the State Game Commission and advise that body that the Highway Commission is in sympathy with such movement and will give its moral support thereto, although it cares not to take the initiative in the matter.

The Parks Superintendent reported on investigations for the establishment of wayside picnic areas along the Mount Hood Highway, as has previously been requested by the Hood River Garden Club. He said that he found two places that would be suitable for this purpose, one of which is exceptionally good and is located opposite Highway Engineer's Station 628, about 10 miles south of Hood River, where an excellent view of Mount Hood may be obtained. He estimated that it would cost about \$750.00 to acquire this one tract and to develop the same, and he recommended approval of the expenditure. After discussion, the Commission approved the recommendation as a trial proposition and authorized the Attorney to negotiate for the acquisition of the property, it being understood that the cost of acquiring it and developing it should be charged to the state park budget and that the maintenance of the site thereafter should be charged to the maintenance budget.

The Parks Superintendent asked the Commission to approve four state park CCC camps located as follows:

1. Silver Creek Falls Park, in Marion County, being a renewal of the existing camp.
2. Saddle Mountain Park, in Clatsop County, being a renewal of an old camp.
3. Crooked River State Park, in Jefferson County. (new camp)
4. Umpqua Lighthouse Park, in Douglas County. (new camp)

The Commission referred this matter to Chairman Cabell with full power to act.

The Engineer reported the cost to channelize the intersection of Denver and Union Avenues, Portland, in order to provide greater safety to traffic at this point. He estimated such cost, which includes construction of channel islands and the installation of traffic lights, to be approximately \$6,000 and recommended the expenditure in the interests of traffic safety. The Commission approved the recommendation unanimously. In this connection, the Engineer pointed out that provision would have to be made for the removal of the service station buildings owned by the Standard Stations, Inc., on the highway right of way on the Denver Avenue approach, which matter has been pending for some time. He suggested an exchange of properties with Standard

Stations, Inc., which would satisfactorily dispose of this matter. After discussion, the Commission authorized negotiations with the Standard Stations, Inc., to that end and ordered that the outcome thereof be reported to the Commission before any deal is closed.

County Judge David F. Graham, of Malheur County, was present and renewed his previous request for certain highway improvements in Malheur County. The Commission agreed to bear the projects in mind in preparation of future construction programs.

County Judge A. R. Bowman of Crook County was present and urged early construction of the Marks Creek Section of the Ochoco Highway. He asked the Commission to place the work under contract so that it can be completed during the 1941 season. He was informed by the Engineer that surveys are now being made of this highway west from Mitchell to a connection with the Forest Highway Section and that he intends to recommend to the Commission the building of the west end of the uncompleted section as the Commission's next project on this road.

The Commission discussed the matter of snow removal projects on various state highways throughout the State. After careful consideration, the Commission, by unanimous vote, took action as follows on such matter:

1. Sumpter Valley Secondary State Highway in Baker County and its extension over the county road to the town of Granite, in Grant County:- This project approved subject to the willingness of Baker and Grant Counties to reimburse the State for the cost of the operations beyond the limits of the secondary state highway. The Secretary was instructed to inform the County Courts of Baker and Grant Counties and interested mining people of Granite of the action taken.
2. Anthony Lakes Road, in Baker County:- The Commission considered that snow removal operations on this road are not its responsibility in view of the fact that the road is not a state highway. However, the Commission authorized snow removal operations on the secondary state highway that connects with this road, provided Baker County removes snow from the county road section. The Secretary was instructed to so inform the Baker County Court and the winter sports organization in Baker.
3. Oregon Caves Road:- The Commission decided not to conduct snow removal operations on this road beyond the farming area; however, agreed to allow the National Parks Service or the operators of the Oregon Caves Resort to conduct such operations beyond the limits of the farming area if the State is relieved of all responsibility and liability in connection therewith and, provided further, that a gate will be maintained across the highway at the limits of the farming area so as to stop traffic at this point when the highway beyond is not suitable for travel.

4. McKensie Highway:- The Commission denied the request of the Eugene Junior Chamber of Commerce for snow removal on this highway for the benefit of winter sports enthusiasts because, according to the records, the cost to repair the highway in the spring as a result of such operations is far in excess of the cost of removing the snow. The Secretary was instructed to so inform the Chamber of Commerce and to suggest that the Chamber endeavor to find a suitable place along the Willamette Highway which highway the Commission proposes to keep open for travel the year round.

5. Diamond Lake Secondary Highway, particularly from Union Creek junction with the Crater Lake Highway to the junction with The Dalles-California Highway. The Commission considered that the cost of keeping this highway open during the winter season is not justified by the amount of traffic that it carries, hence denied the request.

6. Weston-Elgin Secondary Highway, in Umatilla and Union Counties:- The Commission decided, as an experiment, to keep this road open for travel throughout the coming winter season and over its entire length. The Engineer was thereupon authorized to proceed accordingly. The question of whether or not the road would be kept open during future winters will be determined after the experience of the coming winter has been studied.

The Engineer requested authority to advertise for bids for construction of a laboratory building, to be erected on the Highway Department's shop premises at Salem. He explained the urgent need for the building and estimated the cost of a suitable building at approximately \$95,000. After discussion the Commission approved the request by unanimous vote.

Chairman Cabell presented a letter from the Housing Authority of Clackamas County advising that application has been filed with the U. S. Housing Administration for a housing project on a tract of land situate between the Southern Pacific railroad tracks and 32nd Street, Milwaukie, about 2 blocks north of Harrison Street, and further advising that, in order to protect their project it would be necessary for them to acquire from the State Highway Department one acre of land bordering on their project, which land is now being used by the state as a gravel pit and source of materials for highway construction. The Engineer advised that this gravel pit contains a lot of fine material which could be used to good advantage in connection with the construction of the Front Avenue project in Portland and other projects in this vicinity. He questioned the advisability of disposing of the pit because of the possibilities of increasing the cost of highway construction. After discussion, the Commission referred this matter to Chairman Cabell with full power to act.

Commissioner Oliver presented a request from Baker County for state aid in a proposed WPA project for the improvement of the Sumpter Valley Secondary Highway in Baker County. He said that the County Court is asking the

Highway Department to sponsor this project and to pay 25 per cent of the cost, including the furnishing of powder, that is required by the Federal Government as the sponsor's contribution. The County is willing to assign county equipment, he said, as may be necessary to carry on the work. The Commission took the matter under advisement.

Chairman Cabell reported receipt of a letter signed by F. N. Finch, General Manager, Union Pacific Railroad Company, and E. L. King, Superintendent of the Southern Pacific Company, accepting the Highway Commission's proposal of October 18, 1940, with respect to the amount that the Highway Commission is willing to pay the railroad companies for the use of the Steel Bridge in Portland as a route for state highway traffic. The letter was referred to the Engineer for acknowledgment.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

Roy L. Houck, Contract No. 2227, for grading and paving the Salem-Pringle Creek Section of the Pacific Highway East, in Marion County, requested an extension of time, from August 31 to October 23, 1940, within which to complete this project. He alleged that his failure to complete the job within the specified time limit was occasioned by orders from the Engineer to complete the Albany grading and paving project before starting the work at Salem; also the failure of the gravel company to furnish crushed material for shoulder construction. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2237, for surfacing and oiling the Klamath Agency-Medoc Point Section of The Dalles-California Highway, in Klamath County, requested an extension of time of 20 days, from August 31 to September 20, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to an increase in the quantities of materials required. The Engineer advised that the overrun in time limit amounted to 6.6 per cent of the total time, and that the increase in quantities amounted to 7.09 per cent of the quantities estimated. He recommended in view of the fact that the quantities were increased after the contract was awarded that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

E. C. Hall Company, Contract No. 2242, for the Mt. Hood Rock Production Project on the Mt. Hood and Wapinitia Highways, in Clack-

amas and Wasco Counties, requested an extension of time, from October 31, 1940, to June 30, 1941, within which to complete this job. They stated that when this job was awarded to them they had several contracts under way, requiring the production of crushed rock, which utilized all of their crushing equipment, so in order to expedite this particular project they leased equipment from contractor H. L. Rice, who failed during the progress of the work and was adjudged bankrupt, necessitating the discontinuance of the use of his equipment. As a result, these operations were slowed down to such an extent that they could not be completed before bad weather set in and it will be necessary to extend the time limit until next year when weather conditions are favorable. The Engineer advised that this contract was awarded on November 3, 1939, but the contract provided that the work need not be commenced before April 15, 1940, and that all material for the Mt. Hood Highway should be produced and stockpiled not later than June 30, 1940, and that all work under this contract should be completed not later than October 31, 1940. He further stated that the contractor did not get a very early start on the work—in fact the first rock was produced from the Brightwood quarry on August 19; however, production from this quarry was completed on October 19. Due to sickness of both subcontractors Harry L. Rice and Knute Lien and to financial embarrassment of these men it was necessary for Mr. Hall to take over the subcontractors' equipment early in October which was too late for him to make any progress from the other quarry that was provided for his use, known as the Bear Paw Quarry, before bad weather set in but he has agreed to expedite the work early next spring so as to complete the job not later than June 30, 1941. He recommended in view of the adverse conditions surrounding this contract that the extension of time be granted without penalty. The Commission approved the recommendation unanimously.

Leonard & Slate, Contract No. 2260, for grading, surfacing and oiling the West Unit, Petersburg-Fairbanks Section of the Fifteen Mile Creek County Road, in Wasco County, requested an extension of time of 14 days, from July 31, to August 14, 1940, within which to complete this contract. They stated that this project could have been graded at an earlier date but was purposely delayed in order that the oiling could be done immediately following the grading, thus insuring a better finished road; also that there was a substantial amount of oiling remaining to be done on their contract for the construction of the Lang Canyon-Arlington Section of the Columbia River Highway which highway carries heavy traffic. They felt that the public interests would be better served by completing the oiling on this job rather than the oiling of the Petersburg-Fairbanks Project which carries a comparatively small amount of traffic. The Engineer advised that he knows of no good reason why this job could not have been completed within the specified time limit and accordingly recommended that the extension of time requested be granted but that the contractor be required to reimburse the state for extra

engineering costs incurred for engineering supervision subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

S. S. Montague, Contract No. 2312, for construction of abutments to the Strassel Undercrossing on the Wolf Creek Highway, in Washington County, requested an extension of time of 30 days, from September 30 to October 30, 1940, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was occasioned by intermittent delays caused by the Southern Pacific Company in the performance of certain work that the railroad company is doing in connection with this job. The Engineer advised that the contractor could not start his operations until the railroad company had driven false work which work was not commenced by the railroad company until about six weeks after the contract was awarded to Mr. Montague. He recommended in view of the circumstances that the extension of time requested be granted without penalty notwithstanding that the Public Roads Administration will not concur therein. A letter was presented from the Public Roads Administration setting forth its views in the matter and explaining why they could not approve the extension of time without penalty. After discussion the Commission voted unanimously to extend the time limit as requested without penalty in conformance with the Engineer's recommendation.

O. C. Yocum, Contract No. 2315, for surfacing and oiling the Canyonville-Days Creek Section of the Tiller-Trail Secondary Highway, in Douglas County, requested an extension of time of 15 days, from September 30 to October 15, 1940, within which to complete this project. He alleged that his failure to complete the project within the specified time limit was due to unsatisfactory weather conditions prevailing at the time that the final surfacing and oiling work was being done. The Engineer advised that this contract was awarded on May 3, 1940, but the contractor did not commence operations until July 22, 1940; further that the principal reason for the delay in completing the project in time was due to the delay in commencing the work. He recommended in view thereof that the extension of time requested be granted but that the contractor be charged with the extra engineering expense incurred by the state subsequent to the specified date of completion. The Commission approved the recommendation.

M. L. O'Neil & Son, Contract No. 2321, for grading and surfacing the Lone Rock Junction-Rock Creek Section of the Wasco-Heppner Secondary Highway, in Gilliam County, requested an extension of time, from July 31 to August 24, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to delay in award of the contract which did not permit the commencement of operations until late in

the season when dust conditions were very bad which interfered greatly with the progress of the work. The Engineer advised that bids on this project were taken by the Commission on May 3 but the contract was not awarded until May 28; further that operations were not commenced until June 13 which was two weeks after award of the contract. He recommended that the extension of time requested be granted and that no penalty be imposed on the contractor for the first 15 days of the overrun of the time limit so as to offset the period of time elapsed between the taking of bids and the award of the contract, but that the contractor be charged with the extra engineering expense incurred by the state from the end of such period, August 16, to the time that the job was completed on August 24, 1940. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Homer G. Johnson, Contract No. 2324, for grading, surfacing and oiling the Prineville Section of the Ochoco Highway, in Crook County, requested an extension of time of 30 days, from September 30 to October 30, 1940, within which to complete this job. He attributed his failure to complete the project within the specified time limit to bad weather conditions and unexpected breakdowns of his equipment. The Engineer advised that he knows of no good reason that could be given by the contractor for failure to complete the job within the specified time. He recommended in view thereof that the extension of time requested be granted but that the contractor be charged with the costs of engineering incurred by the state subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Warren Northwest, Inc., Contract No. 2334, for surfacing, paving and construction of bituminous macadam on the Albany-Crabtree Corner Section of the Santiam Highway, in Linn County, requested an extension of time of 10 days, from September 30 to October 10, 1940, within which to complete this job. They alleged that the overrun of time limit was primarily caused by an increase of the subbase gravel material of 50 per cent over the estimated amounts, and also because of an increase of the contract amount of approximately 11½ per cent over the original bid items. The Engineer reported that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Contracting and Sales Company, Inc., Contract No. 2336, for replacement of wire rope on the Interstate Bridge over the Columbia River on the Pacific Highway between Portland, Oregon, and Vancouver, Washington, requested an additional extension of time, from October 15 to November 14, 1940, within which to complete this job. They alleged that their failure to complete the project within the

specified time limit was due to conditions over which they had no control, particularly the following: The federal government commandeered their superintendent who was particularly familiar with the work and who could not be replaced on short notice; union labor on the job could not be employed more than 5 days a week; and difficulties encountered in fitting the new diaphragms with the old gears, et cetera. The Engineer advised that the specified date of completion was August 31, 1940, but the Commission extended this time limit to October 15, 1940, without penalty because of the delay incurred by the contractor in securing the necessary cable from the factory. He further stated that since the Commission took action extending the time limit to October 15 there has been added to the work an item of replacement of guide rollers which installation took about three days' time. He gave as his thought that, except for the three days' time in installing the guide rollers, the contractor should have completed the job by October 15 and recommended that the extension of time now requested be granted subject to the condition that the first three days thereof be without penalty but the contractor be charged with the engineering expense incurred by the state subsequent to such three-day period. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2227, 2232, 2237, 2249, 2260, 2267, 2294, 2301, 2312, 2315, 2321, 2323, 2324, 2334, and 2337, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2227, with Roy L. Houck, for grading and paving the Salem-Pringle Creek Section of the Pacific Highway East, in Marion County. Completed October 22, 1940.

Contract No. 2237, with Rogers Construction Company, for grading, surfacing and oiling the Klamath Agency-Modoc Point Section of The Dalles-California Highway, in Klamath County. Completed September 9, 1940.

Contract No. 2249, with Roy L. Houck, for bituminous macadam surfacing on the Siskiyou-State Line Section of the Pacific Highway, in Jackson County. Completed October 31, 1940.

Contract No. 2260, with Leonard & Slate, for grading, surfacing and oiling the West Unit, Petersburg-Fairbanks Section of the Fifteen Mile Creek County Road, in Wasco County. Completed August 14, 1940.

Contract No. 2267, with Roy L. Houck, for grading and paving the Albany Section of the Pacific Highway East, in Linn County. Completed October 26, 1940.

Contract No. 2294, with Barham Brothers, for construction of a maintenance patrolmen's headquarters on the Willamette Highway near Odell Lake, in Klamath County. Completed November 12, 1940.

Contract No. 2301, with Fisher Brothers, for grade widening, surfacing and oiling the Low Pass Section of the Siuslaw Highway, in Lane County. Completed September 21, 1940.

Contract No. 2312, with S. S. Montague, for construction of the Strassel Undercrossing abutments on the Wolf Creek Highway, in Washington County. Completed October 5, 1940.

Contract No. 2315, with O. C. Yocum, for surfacing and oiling the Canyonville-Days Creek Section of the Tiller-Trail Secondary Highway, in Douglas County. Completed October 15, 1940.

Contract No. 2321, with E. L. O'Neil & Son, for grading and surfacing the Lone Rock Junction-Rock Creek Section of the Wasco-Hepner Secondary Highway, in Gilliam County. Completed August 24, 1940.

Contract No. 2323, Averill and Corbin, for construction of the Fischers Lillrace Bridge on the Pacific Highway West, south of Corvallis, Benton County. Completed October 15, 1940.

Contract No. 2324, with Homer G. Johnson, for grading, surfacing and oiling the Prineville Section of the Ochoco Highway, in Crook County. Completed October 28, 1940.

Contract No. 2334, with Warren Northwest, Inc., for surfacing, cement stabilization, paving, oil surface treatment, and bituminous macadam wearing surface, on the Albany-Crabtree Corner Section of the Santiam Highway, in Linn County. Completed October 10, 1940.

Contract No. 2337, with Fife & Company, for construction of a maintenance patrol station at Blue Mountain on the I.O.N. Highway, in Malheur County. Completed October 23, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Petition directed to Public Utilities Commissioner for placing reflectorized signs at crossing of Portland and Southwest Railroad near Scappoose.

"Consent to Vacation", having to do with vacation of alley in West Rainier, previously approved by Commission.

Agreement with Hunt Livestock Company providing for lease of property for maintenance station at Maupin.

Quitclaim deed conveying unto Douglas County a portion of the old county road adjacent to Pacific Highway in Jones Addition to Roseburg. Right of way transaction No. 8219.

Warranty deed conveying unto Northern Pacific Railway Company certain property at Scappoose. Right of way transaction No. 7696.

Bargain and sale deed conveying unto Albert Hoffarber 344 square feet of land in Lots 16 and 17, Hoffarber Tracts, adjacent to Pacific Highway West in Washington County. Right of way transaction No. 6951.

Bargain and sale deed conveying unto James A. Harris 4728 square feet of land adjacent to Oregon Coast Highway at Brookings, Curry County. Right of way transaction No. 7702.

"Agreement for sale of real estate" covering acquisition of property from Home Owners Loan Corporation situate adjacent to the Cascade Highway, in Clackamas County. Right of way transaction No. 8242.

Agreement with Frank F. Dailey and wife providing for slope easement along the Pacific Highway East in Albany. Right of way transaction No. 5834.

Agreement with Gertrude Bramley and Gertrude McLeod providing for slope easement along the Pacific Highway East in Albany. Right of way transaction No. 7186.

Bargain and sale deed conveying unto Walter W. Russell, et al, Trustees of Bellevue Community Hall, certain property outside of the standard highway right of way along the Salmon River Highway, in Yamhill County. Right of way transaction No. 4313 and 8205.

The meeting was adjourned at 5:45 p. m.

Corbett Road. Connection to be made between this road and new Columbia River Highway.
Traffic signal. Installation on new Columbia River Highway at Corbett Road intersection authorized.
Pacific Highway. Request for certain changes near junction with Redwood Highway denied.
Grants Pass. E. E. Smith, owner of Rogue Motor Court, requests improvement of driveway into his auto camp.
Driveway. E. E. Smith, owner of Rogue Motor Court, requests improvement of driveway into his auto camp at Grants Pass.
Highway system. Letter from Director of Northwestern Observatory expressing favorable comment on Oregon highway system.
Signs. Maintenance of signs on ocean beach at Gearhart re danger of standing on logs in surf. Referred to Attorney.
Klamath Falls. Letters requesting re-examination of traffic conditions, construction of four-lane highway within city, betterment of traffic conditions, and improvement of South Sixth Street.
Siuslaw Highway. Summit Section. Lions Club of Junction City thanks Commission for improvement.
Snow removal. Sumpter-Granite Road. County Courts of Grant and Baker Counties agree to pay cost of operations beyond limits of Sumpter Valley Secondary Highway.
Sumpter Valley Secondary Highway. Operations authorized.
Bridge. Marion and Linn County Courts request Engineer to advertise bridge over Santiam River at Gates for bids.
Survey. Request for survey of Camp Clatsop-Fort Stevens Road and for roads connecting Camp Clatsop and Fort Stevens with Oregon Coast Highway approved.
Oregon City. City to enter into agreement with Commission relative to maintenance of float in Willamette River.
Oregon Coast Highway. Ocean Lake District. Inquiry as to plans of Commission for improvement.
Wilson River Highway. Glenwood-Banks Section. Tillamook Chamber of Commerce suggests WPA project for construction.
Pacific Highway. Ashland. Letter suggesting entirely new route.
Signal. Request for installation of bell and light signal at East Springfield Railroad Crossing denied.
Snow removal. Oregon Caves Road. E. P. Leavitt complains of conditions imposed by Commission.
County equipment. Services of Department offered to counties in purchase of county equipment, if requested.
Portland. J. W. Harrison requests right of access to Union Avenue, including building of approach thereto by state.
Salem. Lions Club proposes construction of overhead pedestrian crossing on South Commercial Street.
Surveys. Following authorized in Klamath Falls: South Sixth Street entrance of Klamath Falls-Malin Highway; Green Springs Highway entrance, and entrance of West Side Klamath Lake Hwy.

John Day-Burns Highway. Seneca Section. Request of Hines Lumber Company for change in alignment of highway in Seneca denied. Right of way correction. Error in right of way resolution adopted October 9, 1940, Item 3038-A, to be corrected. Three Flags Highway Association. Delegation confers with Commission in John Day regarding highway matters. No requests.

Bend, Oregon, December 3, 1940

The State Highway Commission met in special session at 8:00 p. m. in the Pilot Butte Inn, following inspection of "The Cove" State Park, at the confluence of the Deschutes River, Crooked River, and Metolius River, Jefferson County, in company with the State Parks Superintendent, S. H. Boardman, who pointed out the attractive features of the present park and presented arguments in favor of enlarging the park by the purchase of adjoining privately-owned land. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

This meeting was held enroute the inspection trip in Lake and Klamath Counties. Commissioner Herman Oliver joined the party at Lakeview on the following day.

The Attorney presented a form of agreement between the Oregon-Washington Railroad and Navigation Company, the Union Pacific Railroad Company, the Southern Pacific Company, and the State Highway Commission, covering the use of the Steel Bridge, in Portland, for state highway traffic upon completion of the proposed Front Avenue project. He read aloud the provisions of the proposed agreement which the Commission discussed at length and approved.

The Attorney was instructed to discuss the matter with the attorneys for the railroad companies. If the form is approved by such attorneys, then copies of the agreement are to be delivered to the railroad companies by Chairman Cabell for execution.

The Commission also discussed and approved a form of agreement with Multnomah County with respect to the use of such bridge. The Attorney was instructed to discuss the same with the County's attorney and, if approved by such attorney, to deliver the forms to Chairman Cabell for transmittal to the Board of County Commissioners for execution.

The Commission discussed the controversy with Mr. W. C. Calder arising out of a slide that occurred on the Oregon Coast Highway in front of Mr. Calder's property near Arch Cape, in northern Tillamook County. The Commission decided that the offer previously made to Mr. Calder as settlement of this matter, which offer provided for the payment of \$1,500 to Mr. Calder as damages and the removal of debris from his land and the general clean-up of the premises, was sufficient. The Attorney was instructed to so inform Mr. Calder and to advise him that the Commission considers such offer of settlement as final.

In this connection the Attorney read aloud a letter from Mr. Calder offering to sell to the State for park purposes, at the rate of \$25.00 per

acre, 68 acres of land situate on the east side of the highway at this location. The State Parks Superintendent who was present recommended purchase of the tract because it would connect up wayside strips previously acquired by the Commission at this point. The Commission authorized the Attorney to negotiate for the purchase of this tract; however, instructed him to keep the two transactions absolutely separate.

The Engineer presented a letter from C. S. Freeman, Rear Admiral, U. S. Navy Commandant, U. S. Naval Department, in regard to the proposed acquisition by the Navy Department of additional land adjacent to the naval air station at Tongue Point to permit the expansion of this station. Admiral Freeman advised that the Naval Department will need certain land, including the highway right of way, extending from the city limits of Astoria north to the present boundary of the station and will also need certain land lying north and west of the highway right of way which was formerly embraced in what was known as Tongue Point State Park. He inquired as to how much the State would require the Naval Department to pay for this property and advised that if the title to the land is taken by the United States that the state highway would be left open to public traffic until such time as military considerations necessitate closing it; also, that the Navy Department does not have funds at the present time to pay the cost of relocating the highway. The Engineer read aloud his letter of reply, dated November 28, 1940, in which he advised that the State Highway Commission is willing to transfer to the Navy Department the land beyond the limits of the highway right of way but is not willing to relinquish the right of way at this time, although the Commission is agreeable to conveying it to the Navy Department when it is urgently needed for military purposes and provided the Navy Department will pay the cost of constructing a satisfactory substitute therefor. After discussion, the Commission approved the Engineer's letter and authorized the transfer of the park property to the United States Naval Department at once through Clatsop County Court, inasmuch as it was acquired by the State from the County as a gift for park purposes. Deed conveying the area to the County was signed by the Commission later in the session.

The Attorney presented a request from Albany School District No. 5 for the use of a portion of the right of way of the Pacific Highway in front of the school grounds in Albany. He advised that the area in question is a narrow strip of land lying between the sidewalk and the school-ground fence, and that the School District would like to have the use of it for school playground purposes, and, if the Commission will grant them that privilege, the School District will remove the existing board fence and replace it with a new woven wire fence at the sidewalk line at no expense whatsoever to the State. The Commission indicated that it would have no objection to leasing the property to the School District temporarily if the District will vacate the property whenever the area is needed for highway purposes. However, a definite decision was deferred pending further investigation by the Engineer, to whom the matter was referred for report.

The Attorney also presented a right of way settlement with the School Board at Scappoose. It appears that in connection with the improve-

ment of the Columbia River Highway at this place it was necessary to acquire a strip of land 10 feet wide across the front of the High School grounds and another strip 10 feet wide across the front of the Grade School grounds and that in the negotiations the depreciated value of the school property was overlooked and the School Board will not now complete the deal unless allowed an extra payment of \$228.00. The Attorney gave as his opinion that the claim is justified and recommended payment of the same in order to avoid a law suit. The Commission approved the recommendation unanimously.

The Attorney requested instructions relative to the acquisition of right of way across the front of the Congregational Church property in Scappoose. He advised that the improvement of the Columbia River Highway at this place necessitates taking some of the Church land which places the Church building nearer the highway than heretofore, and for that reason he is unable to reach a satisfactory settlement with the Church people, who will not deed the property to the state unless the Commission will agree to move the Church building back. He gave as his opinion that the Church has not been hurt in the least and accordingly recommended condemnation to acquire the right of way if a satisfactory settlement cannot be made otherwise. The Commission approved the recommendation.

The Engineer requested authority for the Right of Way Department to negotiate for right of way needed for the Wolf Creek Highway between Manning and Portland, inasmuch as this improvement is scheduled for construction in the near future as a WPA project. The Commission approved the request.

The Commission considered the offer of the Penn Timber Company to sell to the state wayside timber strips along the Willamette Highway. The State Parks Superintendent advised that these strips are within the boundaries of the Willamette National Forest and, in his estimation, such acquisitions are the function of the U. S. Forest Service. He recommended that the offer be declined. The Commission approved the recommendation.

The Commission discussed and referred to the State Parks Superintendent, for investigation and report, the matter of acquiring burned timber strips along the Santiam Highway in the vicinity of Sisters.

The Commission also discussed the matter of acquiring the land lying between the Oregon Coast Highway and the Pacific Ocean south from Newport to Yachats, in Lincoln County. The State Parks Superintendent recommended the purchase of these strips which, he said, are quite narrow and will provide a freeway six miles in length at this location, inasmuch as the state already owns the land on the opposite side of the highway. The Commission instructed the Attorney to secure options on the property.

A request from a Mrs. Miller, Oregon City, for right of access to the Pacific Highway East, in Block 13, Oregon City, had the attention of the Commission. The Attorney advised that when the highway right of way was acquired at this point the grantors were assured that they would be given access to the highway when it was completed, which was in conformity with the

Highway Commission's policy at that time. In view of the Attorney's statement, the Commission approved Mrs. Miller's request with the understanding that access to the highway would not be continuous but would consist of two openings, each not more than 25 feet wide, one to allow ingress to her property and the other egress therefrom. The Engineer was instructed to have Landscape Engineer George Otten and Traffic Engineer John Beakey contact Mrs. Miller at the earliest possible time and explain in detail the Commission's plans for landscaping along this section.

The Secretary presented a resolution adopted by the State Board of Control with respect to an exchange of properties adjacent to the Highway Department Shops in Salem. The Commission approved the resolution by unanimous vote and authorized the Secretary to enter in the minutes of this meeting the following resolution covering the same subject which was approved by the Commission at the previous meeting:

WHEREAS, the State of Oregon, by and through its State Highway Commission, is the owner and is in possession of the following described real property situated in Marion County, Oregon, to wit:

A parcel of land lying in the Samuel Parker D.L.C. and in the A. F. Waller D.L.C. in Section 25, Township 7 South, Range 3 West, W. M., Marion County, Oregon, the said parcel being a strip of land 25 feet in width and being described as follows:

Beginning at the southwest corner of the Samuel Parker D.L.C.; thence North $0^{\circ} 43'$ East along the west line of said D.L.C. a distance of 499.75 feet to the southerly right of way line of the Southern Pacific Co.; thence along said right of way line on a 3871.06 foot radius curve to the left (the long chord of which bears North $71^{\circ} 49'$ East 14.5 feet) a distance of 14.5 feet; thence North $39^{\circ} 11'$ East a distance of 18.14 feet; thence South $0^{\circ} 43'$ West parallel to and 25 feet distant easterly from said D.L.C. line a distance of 524.22 feet to the southerly line of the Oregon State Highway Department property; thence South $89^{\circ} 57'$ West along said southerly line a distance of 25 feet; thence North $0^{\circ} 43'$ East a distance of 5.9 feet to the point of beginning, containing 12,802 square feet.

AND, WHEREAS, the State of Oregon, by and through its State Board of Control, is the owner of and is in possession of the following described real property situated in Marion County, Oregon, to wit:

A parcel of land lying in the Samuel Parker D.L.C. and in the A. F. Waller D.L.C. in Section 25, Township 7 South, Range 3 West, W.M., Marion County, Oregon, the said parcel being a strip of land 10.5 feet in width and being

described as follows:

Beginning at the southeast corner of the Oregon State Highway Department Highway Shops Grounds, said corner being South $0^{\circ} 43'$ West 5.9 feet and North $89^{\circ} 57'$ East 1246.05 feet from the southwest corner of the said Samuel Parker D. L. C.; thence South $0^{\circ} 10'$ East along the westerly right of way line of the Airport Road a distance of 10.5 feet; thence South $89^{\circ} 57'$ West parallel to and 10.5 feet distant from the said Highway Shops Grounds a distance of 1221.1 feet; thence North $0^{\circ} 43'$ East a distance of 10.5 feet; thence North $89^{\circ} 57'$ East along the southerly line of said shops grounds a distance of 1221.05 feet to the point of beginning, containing 12,820 square feet;

AND, WHEREAS, the State Highway Commission and the State Board of Control desire to exchange said real properties because of the fact that such exchange will be to the material benefit and advantage of said respective departments; and

WHEREAS, it is the judgment of the Highway Commission that the said properties are of equal value and that public interest will be furthered by such proposed exchange;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Oregon State Highway Commission, all members being present and voting affirmatively, as follows:

1. That the State Highway Commission does hereby transfer to the State Board of Control all of the interest of the State Highway Commission in and all of its control over the real property first above described, upon the express condition, however, that the State Board of Control shall by appropriate resolution or action transfer to the State Highway Commission all of the interest of the State Board of Control in and all of its control over the real property second above described. The Highway Commission, however, reserves the right to maintain the sewer line which has been constructed and installed beneath the surface of said tract and reserves the right to go upon said tract for the purpose of repairing and/or renewing said sewer line.

2. That upon the adoption of this resolution by the State Highway Commission and the adoption of an appropriate and corresponding resolution by the State Board of Control and the delivery of a certified copy of this resolution to the State Board of Control, and the delivery of a certified copy of the State Board of Control resolution to the State Highway Commission, the exchange of said properties shall be deemed complete, and thereafter this resolution shall be entered in the minutes and records of the State Highway Commission.

The Commission, by unanimous vote, and upon recommendation of the Engineer adopted the following resolution abandoning a portion of the Corvallis-Newport Highway in the City of Toledo, which portion is no longer of value for state highway purposes, inasmuch as the highway has been reconstructed on other alignment:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Commission found it necessary to relocate a portion of the Corvallis-Newport Highway and particularly the section within the corporate limits of the City of Toledo; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway, which section is sometimes known as the Toledo or Olalla Creek-Toledo section, there was eliminated and made unnecessary as a part of the right of way of the permanent highway a certain tract or parcel of land, which tract or parcel is more specifically defined hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of said state highway the fragment or portion of land hereinafter designated and heretofore included within the area of the right of way of said highway as formerly located, improved and used.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land hereinafter designated, which fragment or parcel was formerly within the limits of the right of way of the Corvallis-Newport Highway but is now eliminated from the right of way of said highway as said highway has been relocated in the City of Toledo, be and said fragment or parcel of land is abandoned as part of said highway, and said parcel of land being within the corporate limits of the City of Toledo is left to revert to the City of Toledo for such public purpose as the said municipality may elect to make of the same, and in the event the municipality does not elect to preserve said fragment of land for public purposes, then the same is left to revert to the abutting owners according to their legal rights. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

All that certain section of the old right of way of the Toledo Section of the Corvallis-Newport Highway, in Sections 8 and 17, Township 11 South, Range 10 West, W.M., Lincoln County, lying on the easterly side of the right of way required for the reconstructed Corvallis-Newport Highway, the beginning and ending points with reference

to the engineer's stations of said reconstructed highway being Station 2549+52 on the northerly end and Station 2554+10 on the southerly end.

The said fragment or parcel of land is more particularly ascertained and determined by reference to a map or blueprint marked "Exhibit A", attached hereto and by this reference made a part hereof, which said map for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. E. McCullough, Assistant Highway Engineer, and is dated October 30, 1940, upon which map or print there is reflected the above described parcel of land by showing the same shaded in red.*

2. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof delivered to the municipal authorities of the City of Toledo for such action as said municipal authorities may desire to take with respect to said fragment of land, and that a certified copy be mailed to the County Court.

3. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway, may enter or use the said abandoned portion of the said highway to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned highway, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

The Commission discussed the advisability of establishing a game refuge on State Highway Department property at Albany, particularly the area that includes the artificial lake formed by the impounding of the water of Cox Creek. The Commission approved establishment of such game refuge and, thereupon, signed a game refuge contract form furnished by the Oregon State Game Commission for such purpose.

The Commission discussed a report from the State Parks Superintendent on the suggestion made by Mr. A. B. Sanders, Manager of the Oregon Coast Highway Association, that the Commission maintain latrines adjacent to the Oregon Coast Highway at Depoe Bay. The Parks Superintendent recommended against the establishment of such facilities. The Commission approved the recommendation.

Reconsideration was given by the Commission to the matter of establishing wayside picnic areas along the Mount Hood Highway, in Hood River County. The Commission confirmed its action taken at the meeting on November 13 when the establishment of one wayside area was approved as a trial

*Map filed Right of Way Abandonment and Retention File - No. 82

proposition, same to be located at Highway Engineer's Station 628+00, about 10 miles south of Hood River.

The Commission discussed the action to be taken with respect to illegal advertising signs that are being maintained on privately-owned property adjacent to state highways but deferred its decision thereon until the next meeting. The Engineer was instructed to give the matter study in the meantime and to offer at such meeting suggestions and recommendations for handling the matter.

The Attorney brought up for discussion a right of way controversy with Mr. Clyde R. Gillette, Nashville, Oregon. He advised that Mr. Gillette has been offered \$225.00 for the land required of him, which offer Mr. Gillette has refused although he has stated his willingness to settle for \$250.00. The Attorney requested instructions as to whether to pay the sum demanded or to acquire the property by condemnation. The Commission decided to pay the \$250.00 in order to avoid condemnation and the expense incident thereto.

The Engineer reported on investigations conducted along the Old Oregon Trail at Huntington to ascertain the extent of the improvements that will be necessary to prevent waterspouts from causing damage to property at this place. He said that a joint inspection of the situation was made by Division Engineer Williams in company with engineers representing the Union Pacific Railroad Company and it is their thought that the main trouble could be eliminated by diverting waters from Waterspout Gulch into Durbin Creek, which flows under the highway and the railroad at the north side of the town, and by enlarging certain culverts under the highway and the railroad tracks at certain points in the town, all of which work is estimated to cost about \$5,174.00, and is to be paid approximately 50 per cent by the state and 50 per cent by the railroad company. He gave as his personal opinion that the diversion of the waters from Waterspout Gulch would not prove entirely satisfactory because waterspouts carry a lot of debris which would probably collect at the point where the diversion canal enters Durbin Creek and form a dam that would force the water to flow over private property, inviting damage claims. However, he said that the reconstruction of the culverts would materially assist in caring for the excess water. He recommended approval of the proposed plan insofar as the culvert construction is concerned and that further study be made with respect to the diversion of the waters from Waterspout Gulch before the expense is incurred in connection with that part of the improvement. The Commission approved the recommendation and authorized the Engineer to proceed in accordance therewith.

The Engineer reported that as previously instructed by the Commission he has made inquiry as to the plans of the U. S. Reclamation Service to establish a CCC camp along The Dalles-California Highway between Terrebonne and Madras in connection with the construction of irrigation canals and ditches in this vicinity, and has ascertained that there is no immediate plan for the establishment of such a camp, hence there appears to be no particular hurry from that standpoint for the reconstruction of the highway between these points. The Commission approved the report.

The Engineer discussed with the Commission the matter of surfacing a 6-mile unit of the Prineville-Madras Section of the Warm Springs Highway which was graded during the past summer. He said that the only surfacing material available in this vicinity is crushed rock and due to the high cost of producing such material, in his estimation, it would be inadvisable to place a standard surfacing on this section until the entire unit between Madras and Prineville is graded several years hence, when a larger surfacing project can be contracted at lesser unit cost. He accordingly recommended deferment of such surfacing project and that in the meantime he be authorized to expend about \$1,500 for graveling the weak spots on the new grade as they develop, such work to be done with state forces. The Commission approved the recommendation.

The Commission discussed a letter from Mr. G. H. O'Conner, Larshfield, in which the Commission was urged to improve a one-half mile section of the Coos River Secondary Highway just north of the Enegren Ferry crossing. Mr. O'Conner alleges that this road is narrow and crooked and is a death trap, and that many accidents have occurred thereon. Further, that the road carries a large volume of traffic and its improvement is more than justified. The Engineer estimated that it would cost about \$10,000.00 to improve the present road as requested. He pointed out that the road is not now on permanent alignment and will probably have to be moved in order to accommodate a bridge across Coos River to replace the present ferry, although as to that he cannot say definitely until a survey has been made. The Commission discussed the matter but deferred a decision pending the securing of an accurate estimate of cost to provide a permanent improvement. The Engineer was thereupon authorized to conduct a location survey of the section in order to secure such information.

The Commission discussed a resolution from the Ashland Chamber of Commerce in which request was made for a survey to determine just what is required to modernize the Pacific Highway along its present route through the city of Ashland, including resurfacing and widening where necessary, extension of concrete surfacing to the curbs at all points, and the elimination of the turn at the Plaza Corner. After discussion, the Commission approved the request and instructed the Engineer to make such investigations as may be necessary to determine what it will cost to do the work requested. He was further instructed to include in his report a statement of expenditures heretofore made by the Commission in the improvement of the Pacific Highway within the city limits of Ashland and an estimate of cost of acquiring the necessary right of way, removal of buildings, etc.

A letter was presented from the County Court of Lane County transmitting and endorsing a petition signed by numerous users of the Deadwood-Alsea Secondary Highway in which the Commission was urged to modernize this highway at the earliest possible time by widening, straightening, graveling and eliminating dangerous curves. The Commission denied the request on account of lack of funds to finance the work and for the further reason that there are so many other projects throughout the State that have a priority rating.

The Engineer reported that, as previously instructed by the Commission, he contacted the County Court of Lane County relative to the proposed improvement of the Swisshome Secondary State Highway between Walton and Swisshome, and the Court stated its willingness to pay one-third of the cost of this work, the balance to be paid one-half by the State and one-half by the logging company, and further agreed to the elimination of this section from the Secondary State Highway System when the proposed improvements have been completed, if the Highway Commission will extend this secondary state highway easterly from Veneta to Eugene. The Commission approved such arrangement and authorized the Engineer to proceed with the improvements.

The Engineer requested authority to purchase the following equipment:

- 25 trucks with dump bodies, of Ford and Chevrolet type,
25 old trucks to be traded in as part purchase price.
Estimated total cash outlay \$22,500.00.
- 14 $3\frac{1}{2}$ -ton, 2-wheel drive trucks, 14 old trucks to be
traded in as part purchase price. Estimated total
cash outlay \$47,600.00.
- 1 fire pump for use in state parks during fire season.
Estimated cost \$310.00.

After discussion, the Commission approved the request by unanimous vote and ordered that the purchases be made through the State Purchasing Agent in accordance with the usual practice.

The Engineer requested authority to sell to the Marshfield Cement Company, of Marshfield, 335 bbls. of cement which was purchased from the company for use in connection with the state force stabilization project on the Cape Arago Secondary State Highway near the town of Empire. He explained that bad weather conditions forced the closing down of this job before completion, necessitating the storing of the cement until spring, with probabilities of loss. In order to avoid any loss, he said, it was thought advisable to sell the cement back to the company if the company would buy it, which it has agreed to do at the same price that the state paid for it: viz., 136 barrels at \$2.94 per barrel and 199 barrels at \$2.65 per barrel, totaling \$927.19. He recommended acceptance of the offer. The Commission approved the recommendation.

The Commission had under discussion the form of agreement with Botsford, Constantine and Gardner covering the services of this company in connection with publicity matters during 1941. The Commission ordered that the form of the 1941 agreement shall be identical with the 1940 agreement.

The Commission discussed briefly matters pertaining to revenues of the State Police Department, particularly the desire of Superintendent Charles .. Pray for an increase of \$55,000 to finance his operations during

the next biennium. The matter was referred to Chairman Cabell to discuss with Governor Charles A. Sprague.

Consideration was given by the Commission to the claim of Melvin Sorell of Salem for injuries and damage suffered in an automobile accident on the Pacific Highway south of Salem. It appears that Mr. Sorell was driving his car on the old pavement just south of Salem, notwithstanding that the new highway was open for traffic at the time, and unfortunately drove his car through a barricade at a point where the old highway connects with the new highway, injuring himself and a companion and damaging his car. He asks reimbursement in the amount of \$150.00 to pay the cost of repairing his car. The Engineer gave as his thought that there was no excuse for the accident because the highway was properly barricaded, and that the State is not liable. The matter was discussed at considerable length but action thereon was deferred pending inspection of the premises by Chairman Cabell.

The Commission also considered the claim of I. L. Darby, Salem, for reimbursement for the cost of repairing his car, which was damaged when he backed into a "fog post" on the Pacific Highway just south of the intersection at Brooks, Marion County. Mr. Darby alleges that the fog post was improperly located and, in view thereof, that his claim is a just one. The Engineer advised that the fog post referred to serves to keep traffic on the surfaced road and is properly located, being 22 ft. distant from the center line of the highway and 10 ft. from the edge of the non-skid surfacing. He further stated that only carelessness on the part of the driver of an automobile could cause a collision with this post, hence, in his estimation, the state is not liable. He recommended denial of the claim. The Commission approved the recommendation.

A letter was presented from Arthur Langguth, attorney, Portland, requesting, on behalf of Albert C. Graff, Corbett, Oregon, assurance from the State Highway Commission that Mr. Graff will not be apprehended by State Police for transporting over state highways enroute from Larch Mountain to Portland, five or six loads of short-length logs weekly, the logs being not in excess of eight feet in length and loaded crosswise on the truck bed. Mr. Langguth stated that Mr. Graff is a farmer and that the timber from which the logs are cut belongs to him. Further, that he considers the logs an agricultural product and, under his interpretation of the law, it would not be necessary for Mr. Graff to secure a special carrier permit. The Commission considered that this matter is outside its jurisdiction and ordered that Mr. Langguth be so informed and that he be referred to the Public Utilities Commissioner.

The Commission adjourned at 10:30 p. m.

Mr. [Signature]
State Highway Engineer

Mr. [Signature]
Secretary

Henry T. Cabell
Chairman

Mr. [Signature]
Commissioner

DEC 3 1940

Lakeview, Oregon, December 4, 1940

The State Highway Commission met informally with the Lake County Court and a number of local citizens in the dining room of the Hot Springs Hotel, for a discussion of several matters of mutual interest. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Among the local people present were County Judge J. R. Heckman; County Commissioners E. J. Egli and W. P. Vernon; and County Clerk Carl W. Pendleton; Forrest Cooper, Secretary of the Lakeview Chamber of Commerce, who presided; Fred Reynolds, and Mr. Utley.

Judge Heckman asked for the improvement of the section of the Goose Lake County Road which extends southerly from the Klamath Falls-Lakeview Highway along the west side of Goose Lake. He also asked the Commission to expedite the oiling of the uncompleted portions of the Klamath Falls-Lakeview Highway. His request was endorsed by other members of the local group. The Commission agreed to inspect both projects on the following day enroute to Klamath Falls. Judge Heckman also asked the Commission to improve the Warner Valley Secondary Highway, which highway the Commission inspected early in the afternoon of this day. The Commission took the matter under advisement.

Commissioner Egli asked for permission to secure gravel from the state's gravel pit situate in the Southeast Quarter of the Northwest Quarter of Section 21, Township 28 South, Range 14 East, W. 12., Lake County, for use in surfacing county roads in the vicinity of Silver Lake. The Commission approved the request subject to investigation by the Engineer to determine whether or not the County's use of this gravel pit will react adversely to the best interests of the state. The Engineer was instructed to notify the County Court as soon as possible.

Mr. Utley brought up the matter of erection of an historical monument at the intersection of the Fremont Highway and the Lakeview-Turns Highway at Valley Falls. He said that the Flavell-Utley Company, which he represents, owns land at this location and will be pleased to deed sufficient area to the state, without cost, if the Highway Commission will erect the monument. The Commission took the matter under advisement.

The meeting was adjourned at 9:00 o'clock p. m.

Klamath Falls, Oregon, December 5, 1940

The State Highway Commission, all members being present, inspected the Goose Lake County Road, in Lake County, in company with the Lake County

Court, enroute from Lakeview to Klamath Falls. The Commission also inspected the uncompleted portions of the Klamath Falls-Lakeview Highway and certain county roads in the vicinity of Bonanza and Malin, in company with the County Court of Klamath County, following which the Commission conferred with members of the County Court and the Klamath Falls Chamber of Commerce, in the Chamber of Commerce Assembly Room. Present were:

Henry F. Cabell, Chairman
 Huron W. Clough, Commissioner
 Herman Oliver, Commissioner
 R. H. Baldock, State Highway Engineer
 H. B. Glaisyer, Secretary

Also present were about 20 members of the Chamber of Commerce. Mr. T. B. Watters, Chairman of the Highway Committee presided. He asked for the following improvements:

(1) Additional improvement of The Dalles-California Highway north from Terminal City. He was informed that the Commission expects to take bids for the grading of the $3\frac{1}{2}$ -mile section of this highway between Algona and Terminal City at its meeting on December 17. Also, that the surfacing of the section will not be included in the contract because such work will involve the obligating of funds in the new highway program which has not yet been arranged due to uncertainties of federal requirements with respect to the federal monies.

(2) Adopt a program to properly care for state highway traffic through the city of Klamath Falls. Mr. Watters was informed by the Engineer that this matter is now being studied.

(3) Improve the Westside-Klamath Lake Secondary Highway both inside and outside of the city limits of Klamath Falls and up to a point known as Geary Marsh. He particularly asked for the straightening of this highway at the Link River Bridge inside the city limits. The Commission agreed to inspect this latter project following the meeting.

(4) Improve the Westside-Klamath Lake Secondary Highway north of Geary Ranch, particularly the eight-mile section within the national forest boundaries. He was informed by Chairman Cabell that this road qualifies for only state money and there are no state moneys available to finance the work. Mr. Paul Landry, who was present, also urged the oiling of the eight-mile section within the forest boundary. He said that they would be perfectly satisfied with the oiling of the present road and urged an allocation of forest highway funds to finance it. The Commission took the matter under advisement.

(5) Installation of traffic signals on city streets in Klamath Falls, which project has previously been approved by the

Commission and is covered by cooperative agreement between the Highway Commission and the city. Mr. Watters urged the early installation of this signal system as did also City Engineer E. A. Thomas. Mr. Thomas stated that the city council would secure the funds to pay the city's share of the expense involved, hence there is no need for delay from that standpoint. The State Highway Engineer explained that the Commission at one time took bids for this work but rejected all of them because they were too high and the reason the project has not been readvertised is because it was thought inadvisable to open up the city streets during the winter season. Bids will be called again for this work, he said, as soon as weather conditions are favorable.

(6) Mr. Watters urged the Commission to install a railroad grade crossing signal on the Klamath Falls-Malin Highway at a place known as Hager. Mr. Budd, representing the Oregon, California and Eastern Railway Company, who was present, also urged the installation of such signal, stating that the traffic at this point is extremely heavy and that the signal is badly needed as a safety measure. The Engineer estimated the cost of the installation at \$2,500. He was instructed by the Commission to investigate the priority rating of this installation in the grade crossing signal program and to advise Mr. Earl Reynolds, Manager of the Klamath County Chamber of Commerce, relative thereto.

In this connection a letter was presented from Klamath County School District quoting a resolution adopted by the Board in which the Highway Commission was urged to install warning signals at the Hager, Summers Lane, and Olene highway crossings of the Oregon, California and Eastern Railroad for the benefit and safety of the many school children who are required to cross the railroad at these points. The Engineer was instructed to investigate the priority rating of all of these crossings.

(7) Widen and reconstruct the Green Springs Highway from its junction with The Dalles-California Highway to the west city limits of Klamath Falls. The Engineer advised that this matter is now being studied, surveys for the project having already been made.

(8) Insert on the new highway sign erected by the Highway Commission at the junction of the Willamette Highway and the Pacific Highway, at Goshen, the mileage to San Francisco from such point via the Pacific Highway and via the Willamette Highway. The Commission took the matter under advisement.

(9) Investigate the condition of the approaches to the Standard Oil Company's service station at Bonanza junction. The Engineer was instructed by the Commission to make such investigation.

(10) Improve the South Sixth Street entrance of the Klamath Falls-Malin Highway into Klamath Falls. The State Highway Engineer

explained the status of investigations that are being made of this matter which include not only the improvement of the present route but also the construction of alternate routes bypassing the congestion district along South Sixth Street. He gave as his thought that the present route should be improved regardless of whether or not the Commission adopts it as the main highway route, because it carries a large volume of local traffic, although the standard of construction could be lower than if it were to be used by both through traffic and local traffic. Mr. A. M. Collier suggested the adoption of a route paralleling the Oregon, California and Eastern Railway which would provide a freeway.

Mr. Watters brought up the matter of sidewalk construction along South Sixth Street. He suggested that the City of Klamath Falls could probably provide funds for the sidewalk construction within the city limits if the state would build the walks outside the city limits and he urged such work at the earliest possible time for the benefit of pedestrians.

Chairman Cabell closed the conference by stating that the South Sixth Street project is one of the Highway Commission's major problems and that it is being very carefully studied by the Commission to the end that when the improvement is made it will be satisfactory for all time to come.

The meeting was adjourned at 2:00 p. m., following which the Commission inspected the Westside-Klamath Lake Secondary Highway at the city limits; the approach to the Green Springs Highway between The Dalles-California Highway junction and the west city limits of Klamath Falls, and conditions along South Sixth Street.

At 4:00 p. m. the Commission met privately in the office of the District Maintenance Superintendent, George Sothman, at the Highway Department's Shops, to discuss the following matters, all members being present and participating, as were also the State Highway Engineer and the Secretary:

The Commission discussed a letter from Mr. W. H. Lynch, District Engineer, Public Roads Administration, dated November 25, 1940, relative to the modifications and additions to the military strategic highway system of Oregon contained in the State Highway Engineer's letter directed to Mr. Lynch under date of October 25, 1940. Mr. Lynch suggested certain additional alterations. These were given very careful consideration by the Commission and were approved by the Commission with the exception of the elimination of the John Day and Ochoco Highways from Vale to Redmond. The Commission considered that such section should be retained on the strategic highway system as a second priority route. The Engineer was instructed to convey such information to Mr. Lynch and to secure approval of the exception if at all possible. (See State Highway Engineer's letter dated December 9, 1940)

The matter of revising the minimum wage rates to be paid labor engaged in the performance of work under state highway contracts had the atten-

DEC 5 1940

tion of the Commission. The Engineer recommended minimum wage rates for four classifications of labor as follows: unskilled labor \$0.62½ per hour; intermediate grade labor, group one, \$0.75 per hour; intermediate grade labor, group two, \$0.90 per hour; skilled labor \$1.20 per hour. He presented a tabulation showing the various operations covered for each labor classification. He also recommended that all time worked by any employee in excess of eight hours per day be paid at double the minimum rate. After considerable discussion of this matter the Commission by unanimous vote adopted the minimum wage rates as recommended by the Engineer, including the payment of double time for time worked in excess of eight hours per day. The Commission also approved the labor classification prepared by the Engineer. The Engineer was instructed to put these minimum wage rates into effect on all new contracts awarded after January 1, 1941. (See tabulation of labor classification and minimum wage rates on file in "special matters.")

The Commission discussed at some length matters pertaining to the cost of constructing buildings and bridges but no action was taken thereon except that it was agreed that the Commission would inspect the new maintenance building now being constructed at Seneca in Grant County at the earliest convenient time.

Reconsideration was given by the Commission to the designation as a state highway of the proposed road or route extending from a point on the Columbia River Highway near the town of Boardman, in Morrow County, to a point on the Old Oregon Trail near the town of Stanfield, in Umatilla County. The Commission approved the placing of such route on the state highway system and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Old Oregon Trail as defined and described by statute connects with the Columbia River Highway at or near Umatilla; and

WHEREAS, in the judgment of the Highway Commission traffic having occasion to use the Old Oregon Trail from the Columbia River Highway easterly will be better served and more thoroughly accommodated by the location and construction of a highway having for its terminus on the Columbia River the place designated as Boardman and its terminus on the Old Oregon Trail the city or place designated as Stanfield.

THEREFORE, BE IT AID IT HEREBY IS RESOLVED, all members of the Commission being present and voting affirmatively, as follows:

1. That there be and there hereby is located and adopted as a state highway a route or location extending from Stanfield on the Old Oregon Trail to Boardman on the Columbia River Highway.

2. That the survey, map, field notes and other data made and prepared by the Engineer and filed with the State Highway Commission at Salem, Oregon, be and said survey, field notes, map and

other engineering data hereby are approved and said survey is hereby adopted as the survey of the route of said highway.

3. That said route and location hereby is approved and the construction of a highway thereover is hereby authorized.

4. That said highway shall be known and designated as the Boardman-Stanfield Highway and shall be given the number 54.

5. That this resolution shall be entered in the minutes and records of the Commission and a duly certified copy thereof delivered to the Public Roads Administration and a like copy to the County Court of Umatilla County and also to the County Court of Morrow County.

The Engineer requested authority from the Commission to advertise for bids for certain projects heretofore tentatively approved by the Commission in the 1941 construction program. He explained that the contracting of projects is behind schedule and that it is quite imperative that the Commission take action on this matter at this meeting so that the work can go forward without delay. He presented a list of such projects, as follows, which the Commission approved for contracting at the earliest possible time.

STATE PROJECTS ON PRIMARY HIGHWAYS

County	Highway	Section and Kind of Work	Estimated Cost
Harney	Burns-Crane	West Unit, Surface & Oil	\$ 40,000
Baker	Baker-Homestead	Flagstaff Hill-Keating Road, Grade, Surface & Oil	25,000
Grant	John Day-Burns	Seneca-South, surface & Oil	100,000

STATE PROJECTS ON SECONDARY HIGHWAYS

County	Highway	Section and Kind of Work	Estimated Cost
Benton	Kings Valley	Plunkett Section, Grade, Surf., Oil	\$ 60,000
Hood River	Hood River Secondary	Hood River Secon., Grade, Surf., Oil	40,000*
Malheur	Vale-West	All, Grade, Surface and Oil	40,000 T
Wheeler	Shaniko-Fossil	Clarno-Chichester, Grade & Surface (Intermittent)	20,000
Union	Starkey Secondary	Meadowbrook-Grande Ronde River, Grade & Surface (Intermittent)	20,000

* Authorized subject to approval of Hood River County Court
T Approved tentatively only

In this connection the Commission was undecided whether to approve additional work on the Hoppner-Cordon Road, in Morrow County, or to surface

and oil a section of the Oregon-Washington Highway between Jones Hill and Lena, east of Heppner. The Secretary was instructed to invite the County Court of Morrow County to the next meeting of the Commission on December 17 for discussion of the matter.

The Commission discussed the request of citizens of Cottage Grove for the removal of barricades which have been erected across certain streets in this town, particularly at Eighth and Washington Streets and at Seventh and Jefferson Streets so as to prevent local traffic from entering the newly constructed state highway at such locations. The Commission considered that it would be to the best interests of the general traveling public and to local traffic if the barricades are maintained as constructed and particularly would it eliminate the hazard of traffic entering the highway at these points. The request was accordingly denied and the Engineer was instructed to maintain the barricades in accordance with the original plans for this project.

A letter was presented from the Pilot Rock Lumber Company, Pilot Rock, Oregon, requesting a decision by the Commission on its previous request for permission to transport logs over the Pendleton-John Day Highway during hours of darkness, at least for two or three hours after sunset, so as to permit truckers to reach their destination on the same day that their trucks are loaded. The Commission deferred its decision in this matter pending consultation with Mr. Ormond R. Bean, Public Utilities Commissioner. The matter was referred to Chairman Cabell to discuss with Mr. Bean.

The Commission adjourned at 6:00 p. m. and reconvened at 8:00 p. m. in Room 208, Willard Hotel, Klamath Falls, with all Commissioners, the State Highway Engineer and the Secretary present and participating.

The Commission discussed a request from the City of Marshfield for the installation of traffic signals at the intersections of Broadway Street with Central Avenue, Anderson Avenue and Curtis Avenue, in that city. In this connection a letter was presented from the city recorder, Mr. John W. Butler, stating that the city has cash on hand in the amount of \$1,100 to pay a portion of its share of the cost and has included in its 1941 budget an item of \$1,500 to pay the balance. The Engineer advised that this matter has been investigated by Traffic Engineer John Beakey who has given as his opinion that the traffic lights are warranted and who estimates that the complete installation will cost about \$4,500. The Engineer recommended approval of the city's request provided the city will deposit with the Commission, before bids are taken for the work, its certified check in the amount of \$2,250 which represents 50 per cent of the cost of the installation and is in conformity with the Commission's policy with respect to such matters. The Commission approved the recommendation unanimously and authorized the Engineer to advertise the project for bids at the proper time.

A letter was presented from the County Court of Deschutes County requesting permission to construct sidewalks along the right of way of the McKenzie Highway through the town of Sisters which work is to be done as a WPA project under sponsorship of the county. The Engineer advised that the

plans for this work have been checked by Division Engineer Chandler who recommends approval of the request, in which approval he concurs. The Commission approved the recommendation by unanimous vote and instructed the Secretary to issue the customary permit covering the matter and to notify the county court and the WPA officials that the Commission has no objections to such sidewalk construction if carried on in conformance with the requirements of the State Highway Department.

The Engineer reported that in conformance with authority previously granted him by the Commission he has awarded contracts as follows for highway construction work for which bids were taken by the Commission on November 12 and 13, 1940, the awards in each instance being made to the low bidder and the conditions of the awards having been satisfied:

Barbur Boulevard-Boones Ferry Road Section of the West Portland-Hubbard Highway, in Multnomah, Washington, and Clackamas Counties. Bids taken November 12, contract awarded November 28, 1940, to Jacobsen-Jensen Company, low bidders.

Woodburn-Molalla-Silverton Rock Production Project in Clackamas and Marion Counties. Bids taken November 13, contract awarded November 28, 1940, to A. S. Wallace, low bidder.

Millican-Brothers Rock Production Project on the Central Oregon Highway, in Deschutes County. Bids taken November 13, contract awarded November 28, 1940, to A. S. Wallace, low bidder.

The Commission by unanimous vote approved the awards as reported.

The Commission had under discussion the adoption of a permanent route for a short section of Federal Aid Road No. 41 near the town of Clackamas, in Clackamas County. The Engineer advised that this road is now described as being "via East 82nd Street and Meridian Road to a point on Federal Aid Road No. 26 near Gladstone", whereas subsequent studies lead to the conclusion that a more direct and more serviceable route for the southern portion of the road would depart from the Meridian Road and would join Federal Aid Road No. 26 at or near Oregon City. He pointed out that the Commission plans to construct a railroad grade separation structure at the point where 82nd Street crosses the Southern Pacific Railroad tracks north of the town of Clackamas and that it is necessary that the Highway Commission adopt a permanent route for the highway at this point in order to secure the benefits of the federal funds that are being allocated for projects of this kind. He also pointed out that a controversy exists as to the permanent location of the highway south of the proposed railroad crossing and advised that it is not intended to make a selection now that will be final between this crossing and Oregon City; however, the location of the structure will fit any line that the Commission may later select. After discussion the Commission approved the following revised description for this highway, "No. 41: from a point on Federal Aid Road No. 1 at the intersection of East 82nd Street and Sandy Boulevard at the northeast limits of Portland to

DEC 5 1940

a point on Federal Aid Road No. 26 at or near Oregon City", and thereupon signed a letter directed to the Public Roads Administration requesting approval of such revised description. (See letter dated November 13, 1940, directed to Public Roads Administration, Portland, Oregon.)

The Engineer reported that repairs have been made to the bridge over the John Day River known as the Cottonwood Bridge on the Wasco-Heppner Secondary State Highway No. 300 at the Sherman-Gilliam County line, and it is no longer necessary to maintain the reduced load limit for which this bridge has been previously posted. He recommended the lifting of the reduced load limit. The Commission approved the recommendation and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, on the 30th day of August, 1938, at a meeting of the Oregon State Highway Commission, two members being present and participating, the Commission passed and adopted a resolution limiting the maximum permissible load limit to ten (10) tons on the following state highway bridge, to-wit:

300-18.84 Bridge over John Day River (commonly known as the Cottonwood Bridge) on the Wasco-Heppner Secondary Highway No. 300, at the Sherman-Gilliam County line . . . 10 tons

and

WHEREAS, subsequent to the passage of said resolution the said above-named bridge has been repaired so that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridge, to-wit:

300-18.84 Bridge over John Day River (commonly known as the Cottonwood Bridge) on the Wasco-Heppner Secondary Highway No. 300, at the Sherman-Gilliam County line

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridge shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that certified copies of this resolution be furnished to the county clerks of Sherman and Gilliam Counties, and that a certified copy of this resolution also be furnished the Superintendent of the Department of State Police for his information.

Consideration was given by the Commission to an application of the Salem Electric Cooperative Association for permission to construct a power pole line along the Salem-Dallas Highway near the Willamette River Bridge at West Salem. Action on this matter was deferred by the Commission for investigation and report.

The Commission reconsidered the proposed improvement of the Oregon Coast Highway through the town of Gold Beach but deferred action pending additional report from the Engineer as to how much it will cost to reconstruct the present highway through this town on a 60-foot right of way as compared to the improvement on an 80-foot right of way, considering both construction and right of way costs.

The Secretary presented letters from the Deschutes County Court and the Oromite Company with respect to the proposed improvement of the Terrebonne-Lower Bridge Road, in Deschutes County. The County Court's letter stated that, if the State Highway Commission will designate and improve this road as a federal aid secondary highway, the county will provide, at county expense, necessary right of way, construct the grade, and surface the same to the required standard and will contribute the sum of \$5,000 toward the cost of oiling. The Oromite Company in its letter assured the Commission that it intends definitely to rebuild its plant which was recently burned, which plant is located adjacent to the road that it is proposed to improve. Further, that reconstruction of their plant is now under way and they expect to resume operations about the first of February, 1941. In view of these letters the Commission authorized the Engineer to proceed with the location survey of the project which is in conformance with previous understanding and agreement with the county and the company.

The Commission ordered filed, without action, a letter from George T. Hall, Eugene, suggesting postponement of the proposed improvement of the Pacific Highway between West Springfield and Eugene, and expenditure of the funds budgeted for such improvement in constructing a highway on eventual permanent alignment west of Eugene from the Pacific Highway overcrossing of the Southern Pacific tracks to a junction with the Pacific Highway at or near Goshen.

The Secretary presented a resolution from the Baker County Chamber of Commerce relative to the maintenance of "Old Oregon Trail" signs along the Old Oregon Trail as directed by the Legislature in 1923 in a bill designating certain east and west highways across the State of Oregon, from the Idaho line to Seaside, as the Old Oregon Trail. The Engineer advised that signs have already been erected in conformance with this legislative order. In view thereof the Commission ordered the resolution filed without action.

The Commission also considered and ordered filed resolutions from the Gold Beach Chamber of Commerce, Manzanita Chamber of Commerce, Brookings Harbor Chamber of Commerce, and the Port Orford Chamber of Commerce, offering objections to the increased use of the Oregon Coast Highway by large trucks and trailers because in their belief such use will be dangerous, discouraging and otherwise inimical to tourist use of this road; and a letter

from Dr W. B. Prophet, Mayor of John Day, Oregon, thanking the Commission for highway improvements completed at that place.

The Secretary presented a letter from the Waterford Lumber Company, Marshfield, in which the Commission was urged to reconsider its previous decision denying the company's request for reimbursement for amounts expended by the company in 1936 and 1937 for improvements on the Allegany Section of the Coos River Secondary State Highway, in Coos County. The Commission considered that it has completely fulfilled its obligation and accordingly confirmed its previous decision.

The Commission discussed a letter from C. A. Bigelow, Chairman, Board of County Commissioners of Multnomah County, in regard to the Corbett Road which intersects the new Columbia River Highway at Corbett. According to Mr. Bigelow this road has been in existence for over half a century and is recognized by the O. W. R. R. & N. Company which has maintained a crossing signal at the place where the road crosses the railroad tracks for a long period of time. He also pointed out that the road affords the only access to the Columbia River for many miles and gave as his opinion that the road should never be alienated from general public use. In view of this letter the Commission decided that it has no alternative but to construct and maintain a connection between this road and the new Columbia River Highway when it is constructed. The Engineer was authorized and instructed to install a traffic actuated signal at the railroad crossing at the proper time.

The Commission considered and denied a request from the Redwood Empire Association suggesting certain changes in the Pacific Highway near its junction with the Redwood Highway just south of Grants Pass.

A letter was presented from E. E. Smith, owner of the Rogue Motor Court, Grants Pass, requesting an improved entrance driveway into his auto camp which is located adjacent to the Redwood Highway near its junction with the Pacific Highway at Grants Pass. The Engineer advised that he personally investigated this complaint and is of the opinion that Mr. Smith has an honest grievance. Further, that he has ordered certain things done which, he thought, would correct the situation to the satisfaction of Mr. Smith. The Commission approved the report.

The Commission read and ordered filed a letter from Oliver Justin Lee, Director of the Northwestern Observatory, Northwestern University, expressing favorable comment on the Oregon state highway system.

The Commission discussed a letter from Senator F. M. Franciscovich, Astoria, in which the Commission was requested to maintain signs on the ocean beach at Gearhart warning the public that it is dangerous to stand near or on logs that may be in or near the surf because of the possibility of the logs rolling and causing injury. The Commission referred this matter to the Attorney for advice as to whether or not it has jurisdiction over the beach at this location.

The Commission discussed and ordered filed, without action, communications as follows:

Resolution from Shasta View Grange, Klamath Falls, requesting re-examination of traffic conditions on South Sixth Street, Klamath Falls, and construction of four-lane highway from Lakeview-Merrill Junction to east end of Main Street, thence northwesterly through Hot Springs Addition to junction with The Dalles-California Highway north of Klamath Falls.

Letter from Alba Lewis, Chairman, Legislative Committee, Shasta View Grange, suggesting changes for the betterment of traffic conditions in Klamath Falls.

Newspaper clippings from Klamath Falls papers regarding accidents that have occurred on South Sixth Street, and urging improvement of this section.

Letter from Lions Club of Junction City thanking Commission for improvement of Summit Section of Siuslaw Highway.

The Secretary presented letters from the Grant County and Baker County Courts stating their willingness to pay the cost of snow removal operations on the Sumpter-Granite Road in Baker and Grant Counties beyond the limits of the Sumpter Valley Secondary State Highway. In view of these letters the Commission authorized the Engineer to conduct snow removal operations on this road during the present winter season so as to maintain travel to the town of Granite. He was further instructed to bill the counties monthly for the expense of such operations on the county road section. The Commission decided that it would not be necessary, in view of these letters, to enter into formal agreements with the counties covering the matter.

A joint resolution was presented from Marion and Linn County Courts in which the Commission was requested to authorize the Engineer to prepare plans and specifications as may be necessary for a bridge over the Santiam River on a county road near Gates, Oregon, and to advertise this project for bids, on behalf of the counties, at the meeting on December 17. The Commission approved the request by unanimous vote.

The Commission discussed a letter from Clatsop County Court requesting the survey of a proposed road between Camp Clatsop and Fort Stevens, in Clatsop County; also, requesting a survey for roads connecting Camp Clatsop and Fort Stevens with the Oregon Coast Highway. The Engineer advised that the cost of such surveys will be paid with federal moneys and he recommended approval of the request. The Commission approved the recommendation unanimously.

A letter was presented from the city manager of Oregon City stating the desire of the city commission to enter into an agreement with the Highway Commission with respect to the maintenance of a float in the Willa-

mette River between 8th and 9th Street, Oregon City, for the benefit of fishermen in mooring their boats. The Commission approved the request and instructed the Attorney to prepare an appropriate form of agreement covering the matter.

A letter from the Progressive Civic Club of Ocean Lake, inquiring as to the plans of the Commission for the improvement of the Oregon Coast Highway through the Ocean Lake District, had the attention of the Commission. Action on the matter was deferred by the Commission pending report from the Engineer as to how much it would cost to make a permanent improvement of the highway at this place.

The Commission discussed a letter from the Tillamook Chamber of Commerce suggesting that a WPA project be set up for the construction of the easterly end of the Wilson River Highway between Glenwood and its junction with the Wolf Creek Highway in the vicinity of Banks, Washington County. The Engineer read the letter aloud and also his reply thereto, in which he informed the Chamber of Commerce that it is the intention of the Highway Commission to build a road from Tillamook to Glenwood and to utilize the Gales Creek Road connection via Forest Grove for some time before proceeding with the construction of the section between Glenwood and Banks. The Commission approved the reply, it being the Commission's thought that it would be inadvisable to proceed with the Glenwood-Banks project in the near future. However, the Engineer was instructed to bring to the Commission's attention full information on this subject at the next meeting.

The Commission considered, and ordered filed, a letter from W. R. Winkler, Ashland, pointing out that the present Pacific Highway through the City of Ashland passes through four school zones, and giving as his opinion that, because of this fact, the route is entirely unsatisfactory as a permanent highway and suggesting an entirely new route through this city.

A resolution was presented from Thurston Grange No. 833, Lane County, requesting the immediate installation of a bell and light signal at the Southern Pacific Railroad crossing of the McKenzie Highway just east of Springfield, locally known as the "East Springfield Railroad Crossing". The Engineer advised that this matter was investigated by Traffic Engineer John Beakey who states that the priority of this signal does not fall within the first 100 crossings on the Commission's approved list, and who points out that there are no funds available to pay the cost involved, unless the Commission wishes to make a special appropriation. He recommended that the funds available to the Commission be expended on such other crossings (in the order of their priority) as have a higher hazard rating than this one. The Commission approved the recommendation and instructed the Secretary to so inform the Grange.

The Engineer read aloud a copy of a letter dated November 30, 1940, directed by E. P. Leavitt, Superintendent of Crater Lake National Park and the Oregon Caves National Monument, to Richard L. Sabin, Manager of the Oregon Caves Resort, in which Mr. Leavitt complains of the conditions imposed

by the State Highway Commission with respect to snow removal operations on the Oregon Caves Road, particularly the condition which requires a gate to be maintained across the road to stop general public travel. The Commission took no action on this matter.

The Engineer reported a suggestion from Governor Charles A. Sprague that it might work to the benefit of the several counties of the state if the Highway Commission would loan its services and facilities to the counties in connection with the purchase of county equipment. The Commission discussed the matter at some length and approved the Governor's suggestion. The Engineer was instructed to direct a letter to Mr. F. L. Phipps, Secretary of the Association of County Judges and Commissioners, offering the services of the State Highway Department in such matter if any of the counties want them.

A request was presented from J. W. Harrison, Portland, that he be allowed right of access to Union Avenue, Portland, between Harrison Street and Stevens Street, particularly in front of the Harrison Trucking Company's building on Block 7, Lot 45, where he wants to build an approach 14 ft. wide through the concrete curb and guard rail of the highway viaduct. Mr. Harrison wants the state to build this approach for him. The Engineer advised that it would cost about \$200 to build such an approach. The Commission decided to oppose the opening if it has legal authority to prevent it. The Attorney was instructed to advise the Commission of its legal power in the matter. In the event it is the Attorney's opinion that the Commission does not have legal authority to prevent right of access at this point, then the Commission will approve the opening subject to the condition that Mr. Harrison will pay, in advance, the estimated cost of the work, and that the work is done with state forces.

The Commission discussed a plan proposed by the Lions Club of Salem for the construction of an overhead pedestrian crossing on South Commercial Street, route of the Pacific Highway through Salem, near its intersection with Hoyt Street. The Engineer advised that the Lions Club is simply asking the State Highway Commission to approve the project which the club will build at its own cost and expense. The Commission questioned the advisability of permitting such structure to be built over the highway, because it probably would not be used by pedestrians and would not add to the attractiveness of the highway. Accordingly, the Engineer was instructed to explain the situation to the Lions Club and get them to change their plans, if possible.

Reconsideration was given by the Commission to the projects requested by the Klamath County Chamber of Commerce at its meeting with the Commission earlier in the day. After discussion, the Engineer was authorized to conduct location surveys of the several projects requested, including the proposed revision of the South Sixth Street entrance of the Klamath Falls-Malin Highway into Klamath Falls; proposed revision of the Green Springs Highway entrance into Klamath Falls; and the proposed revision of the entrance of the West Side Klamath Lake Secondary Highway into Klamath Falls.

The Commission also reconsidered the purchase of private property which is needed to fill out the state park at a place known as The Cove, in Jefferson County, which property was inspected by the Commission on December 3, 1940. The Commission, by unanimous vote, authorized the Right of Way Department to secure options for such property.

The matter of designating certain city streets in Albany as state highway routes and the abandoning of certain other streets that heretofore have been maintained by the state as state highway routes in this city had the attention of the Commission in view of the completion of the Pacific Highway revision through this place. After full discussion the following resolutions with regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, for the purpose of making possible a better alignment and a more satisfactory, safe and convenient highway and thoroughfare for the traveling public, the Highway Commission finds it necessary to relocate and reroute the Pacific Highway East where it enters, passes through and leaves the city of Albany, Linn County, and including portions without the city limits; and

WHEREAS, it is deemed by the Highway Commission advisable that a route and location heretofore selected should be more definitely and accurately defined and described; and

WHEREAS, the route and location of said highway into, through and out of the said city of Albany as modified by this resolution shall be duly and regularly adopted as the route and location of said highway where it enters, passes through and leaves the said city, including portions of said route immediately outside the corporate limits of said city;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

That the route of the Pacific Highway East through and adjacent to the city of Albany be as follows:

Beginning at the intersection of the former Pacific Highway East with the relocated and reconstructed Pacific Highway East at Engineer's Station 307+50, new route, which is Engineer's Station 333+90 of the old route; thence in a southwesterly direction along the relocated and reconstructed Pacific Highway East to the intersection of said highway with the east city limits of the city of Albany at Engineer's Station 389+15 (new route) near the intersection of Eighth Street and Geary Street; thence westerly along Eighth Street to the west end of the overhead structure near the west line of Railroad Street; thence in a southwesterly direction along the relocated and reconstructed route of the Pacific Highway East

to the intersection of said route with the south city limits of Albany at Engineer's Station 468+14.3 (new route); thence continuing in a southwesterly direction along the relocated and reconstructed Pacific Highway East to the intersection of said highway with the former Pacific Highway East at Engineer's Station 513+37.4, new route, which is Engineer's Station 48+15 of the old route; and including the ramps and approaches known as the North and South Thurston Street ramps, the Jackson Street ramp, the North and South Lyon Street ramps, the civic center ramp, the Ellsworth Street ramp, and that section of street connecting Lyon Street with the civic center ramp and South Lyon Street ramp; and including the section of the former Pacific Highway East to be used as a service road, between Engineer's Stations 333+90 (old route) and 349+20 (old route); and including that portion of the old Pacific Highway East between Engineer's Stations 48+15 (old route) and Engineer's Station 0+00 (old route) at the south city limits of Albany.

The route and streets hereinabove described may be more definitely and particularly ascertained and determined by reference to a map or blueprint attached hereto and by this reference made a part hereof, which for identification purposes bears the signatures of F. D. Eason, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McQuilough, Assistant State Highway Engineer, and is dated December 5, 1940, upon which map there is reflected the above described route by showing the same shaded in red.*

That this resolution be entered in the minutes and records of the State Highway Commission and a duly certified copy thereof be delivered to the municipal authorities of the city of Albany, to the County Court of Linn County, and to the Public Roads Administration.

WHEREAS, the Highway Commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this state, to select and designate the street or streets of such incorporated city or town over which the state highway shall be routed, and the Commission is further authorized to alter or change such routing when in its opinion the interests of the traveling public will be better served; and

WHEREAS, for the purpose of affording a more serviceable, convenient and safe highway and thoroughfare through the city of Albany, a new location has been adopted and a permanent four-lane highway constructed thereover; and

* - Map filed in New Highway Routes File - No. 24

DEC 5 1940

WHEREAS, by reason of the said relocation of the highway and the construction of a four-lane highway, the former route of the Pacific Highway East through the city of Albany is no longer needed as a route for the general traveling public into, within, and out of the said city and the streets formerly designated and used as a part of the said routes are no longer needed for such purposes:

THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the former route of the Pacific Highway East, entering the city of Albany from the north and east, passing through said city and leaving at the south and west, and including such portions as are described without the city limits, be and the same hereby is abandoned as a section or segment of the said highway; and said route, and the streets or roads involved therein, are left to revert to the authority having original jurisdiction thereover. The description of the sections to be abandoned by this resolution as a part of the route of the Pacific Highway East is as follows:

Beginning at the intersection of the relocated and reconstructed Pacific Highway East with the former route of the Pacific Highway East at Engineer's Station 307+50 of the new route which is Engineer's Station 333+90 of the old route; thence in a southwesterly direction on the former route of the Pacific Highway East to the east city limits of Albany at the intersection of Geary Street and Salem Road at Engineer's Station 408+18.0 (old route), except that portion between Engineer's Stations 333+90 (old route) and 360+00 (old route); thence westerly on Salem Road to the intersection of Main Street and Salem Road; thence north on Main Street to the intersection of First Street and Main Street; thence west on First Street to the intersection of Washington Street and First Street; thence south on Washington Street to the intersection of Sixth Street and Washington Street; thence west on Sixth Street to the intersection of Sixth and Elm Streets; thence southerly on Elm Street and an extension thereof to the south city limits of Albany at the intersection of Klamath and Elm Streets at Engineer's Station 0+00, thence southerly on the route of the former Pacific Highway East to an intersection with the relocated and reconstructed Pacific Highway East at Engineer's Station 48+15 (old route), except that portion between said Engineer's Stations 0+00 and 48+15 (old route).

2. That the section of the former route of the Pacific Highway East, beginning at Engineer's Station 360+00 (old route) and extending thence in a southwesterly direction on the former route of the Pacific Highway East to the east city limits of Albany at the intersection of Geary Street and Salem Road is left to revert to the jurisdiction

tion of the County Court of Linn County for such use and purpose as said route may serve as a county road.

3. That the section of the former route of the Pacific Highway East through the city beginning at the east city limits at the intersection of Salem Road and Geary Street at Engineer's Station 408+18 and proceeding west and south over the former described route of the Pacific Highway East through the city of Albany to the south city limits at the intersection of Elm Street extension and Klamath Street at Engineer's Station 0+00 shall no longer be designated as streets or sections of streets of the city of Albany over which the Pacific Highway East shall be routed, and jurisdiction over said streets for every and all purposes is hereby surrendered to the municipal authorities of the city of Albany.

4. That for the purpose of further describing the route and location under discussion in this resolution there is attached hereto and made a part hereof a blueprint or map on which is shown colored in red the route or routes herein described.*

5. That this resolution be entered in the minutes and records of the State Highway Commission and a duly certified copy thereof be delivered to the municipal authorities of the city of Albany, to the County Court of Linn County, and a like copy to the Public Roads Administration.

WHEREAS, for the purpose of making possible a better alignment and a more satisfactory, safe and convenient highway and thoroughfare for the traveling public, the Highway Commission finds it necessary to make a new junction of the Santiam Highway and the new route of the Pacific Highway East at or near the east city limits of Albany, which relocation involves the abandonment of certain sections of the former route of the Santiam Highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting, as follows:

1. That that portion of the former route of the Santiam Highway between the north right of way line of the new location of the Pacific Highway East at State Street and the east city limits of Albany at Geary Street (Highway Engineer's Station 64+23.5, old route), be abandoned as a portion of the route of the Santiam Highway and left to revert to the jurisdiction of the County Court of Linn County for such use and purpose as said road may serve as a county road.

2. That the former route of the Santiam Highway from the east city limits of Albany at Geary Street at Engineer's Station

* - Map filed in Abandonment and Retention File - No. 85

64+23.5 (old route) and extending along the former route of the Santiam Highway to an intersection with Main Street and thence on Main Street to an intersection with the Salem Road, or the former route of the Pacific Highway East, be and hereby is abandoned as the route of the Santiam Highway and the jurisdiction over said described streets for every and all purposes is surrendered by the Highway Commission to the municipal authorities of the City of Albany.

3. That for the purpose of further describing the route and location under discussion in this resolution there is attached hereto and made a part hereof a blueprint or map on which is shown colored in red the route or routes herein described.*

4. That this resolution be entered in the minutes and records of the State Highway Commission and that a duly certified copy thereof be delivered to the municipal authorities of the city of Albany, to the County Court of Linn County, and to the Public Roads Administration.

WHEREAS, for the purpose of making possible a connection between the present route of the Albany-Corvallis Highway and the newly relocated and constructed route of the Pacific Highway East in the city of Albany, the Highway Commission finds it necessary to extend the route of the Albany-Corvallis Highway to this new connection; and

WHEREAS, it is deemed by the Commission appropriate that the route and location of this extension should be duly and regularly adopted as a portion of the route of the Albany-Corvallis Highway within the city of Albany;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

That the route of the extension of the Albany-Corvallis Highway be and is described as follows:

Beginning at the intersection of Ellsworth and First Streets; thence south on Ellsworth Street to the intersection with the newly relocated and constructed Pacific Highway East near Eleventh Street, and including that portion of Ninth Street between Ellsworth Street and Lyon Street and that portion of Lyon Street between Ninth Street and First Street and that portion of First Street between Lyon Street and Ellsworth Street.

That for the purpose of further describing the route and location under discussion in this resolution there is attached hereto

* - Map filed in Right of Way Abandonment and Retention File - No. 86

and made a part hereof a blueprint or map on which is shown colored in red the route or routes herein described.*

That this resolution be entered in the minutes and records of the State Highway Commission and that a duly certified copy thereof be delivered to the municipal authorities of the city of Albany and to the Public Roads Administration.

The Commission also discussed the matter of rerouting state highways through Oregon City in view of the completion of the new highway along the waterfront at this place. The following resolutions with regard thereto were adopted by the Commission by unanimous vote:

WHEREAS, for the purpose of making possible certain connections between the present route of the Cascade Secondary Highway and the newly relocated and constructed route of the Pacific Highway East in the city of Oregon City, the Highway Commission finds it necessary to designate certain streets as connecting routes between these state highways; and

WHEREAS, it is deemed by the Commission appropriate that these connecting routes should be duly and regularly adopted as a portion of the route of the Cascade Secondary Highway within the city of Oregon City;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and affirmatively voting, as follows:

1. That the route of the Cascade Secondary Highway within the city of Oregon City shall also include the connections described as follows:

Beginning at Engineer's Station 10+97.5 on the newly relocated and constructed route of the Pacific Highway East; thence southerly to the intersection of 14th Street and Main Street; thence easterly on 14th Street to Washington Street to a connection with the route of the Cascade Secondary Highway; and westerly on 14th Street between Main Street and the new route of the Pacific Highway East.

2. That these connections be and they hereby become connections between the Cascade Secondary Highway and the route of the Pacific Highway East.

3. That for the purpose of further describing the route and location under discussion in this resolution there is attached

* - Map filed in New Highway Routes File - No. 25

hereto and made a part hereof a blueprint or map on which is shown colored in red the route or routes herein described.*

4. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof be delivered to the municipal authorities of the city of Oregon City and to the Public Roads Administration.

WHEREAS, the Highway Commission is authorized and directed, whenever the route of any state highway passes through the corporate limits of any incorporated city or town of this state, to select and designate the street or streets of such incorporated city or town over which the state highway shall be routed; and the Commission is further authorized to alter or change such routing when in its opinion the interests of the traveling public will be better served; and

WHEREAS, the Highway Commission has recently relocated and reconstructed the Pacific Highway East through Oregon City, which has made necessary an extension of the route of the Oswego Highway to a connection with the newly located and constructed route of the Pacific Highway East in Oregon City;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the route of the extension of the Oswego Highway is described as follows:

- (1) Beginning at the intersection of Main and 7th Streets, thence southerly along Main Street to a connection with the route of the Pacific Highway East at Main and 5th Streets;
- (2) Beginning at the intersection of Main and 7th Streets, thence northerly along Main Street to 8th Street, thence westerly on 8th Street to Water Street, the new route of the Pacific Highway East.

2. That this connection be, and it hereby becomes, an extension of the Oswego Highway to connections with the route of the Pacific Highway East.

3. That for the purpose of further describing the route and location under discussion in this resolution there is attached hereto and made a part hereof a blueprint or map on which is shown colored in red the route or routes herein described.*

4. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof be delivered to the municipal authorities of the city of Oregon City and to the Public Roads Administration.

* - Maps filed in New Highway Routes File - Nos. 26 and 27

The Commission discussed several projects that were brought to its attention by delegations during its inspection trip in Eastern Oregon, September 30 to October 4, 1940, particularly the following:

1. Request of Umatilla County Court for the construction of a connection between the Havana-Helix Road and the new highway between Pendleton and Adams, in Umatilla County.
2. Request of Hermiston delegation for the straightening of the Old Oregon Trail between Hermiston and Umatilla and the elimination of existing railroad grade crossings, especially the elimination of the numerous right-angle turns in the present highway route through Hermiston.
3. Request of Wallowa County Court for a one-mile extension of the Joseph-Wallowa Lake Secondary State Highway at the head of Wallowa Lake.

The Commission deferred its decision as to the first of these projects pending inspection of the same in company with the Chief Engineer of the office of the Public Utilities Commissioner. The Commission denied the request of the Hermiston delegation for the straightening of the Old Oregon Trail between Hermiston and Umatilla, however, authorized the Engineer to make a location survey of this highway to determine a permanent location through the town of Hermiston eliminating the turns in the existing highway. With respect to the extension of the Joseph-Wallowa Lake Secondary State Highway, the Commission deferred a decision pending investigation of the right of way status. The Attorney was instructed to make such investigation and report his findings to the Commission.

The Engineer reported that a number of surveys heretofore authorized by the Commission have been completed. He presented a list of such surveys and reported briefly on each survey listed thereon. After due consideration, the Commission approved the respective surveys, as reported, and adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on certain sections or portions of the highways of the State of Oregon; and

WHEREAS, pursuant to said authorization the State Highway Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission, in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT RESOLVED that the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the State Highway Commission in its Salem office, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highways involved:

BE IT FURTHER RESOLVED that the State Highway Engineer be and he hereby is authorized to make such minor changes in the said loca-

tions as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

K. L. Goulter, Contract No. 2259, for grading and construction of concrete structures on the Necarney Creek-Neahkahnie Mountain Section of the Oregon Coast Highway, in Tillamook County, requested an extension of time of four months, from November 30, 1940, to April 1, 1941, within which to complete this job. He attributed his failure to complete the job within the specified time limit to a large overrun of the quantities involved. The Engineer advised that, according to the last revised estimate for this work, there has been an increase of 28.4 per cent in the quantity of material that Mr. Goulter was required to move. This would automatically entitle Mr. Goulter, he said, to an extension of time of 101 days, or until March 10, 1941, without penalty. He recommended the granting of the extension of time requested by Mr. Goulter up to April 1, 1941, but that he be required to reimburse the state for extra engineering expense incurred on this job after March 10, 1941. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Rogers Construction Company, Contract No. 2266, for furnishing crushed rock, in stock piles, for the Chemult-Fort Klamath Section of The Dalles-California Highway, and Sand Creek Secondary Highway, in Klamath County, requested an extension of time of three months, from June 30, to October 7, 1940, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to bad weather conditions. The Engineer advised that the contractor did experience some bad weather but it was not unusual nor exceptional and this is not the reason for failing to complete the project within the specified time limit. He gave as his thought that the main reason for overrunning the time limit was because the contractor had additional highway work under way in other parts of the state which did not permit starting of this project as early as was expected. He recommended the granting of the extension of time requested subject to the condition that the contractor be charged with the extra engineering expense incurred by the state on this job subsequent to the specified completion date. The Commission approved the recommendation.

Rogers Construction Company, Contract No. 2273, for grading, surfacing, and oiling the Dairy Section of the Klamath Falls-Lakeview Highway, in Klamath County, requested an extension of time, from July 15 to October 21, 1940, within which to complete this job. They attributed their failure to complete the project within the

specified time limit partly to bad weather conditions and partly to other state highway work which they had under way at Modoc Point, which work, they declared, was retarded because of a flood at Algoma. The Engineer advised that the contract for this work was awarded on January 12, 1940, and it was specified that the work should be completed by July 15, 1940, which allowed ample time. However, the work was not completed until October 21, 1940. He recommended that the extension of time be granted with the understanding that the contractor would reimburse the state for extra engineering expense incurred on the job subsequent to the specified date of completion. The Commission approved the recommendation.

Mid-Columbia Sand & Gravel Company, Contract No. 2290, for the furnishing of crushed rock in stock piles for the Seufert-Dufur Section of The Dalles-California Highway, in Wasco County, requested an extension of time from July 31 to October 21, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to rainy weather which did not permit them to prepare the sites for the stock piles. The Engineer advised that the principal reason for the contractor's failure to complete the job on time was lack of experience in carrying on this type of work and the use of old equipment which was constantly in need of repair. If the job had been handled properly and if the contractor had used good equipment, he said, the project could have been completed easily within the specified time limit. He recommended, in view of the circumstances, that the extension of time requested be granted but that the contractor be charged with the extra engineering expense incurred by the state subsequent to the specified date of completion. The Commission approved the recommendation.

Jacobsen-Jensen Company, Contract No. 2338, for grading and paving the Warrenton (Massachusetts Ave.-Market Street) Section of the Fort Stevens County Road, in Clatsop County, requested an additional extension of time, from October 5 to October 26, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to difficulties in securing crushed material for base and shoulder work, alleging that the Astoria firm that was to supply this material was greatly handicapped in doing so by reason of the fact that they were required to furnish similar materials for the Tongue Point Naval Base project. The Engineer advised that the reason given by the contractor for failure to complete this project on time is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. Also, that the penalty previously imposed on the contractor in connection with the first extension of time be cancelled. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Coos Bay Dredging Company, Contract No. 2339, for grading and construction of bituminous macadam on the Bandon Section of the Oregon Coast Highway, in Coos County, requested an extension of time of nine months, from October 31, 1940, to July 31, 1941, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to adverse weather conditions which did not permit the performance of the oiling work. The Engineer advised that the Commission took bids for this job on June 14, 1940, but the contract was not awarded until July 12, 1940. Also, that the contractor started operations on July 15, 1940, and did everything possible to expedite completion of the work within the specified time limit but failed to do so because of early rains that made it inadvisable to do the oiling. He also said that he informed the contractor on September 10 that he would not be permitted to do the oiling work this fall. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

William Zickler, Contract No. 2341, for the construction of a bridge over Canyon Creek, on the John Day Highway, in the town of John Day, requested an extension of time of 30 days, from October 31 to November 30, 1940, within which to complete this job. He gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the quantities on this job were increased somewhat over the original estimate and, in his estimation, the contractor is entitled to a 7-day extension of time without penalty on this account. He recommended the granting of the extension of time for 7 days without penalty; also, that the Commission grant the balance of the extension requested, to November 30, 1940, with the understanding and condition that the contractor be charged for the extra engineering expense incurred by the state subsequent to such 7-day period. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Martin Peterson, Contract No. 2351, for construction of a slide drainage ditch on the Bunker Hill Section of the Oregon Coast Highway, in Coos County, requested an extension of time of 31 days, from September 30 to October 31, 1940, within which to complete this project. He alleged that his original contract for this work was completed before the expiration of the specified time limit and that the extension of time required is simply to allow him time to complete other work ordered by the Engineer. The Engineer advised that the reason given by the contractor for failure to complete this project within the specified time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2266, 2273, 2290, 2338, and 2351, for the construction of state highway projects, have been completed according to the requirements of the contracts, or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2266, with Rogers Construction Company for furnishing 12,000 cu. yds. of crushed rock, in stock piles, on the Chemult-Fort Klamath Section of The Dalles-California and Sand Creek Secondary Highways, in Klamath County. Completed October 7, 1940.

Contract No. 2273, with Rogers Construction Company, for grading, surfacing, and oiling the Dairy Section of the Klamath Falls-Lakeview Highway, in Klamath County. Completed October 21, 1940.

Contract No. 2290, with Mid-Columbia Sand & Gravel Company, for furnishing 9,100 cu. yds. of crushed materials in stock piles on the Seufert-Dufur Section of The Dalles-California Highway, in Wasco County. Completed October 21, 1940.

Contract No. 2338, with Jacobsen-Jensen Company, for grading and paving the Warrenton (Massachusetts Avenue-Market Street) Section of Fort Stevens County Road, in Clatsop County. Completed on October 26, 1940.

Contract No. 2351, with Martin Petersen, for construction of a slide drainage ditch on the Bunker Hill Section of the Oregon Coast Highway, in Coos County. Completed October 22, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Consideration was given by the Commission to the date for its January, 1941, regular meeting heretofore scheduled for Thursday and Friday, Jan-

uary 23 and 24. The Engineer advised that this date conflicts with the date of the Annual Meeting of the Associated General Contractors in Seattle, Washington, and that the contractors' association has asked that the Commission meeting date be changed. The Commission decided in view thereof to advance its meeting date to Tuesday and Wednesday, January 21 and 22, 1941. The Secretary was instructed to make the usual arrangements for the use of the auditorium in the Public Service Building, Portland, for such meeting.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Newport Construction Company disposing of its claim for extra compensation arising out of its contract No. 2196 with the Commission for construction of the Provolt-Williams Section of Williams Secondary State Highway, in Josephine County.

Agreement with State Game Commission establishing a game refuge at Albany.

Letter directed to Public Roads Administration regarding proposed improvement of Cascade Highway between Clackamas and Oregon City.

Joint letter with W. H. Lynch, District Engineer, Public Roads Administration, being Program Letter covering allocation of one-half of 1941 Federal Lands Highway Funds.

Bargain and Sale Deed conveying unto Faith M. Larios 0.2 acre of land situate adjacent to Cascade Highway in the Northwest $\frac{1}{4}$ of the Southwest $\frac{1}{4}$ of Section 4, Township 2 South, Range 2 East, W. M., Clackamas County.

Quitclaim Deed conveying unto Clatsop County, for reconveyance to the U. S. Navy Department, 6.99 acres of land situate in Lots 4 and 5, Section 22, Township 8 North, Range 9 West, W. M., Clatsop County, being a portion of Tongue Point State Park, which is needed by the Navy Department in connection with the development of Tongue Point Naval Air Base, Real Property File No. 8189.

The meeting was adjourned at 10:30 p. m.

Herman O. Lane
Commissioner

DEC 5 1940

Portland, Oregon, December 17, 1940

The State Highway Commission met in regular session at 9:00 a.m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
D. G. DeSart, Acting Secretary

Secretary H. B. Glaisyer was absent on account of illness.

Bids as follows for highway construction projects and the sale of buildings were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room:

OREGON COAST, WOLF CREEK, AND MECANICUM HIGHWAYS
SEASIDE-WHEELER ROCK PRODUCTION

Babler Bros.	\$14,510.00
R. O. Dail & Warren Bros.	14,870.00
A. S. Wallace	15,200.00
Gus Reichow,	15,220.00
Homer G. Johnson	15,490.00

SALE OF BUILDING IN SCAPOOSE

Building No. 8341 (former owner Mrs. G. B. Turner)

H. G. Palmberg	\$32.00
----------------	---------

The Morrow County Court, represented by County Judge Bert Johnson, County Commissioner George N. Peck, and County Commissioner L. D. Neill, conferred with the Commission in regard to the improvement of the Patterson Ferry County Road, the improvement of the Jones Hill-Lena Section of the Heppner Highway, and the Gilliam County Line-Zinter Ranch Section of the Wasco-Heppner Secondary Highway. The Commission instructed the Engineer to furnish the Attorney with data necessary for drawing up an agreement with the county for the improvement of the Patterson Ferry Road, it being understood that the county would provide a 60-foot right of way and that the state will oil the roadway at state expense; also that the county will maintain the road thereafter or pay the state for maintaining it.

Judge Johnson gave as his thought that the improvement of the Jones Hill-Lena Section is more important to the county than the construction of the Gilliam County Line-Zinter Ranch Section, due to the fact that much log hauling is being carried on thereover. However, discussion brought out the fact that the Gilliam County Line-Zinter Ranch Section should be improved as a unit, whereas the Jones Hill-Lena Section is of such nature that it would readily lend itself to adjustment to the Commission's finances. The county court approved the Commission's plan to contract the Gilliam County Line-Zinter Ranch Section, for which there is set up in the program an amount of \$65,000, and to contract later the Jones Hill-Lena work in the amount of \$45,000 plus any saving that might accrue from the amount set up for the Gilliam County Line-Zinter Ranch project.

Judge Johnson said he also had a petition for widening the bad curve on the Eightmile-Rhea Creek Section of the Wasco-Heppner Secondary near the Hilma Anderson place above Ruggs, but that he would not present it now inasmuch as he had had a letter from Division Engineer W. C. Williams stating that this work had been approved as a Minor Betterment order.

The Commission then approved Judge Johnson's request that the state perform the oiling for the county on the Ione-Morgan County Road, for which

DEC 17 1940

the county is producing and stock-piling rock. The Engineer was instructed to furnish the county court with an estimate for this state work that the court might draw an order on the Secretary of State against its share of the gasoline tax funds to pay for the work.

A delegation from The Dalles, represented by County Judge J. B. Kirk and County Commissioner Mace Fulton, requested of the Commission the relocation of the Columbia River Highway through The Dalles, by constructing a new route along the water front where traffic could enter the highway without crossing the railroad tracks at grade. They said that the highway so located would relieve their narrow main street of congestion, which would be of great help in cases of fire. Judge Kirk pointed out that grain elevators, tank farms and all industrial development will always be on the river side of the railroad tracks. The Commission refused the request of the delegation because the project is too large and costly to construct at this time. Chairman Cabell suggested the designation and improvement of two routes through the city, one for trucks, and one for other traffic. This suggestion was looked upon with favor by the other members of the Commission but no action was taken.

Mr. Arthur E. Powell, Mayor of Central Point, requested that the Commission take over and maintain as a state secondary highway the road that connects Central Point with the Crater Lake Highway. He informed the Commission that the bulk of the traffic carried by this county road within the City of Central Point is through traffic traveling between the Pacific Highway and the Crater Lake Highway and that the city has no money to maintain the section through their town, which is badly in need of repair. He gave as his thought that it is not fair to require small country towns to build and maintain streets for through traffic. The Commission promised to investigate this project and consider it in relation to other projects in that county.

Mr. Powell offered to the Highway Commission, in behalf of the City of Central Point, sufficient right of way to straighten the "S" curve on the Pacific Highway at the north entrance to the city. The Commission promised to investigate this improvement and advise the city at a later date.

The Attorney submitted a form of agreement with the O.W.R. & N. Company, Multnomah County, and the Port of Portland, covering the Front Avenue project in Portland. The Commission approved the form with minor corrections.

The Attorney reported on the status of the Front Avenue railroad franchise controversy in Portland, which has been referred to the Interstate Commerce Commission by Public Utilities Commissioner Bean. He also reported on the question of whether or not the City of Portland shall take over the Public Market, saying that ownership will probably be settled at a meeting to be held January 6. If the City of Portland does not take over the Market property, there will probably be several months' delay in reaching a right of way settlement with the owners of the Market. The Commission thought it advisable not to award any contracts on the Front Avenue project until it is definitely assured that nothing could interfere with the completion of the whole project.

The Attorney suggested, as a plan for furnishing the Secretary of State with proof of claim for right of way vouchers on the Front Avenue project on which the state is to pay 40%, that the deeds be executed in duplicate, one copy to go to the city for recording, the other to be attached to the Highway Commission's vouchers for the satisfaction of the Secretary of State. A suggestion by Chairman Cabell that the Attorney work out this routine with the city and submit it to the Commission at a later date was approved.

Harold Say, Director of the Travel and Information Department, submitted an agreement with the Castle Films, Inc., for distribution of the State Highway Department's motion picture film entitled "The New Oregon Trail", in black and white, and for editing a colored film under the same title. This agreement is essentially the same in regard to the black and white film as that under which the state's films were distributed during 1940. The agreement was approved, but the Commission refrained from executing it until it is signed by Castle Films, Inc.

The Assistant Attorney submitted agreements with the National Hospital Association and the Physicians and Surgeons Association covering medical care for the employees of the State Highway Commission during 1941. These contracts are essentially the same as those under which similar service has been rendered in the past, the main difference being that the medical associations will no longer furnish medicines except in hospitalization cases. The Assistant Attorney said that another agreement with the Multnomah Medical Service Bureau would be ready for signatures the next day. The Commission approved the form of these contracts.

The Southeast Portland Chamber of Commerce, represented by M. Petrie of the Mount Scott Funeral Home; H. W. Phillips, L. A. Matthiesen, S. A. Felinlig, Harry Black, and Chas. H. Jones, conferred with the Commission in the matter of the Clackamas Overcrossing. The Engineer advised that this project is tentatively listed for contracting in February. Upon Mr. Phillips' request for assurance that money set up for this project would not be used for any other purpose, Chairman Cabell said that, barring any great emergency, it would be spent there and nowhere else.

Mr. Matthiesen then renewed their request for placing the proposed Foster Road extension on the state highway system and on the improvement program. The Engineer admitted that this road would be better than the Mt. Hood Highway through Gresham if both were equally improved. Chairman Cabell gave as his thought that the State has too much of an investment in the present road through Gresham to drop it now in favor of an entirely new route. Mr. Matthiesen advised that Multnomah County will build the Barbur-Welch Gap Section and other small sections with W.P.A. forces if the Commission will place this road on the state highway system; also, that the county will start work immediately, and that the owners will give the right of way.

Chairman Cabell said that if this road were less meritorious it could be placed on the state secondary system, but in view of its strategic location it could only be placed on the primary system, necessitating such

high-type construction as to preclude the county's improvement to that standard. He then asked the Engineer to furnish copies of his report on this subject to the new Commissioners for study, and suggested that they inspect this section with Mr. Matthiesen at a later date.

Mr. Melvin Weiberg, Paulina, was present and asked the Commission to straighten some of the curves on the Crooked River Secondary State Highway between Paulina and Prineville. He also requested the graveling of some of the worst spots that are now nearly impassable. He advised that state forces were in this vicinity about two weeks ago with the intention of placing some gravel but were called away when it was learned that the owners of the gravel deposits would not let them take the material unless paid about \$500. The Engineer recommended that the Commission authorize an expenditure of \$2,500 for the removal of the rocky points and for graveling where necessary to maintain travel. The Commission approved the recommendation and instructed the Attorney to negotiate for the gravel deposit.

Ruth K. Jens, M. D., representing the U. S. Indian Service at Siletz, came before the Commission in the interests of the Siletz Secondary Highway in Lincoln County. She declared that this road, especially between Siletz and Kernville, is in almost an impassable condition and urged the Commission to grade and widen the road throughout its entire length. The Engineer stated that the Public Roads Administration would not accept this highway as a federal aid secondary highway, so it could not be financed with federal moneys. Chairman Cabell advised that the state's money has already been allocated to other projects; hence the Commission is not in position to make any commitment to this project today; however, the Commission will consider the matter next fall in the formulation of the 1942 program. Dr. Jens stated that she would reappear before the Commission at that time.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts and sales of buildings, for which bids were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Seaside-Wheeler Rock Production Project on the Oregon Coast, Wolf Creek, and Mecanicum Highways, in Clatsop and Tillamook Counties. Furnish approximately 10,300 cu. yds. of crushed rock in stock piles. Babler Bros., Portland, submitted the low bid for this work, in the amount of \$14,510.00. R. O. Dail & Warren Bros., Portland, submitted the next-low bid in the amount of \$14,870.00. There were 12 higher bidders. This contract is awarded by the Commission to the low bidder, Babler Bros., at their bid of \$14,510.00.

"East Unit, Dixie Summit-Austin Section of the John Day Highway, in Grant County. 4.3 miles grading, surfacing and oiling. Fisher Bros., Oregon City, submitted the low bid on this work, in the amount of \$117,479.00. Leonard & Slate, Multnomah, submitted the next-low bid, in the amount of \$118,861.00. There were three

higher bidders. This contract is awarded by the Commission to Fisher Bros., at their low bid of \$17,479.00.

"Deception Creek-Salt Creek Falls Rock Production Project on the Willamette Highway, in Lane County. Furnish approximately 8,900 cu. yds. crushed rock or gravel in stock piles. Clifford A. Dunn, Klamath Falls, submitted the low bid for this work, in the amount of \$17,214.00. A. O. Ekstrom, Portland, submitted the next-low bid, in the amount of \$17,319.00. There were three higher bidders. This contract is awarded to the low bidder, Clifford A. Dunn, at his bid of \$17,214.00.

"Depoe Bay Section of the Oregon Coast Highway, in Lincoln County. 1.11 miles grading and 1.17 miles bituminous macadam surfacing. Sam Orino, Portland, submitted the low bid for this work, in the amount of \$81,590.00. Leonard & Slate, Multnomah, submitted the next-low bid, in the amount of \$84,110.00. There were eight higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, Sam Orino, when certain conditions have been fulfilled.

"Cairo Junction-Adrian Rock Production Project on the Old Oregon Trail, Nyssa-Adrian, and Adrian-Parma Highways, in Malheur County. Furnish approximately 7,300 cu. yds. crushed gravel in stock piles. Chester T. Lackey, Ontario, submitted the low bid for this work, in the amount of \$9,355.00. Rogers Construction Company, Dayton, Washington, submitted the next-low bid for this work, in the amount of \$11,844.00. There were four higher bidders. This contract is awarded by the Commission to the low bidder, Chester T. Lackey, at his low bid of \$9,355.00.

"Owyhee River-McDermitt Section of the I.O.N. Highway, in Malheur County. 68.36 miles surfacing and oiling. Norris Bros., Burlington, Washington, submitted the low bid for this work, in the amount of \$136,556.00. E. C. Hall Company, Eugene, submitted the next-low bid, in the amount of \$149,069.40. There were eight higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, Norris Bros., when certain conditions have been fulfilled.

"North Santiam River Bridge at Gates, in Marion and Linn Counties. County Project. J. F. Johnston, Newberg, submitted the low bid for this work, in the amount of \$15,988.25. J. W. & J. R. Hillstrom, Marshfield, submitted the next low bid in the amount of \$17,633.00. There were four higher bidders. These bids were taken for and on behalf of Marion and Linn Counties and are referred to the County Courts of Marion and Linn Counties for action.

"North Powder-Davis Ranch Section of the North Powder River County Road, in Union County. 4.65 miles surfacing and oiling. R. O. Dail and Warren Bros., Portland, submitted the low bid for this work, in

the amount of 18,304.80. M. L. O'Neil & Son, John Day, submitted the next low bid, in the amount of 18,920.00. There were two higher bidders. This contract is awarded to R. O. Dail & Warren Bros., the low bidders, at their bid of 18,304.80.

"Davies Grade Separation Project on the Wolf Creek Highway, in Washington County. C. J. Eldon, Portland, submitted the low bid for this work, in the amount of \$65,285.00. C. J. Montag & Son, Portland, submitted the next low bid, in the amount of \$66,602.50. There were five higher bidders. This contract is awarded to C. J. Eldon, the low bidder, at his bid of \$65,285.00."

Buildings at Brookings:

"Building No. 7700 (formerly owned by Brookings Land & Townsite Company) Kenneth Dodd, Eugene, submitted the high bid for the purchase of this building, his bid being in the amount of \$36.50. Everett Isenhardt, Brookings, submitted the next-high and only other bid, in the amount of \$15.00. The Commission accepts the bid of Kenneth Dodd, and sells this building to him at his high bid of \$36.50.

"Building No. 7707 (formerly owned by Fanny T. Pedriole) Tom B. Page, Brookings, submitted the high bid for this building, his bid being in the amount of \$50.00. Jarvis Automotive Service, Brookings, bid for the salvage value only, and there were two other bidders who asked payment for removing the buildings. The Commission accepts the bid of Tom B. Page, and sells this building to him at his high bid of \$50.00."

Buildings at Marshfield:

"Building No. 8086 (formerly owned by Lillian Madden) Harold Potts, Eastside, submitted the high bid for the purchase of this building, his bid being in the amount of \$352.00. J. L. Gaunt, North Bend, submitted the next high bid, in the amount of \$180.00. There were five lower bidders. The Commission accepts the bid of Harold Potts, and sells this building to him at his high bid of \$352.00.

"Building No. 8091 (formerly owned by G. W. Curtiss and Eliza E. Condron) The only bid received for the purchase of this building was that of the W. J. Conrad Lumber Company, Marshfield, in the amount of \$40.00. The Commission sells this building to the W. J. Conrad Lumber Company at the price offered."

Building at Scappoose:

"Building No. 8341 (formerly owned by Mrs. G. B. Turner) H. G. Palmberg, Scappoose, submitted the only bid for the purchase of this building, in the amount of \$32.00. The Commission sells this building to Mr. Palmberg at such price."

The Engineer submitted an invoice for 1941 dues in the American Association of State Highway Officials, in the amount of \$350.00, and an invoice for 1941 dues in the Western Association of State Highway Officials, in the amount of \$25.00. The Commission approved payment of both invoices.

The Engineer submitted a financial statement dated December 13, 1940, which the Commission discussed and ordered filed.

Ivan F. Phipps, Portland, was present and asked the Commission to either grant him authority to construct a service station partially on the right of way of the Denver Avenue approach to the Interstate Bridge, Portland, just north of Schmeer Road, or to convey to him title to the area that he needs, for which he offered, as consideration, to deed to the state a like area on the opposite side of the highway. He contended that the state's right of way is so much wider than the pavement at this point that a service station erected entirely on his property, in accordance with the Commission's regulations, would be so far from the pavement and shoulder as to have little value. The Commission deferred its decision pending inspection by the Engineer and receipt of his report. The Engineer was instructed to make such inspection in company with Mr. Phipps and to set right of way stakes along the section for Mr. Phipps' guidance.

W. H. Zuber, Portland, came before the Commission and requested permission to operate his overlength truck on state highways. He explained that his truck is 42'6" in length and is used to transport a scientific exhibit from school to school and is more or less a display or class room. Chairman Cabell suggested, in view of pending legislation which would legalize vehicles up to 45' in length, that permits be granted Mr. Zuber for isolated movements, i. e., of about a week's duration, if it appears upon investigation that the vehicle can be and is properly licensed by the Secretary of State. The Commission approved this recommendation and instructed the Secretary to investigate the license feature at once.

Mr. Howard Shoemaker headed a delegation from Hood River composed of C. C. Lindley, City Councilman; Arthur C. Lofts, Jr., President of the Chamber of Commerce; C. M. Sheppard, Tom Scott and E. Riddell Lage, who asked the Highway Commission to acquire the bridge that spans the Columbia River, between Hood River, Oregon, and White Salmon, Washington. He submitted historical information relative to this structure and a financial audit of the bridge operations, together with a printed outline of the "Free Bridge Movement," by the "Free Bridge Committee of Oregon and Washington." He advised that their primary object in coming before the Commission at this time is to secure the Commission's approval to a legislative enabling act that would authorize the Commission to join with the State of Washington in purchasing this bridge. Chairman Cabell informed the delegation that the Commission is reluctant to take over this bridge because of the dangerous precedent that would be established; that the Commission could not go to the Legislature with recommendations, but would be pleased to make such investigations and submit such report as the Legislature might request. The matter was discussed at considerable length but no action was taken.

DEC 14 1940

The Engineer presented a letter from General Robert Lee Bobbitt of the Texas Highway Commission, requesting that Oregon send a delegate to the meeting of the Western Association of State Highway Officials in Denver, on January 6 and 7, 1941. It was decided that Chairman Cabell should represent the Commission at such meeting.

The Commission adjourned at 5:00 p. m. to reconvene on the following morning in the same room.

Portland, Oregon, December 18, 1940

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. F. Baldock, State Highway Engineer
J. M. Devers, Attorney
D. G. DeSart, Acting Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards of contracts would be made at 3:00 p. m. in the same room:

COLUMBIA RIVER HIGHWAY
SVENSEN-GOBLE ROCK PRODUCTION

Tidepoint Co.	\$15,200.00
A. S. Wallace	16,800.00
Frank Penepacker	17,047.00
A. O. Ekstrom	17,520.00
Homer G. Johnson	18,800.00

POWERS SECONDARY HIGHWAY
HOFFMAN BRIDGE-GRANTS CREEK SECTION - SURFACING AND OILING

O. C. Yocum	\$30,000.00
Babler Bros.	30,555.00
Coos Bay Dredging Co.	32,944.00
R. O. Dail & Warren Bros.	36,543.00
A. Milne	39,965.00

JOHN DAY HIGHWAY
GOOSEROCK BRIDGE OVER JOHN DAY RIVER

Averill & Cortin	\$42,840.00
Vernon Bros. Co.	43,329.00

(Continued on next page)

County Judge Nelson B. Higgs, Harney County, appeared before the Commission and requested the placing of some maintenance rock on the Rome-Princeton Secondary State Highway where it passes over the summit southeast of Princeton, near Follyfarm. The Commission referred the matter to the Engineer for investigation and report on how much it would cost to do the work.

Commissioner Oliver asked Judge Higgs what would be the county's reaction if the Commission transferred the \$40,000 heretofore budgeted by the Commission for the improvement of the Burns-Crane Highway to the John Day-Burns Highway where, he said, it could be used to advantage in conjunction with other funds in financing the construction of the Seneca-South Section. Judge Higgs asked for time to consult his constituents before replying.

He reappeared before the Commission later in the session and advised that Harney County would have no objection to such transfer of funds. However, they would like the Burns-Hanley Lane Section of the Burns-Crane Highway improved in lieu thereof as an extension to the proposed improvement of the Hanley Lane Section of the Frenchglen Secondary Highway, omitting for the time being the bridge construction work. The Engineer suggested that, since it appears reasonably certain that the Wrights Point-Narrows Project on the Frenchglen Secondary Highway will be approved as a federal aid secondary project, a portion of the \$15,000 of state money heretofore budgeted for such improvement could be released to finance the Hanley Lane Section. He recommended deferment of any work over Wrights Point at this time and that the proposed federal aid secondary highway project be confined to the construction of a road across the flat to the point known as The Narrows. The Commission appeared favorably inclined toward the Engineer's suggestion but deferred a definite decision pending further information. The Engineer was instructed to make a survey and prepare cost estimates for a project extending from Burns to Hanley Lane, thence south on the Frenchglen Secondary Highway to The Narrows, excepting the section over Wrights Point.

The Engineer submitted a report on amounts heretofore expended by the Commission for the construction of the Pacific Highway through the City of Ashland, and an estimate of cost to complete the work through this city. No action was taken by the Commission on this matter.

The Assistant Attorney reported the refusal of certain house-moving contractors to remove buildings from the highway rights of way in accordance with the terms of low bids submitted by them for such work. He explained that the bids are taken informally and no performance bond is required. He was instructed to bring the next such offense to the attention of the Commission, which would take action precluding such defaulter from further bidding on state highway work.

The Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

DEC 18 1940

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

DEC 16 1940

The Commission approved the request and by unanimous vote, adopted the following resolution covering the matter:

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by The Klamath Development Company, which property is located in the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 18, Township 38 South, Range 9 East, W.M.; the southeast quarter (SE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) and the west half (W $\frac{1}{2}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 7, Township 38 South, Range 9 East, W.M.; the east half (E $\frac{1}{2}$) of the east half (E $\frac{1}{2}$) of Section 1, Township 38 South, Range 8 East, W. M.; the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 7 and the southwest quarter (SW $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 6, Township 38 South, Range 9 East, W. M.; the northeast quarter (NE $\frac{1}{4}$) of the northeast quarter (NE $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$)

of Section 1, Township 38 South, Range 8 East, W.M.; and the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 7, Township 38 South, Range 9 East, W.M., all in Klamath County, Oregon; which property is more particularly described on the attached sheets and designated as Parcels Nos. 1, 2, 3, 4, 5, and 6 and is further identified in the records of the Highway Commission as files R8531, R8541, and R9541; and which property is being acquired for right of way purposes in connection with the Algoma-Terminal City Section of The Dalles-California Highway;*

Real property owned by Alfreda Steinmetz, which property is located in Lots 5, 6, and 7, Block 2, of Upper Lake Garden Acres, situated in Section 1, Township 38 South, Range 8 East, and in Section 6, Township 38 South, Range 9 East, W.M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7 and is further identified in the records of the Highway Commission as file R8544, and which property is being acquired for right of way purposes in connection with the Algoma-Terminal City Section of The Dalles-California Highway;*

Real property owned by Albert Hopkins Pierce, et al., which property is located in Lots 1, 2, 3, and 4, Block 27; Lots 7, 8, and 9, Block 27; Lots 3 and 4, Block 36; Lots 7 and 8, Block 36; Lot 4, Block 46; Lot 5, Block 46; and Lot 4, Block 47; all situated in First Addition to Terminal City, in Section 18, Township 38 South, Range 9 East, W.M., Klamath County, Oregon; which property is more particularly described on the attached sheets and designated as Parcels Nos. 8, 9, 10, 11, 12, 13, and 14 and is further identified in the records of the Highway Commission as file R8530; and which property is being acquired for right of way purposes in connection with the Algoma-Terminal City Section of The Dalles-California Highway;*

Real property owned by Frank Cunningham, et al., which property is located in Lots 3 and 4, Block 37, and Lot 7, Block 37, First Addition to Terminal City, situated in Section 18, Township 38 South, Range 9 East, W.M., Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 15 and 16 and is further identified in the records of the Highway Commission as file R8530A, and which property is being acquired for right of way purposes in connection with the Algoma-Terminal City Section of The Dalles-California Highway;*

Real property owned by Harriett Beatrix Hopkins, et al., which property is located in Lot 8, Block 6, of Depoe Bay, situated in Section 5, Township 9 South, Range 11 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 17 and is further identified in the records of the Highway Commission as file R4125, and which property is being acquired for right of way purposes in connection with the Siletz Bay-Newport Section of the Oregon Coast Highway;*

Real property owned by Harold Roche, which property is located in Government Lot 2 of Section 9, Township 33 South, Range 15 West, W.M., Curry County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 18 and is further identified in the records of the Highway Commission as file R8696, and which property is being acquired for right of way purposes in connection with the Port Orford-Brush Creek Section of the Oregon Coast Highway;*

Real property owned by Orris Knapp, which property is located in Government Lot 1 of Section 4 and in Lot 3 and the south 20 feet of Lot 4 of Block B. B. of Port Orford in Section 4, all in Township 33 South, Range 15 West, W.M., Curry County, Oregon, which property is more particularly described on the attached sheets and designated as Parcels Nos. 19 and 20 and is further identified in the records of the Highway Commission as file R2561 A, and which property is being acquired for right of way purposes in connection with the Port Orford-Brush Creek Section of the Oregon Coast Highway;*

Real property owned by Orris Knapp and Lloyd Knapp, which property is located in Government Lot 2 and in the southwest quarter (SW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 4 and in Government Lot 1 of Section 9, Township 33 South, Range 15 West, W.M., Curry County, Oregon, which property is more particularly described on the attached sheets and designated as Parcel No. 21 and is further identified in the records of the Highway Commission as file R 2561 B, and which property is being acquired for right of way purposes in connection with the Port Orford-Brush Creek Section of the Oregon Coast Highway;*

Real property owned by David McKenzie, which property is located in the east half (E $\frac{1}{2}$) of Section 21 and the north half (N $\frac{1}{2}$) of the south half (S $\frac{1}{2}$) of Section 21, all in Township 32 South, Range 15 West, W.M., Curry County, Oregon, which property is more particularly described on the attached sheets and designated as Parcel No. 22 and is

further identified in the records of the Highway Commission as file R8694, and which property is being acquired for gravel pit and hauling road purposes in connection with the Port Orford-Hubbard's Creek Section of the Oregon Coast Highway;*

Real property owned by the heirs of Oscar Hellenbrand, which property is located in Lot 1, Block 5, Breaker's Addition to Depoe Bay, situated in Government Lot 4 of Section 8, Township 9 South, Range 11 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 23 and is further identified in the records of the Highway Commission as file R5822, and which property is being acquired for right of way purposes in connection with the Boiler Bay-Rocky Creek Section of the Oregon Coast Highway;*

Real property owned by Alex M. Donaldson, et al., which property is located in Government Lot 1 of Section 36, Township 2 South, Range 11 West, W.M., Tillamook County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 24 and is further identified in the records of the Highway Commission as file R3902, and which property is being acquired for a park or recreational area which is adjacent to the Oregon Coast Highway;*

Real property owned by Thomas V. Johnson and Ethel B. Johnson, which property is located in the northwest quarter (NW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 8, Township 30 South, Range 12 West, W.M., Coos County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 25 and is further identified in the records of the Highway Commission as file R8701, and which property is being acquired for the storage of maintenance materials in connection with the Powers Secondary Highway at or near Mile Post 5.4;*

Real property owned by The Frasier Real Estate Holding and Loan Company, et al., which property is located in Government Lot 7 (Northwest quarter of the Northeast quarter) of Section 11, Township 17 South, Range 1 East, W.M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 26 and is further identified in the records of the Highway Commission as file R8684, and which property is being acquired as a source from which to procure road-building materials in connection with the Springfield-Blue River Section of the McKenzie Highway;*

DEC 16 1940

Real property owned by James G. Watts, et al., which property is located in the southwest quarter (SW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) and in the southeast quarter (SE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 12, Township 3 North, Range 2 West, W.M., Columbia County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 27 and is further identified in the records of the Highway Commission as file R8344, and which property is being acquired for right of way purposes in connection with the Multnomah County Line-Scappoose Section of the Columbia River Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

*The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution

on file in the office of the State Highway Commission, Salem, being Resolution No. 7, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported on the status of negotiations for purchase of the Knapp Hotel property at Port Orford, stating that the owners ask \$15,000, whereas the state's right of way buyers appraise the property at \$9,000. The Commission authorized the Attorney to offer \$9,000 for the property; however gave him authority to settle for as much as \$10,000, but authorized him to start condemnation proceedings if he could not settle on these terms.

The Attorney also reported the status of negotiations for the purchase of Cascadia Park, for which the Commission previously authorized him to pay a top figure of \$20,000. He advised that the Honorable Willard Marks, Attorney for the holders of a \$15,000 mortgage on this property, is unable to obtain any discount on this mortgage. However, the Baptist Church Convention will settle its claim for \$4,000 and will remove its buildings from the property if the transaction is completed at once, so they can take up their option on another piece of property, which option will expire at the end of December. In addition to these two amounts, he said, it will be necessary for the Commission to pay to Mr. Giesendorfer, the owner of the park, the sum of \$75.00 per month during his life time. The Commission favored an annuity policy paying Mr. Giesendorfer \$75.00 per month, which can be purchased for \$2,500, making the total cost for the park \$21,500. The Commission authorized the Attorney to close the transaction at this increased figure of \$21,500.

The Attorney reported that Mr. Joseph D. Sternberg will accept \$375 for right of way through his property at the north entrance to Albany, provided the Commission will maintain the old road in front of his property as a service road, and will also maintain the strip of property between the old road and the new road as a park area. The Commission approved this offer and adopted the following resolution with regard thereto:

WHEREAS, in connection with the relocation of the Pacific Highway in the vicinity of and through the City of Albany the alignment of the said highway between engineer's station 341+00 (old route) on the north and engineer's station 349+20 (old route) on the south was changed, by which change or alteration the portion of the old highway between said stations will no longer be a part of the right of way of the Pacific Highway East proper; and

WHEREAS, in connection with the said change of alignment the State acquired from Joseph D. Sternberg some real property; and

THUS, as a part of the consideration and agreement with respect to the acquisition of said real property the said Joseph D. Sternberg was assured that the section of the Pacific Highway East

between said termini would be maintained for the service of property abutting thereon, and it was further agreed that the land lying between the right of way of the old section of the Pacific Highway East and the right of way of the new alignment would be preserved by the State for public use only.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the section of the Pacific Highway East as heretofore located, improved, and used for public traffic between said highway engineer's station 341+00 and said highway engineer's station 349+20 be and said section of highway shall be maintained by the State as a service road to serve the properties abutting thereon and which do not have direct access to the new highway, and that said service road shall be properly and adequately connected with the new alignment of the Pacific Highway East.

2. That the land or area lying between the westerly right of way line of the former location of said highway between said stations and the easterly boundary right of way line of the new Pacific Highway East location shall be landscaped and maintained for public use only and shall not be devoted to or used for any private or commercial use or purpose.

3. That this resolution be entered in the minutes and records of the Commission and the Secretary be instructed to mail to Joseph D. Sternberg a duly certified copy thereof.

4. That there is attached hereto and made a part hereof a blueprint on which is shown the Pacific Highway East as now located between said engineer's stations and the Pacific Highway East as formerly located between said stations, and there is also shown on the said map the area between said two highway right of way lines.*

The Commission adjourned at 12:15 p. m. and reconvened in the same room at 1:30 p. m. with the same persons participating.

The Engineer requested authority to purchase a crusher for use on the Wilson River Highway W.P.A. project and several trucks for use on the Wolf Creek Highway W.P.A. project. It was his thought that small trucks would suffice because they could be used by the state later on when the W.P.A. no longer requires them. The Commission authorized the Engineer to secure bids for a crusher costing between \$6,000 and \$12,000 and the necessary trucks; the type, kind and number of trucks to be left to Chairman Cabell's decision.

*Map filed Right of Way Abandonment and Retention File - No. 87

The Engineer requested authority to make a location survey for the Fish Hawk Falls cut-off, between the Wolf Creek Highway and the Nehalem Secondary Highway, in Clatsop County, in which project, he said, the W.P.A. and the Army are very interested. The survey was authorized.

Commissioner Oliver requested estimates of cost to complete the Ochoco Highway and the John Day Highway east of John Day; also, the cost to complete the Prineville-Madras Secondary Highway and the John Day Highway between John Day and Arlington. He suggested that the Dixie Mountain Section of the John Day Highway should be given priority status in the construction program. Mr. Oliver also asked for an estimate of cost to construct a road between Antelope and Mitchell. The Engineer was instructed to submit to the Commission estimates of the cost for each of these sections.

Don Peoples, Secretary of the Bend Chamber of Commerce, was present and inquired whether or not the Commission has received any definite information with respect to the expenditure of current federal aid funds, and was informed by the Chairman that the Commission has had no word from the government as yet.

The Attorney reported that the Bonneville Power Administration has requested an easement from the Commission for additional right of way needed for a power line in the vicinity of Hood River, stating that there is a small fragment of land severed from the state's park property by the first easement given the Bonneville Authority, and that they wish to include this piece in their right of way. Upon the Attorney's recommendation and that of the State Parks Superintendent the Commission approved the granting of such easement.

The Attorney read aloud a letter from City Manager J. L. Franzen, of Oregon City, requesting authority for the city to construct a public dock in the Willamette River, to be moored to state highway property in that city. Mr. Franzen's letter suggested a floating dock about 12' wide and 50' to 100' long, constructed of logs floored with timbers and tied to the bank with ropes or cables. The Engineer advised that this letter is evidently an answer to his letter of inquiry to Mr. Franzen on this subject and recommended that the Commission give the city authority to construct and maintain this dock for an indefinite period. He also suggested that the Attorney be instructed to draw a lease covering the matter and permitting the city to make a small charge for the mooring of pleasure boats but prohibiting the mooring of house boats, and including a stipulation that the type and design of the dock must fit in with the surroundings. The Commission approved the granting of the request as outlined by the Engineer.

The Commission discussed the matter of constructing cattle guards on state highways in the stock districts, and the advisability of securing legislation authorizing the Commission to construct such cattle guards if needed for public protection. The Attorney advised that the counties now have such authority on county roads, and that the government grazing officials are asking the privilege of building them on state highways. Commissioner Oliver gave as his opinion that cattle guards painted on the highway

are of no value, and pointed out that if legislation permitting construction of such cattle guards existed, the demand for them might be quite large. Chairman Cabell questioned the advisability of the Commission assuming sponsorship of needed legislation. After discussion the Commission instructed the Attorney to prepare a bill covering the matter and to submit a copy of the same to each of the Commissioners for study.

The Attorney reported on the Hartman Abstract Company's bill for furnishing title reports, which matter has been before the Commission previously, and recommended that the bill be returned to them. The Commission instructed the Attorney that its previous decision is final and to settle the account on the basis of \$7.50 per title search.

The Attorney reported that an opinion rendered by the Attorney General states that where only the names of the newspapers, such as "Journal" and "Oregonian", appear on tube boxes and other receptacles used for the convenience of subscribers to newspapers, such names do not constitute advertising within the prohibitory provisions of Section 14-8, 131, Oregon Code, 1930. He emphasized, however, that the opinion is limited to the use of such containers for the purposes and in the manner only stated above. No action was taken by the Commission.

The Attorney brought up for discussion the purchase of the Coleman property at the north end of the Coos Bay Bridge. After discussion the Commission authorized purchase of this property for the protection of the bridgehead, if it can be obtained at reasonable cost.

The Attorney reported a request from Mr. George W. Rhoades for a third point of access from his property to the highway at Scappoose. He explained that Mr. Rhoades understood, in the right of way negotiations, that he was to have three points of access, whereas the state has allowed him only two, and he has offered to reduce the price of right of way taken from him in the amount of \$25 if the Commission will let him have access at the third point. The Commission approved the request on such basis.

The Attorney presented a claim from Maurice G. Roy, Pilot Rock, for damage to his property by reason of a change in grade of the Oregon-Washington Highway at Pilot Rock. Mr. Roy alleges that when the highway was rebuilt at this place the grade line was set several feet above the grade line of the old highway which rendered his property valueless for service station purposes for which it was being used, and he found it more economical to move his station across the street than to fill in the old location; further, that in order to provide satisfactory access to such new location the highway drainage ditch must be filled in, which will necessitate the installation of 105 feet of culvert pipe and a concrete catch basin. The Engineer advised that this matter has been investigated by Division Engineer Williams who reports that Mr. Roy's property was considerably damaged by reason of the change in the highway grade and that access to his garage was rendered very difficult; further that Mr. Williams is of the opinion that Mr. Roy's claim is a just one and recommends approval of the things requested by Mr. Roy, in which recommendation he concurs.

He estimated the cost of the work at \$277.50. After discussion the Commission approved by unanimous vote the recommendation for such expenditure subject to the condition that Mr. Roy will sign a statement relieving the state from any further liability in the matter.

The Attorney reported that Mr. O. D. Keiffer, who resides near Grubb College, Polk County, wishes to lease approximately six acres of state-owned land adjoining his farm for a period of three years beginning next fall, and has offered to pay \$25 per year rental for the same. The Engineer recommended acceptance of the offer if the amount thereof is equivalent to the tax that would have to be paid on the property if it were on the tax roll. The Commission authorized the leasing of the property to Mr. Keiffer at \$25 per year if such amount meets the condition suggested by the Engineer.

The State Parks Superintendent reported that he has received requests from various public-spirited citizens and civic organizations that the State Highway Commission acquire certain privately-owned wayside timber strips located within forest reserves. One of these tracts, he said, lies adjacent to the Willamette Highway, one is along the South Santiam Highway, and another is along the Netarts Secondary Highway. He gave as his thought that it is an obligation of the Federal Government to acquire privately-owned tracts within the government reserves and recommended denial of the requests. The Commission concurred in this thought and instructed the State Parks Superintendent to so reply to all such requests received hereafter.

The State Parks Superintendent presented an offer from Mr. Chester J. Ireland to sell to the state, for the sum of \$400, a nine-acre tract of cut-over land just south of Ecola State Park in Clatsop County. The Commission refused the offer.

The State Parks Superintendent reported on the proposed enlargement of "The Cove" Park area, near Metolius, in Jefferson County. He said that Jefferson County asks \$3.00 per acre for one county-owned tract containing 160 acres, and \$2.00 per acre for another tract; the State Land Board asks \$2.50 per acre, which is their minimum price, for a 320-acre tract. He pointed out that the Commission now has 4,000 acres leased from the government, for which it is paying \$10 per year, and advised that it would be necessary, in order to control the whole rim, to purchase the privately-owned property of a Mr. Boegli, located on the Crooked River. He estimated that a total expenditure of \$20,000 would be required to give the state control of the entire rim. The Commission deferred a decision on this matter until it knows approximately how much it will have to pay for the privately-owned property.

The Commission authorized the purchase of an 83-acre tract, situate adjacent to the Oregon Coast Highway, near Arch Cape Tunnel, in Clatsop County, from W. C. Calder, of Baker, Oregon, at his price of \$25 per acre, or a total of \$2,075, such purchase being recommended by the Parks Superintendent.

In this connection the Engineer reported that Mr. Calder has refused the state's offer of \$1,500 to settle the controversy between him and the Commission with respect to land he owns below the highway at this point, which

land was damaged by the sliding of a highway embankment. The Commission decided to take no action on this matter, believing that the next move is up to Mr. Calder.

The State Parks Superintendent submitted a letter from the U. S. Department of the Interior in which Mr. Newton B. Drury, Director of the National Parks Service, advises that he expects to be in Portland on January 2, and would like to discuss park matters with Mr. Boardman and Chairman Cabell. Chairman Cabell stated that he would be pleased to talk to Mr. Drury and asked the Parks Superintendent to contact him a day or two before Mr. Drury's visit.

The Engineer reported that he has written the Public Roads Administration asking for its requirements that are to govern the expenditure of federal aid moneys for the purchase of timbered wayside strips, but to date has received no reply. He was instructed by the Commission to again write for the regulations.

The State Parks Superintendent reported the cutting of some fifty or more Christmas trees on the wayside strip of cut-over lands on the Salmon River Highway by several Grand Ronde Indians. He advised that the caretaker stopped this destruction and, at the Park Superintendent's instruction, gave the Christmas trees already cut to the Salvation Army. No action was taken by the Commission on this matter.

The Engineer recommended that the State Parks Superintendent submit a financial statement at each Commission meeting showing the status of the park budget, as is done by the right of way department. This recommendation met with the approval of the Commission and it was so ordered.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Svensen-Goble Rock Production Project on the Columbia River Highway in Clatsop and Columbia Counties. Furnish approximately 8,000 cu. yds. crushed rock in stock pile. Tidepoint Company, Astoria, submitted the low bid for this work in the amount of \$15,200.00. A. S. Wallace, Roseburg, submitted the next low bid in the amount of \$16,800.00. There were three higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the Tidepoint Company, the low bidder, when certain conditions have been fulfilled.

"Hoffman Bridge-Grants Creek Section of the Powers Secondary Highway, in Coos County. 8.0 miles surfacing and oiling. O. C. Yocom, Willamina, submitted the low bid for this work, in the amount of \$30,000. Babler Bros., Portland, submitted the next low bid, in the amount of \$30,555. There were three higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, O. C. Yocom, when certain conditions have been fulfilled.

"Gooserock Bridge over the John Day River on the John Day Highway, in Grant County. Averill & Corbin, Portland, submitted the low bid for this work, in the amount of \$42,840. Vernon Bros. Co., Boise, Idaho, submitted the next low bid, in the amount of \$43,329. There were four higher bidders. This contract is awarded to Averill & Corbin, the low bidders, at their bid of \$42,840.

"Kerby Rock Production Project on the Redwood and Oregon Caves Highways, in Josephine County. Furnish approximately 11,700 cu. yds. crushed gravel in stock pile. M. C. Lininger & Son, Ashland, submitted the low bid, in the amount of \$14,670. A. S. Wallace, Roseburg, submitted the next low bid, in the amount of \$15,680. There were two higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, M. C. Lininger & Son, when certain conditions have been fulfilled.

"South Unit, Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County. 3.56 miles grading and 0.64 mile topping. Frank Penepacker, Portland, submitted the low bid for this work, in the amount of \$92,428. Sam Orino, Portland, submitted the next low bid, in the amount of \$100,031. There were ten higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, Frank Penepacker, when certain conditions have been fulfilled.

"Forest Boundary-Cottonwood Creek Section of the Klamath Falls-Lakeview Highway, in Lake County. 4.3 miles grading, surfacing and oiling; also construction of two composite type pile trestle bridges and three concrete culverts. Fisher Bros., Oregon City, submitted the low bid for this work, in the amount of \$116,994. M. L. O'Neil & Son, John Day, submitted the next low bid, in the amount of \$121,611. There were eight higher bidders. This contract is awarded to Fisher Bros., the low bidders, at their bid of \$116,994.00.

"Hendricks Bridge-Silver Creek Rock Production Project on the McKenzie Highway, in Lane County. Furnish approximately 8,000 cu. yds. crushed gravel in stock pile. M. L. O'Neil & Son, John Day, submitted the low bid for this work, in the amount of \$12,663.60. Ransom Sand & Gravel Company, Eugene, submitted the next low bid, in the amount of \$14,071.80. There were four higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, M. L. O'Neil & Son, when certain conditions have been fulfilled.

"Materials Testing Laboratory Building at Salem, in Marion County. Construct 2-story, reinforced concrete building, including heating plant and appurtenances. Approximate size, 112'x 120'. L. B. James, Portland, submitted the low bid for this work, in the

amount of \$88,918. Birkemeier & Saremal, Portland, submitted the next low bid, in the amount of \$89,359. There were six higher bidders. This contract is awarded to L. B. James, the low bidder, at his bid of \$88,918.

"Boardman-Unatilla County Line Section of the Old Oregon Trail, (Boardman-Stanfield cutoff), in Morrow County. 13.94 miles grading and topping. Frank Penepacker, Portland, submitted the low bid for this work, in the amount of \$97,365. Clifton & Applegate, Spokane, Washington, submitted the next low bid, in the amount of \$97,948. There were nineteen higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, Frank Penepacker, when certain conditions have been fulfilled.

"Hawthorne Bridge Approach, in Multnomah County. Frank Watt Construction Company, Portland, submitted the low bid for this work, in the amount of \$25,670. Birkemeier & Saremal, Portland, submitted the next low bid, in the amount of \$29,115. There were five higher bidders. The Commission refers all bids received for this work to the Engineer with power to award the contract to the low bidder, Frank Watt Construction Company, when certain conditions have been fulfilled."

The Engineer read aloud his letter directed to the Lane County Court in regard to removing the lower end of the Swisshome Secondary Highway from the state secondary highway system and substituting therefor a portion of Route "F", between Eugene and Veneta. He recalled that the Commission some time ago agreed to pay one-third of the cost of improving the Swisshome-San Antone Creek Section of this highway to make it usable by logging traffic, if the county and the logging company would pay the balance, and provided further that the county would agree to such substitution of sections. He asked the Commission to confirm such action so the exchange of roads can be made at once, as the county is anxious to proceed with the improvement work. The Commission approved the letter with a slight revision, and confirmed the arrangement previously made with respect to this project.

The Engineer reported that the cost of constructing and maintaining a new embankment on The Dalles-California Highway, near Algoma in Klamath County, necessitated by the breaking of the power company's dikes, amounted to \$43,188.15. As a part of this cost might be considered an investment in better location, he requested advice as to the Commission's attitude in regard to instituting suit against the power company for the full amount of the expenditure. The Commission approved claiming the full amount and instructed the Engineer to furnish the Attorney proper data for instituting this suit.

The Engineer reported on a request from the Tiller Lumber Company that the Commission keep the Tiller-Trail Highway open for traffic during the

winter season. He estimated the number of cars that would use this highway at twenty per day, and the cost to remove snow during the months of December, January, February and March at \$616. He recommended approval of the company's request and the posting of the road for a 50% reduced load limit between M.P. 38.55 and M.P. 45.53. After discussion the Commission authorized the Engineer to conduct snow removal operations on this highway for a period of one month, after which time Division Engineer Lytle and Commissioner Clough are to inspect the road and ascertain whether or not they should be continued. The Commission also ordered a 50% reduced load limit for the section between M.P. 38.55 and M.P. 45.53. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the following road or highway has been designated and declared to be and is a state highway, and has been improved and is being maintained by the State Highway Commission pursuant to the laws of the State of Oregon as a state highway, to-wit:

TILLER-TRAIL SECONDARY STATE HIGHWAY

AND WHEREAS, the said above-named state highway is, in the judgment of the State Highway Commission, being subjected to a kind and character of traffic which is damaging and injuring the said highway, and, in order to protect said highway against such damage and injury, it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said highway that the maximum weights permitted and authorized by law be reduced:

NOW, THEREFORE, the premises being in part as above stated, and the State Highway Commission having, as a result of due investigation, found that the road above mentioned and hereinafter designated is being damaged and injured on account of the kind and character of traffic now being hauled over and upon said road; and, by reason of the fact that vehicles carrying maximum loads moved at the maximum speeds specified by the provisions of the laws of the State of Oregon are breaking up, damaging and deteriorating the said road,

IT IS HEREBY ORDERED, that the maximum weight of combined load and vehicle which shall be permitted upon the within-named road shall not exceed the weight herein fixed.

The maximum weights which shall apply to the following highway, to-wit:

TILLER-TRAIL SECONDARY STATE HIGHWAY between mile post 38.55 and mile post 45.53, in Jackson County,

shall be as follows: the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of the front axle of a truck or truck-tractor shall not exceed the

product of four hundred (400) multiplied by the sum in inches of the tire width of the wheels of such axle; and, the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle or combination of vehicles, other than the front axle of a truck or truck-tractor, shall not exceed the product of three hundred (300) multiplied by the sum in inches of the tire width of the wheels of such axle; but, in no event shall the combined weight in pounds bearing on the surface of the highway at contact with the tread of the wheels of any one axle of a vehicle exceed the maximum limit set by law for any one axle.

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 55-2707, Oregon Code 1935 Supplement, shall be in full force and effect until modified, annulled or voided by the order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named section of said highway and at important crossroads on said highway so that said notice can be readily seen and read, which said notice shall state plainly the limitations and prohibitions of traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that certified copies of this order be furnished the County Clerk of Jackson County, in which county said section of said highway is located, and the Superintendent of the Department of State Police for his information.

The Engineer reported on the cost to improve the Oregon Coast Highway through the town of Ocean Lake. He estimated such cost, based on a 60-foot right of way, at \$24,233. No action was taken by the Commission on this matter.

The Engineer reported that he had contacted Stevens & Koon, Consulting Engineers of Portland, who are in charge of the survey work for the proposed government ammunition dump south of Umatilla, and found no conflict with the state's plans for construction of the proposed highway between Boardman and Stanfield.

The Commission reinstated the log hauling permit of Dale Lloyd Dixon on the recommendation of the Secretary.

The Engineer reported on the operations of the pavement patching plants for the year, and pointed out that the new equipment purchased is much safer than the old. The report was ordered filed.

The Engineer reported that investigation of the drift fences along the John Day Highway, in Baker County, which the grazing men of that section are asking the Highway Commission to maintain, are nearly all located along private lands. However, there is one section 250 rods in length within the National Forest which needs rebuilding at once, the estimated expenditure being \$250. He recommended that the state continue to maintain the fences along public lands. The Commission asked that the Engineer furnish Commissioner Oliver with a resume of this subject, that he might make an investigation and recommendations to the Commission at a later date.

The Traffic Engineer read aloud and explained the special regulations, governing the transportation of logs, poles or piling, by motor trucks, formulated by representatives of the State Highway Commission and the Public Utilities Commissioner, and approved by the Department of State Police, the Industrial Accident Commission and the State Labor Commissioner. The Commission adopted the regulations and instructed the Engineer to see that each holder of a log-hauling permit was furnished with several copies.

The Engineer reported that log haulers are asking that the Commission include in the new log-hauling regulations provisions for hauling after dark. The Commission instructed the Engineer to investigate the manner in which hauling after dark is being regulated by the State of Washington, and make a report at the next meeting.

The Engineer reported that stand-by motors and generators, diesel-powered, for the operation of the Highway Commission's radio stations at Salem, La Grande and Klamath Falls, are estimated to cost \$2,250 each, or a total of \$6,750. The Commission decided against purchase of such equipment at this time.

The Engineer reported that no recent survey has been made for the Fike Undercrossing in Hood River County, and that the lowest estimate, based on an old report, is \$100,000. Mr. Lynch, of the Bureau of Public Roads, thought that probably this work would be eligible for federal aid money. The Engineer recommended that the project be included either in the grade crossing elimination program for the next two years or in the next state program. The Commission instructed the Engineer to make a new survey and estimate as soon as possible at which time action would be taken.

The Engineer recommended that the board sidewalks in Cannon Beach be maintained until such time as it is determined that the Highway Commission's liability no longer exists. He also recommended that the requests for walks through Tolovana Park and within the city of Toledo be included in the Traffic Engineer's general survey and estimate for sidewalks throughout the state. The Engineer's recommendation was approved by the Commission.

The Engineer reported on the cost to improve the Alsea-Deadwood Highway. He said that this is a very expensive project and suggested that an attempt be made to trade this secondary highway back to the county for a more worthy road. The Commission approved this suggestion and instructed the Engineer to contact the county court in regard thereto.

The Commission denied the application of the Sumpter Woman's Club for widening of the Boulder Gorge Section of the Sumpter Valley Secondary Highway in Baker County.

The Engineer recommended that the Highway Commission allocate an additional \$70,000 for oiling a fifteen-mile section of the Wilson River Highway, there being \$30,000 already set up for this section, and that an additional sum of \$45,000 be allocated for oiling work on the Wolf Creek Highway, for which there is nothing set up at present. He placed the tentative date for the dedication of the Wilson River Highway at September 15, 1941, and advised that the W.P.A. organization will spend no money on a section of highway after it is dedicated. The Commission approved the allocation of \$115,000, as detailed above.

The Commission approved renewal of last year's agreement with the U. S. Forestry Department for maintenance of the Timberline Lodge Road.

The Commission approved the request of the D.A.R. for permission to erect a memorial plaque to Madam Dorian, in the Vista House, upon the Engineer's report that Mr. Walter Meacham and Mr. Lewis A. McArthur had approved this request.

The Assistant Chief Engineer reported that the three historical markers for Oregon City would cost about \$200 each. The Commission approved an expenditure for the erection of these markers.

The Commission referred the request of the State Music Teachers Association, for permission to erect a monument to the memory of H. Theophilus Finck in the city of Aurora, to the State Historical Society for recommendation.

The Commission approved an expenditure of \$92,000 for the purchase of traffic-line lacquer as follows for the 1941 season: 5,500 gallons of beaded traffic-line lacquer at \$3.20 per gallon, or a total of \$17,600; 58,000 gallons of standard yellow lacquer at \$1.20 per gallon, or a total of \$69,600; 4,000 gallons of standard white lacquer at \$1.20 per gallon, or a total of \$4,800; 1,500 gallons of thinner at 60¢ per gallon, \$900.

The Commission approved the request of the Salem Electric Cooperative Association to construct a pole line along the Salem-Dallas Highway near the Willamette River bridge, in West Salem, on the basis of their Plan #1, which contemplates the placement of poles on the northerly right of way line of the highway up to the west bank of the river, where it will cross the river with a long span on high poles, and connect with another pole line on Marion Street, Salem. The Secretary was authorized to issue a permit as soon as an 80-foot right of way along this section has been obtained. The Attorney was instructed to negotiate for a right of way of such width.

The Engineer recommended that the Commission permit two delegates to attend the National Institute for Traffic Safety Training, to be held on the campus of the University of California for a period of about two weeks

during July and August, 1941, the student delegates to pay their own expenses but to receive their regular salaries while in attendance. The Commission approved this recommendation.

No action was taken by the Commission on the request of the Parkrose Lions Club for permission to place a Lions Club sign near N. E. 122d and Sandy Boulevard; however the Engineer was instructed to investigate the desirability of placing signs near this intersection and report to the Commission at a later date.

The Commission deferred action in regard to a 10-inch farm drain tile installed by a Mr. John Ediger under a farm road approach to the Salem-Dallas Highway pending receipt of information from other state highway departments as to the practice followed by them in such matters. The Engineer was instructed to obtain such information as soon as possible.

The Commission discussed but took no action on the suggestion of the Penn Timber Company that the Highway Commission purchase portions of their holdings along the Willamette Highway, between Goshen and Oakridge, as wayside strips.

A request from Goodwin and Briggs, logging contractors, Myrtle Point, for the straightening of a number of bad curves on the Coos Bay-Roseburg Highway, was denied by the Commission. Chairman Cabell instructed the Secretary to inform these gentlemen that the Commission is improving the more deserving highways first, and that it might become necessary for the Commission to prohibit log hauling on this highway, in the interests of public safety, if conditions are such as they allege.

The Engineer presented a letter from the Gem Collectors Club, Seattle, Washington, in which the Highway Commission was asked to discontinue the taking of gravel from Oregon beaches for construction projects, and to prohibit others from doing so, because of the value of the agate-bearing gravels from the tourist standpoint. Discussion of this subject brought out the fact that jurisdiction of the Highway Commission over the beaches is in doubt. The Commission asked the Attorney to prepare a legislative bill giving the Highway Commission regulatory control over the Oregon beaches but vesting proprietary interest in the State Land Board.

A request from the Fletcher Oil Company for permission to attach sanding equipment to their oil trucks without reducing their transported load to offset the weight of the equipment was granted by the Commission, in view of pending legislation that will take care of this matter hereafter.

The Engineer reported briefly on matters pertaining to the construction of the Oregon Coast Highway through the town of Gold Beach, but no action was taken thereon by the Commission.

The Engineer recommended the abandonment of portions of the Prineville-Marks Creek Section of the Ochoco Highway, in Crook County, and a

portion of the Salem-Pringle Creek Section of the Pacific Highway East, in Marion County, where these highways have been reconstructed on new alignment rendering the old sections valueless from the state highway standpoint. The Commission approved the recommendation, and by unanimous vote adopted the following resolutions in regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate portions of the Prineville-Marks Creek Section of the Ochoco Highway in Crook County; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated from the main travelled portion of said highway certain sections or fragments of land, which said sections or fragments of land are more specifically defined and described hereinafter in this resolution and are reflected on a print, marked "Exhibit A", a copy of which is attached hereto and made a part hereof; and

WHEREAS, while those sections hereinafter described as the parcels to be retained and shown in yellow on the attached print are not required for use as a part of the main or travelled section of the highway, nevertheless the same are required, can be used, and are essential for other public purposes, to wit: storage purposes, parking area and other public uses in connection with said highway; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to preserve for public use in connection with said highway the fragments or parcels of land hereinafter described as the parcels to be retained and shown in yellow on the attached print; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of this Commission the purpose and plan of the Commission to abandon as parts of the state highway system certain portions of the highway eliminated from the main travelled portion of said highway, which sections are made unnecessary as a part of the completed highway and are shown shaded in red on the attached print or map.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. The fragments or parcels of land which heretofore were within the right of way proper of the Prineville-Marks Creek Section of the Ochoco Highway but which by reason of a relocation or realignment of said highway are now without the area improved and used by

the traveling public, but are adjacent to and abut upon the said right of way, which parcels are shown shaded in yellow on the attached print, shall be preserved by the Highway Commission for such other public use as said land may serve in connection with the construction, improvement, and maintenance of said highway or the use of the same, which said parcels or fragments of land are described as follows, to wit:

All those certain parts of the old right of way of the Prineville-Marks Creek Section of the Ochoco Highway, lying on each side of the right of way required for the reconstructed Ochoco Highway from the east city limits of Prineville located on the north and south center line of Section 5, Township 15 South, Range 16 East to the east line of Section 21, Township 14 South, Range 18 East, W.M., Crook County, Oregon. The beginning and ending points of each section to be retained with reference to the location and the engineer's stations of the reconstructed highway are described as follows:

Station 121+00 to Station 136+00 on the northerly side of center line
 Station 255+00 to Station 262+00 on the northerly side of center line
 Station 78+00 to Station 117+00 on the southerly side of center line
 Station 118+00 to Station 126+00 on the northerly side of center line
 Station 132+00 to Station 145+00 on the southerly side of center line
 Station 327+00 to Station 345+00 on the northerly side of center line

2. That the fragments of land confined within the area hereinafter described and designated as the parcels of land to be abandoned, which fragments were formerly within the limits of the right of way of the Prineville-Marks Creek Section of the Ochoco Highway, be and said fragments of land are abandoned as a part of the right of way of said highway, and said fragments of right of way are, so far as control and supervision of this Commission are concerned, left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Crook County. The fragments of land to be abandoned are described as follows, to wit:

All those certain parts of the old right of way of the Prineville-Marks Creek Section of the Ochoco Highway, lying on each side of the right of way required for the reconstructed Ochoco Highway from the east city limits of Prineville located on the north and south center line of Section 5, Township 15 South, Range 16 East to the east line of Section 21, Township 14 South, Range 18 East, W.M., Crook County, Oregon, the beginning and ending points of which sections to be abandoned with reference to the location and the engineer's stations of the reconstructed highway are described as follows:

Station 25+00 to Station 29+00 on the northerly side of center line
 Station 28+50 to Station 36+25 on the northerly side of center line

Station 40+00 to Station 43+50 on the northerly side of center line
 Station 52+00 to Station 57+25 on the northerly side of center line
 Station 216+00 to Station 255+00 on the northerly side of center line
 Station 259+00 to Station 272+00 on the southerly side of center line
 Station 273+25 to Station 287+00 on the northerly side of center line
 Station 296+00 to Station 327+00 on the northerly side of center line
 Station 345+00 to Station 569+00 on the northerly side of center line
 Station 571+50 to Station 579+00 on the southerly side of center line

3. In addition to the foregoing descriptions of said fragments or parcels of land there is attached hereto a print or map, marked "Exhibit A", which by this reference is made a part hereof, and upon which map there are shown shaded in yellow the parcels of land formerly within the old right of way, but which are now by this official act preserved for public purposes, and upon which map there are shown shaded in red the abandoned sections of said right of way. Said exhibit or map for identification purposes bears the signatures of W. E. Chandler, Division Engineer, H. G. Smith, Construction Engineer, and R. H. Baldock, State Highway Engineer, and bears date of September 19, 1940.*

4. The Engineer hereby is instructed to properly and completely mark on the ground the boundaries of the fragments of land to be retained by the Highway Commission by erecting and maintaining thereon proper monuments or posts upon which shall be inscribed the words "State Property."

5. In the event there remains any physical connection between any portions of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portions of the old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to the said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed, and dedicated section of said state highway.

6. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Crook County, together with copies of said exhibit or map, for such action as said County Court may desire to take with respect to the fragments of land to be abandoned, and should said abandoned portions of the right of way of said Ochoco Highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Crook County and beyond any responsibility or supervision by the State Highway Commission.

*Map filed in Right of Way Abandonment and Retention File - No. 83

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public, the Commission found it necessary to relocate a portion of the Salem-Pringle Creek Section of the Pacific Highway East in Marion County; and

WHEREAS, by reason of said relocation and reconstruction of the said section of said highway there was eliminated and made unnecessary as a part of the permanent highway a certain section or part thereof, which section is more specifically defined and designated hereinafter in this resolution; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of the said state highway the fragment or portion of right of way hereinafter designated and heretofore included within the area of the right of way of the said highway as formerly located, improved and used;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of land confined within the area of land hereinafter designated, which fragment or parcel of land was formerly within the limits of the right of way of the Salem-Pringle Creek Section of the Pacific Highway East in Marion County but is now without the limits of the right of way of said highway, as said highway has been relocated and constructed, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision by this Commission is concerned, eliminated and left to revert to the adjoining and abutting property owners or to the control and supervision of the County Court of Marion County for highway or other public purposes, as the Court may determine. The fragment or parcel of land affected by this resolution is defined and described as follows, to-wit:

All that certain section of the old right of way of the Salem-Pringle Creek Section of the Pacific Highway East lying on the westerly side of the right of way required for the reconstructed Pacific Highway, the beginning and ending points with reference to the Engineer's Stations of the said reconstructed highway being Station 20+00 on the northerly end and Station 57+50 on the southerly end.

The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or blueprint, marked "Exhibit A", attached hereto and by this

reference made a part hereof, which said exhibit for identification purposes bears the signatures of F. D. Eason, Division Engineer, H.G. Smith, Construction Engineer, and C. B. McCullough, Assistant State Highway Engineer, and is dated November 4, 1940, upon which map or exhibit there is reflected the above described parcel of land by showing the same shaded in red.*

2. In the event there remains any physical connection between any portion of said abandoned right of way or highway and the present highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned portion of the said old road to the possible damage or injury of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer is hereby authorized and directed to erect such barricade or other safeguards as may be necessary to protect and safeguard traffic using and employing said newly located, constructed and dedicated section of said highway.

3. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Marion County, together with a copy of said map or exhibit, for such action as said County Court may desire to take with respect to said fragment of land, and should said abandoned section of the right of way of said highway be further employed for public or private highway purposes such use shall be entirely under the control and supervision of the County Court of Marion County and beyond any responsibility or supervision by the State Highway Commission.

The Commission confirmed the Engineer's award of the contract for grading and paving the Scappoose-Multnomah County Line Section of the Columbia River Highway in Columbia County, bids for which were received on November 13, 1940, to Roy L. Houck, Salem, at his low bid of \$87,492.00.

The Commission confirmed the action taken at its meeting on November 13, 1940, designating the new route for the Oregon-Washington Highway between Milton and the Oregon-Washington state line, in Umatilla County, and authorized the Engineer to maintain the present route until the highway is constructed on the new location. The Secretary was instructed to send Mr. James Davis, Acting Director of Highways, State of Washington, a copy of the resolution adopted on November 13, 1940, together with maps and other pertinent data.

The Commission considered the following requests for extensions of time in which to complete highway construction projects:

Norris Bros., contract No. 2287, for surfacing and oiling the Lick Creek-Salt Creek Section of the Little Butte Secondary Highway,

*Map filed in Right of Way Abandonment and Retention File - No. 84.

in Jackson County, requested an extension of time from September 15, 1940, to October 10, 1940, within which to complete this project. They gave unfavorable weather as the reason for failure to complete the work within the specified time limit. The Engineer advised that this project was let on February 16, 1940, and the completion date was designated as July 31, 1940; however, the contractor did not begin operations until July 8, 1940. An extension of 45 days was granted by the Commission on October 11, 1940, subject to the payment of all engineering costs incurred after the specified date of completion. The Engineer recommended, in accordance with an understanding reached with Norris Brothers at a previous Commission meeting, that they be charged with 50% of the engineering expense incurred on the project subsequent to the original date of completion, July 31, 1940. A letter was presented from the Public Roads Administration agreeing to this second extension, with the understanding that the full engineering penalty be assessed against the contract. The Commission approved the Engineer's recommendation unanimously.

The United Contracting Company, contract No. 2340, for grading and surfacing the Corvallis-Lincoln School Section of the Pacific Highway West, in Benton County, requested an extension of time from September 30, 1940, to June 1, 1941, within which to complete this project. They gave as their reason for failure to complete this project within the specified time limit the fact that all bids received in June were rejected, and the contract, after being readvertised, was awarded to them on July 18, 1940. The late award of this contract, they said, placed the work too near the winter season, necessitating a shut-down order by the Engineer until suitable paving weather in the spring. The Engineer advised that he ordered the work closed down on December 5th, 1940. He recommended that the extension of time to June 1, 1941, be granted subject to payment by the contractor of all engineering costs incurred by the state subsequent to the specified completion date, except that incurred during the shut-down period. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2287, 2317, 2336 and 2380, for construction of state highway projects, have been completed according to the terms of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2287, with Norris Brothers, for surfacing and oiling on the Lick Creek-Salt Creek Section of the Little Butte Secondary Highway, in Jackson County. Completed October 5, 1940.

Contract No. 2317, with McNutt Brothers, for construction of the East Birch Creek Bridge on the Pendleton-John Day Highway, in Umatilla County. Completed on October 12, 1940.

Contract No. 2336, with the Contracting & Sales Company, Inc., for the Interstate Bridge cable replacement, on the Pacific Highway, in Multnomah County. Completed October 31, 1940.

Contract No. 2380, with M. L. O'Neil & Son, for furnishing 7,500 cubic yards of crushed rock in stock piles, on the Ironsides-Brogan Section of the John Day Highway, in Malheur County. Completed December 10, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission set Thursday and Friday, February 27 and 28, 1941, as the date for its first regular meeting for receiving bids for highway construction projects following that scheduled to be held in January. The Secretary was instructed to make the usual arrangements to hold such meeting in the auditorium of the Public Service Building, Portland.

The Commission considered and signed agreements, etc., as follows:

Agreements with the National Hospital Association, the Salem Physicians and Surgeons Association, and the Multnomah Medical Service Bureau, covering medical care of certain state highway employees during 1941.

Supplemental agreement with the Southern Pacific Company, in regard to construction of the Davies Overcrossing project on the Wolf Creek Highway, in Washington County.

Agreement with the Oregon-Washington Railroad and Navigation Company, the Union Pacific Company, the State of Oregon, and Gilliam County, being an easement for encroachment of the Columbia River Highway on railroad company property, between Ramsey and Blalock, in Gilliam County.

Agreement with the Portland Electric Power Company, covering installation of an automatic grade crossing signal at the crossing of 82nd Avenue, near Kendall, 0.3 mile south of the incorporated limits of the city of Portland.

Agreement with Castle Films, Inc., covering the distribution of the two-reel motion picture, in black and white, entitled the "New Oregon Trail", and the editing of a two-reel motion picture in color, entitled the "New Oregon Trail."

Agreement with Botsford, Constantine and Gardner, extending the advertising agreement entered into on February 16, 1940, for a period of one year ending September 1, 1941.

Agreement with the City of Ontario for furnishing water for irrigation of a portion of the Ontario Landscaping Project.

Agreement with Marion County covering snow removal operations on the North Santiam Highway during the winter season of 1940-1941.

Agreement with Mrs. Maud Moon covering the leasing of property in North Portland for use as a maintenance headquarters site.

Bill of Sale by the State Highway Commission selling to Helen Louise Chadwick a one-story, wooden building on Lots 3 and 4, Block 15, Brookings, Oregon. File No. 7704.

Bargain and Sale Deed by the State Highway Commission, conveying lands in Lot 12, Block 42, Bennett's

Addition to the town of Marshfield, to Glen William Curtis and Mabel A. Curtis.

"Consent to Vacate" an alley in Eugene, through Lots 1, 2, 3, 5 and 6, and the East 50 feet of the West $\frac{1}{2}$, Block 9, Fairmount Addition to Eugene.

Application for a public highway right of way across the Warm Springs Indian Agency, on the He He Butte Section of the Warm Springs Highway.

There being no further business coming before the Commission at this time, the meeting adjourned at 5:00 p. m.

Commissioner

Herman Oliver
Commissioner

Salem, Oregon, January 10, 1941

The State Highway Commission met in special session at 10:30 a.m. in the office of the State Highway Engineer, Room 325, State Office Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Senator Dean H. Walker, President of the 41st Legislative Assembly of Oregon came before the Commission and requested state cooperation in the replacement of the Willamette River Ferry, which serves traffic between Independence and East Independence, with a bridge. Senator Walker stated that the present ferry carries a large volume of traffic, particularly during the hop season, and many times it is necessary for traffic to wait half an hour or more to secure ferry accommodations. He pointed out that this ferry connects with the South River Road, from Salem, a portion of which has already been approved as a Federal Secondary Highway and which is under consideration at the present time for improvement as a WPA project. He pointed out that the ferry is owned and operated jointly by Marion and Polk Counties and gave as his thought that the counties would contribute toward the cost of the bridge at least as much money as they are now paying for operation and maintenance of the ferry. He suggested an agreement between the counties and the Highway Commission covering the bridge construction and that the South River Road between Salem and Independence, including the river crossing, be designated a state secondary highway. He offered to secure, if possible, legislative action as may be necessary to secure state aid in this matter.

After discussion, the Commission instructed the Attorney to investigate the laws and ascertain whether or not any additional legislation is needed and to confer with Senator Walker in regard thereto. The Engineer was instructed to investigate the cost to build a suitable bridge and to construct a standard type road from Salem to Independence via the South River route and to report to the Commission.

The Commission had under consideration the adoption of partial programs for the 1942 Regular Federal Aid Funds and other funds. The Engineer submitted a list of projects from which the Commission selected the following for such programs:

PARTIAL PROGRAM OF 1942 REGULAR FEDERAL AID PROJECTS

County	Highway	Section	Kind of Work	Length	Estimated Cost
Clatsop	Oregon Coast	Astoria	G. & P.	0.40	\$30,000

The Engineer was authorized and instructed by the Commission to submit a list of the selected projects to the Public Roads Administration for its approval.

In this connection the Commission expressed a desire to extend the improvement of the Wallowa Lake Highway between Elgin and Minam Hill, which project is estimated to cost about \$80,000, and it was decided to do this work as a state project, using state funds to finance it in the event sufficient savings accrue in the maintenance operations this winter. It was also decided to use the state funds set up for the Seneca-South project to finance the construction of the Vance Creek-Seneca Section of the John Day-Burns Highway within the National Forest Boundaries, which work is now scheduled to be done as a forest highway project, using federal moneys, in the event it develops that the federal moneys will not be available so the Vance Creek-Seneca project can be contracted early in the spring.

JAN 10 1941

With respect to the railroad grade separation program, the Commission instructed the Engineer to bear in mind the elimination of the grade crossing on the Old Oregon Trail at Durkee as a desirable project.

The Commission adjourned at 12:00 noon and reconvened at 1:00 p. m. in the same room with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney, and the Secretary.

The Attorney brought up for discussion an opinion from the Attorney General which states that it is the obligation of the State Highway Commission to pursue action through the Courts, in an endeavor to recover from the Ladd and Bush Bank, Salem, the difference between the amounts lost by the State Highway Department as a result of defalcations by a former employee by the name of W. L. Moorman, and the amount recovered on Mr. Moorman's bonds, such difference amounting to approximately \$2,000. The matter was given careful consideration by the Commission but action thereon was deferred pending further information. The Attorney was instructed to furnish each Commissioner with full facts of the case prior to the next meeting, when the matter is to be reconsidered.

The Attorney requested instructions whether or not to prepare for submission to the State Legislature, which convenes the following week, a bill, which, if enacted into law, would authorize the State Highway Commission to construct cattle guards on state highways if and when considered advisable by the Commission. The Commission considered that it would be to its advantage to have such authority whether or not cattle guards were actually constructed and, accordingly, instructed the Attorney to prepare the bill and submit it to Governor Charles A. Sprague for approval.

Commissioner Clough brought up for discussion the question of night hauling of logs over state highways. It was decided to deny requests for such privilege for the time being in view of the possibilities that the Legislature will take some action with respect thereto, and it was the thought of the Commission that any rules or regulations covering the hauling of logs during hours of darkness should be decided by joint action of the Superintendent of the Department of State Police, the Public Utilities Commissioner, and the State Highway Commission. The Secretary was instructed to inform the Pilot Rock Lumber Company, Pilot Rock, Oregon, that the Commission has considered its request for a permit to haul logs over a section of the Pendleton-John Day Highway during the hours of darkness and has denied the same.

The Attorney reported the status of the right of way budget for 1941. He advised that the amount budgeted for this purpose is \$600,000 and that up to the present time there has been obligated \$124,500, such amounts being in addition to \$800,000 which has been set up for the Front Avenue project in Portland.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended.

be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Assistant Attorney reported an offer from Fannie Trimble Pedrioli to purchase a state-owned building at Brookings, being building designated as No. 7707 in the Highway Department's records. He explained that some time ago the Commission took bids for the purchase of this building, the high bid being submitted by Tom B. Page of Brookings. However, subsequent to the acceptance of Mr. Page's bid it developed that thieves entered the building and removed certain facilities and now Mr. Page is not inclined to complete the purchase except at a discount. The price offered by Mr. Page, he said, was \$50.00, compared to \$60.00 offered by Mrs. Pedrioli for the building as is. He recommended release of Mr. Page from his obligation and the return of his bid deposit and the acceptance of Mrs. Pedrioli's offer. The Commission approved the recommendation unanimously.

The Commission had under discussion a letter from Mr. Philip H. Carroll, Executive Secretary of the Public Docks Commission, Portland, calling

JAN 10 1941

attention to certain legislation now pending in Congress which has for its object the transfer to the federal government from the states sovereignty over submerged lands below the low-water mark along the coast. The Attorney advised that investigation reveals that two bills with respect to such matter have been offered in the U. S. Senate, both of which seek to transfer jurisdiction over the submerged lands from the State of California to the federal government under a pretext of preserving petroleum deposits and as against such revision there has been offered in the House of Representatives a bill the purpose of which is to have the federal government re-announce and re-declare the doctrine that the title to submerged and tidelands is and ought to be vested in the respective states within whose boundaries such lands are situate. He pointed out that when the State of Oregon was admitted to the Union its admission carried with it as one of the attributes of state sovereignty ownership and control over tidelands and also title to lands under navigable waters within the state; also, the boundaries of the state were fixed by Congressional Act as "Beginning one marine league at sea, due west from the point where the forty-second parallel of north latitude intersects the same; thence northerly, at the same distance from the line of the coast lying west and opposite the state, including all islands within the jurisdiction of the United States, to a point due west and opposite the middle of the north ship-channel of the Columbia River****." He said that it appears to him that the purpose of the legislation in Congress is to destroy the principle of sovereignty and vest in the federal government control over such submerged lands in so far as the State of California is concerned; and he suggested that, in the interests of the people of Oregon, a protest should be made against such legislation for, if it is accomplished with respect to the State of California, it would not be difficult to do the same in the State of Oregon.

The Commission thought this a matter that should have the attention of the Governor and the Legislature. The Attorney was instructed to so inform Mr. Carroll.

A request was received from Mrs. James H. Ross, Albany, for permission to construct and maintain a sidewalk across a small parcel of state-owned property in Lot 3 of Block 4, Bryan's Addition, Albany, so as to permit prospective customers to patronize a business establishment which she proposes to conduct on adjacent property, this being the only direct means of access to her property from the highway. After considerable discussion the Commission authorized granting Mrs. Ross such privilege subject to the condition that no vehicular traffic shall be allowed to cross the highway curb and sidewalk, and with the understanding that the Highway Commission will not relinquish the right to make such future use of its property as may be necessary for highway purposes, and reserves the right to devote the property to such purposes at any time that the same may appear necessary without obligation to Mrs. Ross or her successors, even though such action may prevent Mrs. Ross having access to the highway at this point.

The Attorney requested instructions from the Commission whether or not to sell to Mr. Newell Wright, Grants Pass, a small parcel of state-owned property adjacent to the Grants Pass-Green Creek Section of the Pacific Highway

JAN 10 1941

in Josephine County. He said that Mr. Wright owns land adjacent to the state property but does not have access to the highway at this particular point. Further, that Mr. Wright alleges that the state's property is continually covered with weeds and obnoxious plant growth which he has to control so as to prevent its spread to his own fields. He pointed out that an irrigation flume is now being maintained along the edge of the property and that the state is also maintaining a siphon at the end of the property, which siphon crosses the highway right of way. The area desired by Mr. Wright, he said, lies beyond the limits of the standard-width highway right of way and is of value for highway purposes only insofar as it concerns the maintenance of the flume and the siphon. He recommended the sale of the property to Mr. Wright for the sum of \$50.00, which is approximately the amount the state paid for it in connection with right of way negotiations, provided however that Mr. Wright will permit the state to reserve the right to maintain the flume and the siphon in their present locations. The Commission approved the recommendation.

The Assistant Attorney reported that Kenneth Pedersen, who submitted the low bid for the moving of buildings on the Henry J. Henze and Laura Henze property at Scappoose, has elected not to proceed with the job for the reason that he made an error in estimating the quantities of excavation and surfacing work required and, therefore, could not do the work at the price quoted. Mr. Pedersen's bid, he said, totaled \$768.00, and included \$227.50 for grading and surfacing, which work he now estimates will cost him \$605.00; also, that Mr. Pedersen has agreed to reduce his bid in the amount of \$227.50 if the state will do the grading and surfacing work, leaving a net of \$540.50 for the moving of the buildings. He added that Division Engineer E. A. Collier estimates that the grading and surfacing work, if performed under an Extra Work Order on the construction contract, will cost about \$431.25, which would make a total cost of \$971.75 compared with \$1051.00, the amount of the second-low bid submitted for this work. After consideration, the Commission authorized approval of the price of \$540.50 for the moving of buildings, leaving the grading and surfacing work to be done by the state's contractor.

A letter was presented from Ralph A. Coan, Attorney for Mr. Charles W. Ertz, Portland, in regard to certain property that Mr. Ertz owns adjacent to the proposed Front Avenue project in Portland. It appears that a portion of this property will be needed for right of way for the highway improvement and, because this fact is known to tenants of the building located on the property, Mr. Ertz is having difficulty in securing tenants and is suffering loss of income thereby and, in view of the circumstances, feels that he is entitled to damages from the state. After discussion, the Commission referred this matter to the Attorney with instructions to secure an option from Mr. Ertz providing for the purchase of his property or the portion that will be needed for the Front Avenue improvement.

The Engineer requested instructions with regard to the removal of buildings from a one-mile section of the right of way of the Wilson River Highway between Glenwood and Balm Grove, which right of way was purchased by Washington County. He said that, while the county purchased the right of way,

it is evident that no provision was made by the county for the removal of buildings and there is doubt in his mind that the county has made any such provision in its budget for 1941. He suggested that, since the State Highway Department has purchased all right of way for state highways during the past several years, the Commission might authorize removal of the buildings at state expense which would expedite the matter considerably and would be in line with the Commission's present policy with respect to such matters. The Commission indicated approval of the suggestion but deferred a decision pending investigation to determine the amount involved. The matter was referred to the Attorney to make such investigation.

The Assistant Attorney advised that Mary Gaboni, through her attorney, Mr. Charles Kosten, Portland, has offered to convey to the state by quitclaim deed, if paid the sum of \$25.00, certain property owned by her along the Front Avenue project in Portland, consisting of the south half of Lot 3 and the north half of Lot 4, in Block 73, being waterfront property against which there are assessments amounting to \$16,404.05, and delinquent taxes and penalties amounting to \$10,862.89. He said that the appraised valuation of the property, in accordance with the standards adopted by the Commission and the City of Portland, is \$12,773.75, so that Mrs. Gaboni's equity in the property is valueless. He recommended acceptance of Mrs. Gaboni's offer, subject to approval of the City of Portland, in order to eliminate all possible future question as to the validity of the assessment foreclosure proceedings, the tax foreclosure proceedings, or the condemnation proceedings by the City of Portland. The Commission approved the recommendation.

The Commission had under discussion the abandonment of a portion of the right of way of the old Pacific Highway in the City of Cottage Grove. The Attorney explained that, in acquiring right of way for the new highway in Cottage Grove, it was necessary to purchase land from Mr. Frank Heck and, as a part of this transaction, it was agreed that the Highway Commission would allow the old highway in front of Mr. Heck's property to revert to Mr. Heck, it being understood at the time that the deal was closed that the Commission's resolution abandoning the area would not be placed on record until the new highway was completed and opened to travel. He advised that the job is now done and that the general public has the use of the road, which is the reason for asking the Commission to act on the matter at this time. After considerable discussion and careful inspection of the map showing the property in question, and particularly because the abandonment of the area for state purposes is necessary in order to fulfill the terms of the option secured from Mr. Heck for the new right of way, the Commission approved the abandonment of the area in favor of Mr. Heck and, thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to relocate a portion of the Pacific Highway in Lane County, and particularly that portion through the City of Cottage Grove; and

WHEREAS, by reason of said relocation and the reconstruction of said section of said highway there will be eliminated and made unnecessary as a part of the permanent right of way a certain section or part of the old location, which said section or part of the right of way hereinafter to be eliminated from the new right of way is more specifically defined and described hereinafter in this resolution; and

WHEREAS, the area hereinafter described will, after the highway has been constructed, with respect to the new location be no longer needed by the state for highway purposes; and

WHEREAS, as a part of the transaction with Frank Heck and Mary E. Heck, by which the state acquired real property for right of way purposes, it was agreed that the real property hereinafter described should be permitted to revert to the said Frank Heck and Mary E. Heck as owners of the property abutting upon said abandoned right of way; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon and eliminate as a part of the right of way of said highway in Cottage Grove the fragment or portion of right of way hereinafter described and which heretofore and at this time is included within the area of the right of way of said highway as now located and used.

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively participating, as follows:

1. That the fragment of real property confined within the area hereinafter designated and described, which fragment or parcel of land heretofore was and now is within the limits of the right of way of the Pacific Highway in Cottage Grove, but is not within the limits of the right of way of said highway as the same has been relocated and reconstructed within the corporate limits of said City, be and said fragment or parcel of land or portion of the old right of way is abandoned as a part of the right of way of said highway, and said fragment or parcel of land or old right of way is, so far as control and supervision of this Commission is concerned, eliminated from the right of way of said highway and is left to revert to the adjoining and abutting property owners, Frank Heck and Mary E. Heck.

2. The fragment or parcel of land affected by this resolution is defined and described as follows, to wit:

A parcel of land lying in the northwest quarter (NW $\frac{1}{4}$) of Section 33, Township 20 South, Range 3 West, W.M., Lane

County, Oregon; the said parcel being described as follows:

Beginning at a point on the westerly right of way line 30 feet distant from (when measured at right angles to) Engineer's Station 805+94.5 of the existing Pacific Highway; said point also being 458 feet south and 127 feet west of the southwest corner of Block 22, Long and Landess Addition to Cottage Grove; thence South $61^{\circ} 15'$ East a distance of 60.0 feet to the westerly right of way line of the Southern Pacific Company; thence along the easterly right of way line of said highway on a 603 foot radius curve to the left (the long chord of which bears North $19^{\circ} 57' 30''$ East 184.3 feet) a distance of 185.1 feet; thence North $89^{\circ} 52'$ West a distance of 36.2 feet; thence South $28^{\circ} 45'$ West a distance of 164.8 feet to the point of beginning; containing 8965 square feet; said parcel being a portion of the abandoned Pacific Highway.

3. That the area of real property lying west of the tract of land described in paragraph two of this resolution shall be retained by the State for public highway purposes so that in so far as consistent with the public interests members of the general public, including the abutting property owners Frank Heck and Mary E. Heck, may have free passage thereover. In other words, said area shall at all times be treated and used as a part of the right of way of the said highway with like privileges and restrictions.

4. This resolution shall be entered in the minutes and records of the Commission and a certified copy thereof delivered to Frank Heck and Mary E. Heck for their special use and benefit.

The Commission discussed a settlement with Mr. Mike McCabe for right of way needed for the Warm Springs Highway in the vicinity of Prineville and, by unanimous vote, approved settlement for the amount stated in the original option secured from him; viz., \$1,444.20, with the understanding that Mr. McCabe does not intend to continuously nor generally transport lambs and ewes across the highway during lambing season. It was considered advisable to bring the conditions to Mr. McCabe's attention by letter, rather than by inserting them in the deed of conveyance, and the Attorney was so instructed.

The Commission discussed an opinion from the Attorney as to its authority to erect and maintain signs on the beach at Gearhart informing the public of the danger of logs on the beach and in the surf. According to this opinion the State Highway Commission, which is the owner of the beach area at this location, has authority to erect and maintain such warning signs if it considers them necessary as an aid in the prevention of accidents. In view of the opinion, the Commission authorized and instructed the Engineer to erect a number of warning signs on the beach at this location.

JUN 10 1941

The Attorney presented a status report on negotiations for the acquisition of privately-owned lands bordering the state park known as "The Cove" at the confluence of the Deschutes, Metolius, and Crooked Rivers, in Jefferson County. He said that the owner of the orchard property near the point where the county road crosses Crooked River, which is the key property to this situation, has been contacted and has indicated a willingness to sell his property to the state for the sum of \$16,000, with certain restrictions and regulations, including the right to occupy the premises for a period of six months. Action on this matter was deferred by the Commission until the next meeting. The Attorney was authorized in the meantime to employ the services of a competent appraiser to set a value on the property.

The Engineer brought up for discussion the roadside development project at Newport. He advised that the contract for this improvement, amounting to \$23,967.50, was awarded on August 23, 1940, as a Federal Aid project but no provision was made for the planting of the area, which is estimated to cost an additional \$3,200.00. He gave as his thought that it would be impossible to secure federal funds to finance such planting work, and suggested an allocation of state funds for the purpose, because it is needed to provide a finished job. The Commission, by unanimous vote, approved the project but instructed the Engineer to secure federal funds to finance it, if possible.

The Engineer submitted a list of sidewalk projects for the Commission's information in formulating a construction program for such work. He explained that the list has been prepared in accordance with the priority rating of each project based upon "Index of Hazard and Relative Warrant Formulas" developed by the Traffic Engineering Department after exhaustive study. He gave as his thought that the Commission should approve a budget for sidewalk construction and suggested the setting up of \$30,000 for such purpose as a start. After discussion, the Commission approved the suggestion by unanimous vote and instructed the Engineer to submit to the Commission at the next meeting a list of projects to take up the amount.

The Engineer reported on the request of the City of Corvallis for the installation of ten railroad-crossing type signals on Sixth Street, Corvallis, at all intersections from A Street (Western Avenue) to Tyler Street. He estimated the cost of such installations at \$25,000 and advised that only two of these intersections; viz., "A" Street and Van Buren Street are on state highway routes. A study of the accident record at these intersections, he said, indicates that the installations are not warranted and he accordingly recommended that the request be not approved, at least not until there appears to be more justification for the same. The Commission approved the recommendation unanimously.

The Engineer also reported on requests for traffic lights at the following locations:

1. Installation of a fixed time signal on the Pacific Highway at the intersection of Ninth and Main Streets and the installation of an overhead flashing beacon on the Pacific Highway at the

intersection of Sixth and Madison Streets, all in Cottage Grove. He estimated the cost of the fixed time signal at \$1,500 and the flashing beacon at \$150, and recommended approval of both lights, the entire cost of both installations to be paid by the state. The Commission approved the recommendation.

2. Installation of a flashing beacon at the intersection of Sherman Avenue and Washington Avenue on the route of the Oregon Coast Highway in the City of North Bend. He estimated the cost of such installation at \$150 and recommended approval of the same at state expense. The Commission approved the recommendation.

3. Installation of an overhead flashing beacon at the intersection of the Oregon Coast Highway and Roosevelt Drive, near the Wahanna Creek Bridge in Seaside. He estimated the cost of such installation at \$175 and recommended approval of the same at state expense. The Commission approved the recommendation.

4. Installation of an overhead flashing beacon at the intersection of the Columbia River Highway and Fairview Road, near Portland. He estimated the cost of such installation at \$150 and recommended approval of the same at state expense. The Commission approved the recommendation.

5. Installation of an overhead flashing beacon at the intersection of the Salmon River Highway with the Oregon Coast Highway at Otis. He estimated the cost of such installation at \$200 and recommended approval of the same at state expense. The Commission approved the recommendation.

The Engineer also recommended denial of the requests for traffic signals at the following locations, it being his opinion, after investigation, that traffic lights at these points are unwarranted at this time

1. Flashing beacons on the Columbia River Highway in the town of Cascade Locks.

2. Signals and flashing beacons in the town of Springfield.

3. Flashing beacon at the intersection of the Oregon Coast Highway and the Wolf Creek Highway at Necanicum Junction.

4. Flashing beacon at the intersection of the Oregon Coast Highway and the road to Cannon Beach.

5. Flashing beacon on the Tualatin Valley Highway at Gaston.

6. Flashing beacon on The Dalles-California Highway at Klamath Agency.

The Commission, by unanimous vote approved the Engineer's recommendation.

The Engineer reported that in accordance with authority previously granted him by the Commission he has awarded contracts, as follows, based on bids received by the Commission at its meeting on December 17 & 18, 1940, the awards in each instance being made to the low bidder and the conditions of the awards having been satisfied:

Svensen-Goble Rock Production Project on the Columbia River Highway, in Clatsop and Columbia Counties. Bids taken December 18, 1940, contract awarded January 4, 1941, to Tidepoint Company.

Surfacing and oiling Owyhee River-McDermitt Section of the I.O.S. Highway, in Malheur County. Bids taken December 17, 1940, contract awarded to Norris Bros., January 4, 1941.

Grading and topping the Boardman-Umatilla County Line Section of the Boardman-Stanfield Highway. Bids taken December 18, 1940, contract awarded December 21, 1940, to Frank Penepacker.

The Commission approved the awards as reported.

The Engineer requested authority to advertise for bids for the construction of what is known as the Meadowbrook Bridge on Starkey Secondary Highway, in Union County. He explained that this job was included in last year's budget for state forces but he is now of the opinion that it would be better to have the work done by contract. The Commission approved the request and authorized the advertising of this project for bids to be received at the next meeting.

The Engineer requested authority to purchase the following equipment:

2 10-ton rollers for oiling crews (1 old roller to be traded in as part purchase price.) Estimated net cash outlay \$8,600

15 Power mowing machines. Estimated total cost \$16,500

10 Asphalt kettles. Estimated total cost \$6,500

6 Patrol graders (6 old graders to be traded in as part purchase price.) Estimated cash outlay \$26,790.

6 Pull-type graders (6 old graders to be traded in as part purchase price) Estimated total cash outlay \$6,000.

20 Light type-dump trucks of Ford or Chevrolet Class (20 old trucks to be traded in as part purchase price.) Estimated cash outlay \$18,000.

2 Power hoists for use of bridge crews. Estimated total cost \$750.

After discussion the Commission approved the request by unanimous vote and ordered that the purchases be made through the State Purchasing Department in accordance with the usual practice.

In this connection the Engineer discussed with the Commission the advisability of purchasing a new type oil and asphalt retort manufactured by the Dallas Machine and Locomotive Works, Dallas, Oregon, known as "The Gerlinger Rotary Oil Retort." He explained that the company has made a special effort to manufacture a retort that will stand up under all conditions of operation and, in his estimation, after having tried out one of the retorts which the company loaned for the purpose without charge, he is convinced that the company has a machine that is better than any similar machine on the market. The regular price of this equipment, he said, is \$4,950, but the company has stated its willingness to sell the retort that it now has on hand for the sum of \$4,450. He pointed out particularly that, in the operation of this retort, an auxiliary boiler is not necessary so it will be possible to save considerable expense to the state from that standpoint; also, that the cost of the machine is less than the cost of similar machines that are now being used on highway work. He requested authority to purchase this machine. After due consideration, the Commission approved the request by unanimous vote.

The Attorney requested instructions relative to the collection of a number of unsatisfied obligations of several cities and counties which obligations are long past due. After discussion, the Commission instructed the Attorney to ascertain the intention of such cities and counties with respect to the payment of the claims and report his findings to the Commission for further action.

The Engineer presented a plan for safeguarding and simplifying the handling of deposits made by cities, counties, and others to guarantee payment for work to be performed by them. Briefly, such plan provides for the setting up of a special account with the State Treasurer placing therein all amounts deposited and withdrawing the amounts by check signed by the State Highway Engineer when final disposition of the deposits is to be made. He said that there is a provision in the state law which gives the State Treasurer authority to handle accounts of this kind and that it is the suggestion of the Secretary of State's office that the Highway Commission take advantage of such law, as many other state departments have done. He further advised that he discussed this matter with the Commission's Attorney, who examined the statute, and has given as his opinion that there is nothing irregular about the proposed plan. He recommended adoption of this plan and that he be authorized to establish such an account with the State Treasurer. The Commission approved the recommendation unanimously.

The Engineer also brought up for discussion the matter of charging contractors for plans furnished for highway work that is being advertised for bids. He advised that for many years it has been the practice of the Highway Department to require contractors and others receiving plans to make a \$5.00 deposit for each set, which amount is returned to the depositor when he returns the plans or, in any event, after a period of six months or so has

elapsed. He gave as his thought that it would prove more satisfactory to make a definite charge of \$1.00 for each set of plans regardless of whether or not the plans are returned, the amounts received to be deposited in the State Highway Fund. Such arrangement, he said, would not only do away with considerable routine in the handling of deposits of this kind but would help defray the cost of preparing the plans, which amounts to a considerable sum. He recommended approval of such method of handling these accounts. The Commission approved the recommendation unanimously.

The Engineer reported that the Stillwell Bridge over the Trask River on the Netarts Secondary Highway, in Tillamook County, is in serious condition due to the decay of timbers. He recommended the placing of a 10-ton maximum load limit on the structure pending replacement of the same with a new one, as a safeguard to traffic. The Commission approved the recommendation and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, the road or highway hereinafter named has been designated and declared to be and is a state highway and has been improved and is being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon, as a state highway;

AND WHEREAS, on the said state highway there is located a certain bridge structure, known as "Stillwell Bridge", which, in the judgment of the State Highway Commission is incapable of safely carrying the traffic to which it is being subjected, and in order to protect said bridge structure against damage and injury and in order to safeguard traffic over said bridge structure it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structure and of the traffic which uses the said bridge structure that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of the said structure at any time shall be reduced and fixed as in this order provided;

NOW THEREFORE, the premises being in part as above stated and the State Highway Commission having, as a result of due investigation, found that the bridge structure above referred to and hereinafter designated is incapable of safely sustaining or supporting a total gross load in excess of that specified hereinbelow;

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the said bridge structure shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any

trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

STARTS SECONDARY STATE HIGHWAY, No. 131, Tillamook County

Mile Post 00.77	Stillwell Bridge	10 tons
-----------------	------------------	---------

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 55-2707, Oregon Code 1935 Supplement, shall be in full force and effect until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structure, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this resolution be furnished to the County Clerk of Tillamook County in which county said bridge structure is located, and that a certified copy of said resolution be furnished the Superintendent of the Department of State Police for his information.

The Engineer presented drawings for a county bridge over the Nestucca River on the county road at Pacific City, Tillamook County, approval of which by the Commission is required by law as a prerequisite to the county securing permission from the United States War Department to erect the structure. He explained that, while this structure is not on a state highway and is one in which the State Highway Commission has no particular interest, nevertheless it is necessary for the Commission to give its perfunctory approval of the plans in order to comply with the statute, particularly paragraph 12, Chapter 189, of the General Laws of Oregon, 1925, which provides that "no bridge shall be constructed over or across any navigable water wholly or in part within this state or over lands lying between high and low water on any navigable stream within or forming the boundary of this state unless and until the plans of such bridge and the elevation and clearance thereof shall be first approved by the State Highway Commission." He said that the bridge under discussion has already been erected by the county and that it has been examined by the bridge engineer who declares it to be structurally sound. He recommended approval of the drawings. After discussion the Commission, by unanimous vote, approved the recommendation and authorized the Engineer to sign, in behalf of the Commission, the certificate on each drawing.

JAN 10 1941

A letter was presented from the Lang Transportation Company, San Pablo, California, requesting authority to operate over Oregon state highways from the California line to Ashland, Medford, and Klamath Falls, certain equipment consisting of truck and trailer, the overall length of which is 52' 8", or 2' 8" in excess of the length limit authorized by the Oregon statutes. The company advised that it is arranging for the purchase of equipment that complies with the Oregon laws but, pending the outcome of their studies of a satisfactory type of equipment, they would like to have authority to operate the equipment that they now own. Further, that they anticipate making about five trips per month to the points mentioned and are only requesting a permit of 90 days' duration. After due consideration, upon recommendation of the Engineer, the Commission approved the granting of such permit as requested.

The Secretary presented a letter from the J. E. Flurry Lumber Company, Ashland, in which the Commission was urged to lift the reduced load limit recently placed on the Tiller-Trail Highway because it interferes greatly with filling of orders for lumber purchased for use in connection with the National Defense Program. The Engineer advised that the road is now in good condition, but has only a light oil surface which may not stand up throughout the winter under heavy log-hauling traffic. He added that the road was built by the Public Roads Administration as a forest highway project and that it is still being maintained by that department at whose request the road was posted for reduced loads. After considerable discussion, the Commission instructed the Engineer to secure a report from Division Engineer K. D. Lytle on this subject and in the meantime to take down the reduced load limit signs temporarily to see what effect full weight loads will have on the section.

The Commission discussed matters pertaining to the Wolf Creek Highway WPA project and particularly the advisability of sponsoring a new project to include all work remaining to be done. In the discussion it was pointed out that the WPA funds that have been provided for the project now under way will be exhausted about the first of April; also, that a new project embracing a portion of the remaining work has already been authorized by the Commission but has not as yet been approved by the government officials, which project calls for 25 per cent contribution by the sponsor. The Engineer advised that it now appears possible under the National Defense Program to secure a project embracing all of the remaining work without obligation on the part of the sponsor to pay more than 16 per cent of the cost, although detailed information in regard thereto has not as yet been received. It was the Commission's decision that the work should proceed under the present project and under a project that is now in Washington for approval, until the final project can be prepared when the old projects can be cancelled. The Engineer was instructed to discuss the matter further with Mr. E. J. Griffith, State Administrator for the WPA.

The Engineer reported receipt of a letter from the WPA pointing out that the Ranger Station-Fish Hawk Falls cutoff project connecting the Wolf Creek Highway and Nehalem Highway, in Clatsop County, is an important access road in the national defense program and inquiring what progress is being

made by the State Highway Department in the survey of this road and the survey of the Nehalem Highway between Fish Hawk Falls and Astoria, all of which work it is proposed to perform with WPA forces. The Engineer advised that a reconnaissance survey only has been made of this project and it is estimated that the work between Ranger Station and Fish Hawk Falls can be done by contract for about \$370,000 whereas it will cost approximately \$750,000 to do the work as a WPA project, of which amount the state's share is estimated approximately \$60,000. The Engineer was instructed to contact the WPA officials and inform them that this project is one that would not normally be undertaken by the State Highway Commission for several years; however, in view of the importance and urgency of the project for national defence the Commission is willing to sponsor the same at this time but cannot contribute more than \$60,000 of state funds to finance it. Also, that the state will make the survey of the project and will purchase the right of way. The Commission thereupon authorized the Engineer to make a definite location survey of the road.

The Engineer reported on the request of Albany School District No. 5 for permission to use the area between the sidewalk and the school-ground fence along the Pacific Highway East in Albany. He said that the area in question is lune-shaped being about 200 feet long and about ten feet wide at the center, tapering to nothing at each end; further, that it is two or three feet lower than the highway roadside shoulders and, while the slope has been planted to shrubbery, the lune itself is undeveloped. At the present time, he said, the school district maintains an unsightly board fence approximately eight feet high along the right of way line, but it is the plan of the school district, if the Highway Commission will grant the necessary permission, to replace this fence with an industrial tight-woven wire fence with steel posts set in concrete and to plant fast-growing shrubbery along the same to act as a screen. They would like to erect this fence on the highway right of way so as to give the school grounds a little more room. He recommended the granting of the request subject to the condition that the fence do not encroach on the highway more than six feet at the widest point and that the school district will agree to remove the fence any time in the future that the area is needed for highway purposes or if it interferes with traffic requirements. The Commission approved the recommendation and ordered that the matter be covered by appropriate agreement.

Reconsideration was given by the Commission to the request of J. W. Harrison, Portland, for access to the Pacific Highway East at the Union Avenue viaduct in Portland, involving the cutting of the viaduct handrail. The Engineer recalled that the Commission, at a previous meeting, indicated that it would not grant this request in the event it had legal authority to prevent right of access at this point. The Attorney advised that he has read the law covering such matters and has also read court rulings on the subject and it is his opinion that the Commission cannot deny Mr. Harrison right of access to the highway although he can be required to pay whatever cost or expense may be incurred in providing such access. In view of the Attorney's opinion the Commission decided unanimously to permit Mr. Harrison right of access as requested provided he will deposit with the Commission, in advance of construction, the estimated cost of doing the work which is about \$200, and provided further that the work be done by state forces.

A letter was presented from Mr. Andrew Newhouse, attorney for Andrew Stambuck, operator of the Enegren Ferry on the Coos River Secondary Highway in Coos County, in which letter Mr. Newhouse points out that it has been the practice of Mr. Stambuck and former operators of this ferry, to provide powerboat service for foot passengers during the times when ferry service had to be discontinued by reason of high water. Mr. Newhouse gave as his interpretation of the contract that Mr. Stambuck would not be obligated to furnish such powerboat service. However, should he discontinue it he would undoubtedly incur the ill feeling of the persons who are benefited thereby and for that reason is asking the Commission to waive the deductions provided for in the contract during periods when the ferry is not operating on account of high-water conditions and when he operates his powerboat, and, if the Commission cannot see fit to modify the contract in such regard, that the Commission provide suitable signs at the approaches to the ferry informing the public that Mr. Stambuck is not obligated to furnish powerboat service when the ferry cannot run during high-water periods. After discussion of this matter the Engineer recommended that the Commission do not modify the provisions of the contract, but in lieu thereof give Mr. Stambuck authority to erect signs as suggested by Mr. Newhouse stating that the ferry will not be operated during periods of high water. The Commission approved the recommendation unanimously.

A letter was presented from G. T. McClean, City Manager of Astoria, requesting financial assistance from the State Highway Commission in paying for the city's proposed street-lighting system which is estimated to cost about \$3,000.00. He advised that the city does not have funds available to pay the entire cost and that it is the thought of the city commissioners that the state highway department might pay a portion of the expense in view of the fact that the poorly lighted portion of the city is along the new route of the state highway. The Commission denied the request for the following reasons: lack of established policy with respect to such matters, and the inability of establishing a policy at this time because of pressing demands for funds for other purposes. The Engineer was instructed to so inform the city manager.

The Commission discussed matters pertaining to the Front Avenue project in Portland, particularly the matter of the award of the contract for reconstruction of the west approach to the Hawthorne Bridge, bids for which were taken by the Commission on December 18, 1940, the low bid being submitted by Frank Watt Construction Company. The Engineer advised that Public Utilities Commissioner Ormond R. Bean expects to hold a hearing on the Front Avenue project about the middle of February and gave as his thought that it would be inadvisable to award the contract for the Hawthorne Bridge project until after this hearing. He pointed out that according to the provisions of the proposal the Commission cannot hold the proposal of the Frank Watt Construction Company longer than 30 days after bids are received, and in this case that would mean not longer than January 18, 1941, unless the contractor will agree to take the job after that date. He was instructed by the Commission to contact the Frank Watt Construction Company and ascertain its attitude in regard thereto. Mr. Watt was contacted by telephone and

JAN 10 1941

stated his willingness to accept the contract even if the award is delayed until after January 18, 1941, provided he is assured by his bondsmen that they would write the contract bond. In view of this report the Commission instructed the Secretary to return to the Frank Watt Construction Company its certified check bid deposit on January 18, 1941.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such location surveys on various sections of the highways of this state, which said sections of highways, together with their identifying location survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Plans	- - - -	1-1424	- Huntington Section, Old Oregon Trail, Baker County.	1st authorization - \$200.00
Plans	- - - -	1-1425	- Unity Scale Site, John Day Highway, Baker County.	1st authorization - \$60.00
Plans	- - - -	102-1423	- Plunket Creek-Read Creek Section, Kings Valley Highway, Benton County.	1st authorization - \$500.00.
Quarry	- - - -	102-1423	- Plunket Creek-Read Creek Section, Kings Valley Highway, Benton County.	2nd authorization - \$400.00 Total to date \$900.00
Plans	- - - -	2-1424	- Corvallis Section, Corvallis-Newport Highway, Benton County.	1st authorization - \$100.00
Plans	- - - -	3-1428	- Oswego Section, Oswego Highway, Clackamas County.	1st authorization - \$1,000.00
Plans	- - - -	3-1429	- N. Unit, Oregon City Section, Pacific Highway East, Clackamas County.	1st authorization - \$225.00
Plans	- - - -	4-2829	- Gearhart-Seaside Section, Oregon Coast Highway, Clatsop County.	2nd authorization - \$200.00 Total to date \$400
Plans	- - - -	4-1443	- Astor St.- Bond St. Section, Oregon Coast Highway, Clatsop County.	1st authorization - \$150.00
Plans	- - - -	204-1444	- Warrenton Section, Ft. Stevens County Road, Clatsop County.	1st authorization - \$400.00
Plans	- - - -	4-1445	- Necanicum Jet.- Nehalem Riv. Section, Wolf Creek Highway, Clatsop Co.	1st authorization - \$150.00
Location	- - -	204-1446	- Camp Clatsop-Ft. Stevens Section, Ft. Stevens County Road, Clatsop County.	1st authorization - \$3000.00

JAN 20 1941

Stock Pile - - 4-1447 - Mile Post 3.0, Necanicum Highway, Clatsop County.
1st authorization - \$100.00

Plans - - - - 105-1423 - Banzer Bridge-Mist Section, Nehalem Highway, Colum-
bia County. 1st authorization - \$650.00

Plans - - - - 9-2826 - Bend-Chemult Section, The Dalles-California Highway,
Deschutes County. 2nd authorization - \$700.00
Total to date \$1,400

Plans - - - - 209-1439 - Terrebonne-Lower Bridge Section, Deschutes County
Road, Deschutes County. 1st authorization - \$800.00

Sidewalk - - - 9-1440 - Sisters Section, McKenzie Highway, Deschutes County.
1st authorization - \$100.00

Plans - - - - 110-1429 - Days Creek-Milo Section, Tiller-Trail Highway,
Douglas County. 1st authorization - \$4800.00

Plans - - - - 10-1422 - Dillard Bridge Section, Pacific Highway, Douglas
County. 3rd authorization - \$250.00
Total to date \$1,050.00

Plans - - - - 12-1425 - Prairie City-Dixie Summit Section, John Day Highway,
Grant County. 1st authorization - \$2250.00

Plans - - - - 14-1417 - Mitchell Point Section, Columbia Highway, Hood River
County. 1st authorization - \$100.00

Plans - - - - 15-1426 - Prospect-Cascade Gorge Section, Crater Lake Highway,
Jackson County. 1st authorization - \$100.00

Location - - - 115-1425 - Lake Creek-Little Butte Creek Section, Little Butte
Highway, Jackson Co. 2nd authorization - \$725.00
Total to date \$2,100.00

Stock Pile - - 17-1412 - California Line-Waters Creek Section, Redwood High-
way, Josephine County. 1st authorization - \$250.00

Quarry - - - 17-1413 - Graves Creek-Jump-off Creek Section, Pacific High-
way, Josephine County. 1st authorization - \$1000.00

Aero - - - - 18-1450 - Klamath Falls Vicinity, Klamath County.
1st authorization - \$275.00

Location - - - 18-1452 - Modoc Point-Barclay Springs Section, The Dalles-
Calif. Hwy., Klamath Co. 2nd authorization - \$1600.00
Total to date \$4800.00

Right of Way - 18-1453 - Sun Mt. Viewpoint, The Dalles-California Highway,
Klamath County. 1st authorization - \$50.00

Location - - - 119-1425 - Warner Canyon-Summit Section, Warner Highway, Lake
County. 1st authorization \$2100.00

Quarry - - - - 19-2819 - Forest Boundary-Cottonwood Creek Section, Klamath
Falls-Lakeview Highway, Lake County.
4th authorization \$200.00
Total to date \$1300.00

Plans - - - - 20-1443 - Cottage Grove Section, Pacific Highway, Lane County.
1st authorization \$200.00

Plans - - - - 20-1437 - Goshen-Lowell Section, Willamette Highway, Lane
County. 2nd authorization \$1112.50
Total to date \$10,912.50

Plans - - - - 20-1437 - Goshen-Lowell Section, Willamette Highway, Lane
County. 3rd authorization \$727.50
Total to date \$11,640.00

Right of Way - 21-1442 - Waldport-Yachats Section, Oregon Coast Highway,
Lincoln County. 1st authorization \$500.00

Plans - - - - 22-1426 - Crabtree Cor.-Lebanon Section, Santiam Highway,
Linn County. 1st authorization \$1860.00

Plans - - - - 22-1427 - Canyon Creek-Bryant Hill Section, Santiam Highway,
Linn County. 1st authorization \$1200.00

Plans - - - - 22-1428 - Albany-Jefferson Section, Pacific Highway East,
Linn County. 1st authorization \$100.00

Stock Pile - - 124-1433 - Silverton-Silver Creek Falls Section, Silver Crk.
Falls Hwy., Marion Co. 1st authorization \$60.00

Plans - - - - 224-1434 - Middle Grove-Silverton Section, Silverton County
Road, Marion County. 1st authorization \$3000.00

Plans - - - - 124-1435 - Silverton-Pine Tree Corner Section, Cascade Highway,
Marion County. 1st authorization \$65.00

Plans - - - - 24-1436 - Illahee-Miller Creek Section, Pacific Highway East,
Marion County. 1st authorization \$900.00

Plans - - - - 26-1447 - Interstate Bridge Section, Pacific Highway, Multno-
mah County. 1st authorization \$500.00

Stock Pile - - 27-1416 - Rickreall Section, Salem-Dallas Highway, Polk County
1st authorization \$100.00

Location - - - 128-1411 - N.Unit, Fulton Canyon Sec., Fulton Canyon-Wasco Hwy.,
Sherman County. 1st authorization \$750.00

JAN 10 1941

Plans - - - - 229-1433 - Johnson Bridge-Peltz Cor. Sec., Trask River Loop Co.
Road, Tillamook Co. 1st authorization - \$1080.00

Location - - - 33-1428 - Celilo Indian Village Sec., Columbia River Highway,
Wasco County. 1st authorization - \$980.00

Plans - - - - 34-1427 - Davies-Barnes Road Section, Wolf Creek Highway,
Washington County. 1st authorization - \$3700.00

Scales - - - - 35-1416 - Kinzua Scale Site, John Day Highway, Wheeler County
1st authorization - \$60.00

Test Holes - - 1-1426 - Keating Road-Ruckles Creek Section, Baker-Homestead
Highway, Baker County. 1st authorization - \$300.00

Location - - - 4-1449 - Astoria-Tongue Point Section, Columbia River High-
way, Clatsop County. 1st authorization - \$1000.00

Location - - - 204-1448 - Humbug-Fishhawk Falls Sec., Wolf Creek-Nehalem High-
way, Clatsop County. 1st authorization - \$3600.00

Reconn. - - - 6-1422 - Noble Creek-Bear Creek Sec., Oregon Coast Highway,
Coos County. 1st authorization - \$1500.00

Plans - - - - 12-1426 - Seneca-Harney County Line Section, John Day-Burns
Hwy., Grant County. 1st authorization - \$3070.00

Plans - - - - 113-1416 - Hanley Lane Section, Frenchglen Highway, Harney
County. 1st authorization - \$1840.00

Plans - - - - 17-1414 - Grants Pass-South Section, Pacific Highway, Joseph-
ine County. 1st authorization - \$500.00

Plans - - - - 20-1445 - Divide-Douglas Co. Line Section, Pacific Highway,
Lane County. 1st authorization - \$50.00

Right of Way - 21-1444 - Otis Junction-Ocean Lake Section, Oregon Coast Hwy.,
Lincoln County. 1st authorization - \$14.00

Location - - - 123-1422 - Jordan Valley Section, I.O.N. Highway, Malheur
County. 2nd authorization - \$300.00
Total to date \$800.00

Plans - - - - 223-1423 - Cow Hollow-Mysa-Adrian Jct. Sec., Vale-Adrian Hwy.,
Malheur County. 1st authorization - \$300.00

Plans - - - - 24-1436 - Illahee School-Albany Section, Pacific Highway East,
Marion County. 2nd authorization - \$4625.00
Total to date \$5525.00

Plans - - - - 25-1409 - Jones Hill-Lena Section, Heppner Highway, Morrow
County. 1st authorization - \$400.00

Test - - - - 26-1448 - Rooster Rock Section, Columbia River Highway, Multnomah County. 1st authorization - \$146.00

Right of Way - 27-1417 - W. Approach Willamette River Bridge, Salem-Dallas Hwy., Polk County. 1st authorization - \$100.00

Plans - - - - 129-1434 - Trask River Bridge Crossing, Netarts Highway, Tillamook County. 1st authorization - \$100.00

Plans - - - - 30-1431 - Pendleton-Adams Section, Oregon-Washington Highway, Umatilla County. 1st authorization - \$150.00

Plans - - - - 131-1422 - Meadowbrook Section, Starkey Highway, Union County. 1st authorization - \$900.00

Plans - - - - 135-1417 - Chichester Gulch-West Section, Shaniko-Fossil Highway, Wheeler County. 1st authorization - \$1,150.00

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

McNutt Bros., contract No. 2232, for construction of bridges on the Water Street Section of the Pacific Highway East in Oregon City, Clackamas County, requested an extension of time from June 30 to November 2, 1940, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that this contract was awarded on October 4, 1939, and the date of completion specified was June 30, 1940. However, on account of high water in the Willamette River the contractors were directed to discontinue work on the stairway leading under the viaduct on May 20, 1940, and were not allowed to resume operations until August 5, 1940. All work on the original contract, he said, was completed on September 12, 1940; however, it was not until November 2, 1940, that the contractors completed the work under extra work orders. He recommended, in view of the fact that the overrun in time was due entirely to closing down of the work by the State Highway Department and to the extra work, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Washington Hauling Company, contract No. 2250, for furnishing crushed rock in stock piles for the Hebo-Oceanlake Section of the Oregon Coast and Salmon River Highways, in Lincoln and Tillamook Counties, requested an extension of time of 15 days, from May 31 to June 15, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to additional work ordered by the Engineer. The Engineer

advised that the reason given by the contractor for overrunning the time limit is correct; that the contractor was required to furnish additional materials needed for oiling operations by the state oiling crew on the Oregon Coast Highway during the past oiling season and that the 15-days' time was required to produce this material. He recommended in view thereof that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Odom Construction Company, contract No. 2257, for widening the bridge over Depoe Bay on the Oregon Coast Highway, in Lincoln County, requested an extension of time from August 31 to November 15, 1940, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the date of completion specified in the contract was August 31, 1940; and that certain changes were made in the plans for the work which involved an increase in quantities. The entire project, he said, should have been completed by September 14, 1940. He recommended the granting of a 14-day extension of time, from August 31 to September 14, without penalty; and the granting of a further extension, from September 15 to November 15, 1940, inclusive, subject to the condition that the contractor shall reimburse the state for extra engineering expense incurred by the state during such period. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Willamette Iron and Steel Corporation, contract No. 2313, for furnishing of steel for the Strassel Undercrossing on the Wolf Creek Highway, in Washington County, requested an extension of time from August 10 to November 30, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to the fact that their shops were too busily engaged in other work to permit the fabrication of the steel for this job. The Engineer advised that the contract called for the steel to be ready for shipment to the job 100 days after the award of the contract. Further, that the contractor had the steel ready for delivery within such period but did not ship it until November 30, 1940, because the Southern Pacific Company, which was responsible for the installation of the steel, did not have a crew available to do the work. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

William Zickler, contract No. 2341, for construction of a bridge over Canyon Creek on the John Day Highway, in the town of John Day, Grant County, requested an additional extension of time, from November 30 to December 7, 1940, within which to complete this

JAN 10 1941

job. He gave no reason for failure to complete the job within the specified time limit but stated that the work remaining to be done after October 31 simply consisted of cleaning up the site and removal of the old bridge. The Engineer advised that the Commission previously granted a 30-day extension of time within which to complete this job, the first seven days of which were without penalty because of an increase in quantities, although the Commission ordered that the contractor be charged with the extra engineering expense incurred by the state subsequent to such seven-day period. He further advised that he knows of no reason why this penalty should be modified and why the contractor should not be charged the extra engineering expense incurred by the state during this additional extension of time. He accordingly recommended the granting of the extension of time now requested subject to the contractor being charged for all engineering expense incurred by the state subsequent to November 7, 1940. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2232, 2250, 2257, 2313, and 2341, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2232, with McNutt Brothers, for remodeling the approach to an existing bridge over the Willamette River and construction of a concrete viaduct on the Water Street Section of the Pacific Highway East, in Oregon City, Clackamas County. Completed November 2, 1940.

Contract No. 2250, with Washington Hauling Company, for furnishing crushed rock in stock piles on the Hebo-Ocean-lake Section of the Oregon Coast and Salmon River Highways, in Lincoln and Tillamook Counties. Completed June 15, 1940.

Contract No. 2257, with Odom Construction Company, for remodeling and widening the concrete bridge over Depoe Bay and construction of approaches thereto, in Lincoln County. Completed November 15, 1940.

Contract No. 2313, with Willamette Iron & Steel Corporation, for furnishing structural steel for the Strassel Grade Separation Project on the Wolf Creek Highway, in Washington County. Completed November 30, 1940.

Contract No. 2341, with William Zickler, for construction of a bridge over Canyon Creek in John Day on the John Day Highway, Grant County. Completed December 7, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Agreement with Maurice G. Roy and wife regarding right of way settlement at Pilot Rock. Right of way transaction No. 8516.

Agreement with Northern Pacific Railroad Company providing for slope encroachment on railroad property at Goble. Right of way transaction No. 8525.

Agreement with First National Bank of Portland cancelling lease on parcel of land used as a gravel pit in Curry County. Right of way transaction No. 1947.

Agreement with Sherman County providing for improvement of the Maryhill Ferry Road.

Agreement with the Pacific Telephone and Telegraph Company covering right of way for the company's telephone pole line in connection with the Sexton Mountain project.

Agreement with the United States of America covering construction of a fence by Federal Grazing Administration along the Powder River Canyon Section of the Baker-Homestead Highway.

Lease agreement with O. D. Keiffer providing for use by Mr. Keiffer of 6.14 acres of state-owned land adjacent to the Wallace Road Secondary State Highway, in Polk County, at the rate of .25 annually.

Roadway easement authorizing Port of Umpqua to construct a roadway under the Umpqua River Bridge at Reedsport.

Ground lease providing for maintenance of a snow fence adjacent to the John Day Highway near Unity.

Bargain and Sale Deed conveying unto T. R. Maxwell 1.19 acres of land in Enterprise. Right of way transaction No. 2633.

JAN 10 1941

10056

Bargain and Sale Deed conveying unto Lars P. Peterson and wife certain lots in Block 18, Hasburg's Addition to Marshfield. Right of way transactions Nos. 8250, 8251, 8252, and 8253.

Bargain and Sale Deed conveying unto A. B. Reese 1,624 sq. ft. of land in Brookings. Right of way transaction No. 8022.

Bargain and Sale Deed conveying unto Sunset Logging Company 80 acres of land in Tillamook County, being in exchange for other property. Right of way transaction No. 2069.

Bargain and Sale Deed conveying unto W. L. Crissey 5,771 square feet of land situate in Lots 1, 2, 3 and 4, Block 15, Brookings. Right of way transactions Nos. 7700, 7705, and 7706.

Bargain and Sale Deed conveying unto James A. Davenport and wife 0.41 acre in the Southeast Quarter of the Southeast Quarter of Section 24, Township 13 South, Range 12 West, W.M., Lincoln Co. Right of way transaction No. 4475-A.

There being no further business to come before the Commission at this time the meeting was adjourned at 5:00 p. m.

JAN 10 1941

Portland, Oregon, January 21, 1941

The State Highway Commission met in regular session at 9:00 o'clock a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Herman Oliver was excused from attending this meeting.

Bids as follows for highway construction projects and for the sale of buildings were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:30 p. m. in the same room:

BAKER-HOMESTEAD HIGHWAY
FLAGSTAFF HILL-RUCKLES CREEK SECTION
GRADING, TOPPING, SURFACING AND OILING

R. O. Dail & Warren Bros., Portland	\$66,747.10
E. C. Hall Company, Eugene	73,275.00
Leonard & Slate, Multnomah	74,260.00
Triangle Construction Co., Boise, Idaho	74,497.00
Babler Bros., Portland	74,550.00

L. V. Benson, Salem	650.00
Otto F. Johnson, Salem	527.50
Wm. Clinton Davisson, Lake Grove	355.50

Mr. L. J. Simpson, Empire, Oregon, was present and presented a petition signed by the following: Coos Bay Gateway Chamber of Commerce, City of Empire, City of North Bend, North Bend Chamber of Commerce, City of Marshfield, and the Marshfield Chamber of Commerce, in which petition the Commission was urged to complete construction of the Cape Arago Secondary State Highway to Cape Arago State Park, a distance of about three miles. Mr. Simpson advised that they are asking for the same type of construction as has been provided on the adjoining section of this road, and that they will not be satisfied with a temporary job. He offered to donate right of way across his holdings for this purpose. He advised that rock for the improvement of the south jetty at Coos Bay is being secured from a quarry near his "Shore Acres" home and that about 100,000 tons of rock are to be taken from this place, all of which will have to be transported over the Cape Arago Secondary Highway which in his estimation is another argument in favor of the improvement of the road. Mr. Simpson was informed by the Commission that highway construction in Coos County is quite expensive and that the Commission is now spending considerable sums in that district; further, that the Commission is glad to have been able to improve the Cape Arago Secondary Highway as far as it is completed but cannot see its way clear at the present time to order additional work as it is a question of finances and the funds available to the Commission are limited.

County Commissioner E. E. Varco, Deschutes County, and Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, came before the Commission

JAN 21 1941

in the interests of the Warm Springs Highway. They asked for additional improvements thereon and urged the early completion of this road so that it will be available for general public use at the earliest time. The Commission agreed to inspect the road some time next summer when it is in that vicinity.

Mr. Varco presented a petition signed by numerous property owners and a letter from the Deschutes County Court requesting the improvement of the O'Neil Secondary State Highway No. 370. The Commission took the matter under advisement.

Mr. Varco also asked for information in regard to the construction of the Cascade Lakes Forest Highway (Century Drive Highway) west of Bend. He was given no definite information in regard thereto.

Mr. C. E. Burgess, Fossil, conferred with the Commission in regard to the survey that is being made for the improvement of the Shaniko-Fossil Secondary Highway in the vicinity of Clarno. He stated that engineers are now making the survey and, according to the stakes that have been set, it appears that the road is to be located across bottom lands that are the only lands in the vicinity of any value and, if such route is adopted by the Commission, it will ruin the property owners. He urged the Commission not to adopt such location and offered to give right of way across his holdings if the Commission would place the road at a higher elevation; otherwise, he said, he and the other property owners would expect to be paid heavy damages. The Engineer advised that the surveys now being made are not final and that before a definite alignment has been decided he would give the matter very careful study. Chairman Cabell assured Mr. Burgess that one of the engineers would inspect the proposed location with him before the Commission takes final action.

The Attorney brought up for discussion the question of payment of a sewer assessment in the city of Ontario. He explained that this matter had the attention of the Commission at a previous meeting at which time the Commission decided not to pay this sewer assessment unless it could be shown that the State Highway Department would receive benefits therefrom. He read aloud a letter from the city stating that the new sewer now being installed is to replace an old sewer that serves the State Highway Department premises, and that upon completion of the new sewer the city does not intend to maintain the old one. He advised that the assessment amounts to \$210.00. It was the opinion of the Commission that the State Highway Department should pay assessments of this kind the same as do other property owners. It appeared to the Commission from the information at hand that the state would receive benefits in this particular instance and accordingly the Commission authorized payment of the assessment in the event that further investigation confirms its conclusions. The matter was referred to the Engineer for such further investigation.

The Attorney also brought up for discussion the matter of payment of an assessment against property owned by the State Highway Commission in

what is known as the Slide Irrigation District. He advised that the Highway Commission purchased this property in good faith with the understanding that all assessments against the property had been paid. However, it now appears that there are \$88.00 due now as an assessment to pay certain bonded indebtedness which is in default, the authority for the assessment having been granted the bond committee by the circuit court, which committee is composed of certain persons who are not original bond holders and do not represent original bond holders. He gave as his thought that this assessment is not a legal claim against the state, hence the Commission cannot be forced to pay it. After considerable discussion and in view of the Attorney's report, the Commission decided not to pay the claim.

Mr. Sam Browne, Jr., Tyler, Texas, came before the Commission and requested authority to operate over certain state highways truck and semi-trailer equipment which exceeds in dimension the limits provided by the Oregon statute, being 12 feet 6 inches high and 42 feet long. He advised that he is making arrangements to purchase fern in the state of Oregon and also in the state of Washington for transportation to Texas; that his equipment, which is refrigerated equipment, is legal in the state of Texas but is apparently a little higher and a little longer than is permitted in Oregon; also, that he plans to make two trips per month into Oregon with this equipment and that at the present time his operations will be confined to the Pacific Highway although at some future time he will probably want permission to extend his operations across the state of Oregon into the state of Washington. He further advised that he has already secured permission to operate this equipment across the intervening states and that the only barrier at the present time is the securing of a permit from the state of Oregon to operate in that state. After discussion the Commission authorized the granting of such permit until the Oregon Legislature, which is now in session, adjourns, at which time the matter is to be reconsidered, provided Mr. Browne will furnish the customary amount of public liability and property damage insurance.

The Commission discussed a communication from Mr. Charles E. Blaess, Shady Grove, Oregon, requesting the privilege to conduct mining operations on state-owned property adjacent to the Crater Lake Highway near Casey State Park, in Jackson County, and decided to adhere to its present policy in regard to such matters, which prohibits such operations on property owned by the state.

The Attorney requested instructions relative to the occupation of Casey State Park by a Mrs. Inez Van Dyke. He recited the history of this case and advised that, as previously instructed by the Commission, he has ordered Mrs. Van Dyke to vacate the state's premises but she refuses to do so. The Commission instructed the Attorney to take necessary legal steps to evict her from the premises.

The matter of maintaining a free flow of water in the irrigation canals and siphons of the West Extension of the Umatilla Irrigation Project, where such canals and siphons are crossed by the new highway between Boardman and Stanfield, had the attention of the Commission. The Attorney advised that

an agreement had been prepared by the government covering this matter which was acceptable to the Highway Engineer in all respects except that the district demands that the State Highway Department assume the responsibility for keeping the canals and siphons free of debris, and guarantee that the free flow of water through these facilities will not be interfered with or interrupted. The Commission stated its willingness to keep the canals and siphons clear of debris so far as they are located on state highway rights of way but refused to guarantee that there would be no interference with the free flow of water beyond such limits. The Commission instructed the Attorney to so advise the government.

The Commission discussed briefly and deferred action, until Commissioner Oliver is present, on the claim of Mr. John O'Gorman for damages in the amount of \$100.00 which he alleges is the value of a number of sheep that were killed by a state highway department truck operating on the Klamath Falls-Lakeview Highway on November 7, 1940.

The Attorney requested instructions with respect to the insurance coverage to be furnished in connection with the use of the Steel Bridge in Portland as a state highway route. He advised that, according to the agreement with the railroad companies, the Commission is required to protect the railroad companies by certain insurance which can be purchased at an annual premium of \$488.00 if protection is offered the railroad companies only. However, if the Commission wishes the state, the State Highway Commission, and its employees also protected by this insurance the annual premium will be \$1,221.88. The Commission decided to purchase insurance protecting the railroad companies only.

The Attorney reported the status of investigations with respect to the proposed suit against Ladd and Bush Bank, Salem, to collect the balance of the amount lost by reason of forgery committed by a former employee named W. L. Moorman. He was instructed by the Commission to discuss this matter with the Attorney General when the Legislature adjourns and ascertain whether or not the Attorney General is of the opinion that there is a chance to recover from the bank the amount of the loss which is approximately \$2,000.00.

The Commission adjourned at 12:00 noon and reconvened at 1:30 p. m. in the same room with the same persons present and participating.

The Engineer reported receipt of the final audit of the Public Roads Administration relative to reimbursement for expenditures made in connection with the construction of the Main Street Undercrossing in Klamath Falls, state highway contract No. 2120. He explained that this project is not on the state highway system but is on a city street in Klamath Falls which is not under the jurisdiction of the State Highway Commission or the Klamath County Court. Further, that it was financed with railroad grade separation funds provided by the federal government. According to the audit, he said, the Public Roads Administration rules nonreimbursable certain claims totaling \$2,925.87 of which amount \$1,441.49 represents preliminary engineering costs, \$712.30 extra work performed in cleaning up excavation in the abutment sections, \$44.60 for

name plates, \$695.63 claims presented by the California-Oregon Power Company for rearranging its water and power lines in the vicinity of the undercrossing, and \$31.85 for claims presented by the Southern Pacific Company.

The expenditures of the California-Oregon Power Company and the Southern Pacific Company, he said, do not enter into the final settlement with the City of Klamath Falls. However, according to the agreement between the Commission and the city, the city is required to pay all items for which reimbursement cannot be secured from the federal government; hence the city, under such agreement, could be required to pay expenses totaling \$2,198.39 which represents expenditures made by the state for which reimbursement cannot be obtained from the government. He pointed out that the law authorizes the Commission to perform certain engineering services to counties and cities at state expense and he also pointed out that the city of Klamath Falls has deposited with the Commission the sum of \$1,000.00 as a guarantee that it would pay the nonreimbursable items. He suggested, in order to close the books on this project, that the Commission assume the payment of the engineering expense and accept the \$1,000.00 deposited by the city of Klamath Falls as payment in full of its obligation in connection with this project. After discussion the Commission approved the suggestion by unanimous vote of the members present and instructed the Engineer to inform the Klamath Falls city council.

The Engineer reported that the city of Portland has plans for the diversion of traffic on Union Avenue between Couch Street and Ankeny Street whereby it is proposed to route north-bound traffic between these points along Union Avenue, and south-bound traffic via Couch Street and N. E. Third Street and Ankeny Street; and in this connection the city is asking that the State Highway Commission acquire small parcels of land for widening the intersections at the northwest corner of Union Avenue and Couch Street and at the southwest corner of Union Avenue and Ankeny Street to facilitate the free flow of traffic at such points. He gave as his thought that the plan is a good one and would relieve considerably the traffic congestion on Union Avenue which is a state highway route. He recommended approval of the city's request and that the Attorney be authorized to negotiate for the small parcels of land required. The Commission concurred in the viewpoint of the Engineer and thereupon authorized the Attorney to negotiate for necessary land.

A petition was presented from taxpayers and residents of Wasco, Sherman and Gilliam Counties requesting the oiling of the Sherars Bridge Secondary State Highway from its intersection with The Dalles-California Highway near Tygh Valley to the end of the graveled and graded section at the top of Sherars Grade. The Engineer estimated that it would cost about \$26,000.00 to do the work. On account of the expense involved and the limited amount of funds available to finance the work, the Commission decided against the improvement at the present time; however, instructed the Secretary to inform the petitioners that the Commission will consider the project in the formulation of future construction programs.

The Engineer requested authority to post the following highways in Eastern Oregon for 50 per cent reduced load limits when such action becomes

necessary: Nye Junction-Long Creek Section of the Pendleton-John Day Highway; Prairie City-Brogan Section of the John Day Highway, and the Weston-Elgin secondary Highway through its entire length. He said that inspection of these roads reveals that, due to the many extreme cold and thawing spells, the oiled roads are in much worse condition this winter than they have been for years and in his estimation it will be necessary to reduce the maximum weight of loads that can be transported over them, otherwise they are very likely to break up during the period of thaw. He recommended adoption of the 50 per cent reduced load limit and the posting of signs at such time as investigations reveal that absolutely necessary, which he thought would be about the first of February. He also recommended that notification be given to the various mill owners in the meantime that reduced load limits are anticipated and that the suggestion be made to them that they could deck a sufficient supply of logs at their mills so that mill operations will not be interrupted during the time that the reduced load limit is in effect. The Commission, by unanimous vote, approved the posting of the roads when necessary and instructed the Secretary to notify the mill owners of the action taken so they can arrange to have sufficient logs on hand to keep their mills running without interruption.

The Engineer reported on investigations relative to the maintenance of a sign at the junction of the Lakeview-Burns and Fremont Highways calling the public's attention to "Abert Rim," which matter has been urged by people of Lakeview. He said that several sites have been investigated but he is not yet ready to make a recommendation with respect to any of them although he does recommend the erection of two signs, one at this junction and the other at the east end of the rim for the benefit of tourists enroute from Burns to Lakeview. He estimated the cost of both signs at approximately \$450.00. After discussion the Commission authorized the expenditure for both signs and referred to the Engineer the matter of selection of sites for the same and the wording that is to go on them.

The Engineer also reported on the cost to improve West First Street in the town of Ontario as a route for Old Oregon Trail truck traffic through this town; also the cost to widen the existing route of the Old Oregon Trail along Fourth Avenue from West First Street to Maple Street near the city hospital, all of which has been requested by Mr. George Aiken, Mayor of Ontario. The cost to improve West First Street from Fourth Avenue to a connection with the Old Oregon Trail, a distance of about 0.95 mile, is \$28,500 and the cost to widen the existing Old Oregon Trail along Fourth Avenue from West First Street to Maple Street is \$16,000. The Commission considered that the time is not propitious to make such improvements in view of the high costs involved and the limited amount of funds available for purposes of this kind. For these reasons the request for the improvement was denied.

The Commission had under discussion a request from the Wauna Toll Bridge Company for state aid in removing snow from the Oregon end of the "Bridge of the Gods" at Cascade Locks, including the approach thereto from the Columbia River Highway. The company suggested that this work could best be done by state highway forces since the highway department has necessary equipment conveniently located and is experienced in this class of work. The company

agreed to reimburse the state for the expense incurred in connection therewith. The Engineer recommended approval of the request if there are no legal obstacles and provided the company will deposit with the Commission its certified check in the amount of the estimated cost of the work, which he thought would not exceed \$150 annually. The Commission approved the Engineer's recommendation subject to the condition that advance payments of the estimated expense be deposited with the Commission and that the work do not extend beyond the point where the bridge crosses the state line.

The Commission discussed a letter from State Senator Charles Childs, Albany, in which suggestion was made that the artificial lake in the state's borrow pit located near the north city limits of Albany be named "Waverly Lake" in view of the fact that the tract of land on which the lake is situated was formerly known as "Waverly Orchard" tracts. The Engineer advised that Senator Childs also wrote Mr. Lewis A. McArthur, Secretary of the Oregon Geographic Board, regarding this matter and that he has received a copy of Mr. McArthur's reply in which Mr. McArthur advises that he personally can see no objection to so naming this lake, particularly in view of the fact that so far as he knows the name has not been used elsewhere in Oregon. He gave as his personal opinion that the name "Waverly Lake" is very appropriate and recommended adoption of the same. The Commission approved the recommendation and authorized the Engineer to erect appropriate signs for public information.

The Commission discussed the application of Kinzua Pine Mills Company for permission to construct a private logging road across the Heppner-Spray Secondary Highway, in the Northeast Quarter (NE $\frac{1}{4}$) of Section 35, Township 6 South, Range 25 East, W. M., Wheeler County.

The Engineer advised that this matter has been investigated by Division Engineer Williams who reports that the company is building a high type logging road which they expect to use for many years and is very desirous of securing a convenient crossing that would be satisfactory in every respect and would not require maintenance of flagmen on the highway when logging trucks are crossing over it. The sight distance along the highway south of the point of crossing, he said, is unlimited, but is limited to the north due to the lower grade line of the highway. However, the company has agreed to reconstruct the highway grade along such section to provide at least 900 feet sight distance to the north, the work to be done at no expense to the state provided the Highway Commission will relieve the company of the responsibility of maintaining flagmen at the crossing. After considerable discussion the Commission approved the company's proposition with the understanding that no flagmen will be required during daytime operations but that the company will maintain flagmen at the crossing to warn highway traffic if and when logging operations are carried on at this point during hours of darkness, and provided further that the company will furnish public liability and property damage insurance in the customary amounts.

The Engineer reported that in accordance with authority previously granted him by the Commission he has awarded the following contracts, bids for which were taken by the Commission at its meeting on December 17 and 18, 1940, the conditions of the awards having been satisfied:

Grading and surfacing Depoe Bay Section of the Oregon Coast Highway, in Lincoln County. Bids taken December 17, 1940. Contract awarded January 10, 1941, to Sam Orino, the low bidder.

Surfacing and oiling the Hoffman Bridge-Grants Creek Section of the Powers Secondary Highway, in Coos County. Bids taken December 18, 1940. Contract awarded January 10, 1941, to O. C. Yocom, the low bidder.

Furnish crushed gravel in stock piles for the Kerby Rock Production Project on the Redwood and Oregon Caves Highways, in Josephine County. Bids taken December 18, 1940. Contract awarded to M.C. L'ninger & Son, the low bidder, on January 16, 1941.

Furnish crushed gravel in stock pile for the Hendricks Bridge-Silver Creek Rock Production Project on the McKenzie Highway, in Lane County. Bids taken December 18, 1940. Contract awarded January 16, 1941, to M. L. O'Neil & Son, the low bidders.

Grading and topping, South Unit, Algoma-Terminal City Section of The Dalles-California Highway, in Klamath County. Bids taken December 18, 1940. Contract awarded January 16, 1941, to Frank Penepacker, the low bidder.

The Commission by unanimous vote confirmed such awards as reported by the Engineer.

A letter was presented from the Eugene Hospital and Clinic inquiring whether or not arrangements could be made with the State Highway Commission for the furnishing of medical and hospital service for state highway department employees who may desire to accept coverage by their clinic as numerous employees are now covered by the National Hospital Association and other associations. It was the decision of the Commission that no additional contracts be entered into during the year 1941, and that all such contracts must be effective on January 1 of any year and expire on December 31 of any year unless continued. Further that contracts with the various hospital associations must be on standard forms prepared by the State Highway Department and that no consideration shall be given to the application of any company to furnish such service unless the company files along with its application a substantial list of employees who have stated a desire to accept service by such company. The Assistant Attorney was instructed to so inform the Eugene Hospital and Clinic.

In this connection the Engineer pointed out that, since the Commission approved the revision of the terms of the contracts with the National Hospital Association, the Salem Physicians and Surgeons Association, the Multnomah Medical Service Bureau, whereby these companies are not required to furnish medical supplies except in hospitalization cases, a number of requests have been received from employees who wish to withdraw and some of these employees, he said, want to change over from one company to another. The question now arises whether or not it would be advisable to permit employees to transfer from one company to another. After considerable discussion

the Commission decided that any employee who cancels his protection in one company shall not be permitted to reinstate himself either in the same company or in any other company prior to the beginning of the next calendar year, and no employee will be permitted to cancel his protection at the end of the year without first notifying the State Highway Department at least 60 days in advance.

The Commission considered and ordered filed a communication from the District Engineer, United States War Department, Portland, advising that application has been made to his office by The Dalles Bridge Company, Olympia, Washington, for approval of a plan for a bridge to be constructed across the Columbia River Highway and The Dalles-Celilo Canal near The Dalles, Oregon, it being considered that the Commission is not particularly interested in this matter at the present time.

The Commission discussed a letter from Hattie L. Henderson, Nehalem, in which objections were offered to expenditure of additional funds for the survey and construction of a county road which extends up Cook Creek from the Oregon Coast Highway in Tillamook County, commonly known as the Ridge Route. The Commission ordered the letter filed inasmuch as this is a county road project in which the Commission is not particularly interested.

The Engineer reported that in order to properly maintain the eight or ten acres of lawn, shrubbery and parking areas which have been constructed by the State Highway Department adjacent to the new route of the Pacific Highway East in Albany it will be necessary to employ a landscape crew with appropriate equipment, consisting of one 30-inch power mowing machine estimated to cost \$300, one long-wheel-base, light-type truck and tank for irrigating the trees estimated to cost \$1,000, and miscellaneous small tools and equipment including pruners, et cetera, estimated to cost \$100. He also reported that it will be necessary to provide storage space for this crew and the equipment and for one bridge crew that is working out of the Albany headquarters. He requested authority to purchase the equipment and to construct a frame building 28 feet by 55 feet in dimension, estimated to cost \$1,800. After discussion the Commission approved the request by unanimous vote.

The Engineer also reported that one of the highway department trucks, being a 1935 model Chevrolet dump truck, 1½-ton capacity, was recently involved in an accident and was wrecked beyond repair, being practically a total loss. The accident, he said, was a rather peculiar one and involved three trucks, one belonging to the Bonneville Power Administration, another belonging to the Asberry Transportation Company, and the third a State Highway Department truck, and it has been determined that the Bonneville Power Administration truck was the cause of the accident. He requested authority to purchase a new light-type truck with dump body to replace the one destroyed and estimated the cost of the same at about \$900. The Commission approved the request and instructed the Engineer to endeavor to collect damages from the Bonneville Power Administration for the truck destroyed.

The Commission considered the following requests for extensions of time within which to complete highway construction projects:

JUN 21 1941

Parker-Schram Company, contract No. 2326, for paving the Lombard Street (Alma Avenue-Interstate Avenue) Section in the city of Portland, Multnomah County, requested an extension of time of ten days, from September 30 to October 10, 1940, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that this contract was first considered complete on September 13, 1940. However, rainy weather revealed poor drainage in some of the gutters and the contractor was requested to remedy this condition which accounted for the overrun in time limit. He recommended in view of the fact that it was no fault of the contractor that the work was not completed within the specified time that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

M. E. Meyers & Son, contract No. 2335, for construction of a roadside improvement project on the Ontario-Snake River Section of the Old Oregon Trail, in Malheur County, requested an extension of time of ten days, from November 30 to December 10, 1940, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was due to early freezing weather and the inability to secure plant materials at the proper time. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Parker-Schram Company, contract No. 2347, for pavement resurfacing on the Oregon Slough-Columbia Slough Section of the Pacific Highway West, in Multnomah County, requested an extension of time of 63 days, from August 15 to October 17, 1940, within which to complete the job. They attributed their failure to complete the project within the specified time limit to failure of the state highway forces to perform certain necessary planing work on the existing pavement, the highway department's planing equipment being in use elsewhere, and additional work required to remove a high joint in the new surfacing near the north end of the project, which condition could not be corrected until October 17 because of interference with heavy traffic, resulting from the International Livestock Show which was in progress at the time. The Engineer advised that this contract was awarded contingent upon certain planing work being done by state forces; however, due to the fact that the planing equipment was under repair, such work was not completed until September 3, several weeks after completion date specified in the contract. As soon as this planing work was done, he said, Parker-Schram Company finished their portion of the contract expeditiously except for the touching up of the low spot which was disclosed by subsequent rains. He recommended,

inasmuch as such remedial work could not be anticipated during the progress of the contract and for the further reason that the planning work was not done by state forces earlier, that the extension of time now requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that contracts Nos. 2326, 2335, 2347, 2355, and 2363, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and said jobs are now ready for acceptance:

Contract No. 2326, with Parker-Schram Company, for paving on Lombard Street (Alma Avenue-Interstate Avenue) Section in Portland, Multnomah County. Completed October 10, 1940.

Contract No. 2335, with M. E. Meyers & Son, for road-side improvement on the Ontario-Snake River Section of the Old Oregon Trail Highway, in Malheur County. Completed December 10, 1940.

Contract No. 2347, with Parker-Schram Company, for pavement resurfacing on the Oregon Slough-Columbia Slough Section of the Pacific Highway West, in Multnomah County. Completed October 17, 1940.

Contract No. 2355, with Barham Brothers, for construction of the Cox Creek Bridge on the Pacific Highway at Albany, in Linn County. Completed December 17, 1940.

Contract No. 2363, with Birkemeier & Saremal, for widening the existing bridge over Beaver Creek, at Beaver, on the Oregon Coast Highway, in Tillamook County. Completed December 6, 1940.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Mr. Fred Brenne, Secretary of the Eugene Chamber of Commerce, was present and presented a written report on the Western States Highway Defense Conference which was held in the Palace Hotel, San Francisco, on January 17, 1941. The Secretary was instructed to send copies of the report to the individual members of the Commission.

Mr. Ed. J. Hughes, President of the Western Federation of Outdoor Clubs, Portland, came before the Commission in regard to acquisition of state parks. He said that the Federation of Outdoor Clubs is a strong believer in conservation of primitive areas and favors small state parks of historical or scenic beauty along the coast line and throughout the state but is strongly opposed to the establishment of a park such as has been proposed by the National Parks Service along the Oregon Coast Highway, in Curry County, in fact this club was directly responsible for defeating legislation in Congress that would have provided for such park, and it is their intention to continue to oppose the establishment of parks of that type. The Commission took no action.

A delegation from Tillamook, including the members of the County Court, Messrs. Harland M. Woods, E. H. Lindsey, and E. G. Anderson; John Aschim, Secretary-Manager of the Tillamook Chamber of Commerce; M. D. Ackley; A. B. Sanders, Manager of the Oregon Coast Highway Association, Marshfield; and Robert Brady, Oceanside, came before the Commission in regard to the oiling of the Netarts Secondary State Highway between Netarts and Oceanside, a distance of about two miles. Judge Woods headed the delegation. He urged the Commission to authorize the oiling of this section which would provide an oiled road throughout the entire length of this highway. The Engineer estimated that such improvement would cost about \$5,700 and recommended approval of the project for construction during the coming summer by state forces. The Commission approved the recommendation.

The delegation then brought up for discussion the matter of constructing the Wilson River Highway connection between Glenwood and Banks, a distance of about twelve miles. They gave as their understanding that the Commission intends to complete the Wolf Creek Highway across the Tualatin Valley plains into Portland at an early date, and urged the Commission to program the construction of a twelve-mile section of the Wilson River Highway between Glenwood and Banks so as to assure its completion at the same time, otherwise, they said, Tillamook County will very likely lose the benefits of travel to the coast. They advised, however, that, if it is not the intention of the Commission to finish the Wolf Creek Highway at once, they would be perfectly satisfied for the time being with the use of the Gales Creek Road and the Tualatin Valley Highway from Glenwood to Portland via Forest Grove.

The delegation was informed by Chairman Cabell that the Commission considers the logical thing to do is to complete the Wolf Creek Highway into Portland first before constructing the connection between Glenwood and Banks, particularly because the Commission understood that people of Tillamook and Washington Counties wanted the Wilson River Highway routed through Forest Grove. The Commission is not in position today, he said, to make any commitment but will bear the matter in mind and will carefully observe traffic

conditions this fall when it is anticipated that both highways will be open for general public use. Whether or not the Commission should construct the twelve-mile section between Glenwood and Banks, he said, will depend upon results of traffic investigations.

The County Court also asked the Commission for the improvement of the Little Nestucca Secondary Highway. They were informed that this is a costly project, estimated at about \$226,000, and the Commission does not have funds available at this time to allocate to it. Furthermore, the Commission thought it was doing what the people of Tillamook County wanted when it allocated funds for the improvement of other county roads from which quick benefits from the expenditure would be received.

At 3:30 p. m. Chairman Cabell announced the following awards of contracts and sale of buildings, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"Flagstaff Hill-Ruckles Creek Section of the Baker-Homestead Highway, in Baker County. 3.38 miles grading, 8.17 miles topping, and 4.79 miles surfacing and oiling. R. O. Dail & Warren Bros., Portland, submitted the low bid for this project in the amount of \$66,747.10. F. C. Hall Company, Eugene, submitted the second-low bid in the amount of \$73,275.00. There were five higher bidders. The Commission has awarded the contract to R. O. Dail & Warren Bros., at their low bid of \$66,747.10.

"Plunkett Creek-Read Creek Section of the Kings Valley Secondary Highway, in Benton County. 2.84 miles grading, surfacing and oiling. Nine bids were received for this project, the low one being that of M. L. O'Neil & Son, John Day, at \$46,717.30 based on the use of tar. They did not submit a bid based on the use of asphalt. The second-low bid was submitted by E. C. Hall Company, Eugene, at \$47,468.00, using tar. It did not submit a bid based on the use of asphalt. The Commission has referred all bids received to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Scappoose-St. Helens Section of the Columbia River Highway, in Columbia County. Remodel and widen existing bridges over McNulty Creek, North Fork Scappoose Creek, and South Fork Scappoose Creek. The low bid for this project was submitted by R. G. Barnes, Astoria, at \$29,744.00. The second-low bid was submitted by A. Milne, Portland, at \$29,998.00. There were five higher bidders. The Commission has awarded this contract to R. G. Barnes at his low bid of \$29,744.00.

"Endicott Creek-Fear Creek Rock Production Project on the Coos Bay-Roseburg Highway, in Coos and Douglas Counties. Requires approximately 7,350 cu. yds. crushed rock in stock pile. A. S. Wallace,

Roseburg, submitted the low bid for this project in the amount of \$11,787.50. Gus Reichow, Forest Grove, submitted the second-low bid in the amount of \$14,097.00. There were two higher bidders. The Commission has awarded this contract to the low bidder, A. S. Wallace, at \$11,787.50.

"Bend-Forest Boundary Section of the Century Drive Secondary Highway, in Deschutes County. 0.93 mile grading, 6.85 miles roadbed shaping, 6.85 miles surfacing, and 9.85 miles oiling. The low bid for this project was submitted by Babler Bros., Portland, at \$39,549.00. The second-low bid was submitted by Joslin & McAllister, Spokane, Wash., at \$43,117.75. There were three higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Bear Creek-Coos Junction Rock Production Project on the Coos Bay-Roseburg Highway, in Douglas County. Requires approximately 10,000 cu. yds. crushed rock or crushed gravel in stock pile. Three bids were received for this project, the low one being that of A. S. Wallace, Roseburg, at \$16,000.00 and the second-low bid being that of C. J. Eldon, Portland, at \$20,900.00. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Lake Creek-Hanley Ranch Section of the Little Butte Secondary Highway, in Jackson County. 2.83 miles grading and construction of one reinforced concrete bridge. E. L. Gates, Trail, submitted the low bid for this project in the amount of \$25,509.50. Leonard & Slate, Multnomah, submitted the second-low bid in the amount of \$28,071.50. There were four higher bidders. The Commission has referred all bids for this project to the Engineer to award the contract to the low bidder when certain conditions have been satisfied.

"Klamath Agency-Modoc Point Section of The Dalles-California Highway, in Klamath County. 12.66 miles roadside improvement. Only one bid was received for this project, it being that of E. L. Gates, Trail, in the amount of \$10,625.00. The Commission has awarded this contract to Mr. Gates at his bid of \$10,625.00.

"Installation of transformers and other electrical equipment for the Interstate Bridge between Portland and Vancouver, in Multnomah County. Two bids were received for this project, the low one being that of the Dimitre Electric Company, Portland, at \$2,850.00, and the second-low bid being that of W. R. Grasle Company, Portland, at \$3,740.00. The Commission has awarded this contract to Dimitre Electric Company at its low bid of \$2,850.00."

Sale of Building at Bandon:

"Building No. 7857-A (known as Koffee Kup Cafe). The only bid submitted for the purchase of this building was that of L. S. Bernetz, Bandon, at \$500.00. The Commission has rejected this bid."

Sale of Building and Tract of Land at Salem:

"Building No. 5785 (formerly owned by Duane Gibson). Five bids were received for the purchase of this building, the high one being that of F. J. Tschauer, Salem, at \$210.30, and the second-high being that of Clinton Perkins, Salem, at \$190.00. The Commission has accepted the bid of F. J. Tschauer and accordingly has sold the building to him at his high bid of \$210.30.

"Tract 'A' (formerly owned by E. A. Jackson and Duane Gibson). Virgil T. Golden, Salem, submitted the high bid for this tract of land at \$950.00. L. V. Benson, Salem, submitted the second-high bid at \$650.00. There were two lower bidders. The Commission has sold the tract to Virgil T. Golden at his high bid of \$950.00."

A delegation from Ashland, consisting of T. S. Wiley, Mayor; F. J. Van Dyke, City Attorney; G. M. Green, representing the Ashland Tidings; and R. E. Koozer, was present and urged the Commission to reconstruct the Pacific Highway through the city of Ashland, particularly the elimination of the bottleneck at the Plaza Corner. They were informed by Chairman Cabell that the approval of this project by the Commission has been dependent upon two things: the right of way costs, which matter it appears has now been overcome; and the priority of the project on the Commission's program. He pointed out that the Commission is now spending large sums for realigning the Pacific Highway over Sexton Mountain and until such work is completed the Commission does not feel that it can commit additional funds for other projects in this vicinity. However, the Commission will keep the Ashland project in mind and, if it develops later on that the Sexton Mountain work is not to cost as much as has been budgeted for the same, the Commission will give serious consideration to the reallocation of at least a part of the savings for the construction of the Ashland project. The Engineer explained that preliminary studies indicate that it might be possible to reduce the high cost of right of way and of moving buildings by shifting the center line somewhat. Such change, he said, would introduce a slight reverse curve in the alignment but he did not believe that would be objectionable. The members of the delegation expressed satisfaction with such revision.

Mr. Green called the Commission's attention to the slippery condition of the highway between the Plaza Corner and the north city limits of Ashland. He said that the pavement on this street is of black-top type constructed by the city years ago, and when the pavement is wet or frosty it becomes very slippery and as a result numerous accidents occur. He urged the Commission to construct a non-skid surface on this section. He also asked for the widening of the one-way lanes along the Siskiyou Boulevard section,

JUN 21 1941

south of the civic center. Mr. Van Dyke advised that these two projects are included in the city's general scheme for the improvement of the highway through their city, but the project they are most particularly interested in is the reconstruction at the Plaza Corner. The Commission agreed to keep the projects in mind.

Mr. Ivan F. Phipps, Attorney, Portland, came before the Commission in regard to the use of a 10-foot strip of highway right of way on the west-erly side of the Denver Avenue approach to the Interstate Bridge, Portland, a short distance north of Columbia Boulevard. He said that he plans to build a service station on property that he owns adjacent to the highway at this loca-tion and requested the privilege of installing his gasoline pumps on the high-way right of way which is extra wide at this point. He offered to purchase a 10-foot strip of right of way if the Commission preferred not to lease the property to him or to let him occupy the property. He alleged that the pave-ment has not been constructed along the center of the right of way and if he is required to place his pumps at the right of way line they will be too far away to conveniently serve the public. The Engineer advised that the extra width right of way will ultimately be used for highway purposes in the con-templated improvement of the Denver Avenue approach to the Interstate Bridge and pointed out that it is strictly contrary to the established policy of the Commission to permit encroachments upon the state's property. He recommended against either the sale or lease of any portion of the right of way to Mr. Phipps; also that Mr. Phipps be not allowed to place his pumps in a location that would necessitate the parking of cars on the highway right of way when being serviced. After discussion the Commission denied Mr. Phipps' request; however informed him that by such action the Commission is not saying that it will not reconsider the matter at some future date.

Mr. Phipps then brought to the Commission's attention a proposed short-cut route for a highway leading from the Portland Columbia Super Airport to the business center of Portland, which route extends from the intersection of Union Avenue and Vancouver Avenue northeasterly to a connection with the Bridgeton County Road near its junction with N. E. Gertz Road. Mr. Phipps stated that he owns most of the property across which this road is projected and would probably donate right of way for the same across his holdings. In any event so far as he was concerned the right of way would not be very cost-ly. He presented a map showing the proposed route. The Commission thanked him for the suggestion and agreed to give the matter some study.

A delegation from Gardiner, consisting of O. H. Hinsdale, J. W. Ford, and Earl Hill, came before the Commission in regard to the improvement of the Oregon Coast Highway through that town. Mr. Hinsdale headed the group and ad-vised that his company has prospects of a sale of certain property that will be needed by the State Highway Commission as right of way for the proposed re-alignment of the highway at this place. He asked the Commission to acquire the right of way at this time so the company can proceed with the sale of its prop-erty in conformity therewith. The Engineer said that the highway needs widen-ing and that it will be necessary to secure the extra width on the bay side. He recommended that the right of way department be authorized to negotiate for

the right of way and that the highway improvement be given serious consideration by the Commission in the formulation of its next construction program. He declared this project to be one of the most pressing projects along the Oregon Coast Highway. After discussion the Commission approved the Engineer's recommendation and authorized the Attorney to negotiate for right of way which is to be 80 feet wide within the city and 100 feet wide outside the city.

Mr. Ford brought up for discussion an agreement entered into by the State Highway Commission and the Gardiner Mill Company at the time the approach to the Umpqua River Bridge was built. It appears that, in order to maintain traffic at a certain point in Gardiner, it was necessary to acquire from the Gardiner Mill Company, for temporary use as a detour, a small parcel of land which it was agreed would be reconveyed to the company when it was no longer needed for detour purposes. Mr. Ford stated that the company would like to secure this property if the Commission has no more need for it, and is willing to pay the state the same amount that the state paid the company. The Commission approved.

Mr. J. D. Langman, representing the Oregon Utilities Company, came before the Commission in regard to an extension of his telephone pole line along the Oregon Coast Highway between Fishers Point and Brighton, in Tillamook County. He said that his present pole line ends at a point about one mile from Brighton and that he has been ordered by the Public Utilities Commissioner to extend it into the town of Brighton in order to serve several applicants. However, his pole line construction has been held up by reason of the rules and regulations of the State Highway Commission which prohibit the construction of a pole line on the westerly side of the highway where the poles and wires will interfere with scenic view. The opposite or easterly side of the highway, he said, is now occupied by a power pole line which carries high voltage and it would not be practicable for him to build on that side. Furthermore, it is contrary to the policy of the Commission to allow two pole lines on the same side of the highway. The cost to construct a pole line on private right of way to the east of the highway, he said, is prohibitive. He suggested that he be allowed to build the pole line on the westerly side of the highway where in his opinion it would not interfere with scenic views because along this section the highway is built up quite high and only the tops of the poles would be seen by anyone traveling on the highway.

The Engineer explained the policy of the Commission in regard to pole-line construction. He also read aloud a letter from Division Engineer F. D. Eason pointing out that Mr. Langman some time ago secured a permit to extend his pole line on the easterly side of the highway south of Fishers Point but disregarded instructions given therein and built his line on the westerly side of the highway notwithstanding that the permit called for the easterly side. It was his thought that the Commission should have an understanding with Mr. Langman with regard to such matters before making its decision with respect to the new application. In this connection Mr. Langman stated that he appreciated the fact that his permit called for the easterly side of the highway but that he discussed the matter of location with a representative of the State Highway Department at the time that he commenced

construction and was told by such person that it would be satisfactory to place his pole line on the westerly side of the highway. After considerable discussion the Commission referred the matter back to the Engineer with instructions to have Division Engineer Eason and Landscape Engineer Otten make a joint inspection of the premises and submit a joint recommendation to the Commission for consideration at the next meeting.

The Commission adjourned at 5:15 p. m. to reconvene at 8:00 p. m. in the Imperial Hotel for a conference with representatives of the United States Navy Department, Public Roads Administration, Work Projects Administration and the Clatsop County Court in regard to access roads to army and naval bases in the vicinity of Astoria.

The State Highway Commission reconvened at 8:00 p. m. in Room 415 (Imperial Room) Imperial Hotel. Present were:

Henry F. Cabell, Chairman
 Huron W. Clough, Commissioner
 R. H. Baldock, State Highway Engineer
 C. B. McCullough, Asst. State Highway Engineer
 J. M. Devers, Attorney
 H. B. Glaisyer, Secretary

Others present were: Lt. Comdr. G. H. Hasselman, Lt. R. M. Latimer, Lt. W. A. Zobel, and Lt. (J. G.) R. W. Hollis, representing the United States Navy; E. J. Griffith, Administrator, Harrison E. Devereaux, Director of Operations, and B. W. Sewell, Office Engineer, representing the Work Projects Administration; W. H. Lynch, District Engineer, T. M. Davis, Senior Highway Engineer, and R. T. Bloodworth, Office Engineer, representing the Public Roads Administration; County Judge Guy Boyington and County Commissioners James Elliott and John Slotte, representing the County Court of Clatsop County; and H. G. Smith, Construction Engineer, G. S. Paxson, Bridge Engineer, H. W. Libby, Chief Locating Engineer, and Edward Clymer, Chief Cost Analyst, of the State Highway Department.

The matter of relocating a section of the Columbia River Highway along Cedar Street in Astoria to accommodate the Tongue Point Naval and Airplane Base, which the Government is constructing at this place, was first discussed. Lt. Comdr. Hasselman stated that the Navy Department needs very badly, in the development of the Tongue Point Base, all of the land included within the right of way of the existing Columbia River Highway between 53rd Street and 60th Street and in addition thereto lands abutting on the northerly side of the highway heretofore embraced in what was known as Tongue Point State Park, and is very anxious to have the matter settled at an early date inasmuch as development work is now under way and a definite answer is needed so they can proceed with their plans accordingly. He advised that another site adjoining the present base is available but it contains much low ground that would have

to be filled in and even then would not be as desirable from their standpoint as the state's property. Furthermore, it would cost an excessive amount to prepare the site. He also advised that the Clatsop County Court has already given the Navy Department permission to occupy county-owned lands at this location and the only thing that is holding them up now is the question of whether or not they can secure the highway right of way and the balance of Tongue Point State Park, which is still owned by the state. He suggested that the rerouting of the highway along Cedar Street would provide an equally good or probably better route for highway traffic.

The State Highway Engineer estimated the cost to construct the Cedar Street route with W.P.A. forces at \$250,000.00. He explained that the State Highway Commission has already reconveyed to Clatsop County all of Tongue Point State Park, so the county in turn could deed it to the federal government in connection with the Tongue Point Base, and that the Highway Commission has also agreed to take similar action with respect to the highway right of way, provided the Navy Department would pay the cost of constructing a new road in lieu thereof.

Chairman Cabell pointed out that the state moneys available to the Highway Commission are trust moneys provided by motorists, hence the Commission must be very careful in the expenditure of the same. He gave as his thought that the state should not be required to pay the cost of constructing the highway along Cedar Street, inasmuch as the change is for national military defense purposes and is not a necessity at the present time from the state's standpoint. However, he added, the state will receive some benefit from the improvement and in view thereof the Commission might be justified in contributing a limited amount of state funds toward the costs.

Mr. Bloodsworth pointed out that the government has as yet provided no special funds that can be used to finance such project or any project on the proposed military strategic highway system and the question now arises--who is to provide the funds that are needed in this instance.

Mr. Griffith stated that the Work Projects Administration is interested in this project and will pay a portion of the costs of construction if the United States War Department designates it as being necessary for national defense. However, final approval of the project must be secured from the W.P.A. office in Washington. He gave as his thought that the Washington officials would not hesitate to approve it if they were convinced that it is necessary for defense purposes because he has been instructed to expedite this class of project.

Lt. Comdr. Hasselman then presented to the Commission a written request: " * * * that the authorized governmental agencies undertake construction of and expedite the rerouting of such portion of U. S. Highway No. 30 as lies south of the Naval Air Station, in order that a normal highway passage might be effected through Cedar Street--vicinity of Astoria, Oregon." (See Lt. Comdr. Hasselman's letter to Mr. Baldock, dated January 17, 1941.)

Mr. Lynch stated that, inasmuch as there are no Federal Aid funds available to finance this work, it appears to him necessary to use W.P.A. moneys exclusively unless the State Highway Commission can see its way clear to contribute some state money.

Chairman Cabell again gave as his thought that the project would be of some benefit to the state, so the state might be justified in contributing toward the cost.

Judge Boyington advised that Clatsop County owns nearly all of the land that will be needed as right of way along Cedar Street and will donate this property for such purpose. County Commissioners Elliott and Slotte concurred.

After further discussion the following agreement was reached, by mutual consent: the State Highway Department will make preliminary surveys as may be necessary for this project and submit the same to the Public Roads Administration for approval; and the State Highway Department will sponsor a W.P.A. project covering the construction of a new highway along Cedar Street about one mile in length, and as its contribution toward such project will construct, at state expense, certain culverts and a pavement on a grade to be built by W.P.A. forces, and will also furnish engineering supervision and acquire such right of way as cannot be obtained by the county, all of which it is estimated will cost about \$50,000.00. All other work in connection with the project is to be performed by W.P.A. forces and paid for with W.P.A. funds.

Mr. Griffith stated that he would forward to Washington, D.C., immediately, the state's application for W.P.A. funds for this job.

The State Highway Engineer was instructed by the Commission to expedite the matter of surveys and acquisition of right of way. The Attorney was instructed to prepare a deed to transfer the existing highway right of way to the United States Navy Department through Clatsop County. This concluded the discussion of the Tongue Point Naval Base matter.

Consideration was next given to the construction of access roads to Fort Stevens and Camp Clatsop. The State Highway Engineer estimated the cost to construct such roads by W.P.A. forces, aggregating some 16 miles of highway both within and without the reservations, at \$1,000,000.00, based on a tentative design for heavy-type roads capable of carrying equipment weighing 70 tons. He advised that the State Highway Department is now spending state money to finance necessary surveys but expects Clatsop County to sponsor the construction work as a W.P.A. project and to furnish rights of way, since the roads are not state highways.

Judge Boyington stated that Clatsop County will furnish right of way free of cost across county-owned lands but is not in position at this time to make a definite statement in regard to the furnishing of right of way across privately-owned lands, although the court will give an immediate answer upon receipt of additional information and a map showing right of way required.

(The members of the County Court consulted among themselves later and agreed to provide county funds up to a maximum amount of \$6,500.00 for right of way. Announcement to that effect was made by Judge Boyington.)

The Engineer was thereupon instructed by the Commission to expedite the completion of the surveys and to send to Judge Boyington as soon as possible a map of the layout together with descriptions of the right of way needed.

Chairman Cabell approved of the state assuming the responsibility for furnishing the engineering for location and construction of roads outside of the army reservation boundaries but questioned whether or not it is the state's obligation to furnish such service for those situated within the reservation boundaries. He was informed by Mr. Griffith that the Work Projects Administration would assume such obligation. After further discussion the following decision was reached and mutually agreed upon with respect to this project: the state will assume the responsibility for all preliminary engineering and for engineering on construction outside of the reservation boundaries, and the W.P.A. will be responsible for such construction engineering work within the reservation boundaries; Clatsop County will acquire, at county expense, right of way as may be required up to a maximum cost of \$6,500.00, the state to purchase the balance; and the county will sponsor a W. P. A. project covering all construction work outside of the reservation boundaries.

This concluded discussion of this subject.

The Engineer brought up for discussion matters pertaining to the proposed W.P.A. project for construction of a new highway connecting the Wolf Creek Highway and the Nehalem Secondary Highway, particularly between the Ranger Station and Fish Hawk Falls, and the proposed W.P.A. project for the construction of the Wilson River Highway between Glenwood and its junction with the Wolf Creek Highway at Banks. He recalled a letter received from the Work Projects Administration advising that the Ranger Station-Fish Hawk Falls project has been declared important from the national defense standpoint and advised that if the Commission decides to undertake this project and sponsor the same the state would be required to contribute only 10 per cent of the cost as compared with 25 per cent under present rules and regulations.

Chairman Cabell stated that he considers the Ranger Station-Fish Hawk Falls job to be of secondary importance to the Wolf Creek Highway project because, under ordinary circumstances, it would not be constructed for several years and if it is to be advanced in priority it must be on the national defense basis; further, that if the United States Army wants construction of this road to proceed along with the Wolf Creek Highway W.P.A. project the Commission will consider its request if presented through the Public Roads Administration in accordance with previous understanding. Mr. Griffith stated that he would ask the army engineers for an expression of their attitude in regard thereto.

JUN 21 1941

After further discussion the Commission approved the following W.P.A. projects under discussion at this meeting: construction of the Cedar Avenue revision of the Columbia River Highway to accommodate Tongue Point Naval Base; and construction of access roads at Fort Stevens and Camp Clatsop. The Commission deferred a definite decision in regard to other prospective W.P.A. projects pending determination whether or not there will be sufficient moneys available to finance them, and sufficient W.P.A. labor to undertake all of the projects simultaneously. The Commission ordered that the two approved W.P.A. projects be expedited as much as possible. It was again pointed out by Chairman Cabell that all military highway projects must be cleared through the Public Roads Administration. This concluded the conference.

The meeting was adjourned at 9:40 p. m., to reconvene the following morning in the Public Service Building.

Portland, Oregon, January 22, 1941

The State Highway Commission reconvened in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room:

MEDICAL SPRINGS SECONDARY HIGHWAY
CATHERINE CREEK-MILES BRIDGE SECTION - SURFACING AND OILING

E. C. Hall Co., Eugene	\$58,692.50
Babler Bros., Portland	61,710.00
Joslin & McAllister, Spokane, Wash.	64,114.50
R. O. Dail & Warren Bros., Portland	64,761.00
McNutt Bros., Eugene	73,000.00

MADRAS-PRINEVILLE SECONDARY HIGHWAY
OCHOCO CREEK SECTION - GRADING AND TWO BRIDGES

Norris Bros., Burlington, Wash.	\$28,429.00
Leonard & Slate, Multnomah	30,024.50
Berke Bros., Portland	31,622.50
E. L. Gates, Trail	32,087.50
Jacobsen-Jensen Co., Portland	32,614.00

(Continued on next page)

(Ochoco Creek Section continued)

Vernon Bros. Boise, Idaho	\$32,636.00
M. L. O'Neil & Son, John Day	32,875.00
E. C. Hall Co., Eugene	32,953.40
A. Milne, Portland	33,788.00
Babler Bros., Portland	34,751.50
McNutt Bros., Eugene	35,300.00
C. J. Eldon, Portland	36,058.00
Homer G. Johnson, Portland	36,177.00
C. J. Montag & Son, Portland	36,485.50
A. C. Greenwood Co. Inc., Portland	39,687.00
Clifford A. Dunn, Klamath Falls	41,742.00

UMPQUA HIGHWAY

DEAN CREEK-PARKER CREEK ROCK PRODUCTION

A. S. Wallace, Roseburg	\$33,400.00
McNutt Bros., Eugene	35,404.00
Umpqua River Navigation Co., Gardiner	39,579.00

OREGON COAST AND SIUSLAH HIGHWAYS

FLORENCE ROCK PRODUCTION

M. L. O'Neil & Son, John Day	\$13,294.00
Edward F. Altree, Agate Beach	13,973.00
Gus Reichow, Forest Grove	14,151.00
A. S. Wallace, Roseburg	15,533.00
Eugene Sand & Gravel Co., Eugene	19,491.00
Homer G. Johnson, Portland	19,580.00

SILETZ SECONDARY HIGHWAY

KERNVILLE-FOREST BOUNDARY SECTION - GRADING AND SURFACING

	<u>Using Asphalt</u>	<u>Using Tar</u>
A. T. Dolan, Tillamook	\$38,424.00	\$37,793.50
E. C. Hall Co., Eugene	- - -	38,909.50
Homer G. Johnson, Portland	- - -	51,793.50
C. J. Eldon, Portland	- - -	54,959.70

OLD OREGON TRAIL HIGHWAY

BOARDMAN-STANFIELD SECTION - REINFORCED CONCRETE SIPHONS

A. Milne, Portland	\$7,182.50
Harry I. Hamilton, Eugene	7,580.00
W. H. Philpott, Portland	7,840.00
Tri-State Construction Co., Portland	8,455.60
McNutt Bros., Eugene	8,935.00
Tower Sales & Erecting Co., Portland	9,620.00

The Assistant Attorney reported that of the \$600,000 budgeted by the Commission for acquisition of right of way during 1941 a total of \$129,500 has been obligated to date. This is in addition to the sum of \$800,000 budgeted for the Front Avenue Project in Portland of which \$375,000 has been obligated to date. The Commission approved the report.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such projects together with a list of prices that he recommended be paid for each. After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Section, Hwy., and Owner	Purpose	Acres	Approximate Amounts	Agent
<u>Rooster Rock Section-Columbia River Highway</u>				
7739-Dabney, Martha A.	R/W	10.43	2.0 a. @ \$42.50 per a.	Parker

The Attorney also presented for the Commission's approval certain additional right of way settlements in connection with the proposed Front Avenue Project in Portland. After careful consideration the Commission tentatively approved them but deferred definite action until its next meeting. The settlements were referred to Chairman Cabell for investigation in the meantime.

The Attorney also requested authority to institute condemnation proceedings to acquire certain properties that are needed for highway improvements and concerning which he has been unable to reach satisfactory settlements. He submitted a list of such properties together with prices that he recommended be offered in condemnation, as follows:

<u>File No.</u>	<u>Name</u>	<u>Purpose Required</u>	<u>Recommended Offer</u>
R 8240	James T. Erickson, et al	Right of Way	\$1000 to \$1250
R 7671	George W. Slayton and wife	Right of Way	\$1550

After discussion the Commission approved the offers recommended and authorized the Attorney to condemn the properties. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the State Highway Commission under the provisions of Chapter 529, Oregon Laws, 1939, is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each

JUN 22 1941

and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by James T. Erickson and the Heirs of Peter Erickson, Deceased, which property is located in the northwest quarter (NW $\frac{1}{4}$) of Section 4, Township 2 South, Range 2 East, W. M., and in the southwest quarter (SW $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 4, Township 2 South, Range 2 East, W. M., Clackamas County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 1 and 2 and is further identified in the records of the Highway Commission as file R 8240, and which property is being acquired for right of way purposes in connection with the Clackamas Grade Separation Section of the Cascade Highway;*

Real property owned by George W. Slayton and Mary Slayton, which property is located in the southwest quarter (SW $\frac{1}{4}$) of Section 15, Township 14 South, Range 15 East, W. M., in the southeast quarter (SE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 15, Township 14 South, Range 15 East, W. M., and in the northwest quarter (NW $\frac{1}{4}$) of Section 22, Township 14 South, Range 15 East, W. M., Crook County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 3, 4, and 5, and is further identified in the records of the Highway Commission as file R 7671, and which property is being acquired for right of way purposes in connection with Jefferson County Line-Prineville Section of the Warm Springs Highway.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys

*The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 6, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Attorney reported the cost to remove from the right of way of the Wilson River Highway at Glenwood certain houses belonging to a Mr. G. L. McCutcheon. He said that according to an estimate made by a Mr. Baumbach, an experienced house mover, it would cost about \$2,000 to move the buildings and appurtenances of which amount about \$550 represents the cost to move the buildings that were constructed on the right of way after the right of way had been acquired by Washington County. He further advised that the Washington County Court has stated its willingness to pay the cost of removing the buildings that were on the right of way when it was acquired by the county but will not pay for the moving of the buildings that have been erected since that time. After discussion and in view of the fact that it is proposed to construct the highway across the McCutcheon property in the not distant future, the Commission instructed the Attorney to tell Mr. McCutcheon that the buildings must be moved and that either the county or the state would pay the cost of moving those that were on the right of way when he sold it to the county but that he would be expected to pay the cost of moving the buildings that have been erected by him since that time.

The Engineer requested authority for Harold Say, Director of the Travel and Information Department, to go to Los Angeles at state expense to supervise the final editing and voicing of the highway department's new

talking film "The New Oregon Trail." He advised that it is quite essential that Mr. Say make this trip in order to secure a satisfactory film, and estimated the expense would not exceed \$125. The Commission approved the request subject to further approval by Governor Sprague.

A delegation from Lane County, composed of County Commissioners Walter J. Holland and Allen P. Wheeler, County Engineer P. M. Morse, Walter Ransom, and Hugh Ford, came before the Commission in the interests of the "Route F" Highway. They reported briefly on the progress that is being made by W.P.A. forces in constructing the westerly end of this road and inquired concerning the proposed trade of the Eugene-Veneta Section of the "Route F" Highway for the Walton-Swisshome Section of the Swisshome Secondary State Highway. They were informed by Chairman Cabell that the Commission hopes to be able to make this exchange in the near future and that the matter will be given consideration as soon as possible when all three members of the Commission are present.

Commissioner Holland inquired as to when the Commission proposes to construct the Eugene-Veneta Section across the Fern Ridge Dam site and was informed that the Commission expects to award a contract for such work some time this year.

County Judge A. R. Bowman of Crook County was present and urged additional improvements on the Ochoco Highway. He was informed that the Commission's plans for this project are to use forest highway funds to finance the construction of the westerly end and to use federal aid funds to finance work at the easterly end, but the Commission is not in position at the present time to make any definite commitment in regard thereto because of the uncertainties that exist with respect to the use of federal moneys inasmuch as the federal government may require that such moneys be expended to finance certain projects on the strategic military system.

The Commission adjourned at 12:00 M. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

A delegation from Marshfield, representing the city council and the Chamber of Commerce, was present in regard to the further improvement of the Oregon Coast Highway between North Bend and Coquille. The delegation consisted of the following: E. T. Steele, President of the Chamber of Commerce; James Bedingfield, City Attorney, Clarence Coe, A. B. Sanders, Secretary of the Oregon Coast Highway Association and Walter Chiens, all of Marshfield; and Elmer Russel and Lloyd Nollner of North Bend. Mr. Steele headed the group and Mr. Bedingfield presented the principal arguments. He referred to the proposal made to the Commission in 1939 by a group from southwestern Oregon which was that the Highway Commission consider the improvement of the North Bend-Coquille Section as one project, and advised that they were led to believe at that time that the Commission was enthusiastic over their plan and would give it a fair share of the funds in future allocations. However, it appears to them that the Commission is not giving this project the attention that it reserves, hence their appearance before the Commission at this time.

He alleged that traffic over this section is increasing rapidly and additional improvements to the highway are essential for the efficient and safe use of the road. He particularly referred to the unit between North Bend and Marshfield and urged the Commission to make an announcement of its plans regarding alignment and grade along this section because such information is essential in the development of this district. Under present circumstances, he said, the property owners cannot make plans to improve their holdings and numerous improvements are being held up. He urged the Commission to expedite the improvement on the entire section between North Bend and Coquille and to allocate this year a generous portion of the funds available for the early elimination of this bottleneck.

Chairman Cabell explained the policy of the Commission with respect to the funds at its disposal and gave reasons why faster progress has not been made on this project. He pointed out that the Commission has already awarded one contract between Marshfield and North Bend but further progress has been delayed because of interference by the railroad. He also said that surveys have been made of alternate routes between these points and that the Commission intends to give the alternate routes very careful consideration and will expedite construction as much as it can although no definite commitment or promise of funds will be made at this time.

Chairman Cabell also advised that the Commission is reluctant to announce the location of a highway before it is ready to undertake construction because it is the Commission's past experience that as soon as a location is announced people insist that the construction go forward regardless of whether or not the Commission is able to finance it and because the announcement of a location by the Commission a long time in advance of construction is not binding and may be changed by the successors of the Commission adopting such location.

A delegation from Marion and Polk Counties headed by County Judge Leroy Hewlett, Marion County, discussed with the Commission the matter of construction of a bridge across the Willamette River to replace a county-owned ferry between Independence and East Independence. Others in the delegation were: County Commissioners James Smith and Ralph Girod, Marion County; County Engineer N. C. Hubbs, Marion County; Herman Van Well, County Judge, and Commissioners Fred Gibson and H. H. Brant, Polk County; E. L. Gray, representing the Salem-Independence-Kings Valley Highway Association; M. Nelson and R. M. Walker, Independence, F. H. Spears, John J. Roberts, D. P. McCarthy, and Ernest A. Miller, Salem; and District Attorney Bruce Spaulding, Dallas. Speaking in behalf of this project were Judge Hewlett and Judge Van Well, Mr. Miller and Mr. Walker. Judge Van Well gave as his understanding that the proposed bridge will cost approximately \$250,000 and advised that on such basis the county courts of both counties are willing to assume together one-half the total cost involved and are making such offer at this time provided the Commission will consent to the payment of the counties' share over a period of years at the rate of \$5,000 annually, which amount the counties are willing for the state to retain from the counties' share of the gasoline tax funds due and payable to the counties each year. The Commission

deferred its decision in the matter pending investigation to ascertain more closely just how much the project will cost. The Engineer was thereupon authorized and instructed to make such investigation and report his findings to the Commission.

The Marion County Court then brought up for discussion the matter of maintenance of the North Santiam Highway. They stated that it is very inconvenient and uneconomical for the county to maintain the completed section east of Detroit and asked the Commission to assume jurisdiction and to place the section on the state secondary highway system. The Commission took the matter under advisement.

The County Court of Polk County and its District Attorney, Bruce Spaulding, discussed with the Commission the state's claim against the county for advancement of state funds to pay for highway pavement construction in Polk County many years ago, which claim is in the amount of \$106,463.03. Mr. Spaulding stated that, while he has not had an opportunity to give this subject much study, it is his understanding that the circuit court a number of years ago enjoined the county from paying this claim and that the decision was appealed to the supreme court which, so far as he knows, made no change in the decision of the circuit court; hence he is of the belief that the circuit court's action still stands. The Commission's Attorney, Mr. J. M. Devers, recited the history of this case, going into considerable detail. He particularly pointed out that the obligation was incurred in connection with construction of three projects, viz., completion of bridges on the Salem-Dallas Highway and construction of two sections of the Pacific Highway West, in Polk County. He said that the county intended to use its market road money to pay the county's share of the cost of such work but the circuit court held that it could not do so because the county did not have sufficient funds available for the purpose, and thereafter, in 1923, the county voted a bond issue of \$265,000 for the purpose of paying for this work and for other work. The legality of this bond issue, he said, was challenged and the case went to the supreme court, which upheld it. It appeared to him that, in view of the fact that the bond issue was authorized after the debt was incurred by the county and was for the purpose of paying the county's indebtedness to the state, and for the further reason that the supreme court in its decision upheld the action of the county in making provision for the payment of these obligations, the state's claim is still valid. Mr. Spaulding apologized for not being sufficiently informed to discuss the matter thoroughly at this time and suggested that the matter be referred to the Commission's Attorney and himself to discuss the legal technicalities involved and if possible to arrange a satisfactory settlement. The Commission approved the suggestion.

At 3:00 p. m. Chairman Cabell announced the following awards of contracts, bids for which were taken at the morning session, the awards having previously been approved by the Commission by unanimous vote:

"Catherine Creek-Miles Bridge Section of the Medical Springs Secondary Highway, in Baker and Union Counties. 19.50 miles surfacing and oiling. The low bid submitted for this work was that

of E. C. Hall Company, Eugene, in the amount of \$58,692.50. The next-low bid was that of Babler Bros., Portland, in the amount of \$61,710.00. There were three higher bidders. The Commission has awarded this contract to E. C. Hall Company, the low bidder, at its bid of \$58,692.50.

"Ochoco Creek Section of the Madras-Prineville Secondary Highway, in Crook County. 1.81 miles grading and construction of two composite type pile trestle bridges. Norris Bros., Burlington, Washington, submitted the low bid for this work, in the amount of \$28,429.00. Leonard & Slate, Multnomah, submitted the second-low bid in the amount of \$30,024.50. There were fourteen higher bidders. All bids for this project have been referred by the Commission to the Engineer with power to award the contract to the low bidder when certain conditions have been fulfilled.

"Dean Creek-Parker Creek Rock Production Project on the Umpqua Highway, in Douglas County. This project requires the furnishing of approximately 16,700 cu. yds. crushed gravel in stock pile. Three bids were submitted for this project, the low bid being that of A. S. Wallace, Roseburg, in the amount of \$33,400.00, and the second-low being that of McNutt Bros., Eugene, in the amount of \$35,404.00. All bids were rejected and the project ordered re-advertised.

"Florence Rock Production Project on the Oregon Coast and Siuslaw Highways, in Lane County. Requires approximately 8,300 cu. yds. crushed rock or crushed gravel in stock piles. M. L. O'Neil & Son, John Day, submitted the low bid for this work, in the amount of \$13,294.00. Edward F. Altree, Agate Beach, submitted the second-low, in the amount of \$13,973.00. There were four higher bidders. The Commission has referred all bids received on this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Kernville-Forest Boundary Section of the Siletz Secondary Highway, in Lincoln County. 0.14 mile grading and 5.55 miles bituminous macadam surfacing. The bid of A. T. Dolan, Tillamook, was the low one received for this work, in the amount of \$38,424, using asphalt, and in the amount of \$37,793.50, using tar. The bid of E. C. Hall Company, Eugene, was the second-low one received for this work. They submitted no bid using asphalt; \$38,909.50 was submitted using tar. There were two higher bidders. The Commission has awarded this contract to A. T. Dolan, the low bidder, at his bid of \$37,793.50, using tar.

"Boardman-Stanfield Section of the Old Oregon Trail Highway, in Morrow County. Construct two reinforced concrete siphons. A. Milne, Portland, was the low bidder for this work in the amount of \$7,182.50. Harry I. Hamilton, Eugene, was the next-low bidder

for this work in the amount of \$7,580.00. There were four higher bidders. The Commission has awarded this contract to the low bidder, A. Milne, at his bid of \$7,182.50."

Mr. Frank L. Shull, Chairman of the Board of County Commissioners, Multnomah County, County Judge A. H. Boice of Curry County, and County Judge J. J. Barrett of Linn County, comprising a committee representing the Oregon Counties Association, were present and asked the Commission to approve an increase in the amount that is paid to the counties from the state highway fund annually for road purposes. Mr. Shull headed the group. He alleged that 98 per cent of the roads in the state are off the state highway system and must necessarily be constructed and maintained by the several counties, which do not have sufficient funds for the purpose. It was his thought that the State Highway Commission could spare a greater share of the highway funds because highway revenues are increasing and the debt obligation for bonds is decreasing. His remarks were endorsed by Judge Boice and Judge Barrett, both of whom stated that the counties do not now have money enough to pay for keeping the county roads in proper condition and if the bill now pending before the State Legislature, which has for its purpose increasing the maximum load limit, is passed the counties will be in much worse condition.

Chairman Cabell stated that the Commission appreciates the predicament that the counties are in and the counties' desire for additional funds, however, the State Highway Commission does not have sufficient funds available even with the increased revenues to pay for the things that it would like to do and in view thereof the Commission considers that no change should be made at this time in the present basis of allocation.

Judge Barrett suggested that the present law should be amended to eliminate state exempt cars from participating in the distribution of the gasoline tax funds. He pointed out that, under the present law, the distribution is made to the counties on the basis of car registrations and that the counties in which the exempt cars are registered receive certain benefits that in his estimation they are not really entitled to and it was his thought that if the law were changed to eliminate such exempt cars in the distribution of the funds it would make for a fairer distribution of the funds. All present concurred in the remarks of Judge Barrett. However, no action was taken on the matter.

Judge Boice brought up the matter of the improvement of the Oregon Coast Highway through the town of Gold Beach. He advised that the county court has plans for the immediate widening of the present highway to 80-foot width in front of the courthouse property regardless of where the highway will be located ultimately, but cannot proceed with the proposed improvement until the highway grade line has been established. The Engineer was instructed to have grade stakes set as soon as possible.

Matters pertaining to the bill now before the Legislature, which has for its purpose increasing the maximum weight of loads and the maximum length of loads which may be transported over public roads of this state, was

discussed. Technical features of the bill were explained and the effect of the bill if enacted into law was discussed. It appeared from the discussion that the county courts do not fully understand the meaning of the law and are fearful that the roads on the county system will fail if the bill passes. The Engineer was instructed to direct a letter to Mr. F. L. Phipps, Executive Secretary of the County Judges and Commissioners Association, explaining fully the purpose and intent of the proposed law and how it will affect the county roads if adopted.

Mr. R. A. McClanathan, City Engineer, and Mr. Glen Gridwell, representing the City of Silverton, came before the Commission in regard to the proposed improvement of the Cascade Secondary State Highway from the Silverton business district to the top of the hill near the north city limits. They inquired whether or not the Commission has made any definite decision with respect to the city's request for state cooperation in this work which the city anticipates doing as a W.P.A. project. The Engineer advised that it has been ascertained from the office of the Work Projects Administration that the expense incurred by the state for paving work in connection with this project will be considered as part of the sponsor's contribution toward the total cost of the improvement which involves not only paving work but also certain grading, surfacing, et cetera. He estimated the cost of the paving work at \$8,000.00. After discussion the Commission voted unanimously to cooperate with the city in this project by furnishing engineering supervision and by paying for such paving work as may be necessary after the city has completed the grading work, rock surfacing, and has constructed curbs, gutters, sidewalks, et cetera. The Engineer was instructed to assist the city in securing its W.P.A. project.

The City Council of Tillamook, represented by Mayor D. E. Steinbach, City Attorney C. W. Barrick, Councilman George D. Riechers, and Thomas Odkirk, came before the Commission for a discussion of the state's claim against the city in the amount of \$10,750.00 for certain highway improvements made in behalf of the city some years ago. Mr. Barrick was spokesman for the group. Chairman Cabell advised that this account is of long standing and the Secretary of State and the Highway Commission are anxious that it be disposed of along with a number of others that are in the same category so as to clear the records, and the Commission at this time simply wants to know the attitude of the city with respect to this claim. Mr. Barrick stated that the city is not disputing the amount of the claim but understood that the claim was cancelled a number of years ago when the city performed certain work on the highway in Tillamook at the Highway Department's request, there being no highway department equipment available at that time. The city's expense for such work, he said, was in excess of \$11,000.00, and while the city's record of the arrangement is not clear he has been told by a number of people who understood the situation that the State Highway Department was agreeable to applying the city's expenditure on its debt. Mr. Riechers stated that he recalls that there was some such an agreement which provided that the city would do certain maintenance work on the highway and would be given credit by the state on its claim against the city.

The group was informed that so far as the State Highway Department knows there was no agreement or understanding, either written or otherwise, with respect to maintenance work performed by the city upon the state highway and so far as is known by anyone now connected with the State Highway Department there was no understanding that the city would be given credit for expenditures made for such maintenance work.

Mr. Riechers then stated that the city appreciates that the records are not clear with respect to the matter and in view thereof is willing to compromise a settlement. He pointed out that the original claim was for \$15,750.00 of which the city has paid \$5,000.00, and inquired whether or not the Commission would accept an additional payment of \$5,000.00 in two installments as payment in full of the balance. The Commission took the matter under advisement.

A delegation from Newberg, headed by C. H. Baynard, and including E. L. Morton, George Larkin, S. L. Parrett, and C. A. Morris, conferred with the Commission in regard to State Secondary Highway No. 143 north of Newberg. They urged the Commission to allocate funds to oil the uncompleted section, which is eight miles long, so as to provide an oiled highway all the way from Newberg to Hillsboro. The Engineer estimated that the work would cost about \$43,000.00. He pointed out, however, that this does not include realignment of the highway over Chehalem Mountain but is simply the cost of improving the present road; also that the Commission has not as yet budgeted any money for this work. After discussion the group was informed that the Commission appreciates the need for the improvement and will give the matter serious consideration although no definite commitment or promise can be made at this time.

The delegation then asked that the county road which extends from Newberg to Butteville along the north side of the Willamette River be designated as a state secondary highway. The Commission took the matter under advisement.

The Engineer brought up for discussion matters pertaining to the wrecking of buildings on the right of way acquired for the Front Avenue Project, Portland. He advised that this work can be done either as a W.P.A. project or by the general contractor in connection with the road work and recommended the adoption of the latter method. He also recommended the employment of an expert appraiser from Spokane or Seattle to set a value on the salvaged materials so as to obtain a fair comparison between such value and the actual cost involved in the wrecking operations. After discussion the Commission approved the Engineer's recommendations and authorized Chairman Cabell to discuss the matter with the Portland city officials.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following matters:

Acquisition of timbered wayside strips along the Pendleton-John Day Highway between Ukiah and Dale Ranger Station:- He advised that federal aid funds, in the amount of about \$50,000.00, are available for the purchase of

wayside strips and inquired if it is the desire of the Commission to spend all of this money in one place or to divide it for purchase of strips in several different localities. Mr. W. H. Lynch, District Engineer of the Public Roads Administration, was present and stated that he has not yet received the rules with respect to the expenditure of the federal moneys for this purpose. The suggestion was made that some of the money be spent for purchase of strips along the Pendleton-John Day Highway and the balance for acquisition of additional strips along the Salmon River Highway. The matter was discussed but a definite decision with regard thereto was deferred until all Commissioners are present.

Timbered wayside strips along the Columbia River Highway, in Hood River County:- The Parks Superintendent advised that Governor Charles A. Sprague has referred to the Highway Commission a letter from Mr. George M. Knox, Assessor of Hood River County, in which Mr. Knox advises that plans are being formulated to cut the timber from a large tract of land adjacent to the Columbia River Highway between Summit and Lindsey Creek, embracing an area which is valuable to the state and the county from the historic and scenic standpoint, and suggesting acquisition of the same by the state in order to preserve it. The Parks Superintendent advised that this property is owned by the Gantenbein Estate and C. Lewis Mead, Portland, and contains approximately 550 acres of land and is important from the historic standpoint. He exhibited a map showing the property under discussion and also showing the location of the Bonneville power pole line which is to cross the property. He recommended purchase of the property if it can be obtained at reasonable cost. The matter was discussed at considerable length during which the Commission indicated that it is interested in the purchase of at least a part of the property in view of its historic importance and to preserve the natural scenic features of the highway. The Parks Superintendent was authorized and instructed to make further investigation relative to the acquisition of the area between the Bonneville power line right of way and the highway right of way and report his findings at the next meeting.

Addition to state park at The Cove:- The Parks Superintendent requested authority to purchase properties as follows, which properties, he said, are needed for the proposed development of this park:

520 acres owned by Jefferson County at prices ranging from \$2.00 to \$3.00 per acre, total \$1,300.00

320 acres from the State Land Board at \$2.50 per acre, total \$800.00

Privately-owned lands from Mary Kennan, Minnie Henske, Oregon-Washington Joint Stock Land Bank, Fred and Minnie Degner, Laura Degner, and Emil Zenke, aggregating 400 acres, at \$3.00 per acre, total \$1,200.00

He also requested authority to negotiate for the purchase of the following additional properties which are needed at this park:

120 acres from Jefferson County
40 acres from Pacific Power and Light Company

He further requested authority to negotiate leases for the following properties from the Bureau of Reclamation and the United States Department of Agriculture:

40 acres from the Bureau of Reclamation
1,980 acres from the Department of Agriculture

After discussion the Commission voted unanimously to acquire all of the properties mentioned by the State Parks Superintendent provided they can be purchased at not to exceed \$3.00 per acre. The matter was referred to the Attorney to handle the details. The State Parks Superintendent was authorized to secure the leases from the Bureau of Reclamation and the Department of Agriculture.

Cutover strips along the Salmon River Highway:- The Parks Superintendent reported that there is considerable cutover timber land along the Salmon River Highway in the vicinity of Boyer which would make a desirable addition to the state's wayside purchases in this vicinity, which property, he said, is owned by James Churchill of Centralia, Washington, and by the Miami Corporation. He requested authority to negotiate for the same. The Commission approved the request with the understanding that the price to be paid for the land is not to exceed \$5.00 per acre.

Spruce Production Railroad right of way in Lincoln County:- The Parks Superintendent presented a request from the Lincoln County Court for a state contribution of \$100.00 to assist the county in acquiring some of the old Spruce Production Railroad right of way, about one mile south of Newport. He said that the state now owns a short section of this right of way, containing two acres of land, which the county deeded to the state without cost some time ago for a wood lot, and that the county is now negotiating for the purchase of an adjoining section for which the owner, the Southern Pacific Company, is asking the sum of \$500.00, and wants the state to pay one-fifth of the expense. The Commission considers that the price is exorbitant and thereupon denied the request.

The Commission considered and signed agreements, et cetera, as follows:

Permit from the Spokane, Portland and Seattle Railway Company authorizing installation by the state of a culvert across railroad company property adjacent to the Lower Columbia River Highway.

Agreement with Bonneville Power Administration providing for construction of a power line across state highway property in Hood River County.

Agreement with Peoples Water and Gas Company covering the re-establishment of the company's water mains and facilities in

Marshfield so that they will be outside of the limits of the new highway pavement.

Agreement with the Southern Pacific Company covering the matter of construction of the Clackamas overcrossing on the 82nd Street Highway near the town of Clackamas.

Lease agreement with Elton McBride and wife covering property in the town of Long Creek which is to be used as a site for a highway maintenance headquarters.

Agreement with Ida Williams, administratrix of the estate of William Williams, covering acquisition of 0.41 acre of land in the NW¹₄ of the SE¹₄ of Section 16, Township 19 South, Range 1 West, Lane County, which property is to be used as a site for maintenance headquarters.

Agreement with Sam Likens covering the cutting and removal of fallen trees on land across which it is proposed to relocate the Oregon Coast Highway in the vicinity of Otter Crest, Lincoln County.

The Commission discussed the setting of a date for its first regular meeting following that scheduled for February 27 and 28, 1941, and decided to hold such meeting in Portland on Thursday and Friday, April 3 and 4, 1941. The Secretary was instructed to make the usual arrangements for the use of the auditorium of the Public Service Building. The Commission also set Friday, February 14, 1941, as the date for an interim meeting in Salem.

There being no further business to come before the Commission at this time, the meeting was adjourned at 5:15 p. m.

FEB 22 1941

Salem, Oregon, February 14, 1941

The State Highway Commission met in special session at 10:00 a. m. in the office of the State Highway Engineer, Room 325, State Office Building, Salem. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. W. DeSouza, Assistant Attorney
H. B. Glaisyer, Secretary

Also present were H. D. Farmer and T. M. Davis, Senior Highway Engineers, representing the Public Roads Administration.

The Engineer discussed with the Commission matters pertaining to the proposed strategic military highway system in Oregon, particularly certain changes desired by the U. S. War Department. After considerable discussion the Engineer was instructed to write the Public Roads Administration to the effect that the Commission will agree to some of the changes on the condition that the War Department will approve the retention in this system of certain highways that the Commission feels are especially desirable from the local standpoint as well as from the military standpoint. Otherwise, the Commission feels that it will be necessary to adhere to its original recommendation as disclosed in its letter to Mr. Lynch, District Engineer, Public Roads Administration, dated December 21, 1940.

The Honorable R. C. Frisbie, State Representative from Baker County, came before the Commission in regard to the Baker-Homestead Highway. He recalled that the State Legislature a few years ago changed the route of this highway beyond the town of Halfway by eliminating the Halfway-Cornucopia Section and substituting in lieu thereof a road from Halfway down Pine Creek to the town of Homestead. However, the people of his district have changed their attitude with respect thereto and now feel that a mistake was made, particularly in view of the fact that the town of Homestead is now served by the State Secondary Highway which extends down the Snake River from the town of Robinette. They are asking, he said, that the Pine Creek Section from Homestead to the top of Pine Creek Canyon be eliminated from the State Highway system and that the highway be routed from Halfway to Cornucopia in accordance with the original designation. He pointed out that a bill is now pending in the Legislature to effect such change but will be withdrawn in the event the Highway Commission will make the change which, he understands, the Commission has legal authority to do. The Engineer advised that he discussed this matter with the Commission's Attorney who is of the opinion that the Commission has such legal authority. After discussion, the Commission approved the changes requested by Mr. Frisbie under the condition that it has the backing of the local residents and is in conformity with general public opinion. Mr. Frisbie advised that he would ascertain the attitude of the people concerned, including Baker County Court and the people of the town of Halfway.

Commissioner Oliver brought up for discussion the matter of snow removal on the roads leading to the Anthony Lake recreational area, Baker County. He advised that inquiry has been made by Mr. Blaine Hallock, Baker, as to whether the Highway Commission would cooperate in such work if Baker County will assume a portion of the expense involved. The Commission decided that it could not enter into such a cooperative arrangement without establishing a very undesirable precedent and without inviting adverse criticism from people who do not have good road facilities at the present time. This decision is also to apply to the McKenzie Highway in Lane County, concerning which the Commission has been requested to conduct snow removal operations to enable the people of Eugene and vicinity to reach the winter sports recreational area adjacent thereto.

Mr. Farmer brought up for discussion the matter of constructing the forest highway project on the Oregon Coast Highway south of Port Orford, Curry County. He advised that at the present time this is the only forest highway project in Oregon that has been approved for contracting and that revised estimates indicate that it is going to cost about \$15,000 more than the amount that has been allocated for the same. He suggested that it would be advisable to transfer such amount of funds from some other forest highway project and mentioned the Willamette Highway surfacing project as being a convenient source. He pointed out that under the present program \$100,000 has been allocated to surface a 7.5 mile section of the Willamette Highway and that if the \$15,000 is taken from this project it would not have a serious effect but would simply reduce the length of the improvement about .8 mile. After considerable discussion the Commission approved such transfer of funds and thereupon signed the following joint letter with W. H. Lynch, District Engineer, Public Roads Administration and F. H. Brundage, Acting Regional Forester, with regard thereto, which letter also requests the transfer of \$75,000 of forest highway funds heretofore budgeted for the improvement of the John Day Highway from Dixie Summit toward Prairie City to the improvement of the section of this highway extending easterly from Prairie City, such transfer having been previously approved by the Commission:

"Changes in the Fiscal Year 1941 Forest Highway Program are recommended for approval as follows:

No.	Project	Present Approved Status		Recommended Revision Funds		
		Length	Funds	Length	F. H.	Coop.
10-D2	Oregon Coast Hwy. Hubbard Creek Bridge Reconst.	.03 mi.	25,000	.03 mi.	40,000	
21-F5, G3,H4	Willamette Hwy. Surfacing	7.5 mi.	100,000	6.7 mi.	85,000	
36-A1	John Day Hwy. Reconst. Grad.	4.0 mi.	75,000	5.7 mi.	75,000	25,000

(Continued on next page)

Oregon Coast Highway, Hubbard Creek Bridge Reconstruction, 10-D2, .03 Mi.

"The estimate included in the previous program was promised on preliminary data. Upon completion of the surveys and design, it became evident that the present approved funds were insufficient to finance the construction. It is necessary, therefore, to recommend the allocation of additional funds as cited above.

Willamette Highway, Surfacing, 21-F5, G3, H4, 6.7 Miles.

"In order to finance the reconstruction of the Hubbard Creek bridge, the funds therefor are to be released from the Willamette Surfacing Project by reducing the length of the proposed improvement.

John Day Highway, Reconstruction Grading, 36-A1, 4.0 Miles.

"The program previously approved provided for the improvement of the project from Dixie Summit toward Prairie City. Since that time the State has decided to finance the section adjacent to Dixie Summit with Federal Aid funds, and it is now desirable to change location of the proposed Forest Highway improvement to extend from Prairie City easterly and to add sufficient additional funds to complete the grading to a connection with the proposed Federal Aid project. The State Highway Department proffers the additional funds as cooperation."

In the discussion of the Port Orford project it was pointed out that difficulties have been encountered in securing right of way across certain property owned by Captain Harold Koche. The Attorney was authorized and instructed to proceed with the condemnation of this right of way immediately so as to avoid delays in contracting the construction.

A delegation from Clackamas County, headed by the Honorable Howard C. Belton, State Senator, and including County Judge E. L. Pope and County Commissioner George G. Randall; County Engineer D. T. Meldrum; J. R. Vinyard, Mayor of Canby; Roy L. Mangus, City Recorder; and George Koehler, Councilman, came before the Commission and requested the designation as state secondary highways of the following county roads:

Market Road No. 10, extending from the south city limits of Canby to a junction with State Secondary Highway No. 160, near Marquam, a distance of about 13.7 miles.

Molalla River Road beginning at the east city limits of Molalla and extending southeasterly therefrom to a point near the confluence of the Molalla River with the north fork of the Molalla River, a distance of about 7.6 miles.

They filed with the Commission formal requests for such designations from the Clackamas County Court. Senator Belton made an urgent plea for such designations

FEB 14 1941

pointing out that these roads are now in bad condition due to heavy log-hauling traffic which, they anticipate, will continue probably twenty years, and Clackamas County is not financially able to maintain them. However, the county will maintain at county expense the road that the loggers are using in transporting their logs between Canby and the Willamette River.

Chairman Cabell explained that due to scarcity of available funds the Commission has been reluctant to add new roads to the state secondary highway system, it being considered advisable by the Commission to improve the roads now on such system before taking on new obligations. However, there are exceptional cases to which the Commission gives special consideration if conditions warrant and, in the present instance, the Commission will take the request under advisement and will probably have investigations made.

Mayor Vinyard asked the Commission to give consideration to the removal of several right-angle turns in the town of Canby along the route used by loggers from Canby to the river. He said that the rerouting of the highway to eliminate these turns would not only shorten the distance between the town and the river but would also provide greater safety to local citizens. Right of way required for such change, he said, can be obtained at small expense. The Engineer was instructed by the Commission to investigate this matter when investigating the other projects requested by this delegation.

The County Court of Marion County, represented by County Commissioners Jim Smith and Ralph Girod and County Engineer N. C. Hubbs, was present and presented formal requests from Marion County Court and Linn County Court for the designation, as a state secondary highway, of the road commonly known as the North Santiam Highway from the town of Detroit southeasterly to a connection with the South Santiam Highway. The Commission took the matter under advisement.

The Honorable Rex Ellis, State Senator from Umatilla County, came before the Commission and requested, on behalf of the logging operators of Pendleton and Pilot Rock, permission to transport logs over the Pendleton-John Day Highway for a short time after dark so as to enable them to deliver two loads of logs daily to the mill at Pilot Rock from their timber stand near Ukiah, about fifty miles distant. He alleged that, on account of the shortness of daylight hours and the long haul, it is not possible for loggers to deliver two loads of logs during daytime and, if the Commission will not grant the permission requested, it will necessitate the parking of the loads at the side of the highway overnight which, during this season of the year, will work extreme hardship on the truck drivers because traffic on the highway is very light and they have no other transportation available to reach their destination. He said the drivers do not want to violate the laws but, unless some concession is made, they will have to, so far as speed is concerned, if they are to deliver their loads before darkness sets in.

Chairman Cabell pointed out that this condition is not confined to the Pilot Rock area but is general throughout the state; that the Commission is aware of the condition and is giving the matter study and it is hoped that

FEB 14 1941

by next fall the Commission will be in position to establish a definite rule pertaining thereto. In the meantime, he added, the Commission will discuss the request and will let Senator Ellis know as soon as possible what, if anything, can be done to relieve the present situation.

Following Senator Ellis' appearance the Commission discussed the matter at further length and decided to permit loggers to operate until 8:00 p. m. provided they equip their loads with proper lights extending the length of the load. This was approved by the Commission as a trial proposition on the Pendleton-John Day Highway between Ukiah and Pilot Rock and a state-wide policy with respect to such matter is to be formulated from the results of this trial. The Engineer was instructed to conduct the experiment at once.

The Commission adjourned at 12:10 p. m. and reconvened at 1:15 p.m. in the same room.

The Commission discussed the request from the City of McMinnville for a decision with respect to the adoption of a permanent connection between the Pacific Highway West and the Three Mile Lane Secondary State Highway in McMinnville. The Engineer advised that the permanent route for the Pacific Highway West, through McMinnville, was adopted by the Commission some time ago but there is still a question as to the route of the secondary highway connection; whether it should be routed along Main Street or along one of the streets south of Main Street. He pointed out that the adoption of a permanent route for this connection involves the location for a new bridge over the South Yamhill River, which bridge is estimated to cost approximately \$300,000. He suggested, in view of the fact that funds are not available to finance the work, that the Commission designate the Main Street route as a temporary connection for this highway until such time as the Commission is in a position to adopt and construct the permanent route. The Commission approved the suggestion and instructed the Engineer to so inform the Honorable Eugene Marsh, State Representative from Yamhill County. He was also instructed to paint and maintain a yellow center line stripe along Main Street.

The Engineer brought up for discussion the matter of filing an application for a new WPA project on the Wolf Creek Highway superseding all projects now in effect and those for which applications have previously been filed. He recommended approval of such project covering the construction of the remaining portion of this highway between the Nehalem River, east of Elsie, and the junction with the Canyon Road, Portland, the work to consist of clearing, grubbing, grading, and all other necessary work except the construction of pavement between North Plains and Portland and railroad grade crossing elimination structures. He estimated the total cost of the project at \$2,129,503 of which amount, he said, the state's share would be approximately 18.3 per cent, the balance to be paid with WPA funds. He also said that the approval of this project would not affect this year's budget and that the WPA would furnish powder and culvert pipe and a considerable portion of the equipment. He pointed out that this is a National Defense project and, accordingly, is in a priority status. After discussion the Commission approved the project as outlined and authorized the Engineer to sign the application for the same.

Mr. Farmer brought up for discussion the proposed plan for financing construction of the North Santiam Highway between Niagara and Detroit where the present road will be flooded by the proposed dam across the North Santiam River. He pointed out that according to the original plan the War Department is to advance the funds to build the new road from the dam site to a point about three miles above Detroit and is to receive reimbursement at the rate of \$100,000 per year from Forest Highway funds. However, it has since been deemed advisable to include in this arrangement construction of the new road down stream from the dam to the foot of the six per cent grade, which is outside of the zone directly affected by the dam and was originally considered by the War Department to be entirely beyond the scope of the agreement. The War Department, he said, is now agreeable to financing this construction on the same basis - that is, the War Department will advance funds for construction in the first instance with the understanding that it will receive reimbursement at the rate of \$100,000 per year from Forest Highway funds. The agreement with the War Department, he said, has been prepared on such basis and he asked the Highway Commission to approve the arrangement before the papers are executed. After discussion the Commission approved the arrangement by unanimous vote and thereupon signed a letter directed to W. H. Lynch, District Engineer, Public Roads Administration, in regard thereto. (See letter dated February 14, 1941, signed by all three members of the Commission.)

The Engineer reported receipt of a letter from W. P. Hewes, City Engineer, Lewiston, Idaho, inquiring as to the plans for the completion of the Oregon section of the Enterprise-Lewiston Highway, in Wallowa County. He was instructed by the Commission to inform Mr. Hewes that the Commission has obligated itself to complete this section by the time the Washington Section of this highway is completed.

The Commission considered and, by unanimous vote, approved the minutes of the meetings held on October 9, 10 & 11, October 18, and November 12 and 13, 1940.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the prices that he recommended be paid for each. After careful consideration of each item the Commission approved the request and, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as herein-after more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

FEB 14 1941

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Assistant Attorney also brought up for discussion additional settlements for right of way needed for the proposed Front Avenue project in Portland. Action on these properties was deferred pending personal inspection of the premises by Chairman Cabell.

FEB 14 1941

Mr. James Elliott, County Commissioner of Clatsop County, was present in regard to the bridge over the Nehalem River on the county road that connects with the Wolf Creek Highway near Elsie. He said that this bridge is badly in need of repair or replacement with a new structure; further, that the county court is not particularly interested in the bridge and had it in mind to dismantle it, in fact, has already closed it to all traffic, but recently received a petition signed by numerous loggers requesting the repair of the structure so that it can be used in their logging operations, it being their contention that unless the bridge is repaired they will be forced to use the Wolf Creek Highway as a turn-around for their equipment, which would present a serious hazard to Wolf Creek Highway traffic, and, as far as the county court is concerned, that is the only justification for the rebuilding of the bridge.

The Engineer advised that the bridge is on the county road that was used as a detour during the construction of the Wolf Creek Highway and when it was turned back to the county it was carefully inspected by the Bridge Engineer who reported it in good condition; however, since that time it has been used extensively by log haulers who have severely damaged it by hauling overweight loads. He estimated the cost to repair the damage at \$6,200, and to construct an entirely new bridge at \$10,000. Mr. Elliott inquired whether the Commission would pay 50 per cent of the cost of repairing the existing bridge or for building a new one, if the county would pay the balance. It was the Commission's contention that the loggers should pay at least a portion of the expense in view of the fact that they were responsible for the present condition of the structure. After discussion, it was agreed that Mr. Elliott would contact the loggers with regard thereto and report his findings to the Commission when the Commission will make its decision.

The Assistant Attorney brought up for discussion a request from the Standard Oil Company for merchantable title to certain property in Bandon which the company is obtaining from the state in connection with a highway right of way transaction. He estimated that to furnish such title would cost not to exceed \$150 and gave as his thought that the state should assume this expense. The Commission voted unanimously to pay the costs involved in furnishing a satisfactory title to the company.

The matter of acquisition of land at Gold Beach to protect the bridgeheads of the Rogue River Bridge was discussed briefly but action thereon was deferred until the State Parks Superintendent is present.

Commissioner Oliver presented a letter from Mr. Lowell Stockman, Pendleton, in regard to the construction of a connecting link between the Helix Secondary Highway and the new state highway between Pendleton and Adams, in Umatilla County. The Engineer advised that this connection involves a crossing of the O.W.R. & N. Company Railroad at grade, at a point where there appears to be somewhat of a hazard, and there is a question whether the Public Utilities Commissioner would permit the improvement without provision being made for the separation of highway and railroad traffic. This feature, he said, vitally affects the cost of construction and should be known before the

Commission makes a decision in the matter. The Engineer was instructed to convey such information to Mr. Stockman and to make a joint inspection of the project in company with the Chief Engineer for the Public Utilities Commissioner and to report his findings to the Commission.

The question whether or not to take legal proceedings to evict Mrs. Inez Van Dyke who is maintaining a cottage on state property known as Casey State Park, adjacent to the Crater Lake Highway in Jackson County, had the attention of the Commission. The Secretary presented a letter from the Attorney regarding this subject. After discussion the Commission ordered that legal proceedings to force Mrs. Van Dyke to vacate the premises be undertaken unless the Attorney knows of some good reason why this should not be done.

The Commission discussed briefly the request heretofore made by I. C. Nealeigh of Oregon City for the filling in of the highway right of way in front of property that he owns adjacent to the new highway at this place. The Secretary recalled that Mr. Nealeigh agreed to write the Commission explaining in detail just what he wanted done but no such letter has been received to date. The Commission decided to let the matter drop until hearing from Mr. Nealeigh.

The Commission discussed and denied the request from Harold Nelson, Portland, for permission to maintain a small building on the right of way of the Oregon Coast Highway at the north end of the Depoe Bay Bridge, in Lincoln County, it being strictly contrary to the Commission's long-established policy to permit such encroachments.

The Secretary presented letters from Mrs. Fay Lamson Ray, of Vancouver, Washington, and Mrs. Frances L. Barnes, Portland, suggesting that the state park which has been established at a place known as "The Cove", in Jefferson County, be named "Rogers Park" in honor of Clark Green Rogers who homesteaded the area in 1879. It was the thought of the Commission that the time is not propitious to name this park in view of the fact that all of the land for the park has not as yet been acquired. The Secretary was instructed to so inform Mesdames Ray and Barnes and to state that the Commission appreciates their interest in the matter and will be pleased to bear their suggestion in mind when the naming of this park comes up for discussion.

The Commission considered and ordered filed a petition signed by a number of organizations of Silverton in which objections were offered to House Bill No. 298 now before the Oregon Legislature, which bill proposes to permit withdrawal of water from Silver Creek for irrigation purposes.

The question of whether to maintain signs along state highways at locations where freeways have been obtained advising prospective purchasers of abutting property that right of access at such locations will not be allowed, had the attention of the Commission. The Commission decided that it would be inadvisable to maintain such signs at the present time, particularly in view of the fact that this information is available to prospective purchasers in the county deed records.

FEB 14 1941

The Commission discussed a request from L. E. Bierce, Grande Ronde, Oregon, for permission to construct a plank logging road across certain state park property adjacent to the Salmon River Highway, in Polk County, for use in connection with the truck hauling of logs from an adjacent privately-owned tract. The Commission approved the request subject to the condition that the connection with the Salmon River Highway is constructed in a satisfactory location so as to minimize the hazard to Salmon River Highway traffic.

The Commission discussed briefly and ordered filed the report from the Engineer relative to revenues derived from the state tax on gasoline during the calendar year 1940 as compared with that for the calendar year 1939.

The Engineer requested authority to install flood lights at four truck scale sites in Division No. 5, particularly at the scales located at Mile Post 1.05 on the Wallowa Lake Highway; at a point on the Old Oregon Trail about one mile east of La Grande; at the north city limits of Ontario; and at the Cairo Junction, south of Ontario. He explained that these lights have been requested by the Department of State Police to facilitate the activities of that department. He estimated that the cost to furnish such lights at all four points would be approximately \$570. The Commission approved the request by unanimous vote.

The Commission discussed a complaint from County Commissioner E. G. Anderson, Tillamook County, with regard to the condition of the Little Nestucca Secondary Highway. Mr. Anderson asked for the stabilization of this road so as to make it passable for log-hauling traffic. The Engineer advised that this road was constructed for local, light traffic only and absolutely will not stand up if subjected to log hauling; also, that to strengthen it sufficiently so that it will withstand logging traffic is a very expensive undertaking. It was his thought that the expense is not justified at the present time. The Commission concurred in the viewpoint of the Engineer and thereupon decided not to make any commitment to the project at this time.

The Engineer reported that due to weather conditions and increased log hauling on the South Santiam Highway it has been very difficult this winter to maintain the road in proper condition, particularly the 12-mile section easterly from the end of the oiled section near Sweet Home. He estimated that it would take about 2,000 cubic yards of rock to properly maintain the road during the next three months and requested authority from the Commission to advertise for bids for the furnishing of such amount of material and to include an additional 3,000 cubic yards to be placed in stock piles for future use. He estimated that this material would cost about \$7,500. The Commission approved the request by unanimous vote.

The Commission discussed a letter from F. T. Fowler, Traffic Engineer for the City of Portland, in which it was pointed out that, in connection with the traffic signal installation on East Burnside Street and 12th Avenue from Sandy Boulevard, it is essential that the curbs on Sandy Boulevard between 12th Avenue and 15th Avenue be set back a distance of two feet to provide a roadway of the same width as the balance of Sandy Boulevard. Mr. Fowler

FEB 14 1941

gave as his thought that this is a state obligation and requested an early decision by the Commission.

The Engineer estimated that the work involved would cost about \$2,500 and recommended approval of the request in view of the fact that the lighting project is part of the main project of safety control along Sandy Boulevard heretofore approved by the Commission. After discussion the Commission, by unanimous vote, authorized the improvement at state expense with the understanding that the city would do the work.

The Secretary presented a resolution from the Lower Columbia Associated Chambers of Commerce requesting designation of the Lower Columbia River Highway as a strategic military highway and the reconstruction of the same to modern standards. The Commission ordered the resolution filed without action, there being no funds available to finance the work at this time.

A letter was also presented from Charles H. Reynolds, President of the Oregon Trail Association, expressing appreciation for the improvements heretofore made by the State Highway Department along the Old Oregon Trail in the vicinity of Arlington, and expressing the hope that this highway will be modernized between the town of Boardman and the John Day River in the near future; also requesting the straightening of this highway through the town of Arlington. The Commission decided that it would be best to defer the construction of the proposed Arlington revision until the Old Oregon Trail has been completely reconstructed on both sides of Arlington, particularly in view of the fact that the improvement of the Arlington Section is a very expensive undertaking involving the construction of a railroad grade crossing elimination structure for which no funds are available at this time.

The Secretary also presented numerous petitions and resolutions from various organizations along the Tualatin Valley Highway in which the Commission was requested to provide for the early reconstruction of this highway for four lanes of traffic between the Multnomah County Line and the Yamhill County Line. The Engineer estimated that it would cost about \$172,000 to construct a pavement 44 feet wide on a 66-foot width grade, with standard shoulders, between Sylvan and Beaverton, a distance of four miles, and that to construct such pavement without the shoulders would cost about \$152,000. To construct a 44-foot pavement with rock shoulders along the section between Beaverton and Forest Grove, he said, a distance of 14½ miles, is estimated to cost \$631,000. It was the thought of the Commission that if and when this improvement is made it should be done properly and should include shoulder work notwithstanding the fact that it would cost somewhat more than if the shoulders were omitted. The Commission made no commitment to the project but decided to bear it in mind in the formulation of future construction programs.

Reconsideration was given by the Commission to the claim of John O'Gorman for the loss of ten sheep which were killed by a State Highway Department truck on the Klamath Falls-Lakeview Highway in the vicinity of Bly, in November, 1940. The details of the accident were explained by the Engineer

FEB 14 1941

After considerable discussion the Commission concluded that it is liable for the payment of the claim, which is in the amount of \$100, and thereupon authorized payment of the same in the event that it is not a just charge against the insurance company that furnished the insurance covering the state equipment. The matter was referred to the Attorney to handle.

The Commission discussed the establishment of a policy to be followed hereafter in passing on applications of hospital associations for permission to provide group hospital insurance covering Highway Department employees, involving deductions from the Highway Department's monthly pay rolls. The Commission confirmed its decision reached on January 22, 1941, not to authorize additional contracts during the year 1941 and to require that all contracts of this nature be on an annual basis, becoming effective on January 1st of any year and expiring on December 31st of the same year, unless continued; also, that all contracts with hospital associations shall be a standard form heretofore approved by the Commission, and that before consideration is given to the application of any hospital association for such a contract that association shall be required to submit to the Commission the names of at least thirty employees who desire to receive the benefits of the service by such company. Further, that before the Commission will approve the renewal or continuation of a contract in effect the company concerned shall file with the Commission evidence to the effect that it is serving at least thirty Highway Department employees, otherwise, the contract will not be continued.

The Engineer reported that as previously authorized by the Commission, he has awarded contracts as follows to the low bidder in each instance, the conditions of the awards having been satisfied:

2.33 miles grading and construction of a bridge on Lake Creek-Hanley Ranch Section of the Little Butte Secondary Highway, in Jackson County. Bids taken January 21, 1941, contract awarded February 12, 1941, to E. L. Gates.

Grading and bridge construction on the Ochoco Creek Section of the Madras-Prineville Secondary Highway, in Crook County. Bids taken January 22, 1941, contract awarded February 6, 1941, to Norris Bros.

Florence Rock Production Project on the Oregon Coast and Siuslaw Highways, in Lane County. Bids taken January 22, 1941, contract awarded February 6, 1941, to M. L. O'Neil and Son.

Grading, surfacing and oiling Plunkett Creek-Read Creek Section of Kings Valley Secondary Highway, in Benton County. Bids taken January 21, 1941, contract awarded January 27, 1941, to M. L. O'Neil & Son.

Bear Creek-Coos Junction Rock Production Project on Coos Bay-Roseburg Highway, in Douglas County. Bids taken January 21, 1941, contract awarded January 27, 1941, to A. S. Wallace.

FEB 14 1941

After due consideration, the Commission by unanimous vote, approved the awards as reported by the Engineer.

The Engineer also reported that repairs have been made to the Service Creek Bridge over the John Day River, on the Service Creek-Mitchell Secondary State Highway, in Wheeler County, and the 10-ton reduced load limit for which this bridge heretofore has been posted is no longer required. He recommended appropriate action by the Commission restoring legal weight loads. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution in regard thereto:

WHEREAS, on the 18th day of May, 1937, at a meeting of the State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution ordering a reduction of the maximum permissible load limit on certain state highway bridges, including the following, to-wit:

SERVICE CREEK-MITCHELL SECONDARY STATE HIGHWAY

390-00.5 John Day River Bridge 10 tons

and

WHEREAS, subsequent to the passage of said resolution the said above-named bridge has been repaired so that it is no longer necessary or desirable to maintain the reduced load limit set out in said resolution;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the following bridge, to-wit:

SERVICE CREEK-MITCHELL SECONDARY STATE HIGHWAY

390-00.5 Service Creek Bridge over John Day River

be and the same hereby is rescinded and vacated as of this date, and the maximum load limit permissible on the said bridge shall hereafter be the maximum load limit provided by law.

IT IS FURTHER ORDERED that certified copies of this resolution be furnished to the county clerk of Wheeler County, in which county said bridge is located, and to the Superintendent of the Department of State Police for his information.

Reconsideration was given by the Commission to the matter of providing auxiliary service at Coos River Ferry during periods of high water, when ferryboat service has to be discontinued. The Engineer advised that

FEB 14 1941

ferry service at this point is now being rendered by Andrew Stambuck under contract with the State Highway Commission and that the original contract provided for the furnishing of free ferry service each day at the rate of \$784.60 per month, which is at the rate of \$1.30 per hour, and provided further that deductions at the rate of \$1.30 per hour shall be made from the amounts due the contractor for each hour that the ferryboat is out of service. During the time that the ferry cannot be operated, he said, Mr. Stambuck has furnished a small power boat for the accommodation of pedestrians and he has rendered such service free of cost, although he does not believe that he is required to do so under the terms of his contract, and now wants the state to either permit him to discontinue such extra service or to pay him for rendering it and has agreed to accept the sum of \$1.30 per hour, the amount that would be deducted from his payments when the regular ferry is out of service. He recommended payment to Mr. Stambuck for rendering such power-boat service at the rate stated. In view of the volume of pedestrian traffic that will be accommodated by such service the Commission approved the recommendation subject to the condition that the insurance coverage provided by Mr. Stambuck in connection with the operation of the ferry is extended to cover the operation of the power boat.

The Engineer brought up for discussion the matter of designating the Salem-Dayton Secondary Highway a through highway. He said that traffic along this highway is steadily increasing and in his estimation side-road traffic should be required to stop before entering the same and he so recommended. After discussion the Commission approved the recommendation and authorized the Engineer to erect stop signs at all intersecting roads. The following resolution designating this highway a through highway was adopted by the Commission by unanimous vote:

WHEREAS, that certain highway known as the Salem-Dayton Highway, otherwise defined as State Secondary Highway No. 150, is a duly established state secondary highway; and

WHEREAS, the Salem-Dayton Highway joins the Salem-Dallas Highway at West Salem and joins Three Mile Lane Highway at Dayton, and by reason of said connections carries a large volume of traffic; and

WHEREAS, because of the importance of said highway and the volume of traffic which now moves thereover said highway should be designated as a main-travelled or through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the Salem-Dayton Highway, otherwise defined as state secondary highway No. 150, from its connection with the Salem-Dallas Highway to its connection with the Three Mile Lane Highway at Dayton be and said highway hereby is designated and declared to be a

main-travelled or through highway.

2. That the Highway Engineer be and he hereby is instructed to place along said highway at all points where roads or highways intersect the Salem-Dayton Highway appropriate signs or markers notifying drivers of vehicles to stop before entering or crossing the said Salem-Dayton Highway. The Engineer is further instructed to place such signs or markers as nearly as practicable at the place where said cross or intersecting road or roads meet the prolongation of the nearest property line of such through highway, and the place or places where such signs are installed shall designate to the drivers of motor vehicles entering said through highway from any of said cross or intersecting roads the place where the stop shall be made.

3. This resolution shall be entered in the minutes and records of the Commission as of the fourteenth day of January, 1941, and a duly certified copy thereof delivered to the Public Roads Administration and a copy to the County Court of Polk County and a copy to the County Court of Yamhill County.

A letter was presented from Mr. Anthony Yturri, Attorney, Ontario, Oregon, in behalf of Mr. Vincent Mendiola, also of Ontario, requesting a blanket permit to operate over state highways, located a few miles south and west of the City of Ontario, a truck fitted for the hauling of loose hay, the overall width being approximately 14 feet. The Commission considered that it has no legal authority to grant such permit and instructed the Secretary to so inform Mr. Yturri.

Reconsideration was given by the Commission to the claim of Melvin Sorell, Salem, in the amount of \$25.00 for expense incurred by him as a result of an accident to his car on the Pacific Highway (old route) a short distance south of Salem. Mr. Sorell states that the accident occurred at the point where the old highway joins the new highway and he alleges that due to improper signing he was not given sufficient advance warning that the old route was barricaded and as a consequence drove his car through the barricade causing injuries to himself and others and damage to the car. The Engineer advised that the barricade was properly placed across the highway and could be easily seen for a distance of about one-half mile and in his estimation there was absolutely no reason for the accident other than carelessness on the part of the driver of the car. He recommended that the claim be denied. The Commission approved the recommendation.

The Commission discussed an application from the Lathrop Hay and Grain Company, Tres Pinos, California, for blanket permission to operate over The Dalles-California Highway, from the California state line to Fort Klamath, certain equipment consisting of a truck and trailer 60 feet overall in length which is to be used in the transportation of cattle. The Commission denied the request because it considers that it does not have legal authority to grant permits of this kind.

FEB 14 1941

The Commission also discussed the application of Mr. Paul Wampler, Klamath Falls, for permission to drag logs across the Klamath Lake Secondary Highway No. 421 in Klamath County, at a point between mile post 21.69 and mile post 22.00. The Engineer advised that investigation reveals that the place where Mr. Wampler desires to operate across the highway is on a section where travel is maintained throughout the winter season. He recommended, in view thereof, that the request be denied. The Commission approved the recommendation.

A request from the Bonneville Power Administration for a blanket permit of thirty-day's duration to operate over state highways between Vancouver, Washington, and the Bonneville Substation, two miles west of West Salem, certain truck and semi-trailer equipment 9' 8" wide and 50' long, had the attention of the Commission. The Commission denied the application for blanket permit; however, confirmed action previously taken authorizing the secretary to issue individual permits for the movement of this equipment between these points.

The Engineer requested authority to purchase the following equipment:

- 22 light-type trucks for use on the Wilson River Highway WPA project; 22 old trucks to be traded in as part purchase price. Estimated total cash outlay \$19,800.00
- 2 RD-8 Caterpillar tractors and 2 12-yard Isaackson scrapers for use on Wilson River Highway WPA project; 2 old tractors and 2 old scrapers to be traded in as part purchase price. Estimated total cost of tractors \$8,548.00. Estimated total cost of scrapers \$5,000.00
- 6 light-type cars. Estimated total cost \$4,800.00
- 6 105-cubic foot air compressors. Estimated cost \$4,200.00
- 4 power sweepers for oiling crews. Estimated total cost \$4,200.00
- 1 long wheel-base, light-type truck, chassis only, for use of electrical crew in connection with repair and installation of signs, signals, et cetera. Estimated cost \$800.00
- 2 air-operated grease guns for La Grande Shops. Estimated total cost \$600.00
- 2 power-barrel hoists. Estimated total cost \$500.00
- 1 line-boring machine for Coquille Shops. Estimated cost \$350.00

2 chipping hammers for use on Canyon Road WPA project.
Estimated total cost \$100.00

1 drafting machine for use of mechanical draftsmen at
Salem Shops. Estimated cost \$85.00

Submarine cable now installed across channel opening at
Interstate Bridge. Cost \$10.00

After discussion the Commission approved the request by unanimous vote and instructed the Engineer to make the purchases through the State Purchasing Agent in accordance with the usual practice.

The Engineer reported an offer from Multnomah County to purchase one traffic-line cart for the sum of \$125.00, and an offer from the Lane County Court to purchase one 1000-gallon gasoline tank located at Oakridge for the sum of \$49.00. He recommended acceptance of these offers. The Commission approved the recommendation.

The Commission discussed and approved the proposed form of agreement with the O.W.R. & N. Company, the Union Pacific Railway Company, and the Southern Pacific Company, covering the use of the upper deck of the Steel Bridge over the Willamette River in Portland by state highway traffic. The Attorney was instructed to prepare the final form of agreement in conformity therewith for execution later by the Commission and the railroad companies.

In this connection the Engineer reported receipt of a letter from W. H. Lynch, District Engineer, Public Roads Administration, pointing out that the proposed agreement provides for the leasing of the upper deck of this bridge for a term of 30 years at the rate of \$65,000 a year, payable in monthly installments out of the state highway fund; and also pointing out that the agreement contains provision that nothing therein shall commit the railroad companies to any renewal or extension of the agreement. Mr. Lynch advised that, if the Highway Commission is willing to enter into the proposed agreement, he would approve the use of federal aid funds to assist in financing the construction of the approaches to the bridge, provided the project agreement covering the matter includes clauses to the effect that no tolls will be charged highway traffic for the use of the bridge and that the state will provide a proper crossing of the Willamette River for such traffic if for any reason the lease of the Steel Bridge is terminated. After discussion the Commission approved Mr. Lynch's suggestions and thereupon authorized and instructed the Engineer to include in the project agreement with the Public Roads Administration the clauses requested by Mr. Lynch.

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway construction projects:

A. C. Greenwood Company, contract No. 2098, for grading the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties, requested an additional extension of

FEB 14 1941

time from August 15 to September 21, 1940, within which to complete this project. They attributed their failure to complete the project within the specified time limit to extra work in removing slide material. The Engineer advised that this contract was awarded on August 4, 1938, and provided that the job should be completed by October 31, 1939. On the expiration date, he said, considerable work remained to be done and due to adverse weather conditions he ordered the work closed down, on November 1, 1939, until suitable weather prevailed in the spring. Grading work was started again, he said, on May 9, 1940, but was not completed until September 21, 1940, for reasons given by the contractor. He pointed out that the total quantities of material moved by the contractor were 23.8 per cent more than that originally estimated and for this reason and for the further reason that the increased work was due in great part to slides which were difficult to handle, he recommended that the extension of time requested be granted without penalty. He also recommended that the penalty previously imposed on the contractor for failure to complete the project within the specified time limit be waived. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

E. C. Hall Company, contract No. 2204, for grading, surfacing and oiling the Warren Creek Section of the Columbia River Highway, in Hood River County, requested an extension of time from July 31 to September 21, 1940, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to the fact that they were required to postpone construction of guard fence until oiling work had been completed in order to eliminate any possibility of oiling operations discoloring the white guard rail. The Engineer advised that bids were taken for this project on July 27, 1939, but the contract was not awarded until September 9, 1939, at which time the date of completion was changed to July 31, 1940, due to delay in the award. The contractor did not commence construction operations until October 2, 1939, and the work was not completed until September 21, 1940. It was his thought that the contractor should have had no difficulty in completing the job within the specified time limit and accordingly recommended that the extension of time requested be granted but that the contractor be required to reimburse the state for expense incurred for engineering supervision subsequent to July 31, 1940. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

George F. Anderson, contract No. 2235, for construction of a bridge over the Necanicum River on the Oregon Coast Highway, in Clatsop County, requested an additional extension of time from August 31 to November 22, 1940, within which to complete this job. He alleged that the extension is necessary because of extra work involved in cleaning up the premises to the satisfaction of the adjacent property owners. The Engineer advised that he knows of no reason why this

contract should not have been completed within the specified time limit and recommended in view thereof that the extension of time requested be granted but that the contractor be required to reimburse the state for all engineering costs incurred in connection with the job subsequent to July 31, 1940, the original specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Berke Pros., contract No. 2306, for grading and paving the Cottage Grove Section of the Pacific Highway, in Lane County, requested an extension of time of 30 days, from October 15 to November 15, 1940, within which to complete this job. They alleged that their failure to complete the project within the specified time limit was due to extra work such as construction of additional curbs, sidewalks, gutters, driveways, et cetera, and because they were not allowed to remove the old concrete pavement at the south end of the job, as contemplated, until after the new pavement had been constructed. The Engineer advised that this contract was awarded on May 2, 1940, and that work was commenced by the contractors on May 17, 1940, and was completed on November 15, 1940, 30 days after the expiration of the specified time limit. The principal reason for failure of the contractors to complete the job on time, he said, was their inability to secure equipment necessary for the paving work which necessitated the giving of orders to the contractor not to disrupt the old pavement at the south end of the job until they were ready to lay new pavement at this point. Another reason for the delay, he said, was the fact that the City of Cottage Grove would not let the contractors install barricades closing certain streets where they intersected the new highway. He recommended in view of the circumstances and the fact that the contractors were not responsible for the delay that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

Edwin C. Gerber, contract No. 2308, for surfacing and construction of bituminous macadam on the Pendleton-Adams Section of the Oregon-Washington Highway, in Umatilla County, requested an extension of time of 36 days, from October 15 to November 20, 1940, within which to complete this job. He attributed his failure to complete the job within the specified time limit to adverse weather conditions and to the fact that he produced certain surfacing materials for Umatilla County. The Engineer advised that the contractor did experience bad weather conditions between September 10 and October 10, 1940; however, the principal reason for his failure to complete the project within the specified time limit was negligence in starting the work. He pointed out that the contract was awarded on May 2, and advised that Mr. Gerber did not deliver any material from his crushing plant until July 22, two months after setting up his

crusher. He recommended in view of the circumstances that the extension of time now requested be granted subject to the condition that Mr. Gerber be charged with the extra engineering expense incurred by the state subsequent to the specified date of completion. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation.

R. I. Stuart & Sons, contract No. 2364, for furnishing crushed rock in stock piles for the Gold Hill Section of the Pacific Highway and Sams Valley Secondary Highway, in Jackson County, requested an extension of time of 30 days, from January 31 to March 2, 1941, within which to complete this job. They attributed their failure to complete the project within the specified time limit to excessive amount of dirt and sand in their gravel pit requiring the handling of much more material than would have been necessary otherwise. The Engineer stated that the pit used by the contractor had been used before and that the contractor should have known what to anticipate; therefore, in his estimation, the excuse given by the contractor for failure to complete the job on time is not a valid one. He recommended, in view thereof, that the extension of time requested be granted, subject to the condition that the contractor reimburse the state for extra engineering expense incurred subsequent to the specified completion date. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2098, 2204, 2235, 2306, 2308, and 2373, for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts and that said jobs are now ready for acceptance:

Contract No. 2098, with A. C. Greenwood Company, Inc., for grading the Arch Cape-Beach Creek Section of the Oregon Coast Highway, in Clatsop and Tillamook Counties. Completed September 21, 1940.

Contract No. 2204, with E. C. Hall Company, for grading, surfacing, oiling and bridge construction on the Warren Creek Section of the Columbia River Highway, in Hood River County. Completed September 21, 1940.

Contract No. 2235, with George F. Anderson for construction of a bridge and roadway approaches over the

Necanicum River at Black Bridge south of Seaside on the Oregon Coast Highway, in Clatsop County. Completed November 22, 1940.

Contract No. 2306, with Berke Bros., for grading and paving the Cottage Grove Section of the Pacific Highway, in Lane County. Completed November 15, 1940.

Contract No. 2308, with Edwin C. Gerber, for 11.51 miles surfacing and 12.02 miles bituminous macadam wearing surface on the Pendleton-Adams Section of the Oregon-Washington Highway, in Umatilla County. Completed November 20, 1940.

Contract No. 2373, with Rogers Construction Company, for furnishing crushed rock in stock piles on the Mosier-Seufert Section of the Columbia River Highway, in Wasco County. Completed December 19, 1940.

THEREFORE, BE IT RESOLVED, that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission considered and signed agreements, et cetera, as follows:

Easement with United States of America covering siphon construction on the Boardman-Starfield Section.

Agreement with S.P. & S. Railway Company providing for installation of a highway drainage culvert across railroad property near Scappoose.

Extension rider agreement with the O.W.R. & N. Company renewing lease of stock pile site on Union Pacific Railway Company property at Albira, in Portland.

Agreement with Pacific Power and Light Company providing for the lighting of the scale house at Biggs.

Agreement with the Southern Pacific Company covering construction of the railroad grade elimination structure on the 82nd Street Highway near the town of Clackamas, Clackamas County.

Bargain and sale deed conveying unto Lars. P. Peterson and wife a portion of Block 18, Nasburg's Addition to Marshfield, and a portion

FEB 14 1941

of Block 3 of Plat "H" Addition to Marshfield. Right of way file No. 8058.

Bargain and sale deed conveying unto Freeman Youmans and wife 0.29 acre of land situate in the northwest quarter (NW $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 4, Township 2 South, Range 2 East, W.M., Clackamas County. Right of way file No. 8244.

Bargain and sale deed conveying unto Gardner Mill Company, for the consideration of \$59.16, 0.51 acre of land in the town of Gardner, Douglas County, heretofore used as a temporary shoofly detour in connection with the construction of the approach to the Umpqua River Bridge. Right of way file No. 1243.

Bargain and sale deed conveying unto the Brookings Land and Townsite Company 2,422 square feet of land situate in Lot 3, Block 4, town of Brookings, Curry County. Right of way file No. 7700.

Quitclaim deed conveying unto Frank Heck and wife a portion of the abandoned Pacific Highway in the town of Cottage Grove, Lane County. Right of way file No. 5697.

Bargain and sale deed conveying unto Nathan Cole and wife 0.16 acre of land situate in the northeast quarter (NE $\frac{1}{4}$) of the northwest quarter (NW $\frac{1}{4}$) of Section 14, Township 4 South, Range 1 West, W. M., Marion County. Right of way files Nos. 3208 and 3209.

Bargain and sale deed conveying unto Virgil T. Golden and wife 21,260 square feet of land situate in Lot 33 of Smith Fruit Farms No. 2, Marion County. Consideration \$950.00. Right of way file No. 5785.

The meeting adjourned at 5:15 p. m.

James E. ...
State Highway Engineer

W. S. ...
Secretary

Henry F. Cabell
Chairman

John W. ...
Commissioner

Hermon Olson
Commissioner

Portland, Oregon, February 27, 1941

The State Highway Commission met in regular session at 9:00 a. m. in the auditorium of the Public Service Building. Present were:

Henry F. Cabell, Chairman
Huron W. Clough, Commissioner
Herman Oliver, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction projects and for the sale of a building were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the awards would be made at 3:00 p. m. in the same room:

COLUMBIA RIVER HIGHWAY
ST. HELENS SECTION - GRADING AND PAVING

Roy L. Houck	\$17,188.50
United Contracting Co.	26,459.50
Babler Bros.	27,905.00
Porter W. Yett	28,574.00

MADRAS-PRINEVILLE SECONDARY HIGHWAY
LYTLE CREEK-CHOCO CREEK SECTION - GRADING AND ROADBED TOPPING

Berke Bros.	\$37,083.50
Roy L. Houck	37,507.50
Norris Bros.	37,851.00
Leonard & Slate	38,229.00
E. L. Rigdon	38,428.00
M. L. O'Neil & Son	38,517.00
E. C. Hall Co.	43,830.50
Vernon Bros. Co.	43,848.00
A. C. Greenwood Co., Inc.	45,624.50
Frank Penepacker	45,870.50
C. H. Grimstad and T. Vanderveldt	46,064.00

COLUMBIA RIVER HIGHWAY
RAMSAY-BLALOCK SECTION - GRADING, SURFACING AND BRIDGE

Leonard & Slate	\$85,031.00
Roy L. Houck	98,461.00
E. C. Hall Co.	128,544.00
A. C. Greenwood Co., Inc.	138,824.00

FEB 27 1941

COLUMBIA RIVER HIGHWAY
QUINTON-RAMSEY SECTION - GRADING, SURFACING AND WIDENING BRIDGE

Leonard & Slate	\$73,972.50
Roy L. Houck	93,417.00
E. C. Hall Co.	99,319.00
A. C. Greenwood Co., Inc.	112,729.10

KLAMATH FALLS-MALIN HIGHWAY
HENLEY SECTION - GRADING, SURFACING AND OILING

Clifford A. Dunn	\$19,307.50
------------------	-------------

OREGON COAST HIGHWAY
SOUTH NEWPORT SECTION - ROADSIDE IMPROVEMENT

Edward F. Altree	\$4,354.00
E. L. Gates	4,747.50
Leonard & Slate	5,124.00
M. E. Meyers & Son	5,200.00
A. Milne	5,511.00
Blair T. Alderman	7,009.00

COLUMBIA RIVER HIGHWAY
TUNNEL POINT-ROOSTER ROCK SECTION - GRADING AND TOPPING

General Construction Co.	\$338,755.00
K. L. Goulter & Puget Sound Bridge & Dredging Co.	376,945.00

WILSON RIVER HIGHWAY
DONALDSON CREEK-MILLS BRIDGE & McNAMARS CAMP-WASHBURN SECTIONS
SURFACING AND OILING

	<u>Using Asphalt</u>	<u>Using Tar</u>
Roy L. Houck	-	\$112,510.00
Babler Bros.	-	113,285.00
R. O. Dail & Warren Bros.	\$118,390.60	117,889.20
E. C. Hall Co.	-	118,957.50
Norris Bros.	-	121,081.90
Rogers Construction Co.	125,432.00	-
Homer G. Johnson	-	130,676.00
A. Milne	-	131,204.50

SALE OF BUILDING IN HUBBARD

BUILDING NO. 3198 (Former owner Bertha Heisig)

Carl R. Beeson	\$12.50
----------------	---------

Mr. F. Wahley Watson, Secretary of the State Mining Board, was present in regard to the rerouting of the Baker-Homestead Highway from the town of Halfway to Homestead. He was informed that the Commission has not as yet made its decision in regard to this matter but expects to do so later in the meeting.

Following the departure of Mr. Watson the Commission reconsidered the matter and decided as follows: The Highway Commission will reroute the Baker-Homestead Primary State Highway from the foot of Timber Canyon Grade to Homestead, via Robinette and Brownlee; and will retain on the primary state highway system the section of the present Baker-Homestead Highway from the foot of Timber Canyon Grade to the town of Halfway. The Highway Commission will also designate as a state secondary highway, upon receipt of appropriate resolution from the Baker County Court, a section of the Pine Valley Road, approximately three miles in length, which extends easterly from Halfway toward Homestead; and will designate as a state secondary highway, upon receipt of appropriate resolution from the Baker County Court, the county road which extends from the town of Halfway to the town of Cornucopia. The above arrangement is contingent upon the willingness of Baker County to accept and assume future jurisdiction of the section of the Pine Valley Road between Halfway and Homestead, beyond the three-mile section which the Highway Commission is willing to place on the state secondary highway system. A letter directed to the Baker County Court, outlining the above arrangements, was signed by the Commission the following day.

Mr. Don Peoples, Secretary of the Bend Chamber of Commerce, was present and discussed briefly with the Commission matters pertaining to the proposed military strategic highway system. He particularly inquired whether or not the Warm Springs Highway between Madras and the Wapinitia Highway Junction would be included in such system. He was informed that the final designation of roads for this system will be decided by the United States War Department.

Mr. Peoples also inquired as to the plans of the Commission for the reconstruction of The Dalles-California Highway between Madras and Terrebonne and was informed that the Commission has not as yet made a definite commitment to this project.

The Engineer reported on the number of automobiles that are owned by the State Highway Department. He submitted a list of the same together with the names of the department employees to whom they have been assigned. Action on this matter was deferred by the Commission pending study of the list.

The Engineer reported receipt of information to the effect that extensive log-hauling operations are to be commenced shortly on the Fremont Highway between Paisley and Lakeview. He requested instructions in view of the fact that this road is light-type construction and probably will be severely damaged if subjected to log-hauling traffic. After discussion the Commission authorized the Engineer to post this road for a reduced load limit if he finds that necessary when log hauling operations get under way.

In this connection the Commission confirmed the authority previously given the Engineer to post any state highway for a reduced load limit at any time if in his opinion such posting is required in order to preserve the road surface. However, he was instructed to notify the Commission of such posting at the first meeting of the Commission after the reduced load limit signs have been placed, when the Commission will confirm the action by appropriate resolution.

The Engineer reported briefly on the cost to grade and surface the Beech Creek Section of the Pendleton-John Day Highway, in Grant County. He advised that this section is four miles in length and that the survey for the same has already been made by the Public Roads Administration for improvement as a forest highway project although the quantities have never been computed or an estimate prepared. The Public Roads Administration, he said, roughly estimates that the work will cost about \$60,000 per mile or a total of \$240,000. After discussion the Engineer was instructed to secure from the Public Roads Administration an accurate estimate of the cost to do this work.

The Secretary presented a letter from contractor Roy L. Houck, which letter is dated February 27, 1941, 10:30 a. m., and concerns his bid submitted this day for grading and paving the St. Helens Section of the Columbia River Highway, in Columbia County. Mr. Houck alleges that he made a mistake in bidding Item No. 4, 6,000 cu. yds. general excavation, unclassified, his bid being 14¢ per cu. yd. whereas it should have been 51¢ per cu. yd., and in view thereof he asks the privilege of withdrawing his bid. The Attorney advised that Mr. Houck is strictly within his legal rights in withdrawing his bid, inasmuch as the bid has not as yet been accepted by the State Highway Commission, provided, however, that he prove conclusively that he made a mistake in submitting his bid for this particular item. After considerable discussion of this matter the Commission decided to award the contract to Mr. Houck notwithstanding his request. The Attorney was instructed to search the statutes and submit to the Commission his legal opinion in regard to Mr. Houck's rights, taking into consideration not only the legality of the procedure but also the effect that approval of Mr. Houck's request would have on the Commission from the general public standpoint.

A delegation was present from the city of Ontario. Mayor Elmo E. Smith headed the group which also included City Councilman Thomas T. Ennor and City Engineer C. Frank Trow. They asked the Commission to reroute the Old Oregon Trail along First Street, which is one block west of the present location on Oregon Street, from Fourth Avenue to the north city limits. The matter was referred by the Commission to the Engineer for investigation and report at the next meeting.

Mayor Smith also asked the Commission to improve some of their city streets. He said that, if the State Highway Department would do this work for the city, the city would submit a certified check in advance to pay the cost. The Commission referred this matter also to the Engineer for investigation and report.

The Engineer reported receipt of a letter from F. P. Ryan, City Recorder, Ontario, requesting the services of one of the Highway Department's

FEB 27 1941

engineers to outline a program for drainage and oiling of the city streets. He reported also a similar request from County Judge J. H. Allen of Grant County for the loan of the services of an engineer to perform part-time engineering work for Grant County. He advised that there is a shortage of engineers at the present time because the army is calling so many of them in the draft, and he did not believe that he could spare anyone to do this work. In view of the circumstances he recommended that the requests be denied. The Commission approved the recommendation.

In this connection the Engineer brought up for discussion the question whether or not to continue the arrangement with Tillamook County for furnishing a locating engineer to have charge of a location survey of a county road in northern Tillamook County, known as the Ridge Route. He said that the Highway Department has been carrying this locating engineer on its pay roll for the last year and one half although the county has been paying the salaries of the rest of the crew and the other expenses. He recommended termination of this arrangement, it appearing to him that the Commission has fulfilled any obligation it might have had to the county. The Commission approved the recommendation, effective April 1, 1941.

The Attorney reported receipt of a complaint from Mr. Frazier, Constable, Newport, who alleges that motorists drive through Newport at wild and excessive speeds and asks that the State Highway Commission do something to remedy the situation before serious accidents occur. He suggests the painting of traffic lines across the highway at two intersections and the installation of a traffic control signal on the highway at its intersection with Sixth Street. The matter was referred to the Engineer for investigation and report.

The Attorney also reported on the hearing recently held by Mr. Ormond R. Bean, Public Utilities Commissioner, with respect to the petition made by the Oregon Electric Railroad and the United Railroad to the Interstate Commerce Commission for permission to abandon certain car tracks and certain service along Front Avenue, Portland. He advised that he has every reason to believe that this matter will be adjusted satisfactorily in the not distant future and suggested an early conference with officials concerned which would probably enable the Commission to reach a decision at its next meeting whether or not to award the contract for the revision of the Hawthorne Avenue bridge, bids for which were taken on December 18, 1940; and whether or not to advertise for bids for additional work in connection with the Front Avenue project. The Commission approved the suggestion but deferred the setting of a date for such conference until later.

The Attorney discussed with the Commission the advisability of employing additional right of way men in order to expedite right of way purchases and to clear projects from the right of way standpoint so as to avoid unnecessary delays in advertising projects for bids. He advised that at present all of his right of way men are busily engaged on special assignments and there are a number of projects that have not as yet been assigned because he has no one to assign them to, and unless he can employ additional men to do this work the probabilities are that the projects cannot be advertised for

bids as planned. After discussion the Commission authorized the Attorney to employ two additional right of way men on a temporary basis and instructed him to transfer Mr. Mark McCallister, who has been carrying on negotiations for the right of way for the Front Avenue Project in Portland, to Gold Beach in an endeavor to expedite the acquisition of right of way that is needed for the revision of the Oregon Coast Highway at that place.

Mr. Paul B. Rynning, County Engineer, Jackson County, appeared before the Commission in behalf of the Jackson County Court and requested the following improvements: (1) Non-skidding of the Pacific Highway between the Josephine County line and Central Point, particularly the first four miles south of Gold Hill; (2) removal of excessive curvature from the Crater Lake Highway between Trail and McLeod Bridge, a distance of about seven miles. The Engineer was instructed to investigate both of these projects and to report to the Commission at its next meeting how much it will cost to do the work involved.

The Commission discussed a letter from J. Arthur Berg, Coquille, Attorney for Strong and McDonald, a Washington corporation, which has a contract with the federal government for the improvement of the jetty at Bandon. Mr. Berg advises that the contractor intends to secure rock from a government-owned quarry at Bandon, which quarry joins a state-owned quarry, and would like to obtain rock from the state's quarry as well as from the other. However, investigation of the records shows that the state does not have clear title to the same and that it is being claimed by Coos County as the result of a tax foreclosure proceeding in 1935. Mr. Berg further states that his clients are very anxious to start work and would like authority to enter the state's quarry at once, pending settlement of the question of ownership. The Attorney advised that the delinquent taxes on this property amount to \$84.17 and that Coos County is willing to quitclaim any interest that it has in the area if the state will pay the taxes. The Commission authorized the payment of the taxes in such amount under the condition that the county will give the state a deed to the area.

In this connection the question arose how much to charge the jetty contractor for rock taken from this quarry. After discussion it was agreed to charge the contractor at the rate of \$0.05 per ton for the same, using as a basis of measurement the actual tonnage determined by the army engineers. The Commission ordered the matter covered by appropriate written agreement.

The Engineer reported briefly on the conference held in the office of Captain Robert C. Williams, Quartermaster Corps, at Hermiston, on Wednesday, February 19, and Thursday, February 20, 1941, for a discussion of matters pertaining to the construction of access roads to the Umatilla Ordnance Depot which is situated about five miles west of Hermiston. (See report of H. W. Libby, Chief Locating Engineer, dated February 24, 1941.) It appears from the report, among other things, that a road connection is desired between the Ordnance Depot and the Stanfield-Boardman Highway near the Morrow-Umatilla County line, which roadway involves the construction of a railroad grade separation structure over the O.W.R. & N. Company's tracks. After discussion of this entire matter the Commission authorized the Engineer to make a vicinity survey of the project.

The Secretary presented a letter from S. E. Anzalone, Hubbard, Oregon, and a resolution from the Washington County Farmers Union and the Legislative Committee of Pomona Grange, Washington County, urging the reconstruction of the Tualatin Valley Highway for four lanes of traffic between the Multnomah County line and the Yamhill County line. The Commission found it necessary to deny the request due to lack of funds with which to finance the work. However, Chairman Cabell expressed himself as being favorable to the building of a four-lane pavement between Sylvan and West Slope, which in his estimation is the most important section, when the Commission is financially able to do it.

The Commission adjourned at 12:00 noon and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

A delegation from Estacada and Sandy, consisting of B. Schoenberg; S. C. Wooster, Mayor of Estacada; Charles Sharnke, Mayor of Sandy; George Anderson, President, Sandy Chamber of Commerce; and Bob Smith, Sandy, came before the Commission and asked for the following improvements: (1) straightening and surfacing of the Woodburn-Sandy Secondary Highway No. 161 between Eagle Creek and Sandy, a distance of about six miles; (2) reconstruction of the uncompleted section of the Woodburn-Sandy Secondary Highway between Estacada and Springwater, a distance of about three miles. Mr. Schoenberg headed the group. He presented petitions signed by numerous residents and property owners of Clackamas County urging these improvements. They were informed that the Commission is not in position today to make any definite commitment to the projects but will be pleased to inspect them again and will let them know as soon as possible what can be expected.

Mr. Theodore Jensen, Portland, representing Mrs. A. Caswell, also of Portland, appeared before the Commission in regard to the settlement for right of way through Mrs. Caswell's property near Tigard. Mr. Jensen stated that Mrs. Caswell owns a five-acre tract at the northwest corner of the Metzger Road and Capitol Highway intersection and that the state is taking 0.77 acre of this property for right of way and has offered to pay for the same the sum of \$1,250, which amount Mrs. Caswell feels is far less than the property is worth; further, that Mrs. Caswell is of the opinion that she is entitled to \$2,250, although she has stated a willingness to accept the sum of \$1,750 as a compromise settlement. Since making this compromise offer, he added, the state's representative has offered to pay Mrs. Caswell the sum of \$1,500, which she has refused. The Commission's Attorney advised that he has had the property appraised by three different appraisers all of whom have set a value of \$1,750 for the property. After discussion the matter was referred by the Commission to Chairman Cabell with full power to act. He was authorized to pay a maximum of \$1,750 for the property if he thinks it is worth such amount after inspection of the same.

The County Court of Lincoln County, represented by County Judge F. E. Gilkey and County Commissioners E. G. Calkins and J. C. Barclay, was present and discussed with the Commission Lincoln County's indebtedness to the state for road building purposes, amounting to \$15,500. Judge Gilkey asked the Commission to approve a compromise settlement of this account if

the Commission could not see its way clear to cancel it outright. He was informed by Chairman Cabell that the Commission could not cancel the claim in fairness to other counties with whom the Commission has reached satisfactory settlements. However, the Commission will be pleased to receive a compromise offer from the county. He inquired whether or not the county court has any proposition to make with respect thereto. Judge Gilkey replied that the county is willing to pay the state \$7,500 to clean up this account if the Commission will spend this money for the improvement of the Siletz Secondary State Highway between the towns of Kernville and Siletz and will contribute at least an equal amount of other state funds in conjunction therewith, making a project costing \$15,000. The Commission took the matter under advisement and advised that the county would be given an answer after the next meeting of the Commission.

At 3:00 p.m. Chairman Cabell announced the following awards of contracts and sale of building, bids for which were taken at the morning session, such awards having been previously approved by the Commission by unanimous vote:

"St. Helens Section of the Columbia River Highway, in Columbia County. 0.52 mile grading and 0.64 mile paving. Roy L. Houck, Salem, submitted the low bid for this project in the amount of \$17,188.50. The United Contracting Company, Portland, submitted the second-low bid in the amount of \$26,459.50. There were two higher bids. The Commission awards this contract to Roy L. Houck at his low bid of \$17,188.50.

"Lytle Creek-Ochoco Creek Section of the Madras-Prineville Secondary Highway, in Crook County. 2.24 miles grading and 4.05 miles roadbed topping. Eleven bids were received for this project, the low one being that of Berke Bros., Portland, at \$37,083.50, and the second-low bid being that of Roy L. Houck, Salem, at \$37,507.50. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Ramsay-Elalock Section of the Columbia River Highway, in Gilliam County. 3.06 miles grading and bituminous macadam surfacing; also construction of a reinforced concrete bridge. The low bid for this project was submitted by Leonard & Slate, Multnomah, at \$85,031.00. The second-low bid was submitted by Roy L. Houck, Salem, at \$98,461.00. There were two higher bidders. The Commission awards this contract to Leonard & Slate at their low bid of \$85,031.00.

"Quinton-Ramsay Section of the Columbia River Highway, in Gilliam County. 2.24 miles grading and bituminous macadam surfacing, also widening of a concrete bridge. Leonard & Slate, Multnomah, submitted the low bid for this project at \$73,972.50. Roy L. Houck, Salem, submitted the second low bid in the amount of \$93,417.00. There were two higher bidders. The Commission awards this contract to Leonard & Slate at their low bid of \$73,972.50.

"Henley Section of the Klamath Falls-Malin Highway, in Klamath County. 0.55 mile grading, surfacing and road mix oiling. Only one bid was received for this project, it being that of Clifford A. Dunn, Klamath Falls, at \$19,307.50. The Commission awards this contract to Clifford A. Dunn at his bid of \$19,307.50.

"South Newport Section of the Oregon Coast Highway, in Lincoln County. 0.58 mile roadside improvement. Six bids were received for this project, the low one being that of Edward F. Altree, Agate Beach, at \$4,354.00, and the second-low being that of E. L. Gates, Trail, at \$4,747.50. The Commission awards this contract to Edward F. Altree at his low bid of \$4,354.00.

"Tunnel Point-Rooster Rock Section of the Columbia River Highway, in Multnomah County. 1.7 miles grading and roadbed topping. Only two bids were received for this project, the low one being that of General Construction Company, Seattle, Wash., at \$338,755.00, and the other being that of K. L. Goulter and Puget Sound Bridge & Dredging Company, Portland, at \$376,945.00. The Commission awards this contract to the General Construction Company at its low bid of \$338,755.00.

"Donaldson Creek-Mills Bridge and McNamars Camp-Washburn Sections of the Wilson River Highway, in Tillamook and Washington Counties. 14.21 miles surfacing and 15.22 miles oiling. Roy L. Houck, Salem, submitted the low bid for this project, based on the use of tar, at \$112,510.00. He did not submit a bid based on the use of asphalt. The second-low bid was submitted by Babler Bros., Portland, at \$113,285.00, based on the use of tar. They also did not submit a bid based on the use of asphalt. There were six higher bidders. The Commission has referred all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

Sale of Building:

"Sale of residence building, No. 3198, formerly owned by Bertha Heisig, at Hubbard. Only one bid was received for the purchase of this building being that of Carl R. Beeson, Hubbard, at \$12.50. The Commission considers the bid of Mr. Beeson satisfactory and accordingly the building is sold to him at his bid price."

A delegation from Nyssa, headed by Mr. Frank Morgan, Secretary of the Nyssa Commercial Club, came before the Commission and requested the improvement of Main Street, Nyssa, (state highway route) from the railroad underpass to their school, a distance of five blocks. Others in the delegation were: L. Thompson, Jim Olson, Mayor; Fred Burgerson, representing the

Amalgamated Sugar Company; Herschel Thompson, Councilman; and L. P. Thomas, Editor of the local newspaper. They particularly requested construction of curbs on both sides of the street, paving full width between curbs, and installation of a storm sewer. The Commission referred this matter to the Engineer for investigation and report at the next meeting.

Mr. Morgan also asked for replacement of the old bridge across the Snake River just east of Myssa. He said that the existing bridge is an old two-lane structure built in 1911 and is entirely inadequate for present day use. The Commission took no action on the matter.

The Commission was also asked to rebuild and oil the secondary state highway which extends south and east from Adrian to the Idaho state line opposite Homedale, a distance of about ten miles. Mr. Morgan said that this is a heavily-traveled road and is badly in need of improvement; further, that the Idaho section of the road is now paved up to the state line. The matter was referred by the Commission to the Engineer for investigation and report.

Mr. Charles R. Cooley and his attorney, Mr. Porter J. Neff, Medford, conferred with the Commission in regard to settlement for right of way needed for a revision of the Pacific Highway across Mr. Cooley's land adjacent to the Rogue River between Grants Pass and Medford. Mr. Neff stated that the state took a strip 25 feet wide across the front of Mr. Cooley's property, and when negotiations were under way for the purchase of the same Mr. Cooley was given to understand that the grade of the new highway would be only 2½ feet higher than the old road and that the highway improvement would not necessitate the destroying of nine trees, so under such supposition Mr. Cooley executed a deed conveying the property to the state. However, when the highway was built, it was found that the grade line was six feet above the natural ground surface, which eliminated the use of Mr. Cooley's property for business purposes, and that the trees had been cut. Mr. Cooley, he said, feels that his property has been greatly depreciated by reason thereof, and is now asking additional compensation for his loss.

The Assistant Attorney confirmed the statement made by Mr. Neff as to the grade of the highway and removal of the trees. He also advised that the price originally agreed upon for the land was \$119, and that Mr. Cooley is now asking an additional sum of \$1,000 as damages. Chairman Cabell advised that the Commission is reluctant to reopen settlements when they have once been concluded, although it does so occasionally when it is convinced that an honest mistake has been made. Attorney Devers gave as his opinion that an honest mistake was made in this instance. After further discussion Commissioner Clough recommended the reopening of this settlement. Commissioner Oliver concurred, as did also Chairman Cabell, making the decision unanimous. The Attorney was thereupon instructed by the Commission to negotiate a new settlement with Mr. Cooley disregarding entirely the original settlement.

A delegation from Washington County, consisting of members of the County Court, Judge H. D. Kerkman and Commissioners James Lewis and J. W. Hughes; Charles O. Roe, Secretary of the Forest Grove Chamber of Commerce;

Fred Gardiner, President of the Forest Grove Chamber of Commerce, W. E. Woodford, J. A. Thornberg, and Loyal M. Graham, all of Forest Grove; J. W. Barney, City Manager of Hillsboro; and Mr. McMahan, came before the Commission and urged the reconstruction of the Tualatin Valley Highway between Portland and Forest Grove for four lanes of traffic. Judge Kerkman headed the group. They alleged that this highway is the second-heaviest-traveled highway in the state and particularly urged the Commission to construct a highway of such width this year between Portland and Beaverton.

Chairman Cabell advised that heavy travel on this road is accounted for by the opening to public use of the Wolf Creek Highway west of Sunset Camp, and gave as his thought that this would be greatly reduced when the Wolf Creek Highway is completed into Portland, which he predicted would be in the not distant future. He also advised that pressure is being brought on the Commission to construct the section of the Wilson River Highway between Glenwood and Banks, which would also have a tendency to relieve the traffic on the Tualatin Valley Highway. He pointed out that the Tualatin Valley Highway closely parallels the Wolf Creek Highway at the eastern end and in the opinion of the Commission it is not good business to build to high standards two such highways that are in such close proximity to each other. The Commission has made no commitment, he said, relative to the construction of the Glenwood-Banks cutoff but is waiting to see what effect the completion of the Wolf Creek Highway into Portland will have on the volume of traffic that uses the Tualatin Valley Highway.

Judge Kerkman repeated their request for a four-lane highway between Portland and Beaverton this year and was informed by Chairman Cabell that the Commission will bear the project in mind but is not in position to make any definite statement or promise in regard thereto at this time.

Judge Kerkman also asked the Commission to improve another section of the Cornelius Pass county road as a federal aid secondary highway project. He advised that Washington County will grade and surface the section if the state will oil it. It was pointed out to him that the Commission has already completed two contracts on this road; also that federal aid secondary highway funds available to the Commission are very limited, being insufficient to distribute to all of the counties in any one year, so the Commission has made a practice to allocate these funds to certain counties in one year and to other counties the next year, and in view thereof the prospect for applying any of the current year's funds to the Cornelius Pass road is not very promising.

Commissioner Hughes asked the Commission for cooperation in constructing a short section of a road connecting the new Pacific Highway with the old highway at Sherwood. He said that the new highway intersects the old highway near the Votaw Undercrossing of the Southern Pacific Railroad where the old highway is in a deep cut and sight distance is very limited, introducing a serious traffic hazard. The people of Sherwood, he said, have asked for a new connection about 500 feet long, which would eliminate this hazard, and the county court has agreed to build this connection, including the grading, surfacing and oiling of the same, if the state will purchase the right

of way which is estimated to cost \$650.00. The matter was referred to the Engineer for investigation and report at the next meeting.

A Mr. Nyberg, who was present, suggested a revision in the alignment of the Southern Pacific Railway near Cook's Station, which he said would eliminate five railroad grade crossings on county roads. The matter was referred by the Commission to the Engineer for investigation.

A delegation from Lane County, representing the Lorane Road Committee, was present and asked the Commission to oil the Territorial Secondary State Highway between Gillespie Corners and the Douglas County Line. This delegation was headed by Thomas B. Mitchell and included Mrs. Marie Mitchell, H. S. Addison, and Mrs. Charles B. Mitchell. They stated that the road is breaking up badly due to the hauling of logs thereover from a new timbered area which has just been opened up west of the road and that logging operations will be carried on in this district for many years. The Engineer advised that the Commission has budgeted \$20,000 for improvement of this highway south of Monroe which is the section requested by the county court. After discussion the Commission instructed the Engineer to investigate this entire highway and report his findings to the end that the Commission will be in a position to decide definitely where the moneys budgeted for this highway should be spent.

Mr. Carl Curlee, Secretary of the Albany Chamber of Commerce, was present and requested permission to conduct a log rolling contest on Waverly Lake at Albany during the Fourth of July celebration that the Chamber of Commerce is sponsoring at this place. He said that the celebration is to be a nonprofit affair, promoted and staged by the united civic clubs and business people of Albany. The Commission approved the request subject to the condition that the Chamber of Commerce will repair any damage that might be done to the state's property, will clean up the premises to the satisfaction of the Engineer after the celebration is over, and will see that the highway is properly policed so that cars are not parked on the highway. The Commission ordered the matter covered by written agreement.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and reported that several bridges on the forest highway section of the Mt. Hood Highway, near Government Camp, are badly in need of replacement and that the highway itself should be realigned to eliminate numerous sharp curves. He asked the Commission to join with the regional forester and himself in requesting authority from the officials in Washington, D. C. to make surveys as may be necessary with regard thereto. He explained that funds to finance the surveys are available from a lump sum for surveys already approved. After discussion the Commission approved Mr. Lynch's request and thereupon signed with him the following letter directed to the Chief, Forest Service, and the Commissioner of Public Roads, Washington, D. C.:

Authority is requested to make surveys looking to the reconstruction of several deficient bridges and the approach grading there-to on the Mt. Hood Highway, Oregon Forest Highway Route 25.

Funds for this work are available from the Lump Fund Survey already approved by the Secretary.

Mr. Lynch also discussed with the Commission the advisability of reallocating the forest highway funds heretofore budgeted for the improvement of the Oregon Coast Highway south of Port Orford but no definite action was taken thereon.

Mr. Lynch also brought up for discussion the allocation of federal lands highway funds apportioned to the State of Oregon. After discussion the Commission by unanimous vote approved and signed with Mr. Lynch the following letters directed to the Commissioner of Public Roads, Washington, D.C., with respect to such funds:

An Act approved June 8, 1938, described as "An Act to amend the Federal Aid Act approved July 11, 1916, as amended and supplemented and for other purposes," authorizes that funds be made available for the survey, construction, reconstruction and maintenance of main roads through unappropriated or unreserved public lands, non-taxable Indian lands, and other Federal reservations other than Forest reservations.

The apportionment to the State of Oregon of \$60,542 for the fiscal year 1940 was recommended on May 17, 1939, for allocation to Oregon Federal Lands Highway Project FLH 3-G(1). This was approved on June 3, 1939.

The final voucher on FLH 3-G(1) has now been paid in the amount of \$54,041.00, leaving a balance of \$6,501.00. We recommend that this balance be now applied to Oregon Federal Lands Highway Projects Nos. SN-FLH 3-A(2), B(2), C(2), F(2) and G(2), and the revised allocation of 1940 funds is as follows:

FLH 3-G(1), Owyhee River-Tudor Ranch Section of the I.O.N. Highway, in Malheur County. Extends from the end of construction 1,500 ft. west of the crossing of the Owyhee River, South and West to the North end of Project FLH 3-F(1), near the Tudor Ranch. Work to be done consists of grading and topping, of which 9.6 miles are on public land. Estimated cost is \$133,000.00, of which \$54,041.00 is to come from 1940 FLH funds. - - - - - \$54,041.00

SN-FLH 3-A(2), B(2), C(2), F(2) and G(2), Oregon-Nevada State Line-Owyhee River Section of the Idaho-Oregon-Nevada Highway, in Malheur County. Extends from the Oregon-Nevada State Line northerly to 1,000 ft. south of the Owyhee River Bridge. Work to be done consists of approximately 68 miles of surfacing and oiling. Estimated cost \$150,211.60, of which \$6,501.00 is to come from 1940 FLH funds. - - - - - \$6,501.00

Total \$60,542.00

An Act approved June 8, 1938, described as "An Act to amend the Federal Aid Act approved July 11, 1916, as amended and supplemented and for other purposes", authorizes that funds be made available for the survey, construction, reconstruction and maintenance of main roads through unappropriated or unreserved public lands, non-taxable Indian Lands and other Federal reservations other than Forest reservations.

The apportionment to the State of Oregon under the provisions of this Act for the 1942 fiscal year is in the amount of \$96,839.00.

In accordance with previous correspondence and commitments for the purpose of allocating \$47,115.57 or approximately 50% of the amount apportioned to the State of Oregon, we recommend the following project and allocation of funds:

SN-FLH 3-A(2), B(2), C(2), F(2) and G(2), the Oregon-Nevada State Line-Owyhee River Section of the Idaho-Oregon-Nevada Highway, in Malheur County. Extends from the Oregon-Nevada State Line north-erly to 1,000 ft. south of the Owyhee River Bridge. Work to be done consists of approximately 68 miles of surfacing and oiling. Funds to be used in conjunction with 1940 and 1941 Federal Lands Highway funds. Estimated cost is \$150,211.60, of which \$47,115.57 is to come from the 1942 FLH funds, - \$47,115.57.

The Attorney brought up for discussion the claim of Wm. Van Cleave against the Dolan Construction Company arising out of the Dolan Construction Company's contract No. 1933 with the Commission for the construction of a bridge over the North Fork of the Nehalem River and contract No. 2204 with the Commission for certain oiling work in Tillamook County on which contract the Dolan Construction Company was a subcontractor. The Attorney advised that on several occasions Mr. Van Cleave had requested a conference to be attended by the interested parties and the Attorney stated that a date several times was fixed and the parties notified but at no time did Mr. Van Cleave attend the conference. The last conference was fixed for January 30 and there appeared at that time Mr. W. H. Lynch and Mr. Tom Davis, representing the Public Roads Administration; Mr. Dolan and his attorney, Mr. Winslow; Mr. Ray Webber, representing the State Highway Department, and a representative of the surety company. The Attorney further advised that the projects involved are federal aid projects and that the Public Roads Administration will not reimburse the state for advancing state funds to finance the work until the Van Cleave claim has been disposed of. He recommended in view of the circumstances that this transaction or controversy be deemed closed so far as the State Highway Commission is concerned and that the Commission so inform the Public Roads Administration and make application for final payment of the money due the state under such contracts with the understanding that the state would assume any responsibility with respect to the denial of Mr. Van Cleave's claim. After discussion the Commission approved the recommendation and instructed the Attorney to direct a letter to Mr. Lynch, District

Engineer of the Public Roads Administration, in conformity therewith.

The Commission discussed projects for contracting at its next regular meeting on April 3 and 4, 1941, and authorized the Engineer to advertise the following projects for bids to be received at that time, and to include in the advertisement other projects heretofore approved by the Commission for contracting if they have been cleared from the right of way standpoint:

Clackamas Grade Separation, Bridge & Box Culvert.....	41 OS	\$ 30,000
Taylor Creek Section (Ochoco), Grading.....	41 FA	74,000
Pendleton-Adams, Roadside Improvement	41 FA	9,000
Dixie Summit Section, Grad., Surf. & Bit. Mac.....	42 FA	169,000
Long Creek-Fox, Grad., Surf. & Oil (2 Bridges).....	42 FA	113,500
Morrow Co. Line-Stanfield, 2 Bridges	42 FA	8,000
Warrenton Section, Grad. & Pav.....	41 FAS	25,000
Banzer Bridge-Mist, Grad., Surf. and Bit. Mac.....	42 FAS	82,000
Vandehey & Van Dyke Sections (Nehalem), Grad., Surf. & Oil.....	42 FAS	29,000
Cow Hollow Cr.-Adrian Jet., Bridge, Gr., Surf. & Oil...	42 FAS	24,400
Trout Creek Section (Hood River Hwy.), Gr., Surf. & Oil.	41 State	41,300
West Fork of Dairy Creek (Wolf Cr.), Bridge.....	41 State	5,000
Yamhill River Bridge at Dayton, Reconstruction.....	41 State	22,600
Interstate Bridge, Reconst. Exp. Jts. & Resurface.....	41 State	12,000
Seaside-Gearhart, Oiled Footpath.....	41 State	8,200
		<u>\$653,000</u>

In this connection the Engineer advised that the Dayton Bridge over the Yamhill River, which consists of a 200-foot steel span and an 884 lin. ft. untreated frame trestle, is badly in need of repair, particularly the timbered portion of the bridge. He estimated the cost of the repairs at \$22,650 and requested authority to advertise this project for bids to be received at the next meeting. The Commission approved the request.

The Engineer also requested an authorization for an expenditure of about \$3,300 for improvements to the maintenance headquarters at Newport. He explained that the Commission some time ago authorized construction of a building at this headquarters when it is needed; but the improvement proposed now is simply the preparation of the site and the grounds, including the fencing of the area and the installation of gasoline and kerosene pumps which can be used to good advantage by the construction and maintenance crews working out of such place. The Commission approved the request.

The Commission adjourned at 5:30 p. m. to reconvene the following morning in the same room.

Portland, Oregon, February 28, 1941

The State Highway Commission reconvened at 9:00 a. m. in the auditorium of the Public Service Building with all Commissioners present and participating. Also present were the State Highway Engineer, the Attorney and the Secretary.

Bids as follows for highway construction projects were opened and read in conformance with previously published notice, following which Chairman Cabell announced that the award of contracts would be made at 3:00 p. m. in the same room:

THE DALLES-CALIFORNIA AND FREMONT HIGHWAYS
LAPINE ROCK PRODUCTION

Chester T. Lackey	\$17,700.00
A. S. Wallace,	25,440.00

*Bidder will not accept award of this contract unless also awarded W. Sheridan project.

**Bidder will not accept award of this contract unless also awarded Deer Creek-Bellevue project.

FEB 28 1941

The Attorney brought up for discussion a request from contractor Charles H. Leonard for reimbursement of one half of the expense incurred by him in defense of an action brought by laborers employed by him on his state highway contract, No. 1754, for grading the Brooks-Jordan Creek Section of the Wilson River Highway, in Tillamook County. The Attorney recalled that the trial court in this case decided against Mr. Leonard and that the State Highway Commission authorized its attorney to aid Mr. Leonard in the prosecution in an appeal to the Supreme Court, which was done and the Supreme Court reversed the decision of the trial court, the cost to the state in such appeal amounting to approximately \$1,100, which represents the cost of preparing the transcript of testimony. The Attorney advised that Mr. Leonard claims that he spent, in connection with the litigation in carrying the case through the trial court, something in excess of \$4,000, and he has requested the state to reimburse him for one half such amount. He gave as his opinion that there are no legal barriers to the Commission reimbursing Mr. Leonard if the Commission so desires and feels that is the proper thing to do in view of the benefits that the state derived from the litigation. It was the Commission's thought that Mr. Leonard should have presented this matter to the Commission at the same time that he asked the Commission to join with him in making his appeal to the Supreme Court, and that the Commission could not now approve the additional expenditure without establishing a very dangerous precedent. In view thereof the Commission denied the request; however, indicated that it would not oppose payment of the claim if it were presented to the Legislature. The Attorney was instructed to so inform Mr. Leonard.

The Commission discussed a claim in the amount of \$55.30 from the United States Forestry Department for reimbursement for trees destroyed in connection with the reconstruction of the Low Pass Section of the Siuslaw Highway in Lane County. The Commission considered that the filing of the claim is a departure from the usual practice in connection with construction of highways through national forests and in view thereof decided not to pay it unless it cannot be avoided. The matter was referred to the Attorney to handle.

The Attorney brought up for discussion the matter of payment of irrigation and drainage assessments at the State Highway Department shops at Klamath Falls. The Commission authorized payment of such assessments provided they represent payments in connection with bonded indebtedness and do not represent payments for water supply, and provided further that the Commission has legal authority to spend state highway funds for such purpose. The matter was referred to the Attorney to pass on the legal features.

The Commission considered a request from the Parkrose Lions Club for permission to either attach a small metal sign to the large Parkrose signboard on Sandy Boulevard near Northeast 122nd Avenue, Portland, or to maintain a separate signpost on the highway right of way near such location for the common use of clubs and lodges of Parkrose. The Commission approved the installation of a standard service-club sign rack.

The Attorney brought up for discussion a request from the United States Reclamation Service that the state pay a portion of the cost of certain

irrigation canal construction across The Dalles-California Highway near Bend. It appears that a structure is involved which is estimated to cost approximately \$10,000 and that the Bureau of Reclamation is asking the state to pay one half of this expense, basing its request on the Federal Reclamation Law of August 30, 1890. After discussion the Commission authorized the payment of one half of the cost of this structure with state highway funds if absolutely necessary.

The Engineer brought up for discussion the matter of providing temporary electric service for operation of the Interstate Bridge between Portland and Vancouver. He recalled that some time ago the Commission authorized an expenditure to provide a new motor generator set for this purpose in view of the discontinuance of electrical facilities by the Portland General Electric Company, and it was thought at that time that the installation would be completed early this year, and the Portland General Electric Company agreed to continue servicing this structure in the meantime. However, delivery of the new motor generator set has been delayed by the manufacturers because of priority orders for defense purposes. It is evident, he said, that the power company has overlooked this feature and has disposed of a portion of its trestle on which its power line was carried and the purchaser plans to remove the trestle at once, and if he does so it will mean discontinuance of the electrical service to the bridge. It is possible, he said, to provide temporary service by constructing a short line from the end of the power company's trestle that is still standing but this will cost about \$400.00, which amount the power company is asking the Highway Commission to pay. The Commission approved the expenditure if it cannot be avoided. The Attorney was instructed to consult the Public Utilities Commissioner in regard thereto.

The Commission discussed and approved the application of the Bonneville Power Administration for permission to construct a power pole line across State Secondary Highways No. 334 and No. 335, in Umatilla County, which is necessary in connection with the construction of the power administration's transmission line between Walla Walla and Pendleton. (Decision reconsidered at meeting on March 24, 1941.)

The Engineer reported difficulties in securing right of way from Mr. L. A. McClintock for the Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway, in Umatilla County, bids for which were received today. The Commission decided to consider the bids for this job, notwithstanding the right of way difficulty, but to postpone the award of the contract until the right of way is cleared. The Assistant Attorney was instructed to give this right of way matter his personal attention at once.

Messrs. Lee Pratt and E. J. Hermans, property owners of Sheridan, Oregon, came before the Commission in regard to the proposed improvement of the Salmon River Highway through the town of Sheridan. Mr. Pratt stated that the plans call for the taking of some of his business property for right of way purposes, which he cannot afford to give up entirely because it is on the river side of the highway and there will not be sufficient room between the highway and the river on which to reestablish his buildings. In view thereof he asked authority from the Commission to use the highway shoulder and the

sidewalk area for private purposes, particularly the privilege of maintaining his gasoline pumps in their present location which would be on the highway right of way. Mr. Hermans asked a similar privilege. The State Highway Engineer advised that the Commission has an established policy which prohibits encroachments on highway right of way and unless the highway is entirely cleared of such encroachments the improvement could not proceed. Mr. E. J. Bayliss, Mayor of Sheridan, who was present, advised that the people of Sheridan are very anxious for a sidewalk. He guaranteed full width right of way, free and clear of all encroachments. Chairman Cabell advised that the Commission must adhere to its established policy and accordingly must require that all encroachments be eliminated.

Mr. Hermans then requested that all waste material from the highway improvement be deposited on his property in order to raise it to the proper level. The Commission approved the request provided there is any waste material available and provided the contractor is willing to deposit it on Mr. Hermans' property. The Engineer was instructed to bear this in mind.

Mrs. Stella Jones Bailey and her attorney, R. W. Wilbur, Portland, came before the Commission in regard to settlement for a gravel pit and a small parcel of land containing 0.23 acre that the state needs as right of way in connection with the improvement of the Jones Hill-Lena Section of the Oregon-Washington Highway, in Morrow County. Mr. Wilbur stated that Mrs. Bailey is willing to deed the right of way to the state without cost, but she wants the Commission to construct for her a new entrance roadway to her property from the highway. The matter was referred by the Commission to the Engineer for investigation and report.

Mr. Wilbur advised that the gravel pit site contains $7\frac{1}{2}$ acres and is part of an 80-acre tract of land that Mrs. Bailey is renting to a third party who contemplates purchasing the same, and if the state is determined to take the $7\frac{1}{2}$ acres it very likely will spoil Mrs. Bailey's chances of disposing of the balance, wherefore she would rather that the state secure a site at some other location or pay her extra as damages. The Attorney advised that the $7\frac{1}{2}$ -acre tract is scab rock land and practically worthless for anything but for the purpose that the state wants it, and that he has offered to pay Mrs. Bailey \$20 per acre for it and to fence the area, which he thought was quite generous. This matter was discussed at some length but no decision reached. Mrs. Bailey agreed to give the state right of entry onto her property until negotiations are completed. The Engineer was instructed to ascertain whether or not a suitable quarry can be obtained elsewhere.

The Engineer reported the cost to construct a bridge over the Willamette River between Independence and East Independence to replace a county-owned ferry; also the cost to construct a standard-type road from East Independence to Salem. He estimated the cost of the bridge at \$281,000 and the cost of the road at \$369,000, or a total of \$650,000. The Commission took no action on this matter but indicated that it could not cooperate in the undertaking unless Marion and Polk Counties would contribute a very substantial portion of the cost involved.

The Commission adjourned at 12:10 p. m. and reconvened at 2:00 p. m. in the same room with the same persons present and participating.

A delegation from Marion and Polk Counties appeared before the Commission in regard to construction of a bridge over the Willamette River at Independence and a standard highway between Independence and Salem via what is known as the South River Road, Salem. The group was headed by E. L. Gray, President of the Salem-Independence-Kings Valley Highway Association, and included the following: County Court of Marion County, represented by County Judge Leroy Hewlett and County Commissioner Ralph Girod; County Court of Polk County, represented by County Judge Herman Van Well and Commissioners Fred Gibson and H. H. Brant; County Engineer N. C. Hubbs of Marion County; Henry C. Crawford and Oscar D. Olson, representing the Highway Committee, Salem Chamber of Commerce; Lee Eyerey, Vice President Salem-Independence-Kings Valley Highway Association; John J. Roberts, Secretary-treasurer of such association, E. A. Miller, Director of the association; Dr. George Hurley, President, Independence Chamber of Commerce; Dr. M. J. Butler, Mayor of Independence; James H. Hart, Milford M. Nelson, D. P. McCarthy, and R. M. Walker, all of Independence. Speaking in behalf of this project were Messrs. Gray, Walker and Miller. Mr. Walker presented resolutions from the chambers of commerce of Corvallis, Monmouth, and Independence in support of their oral request.

The Engineer reported the estimated cost of the bridge and the road, and pointed out that a traffic analysis indicates that there is insufficient travel over the road to amortize the investment. Chairman Cabell pointed out that the proposed route would provide no appreciable saving in distance over the old route; also that the Highway Commission has received numerous requests for other improvements in the territory served by this road. He gave as his opinion that it would not be right or fair to postpone such improvements, for which the people have waited for many years, in behalf of this new project, and predicted that the Commission would be severely criticized if it should make such substitution in projects. He also called attention to the fact that the federal government is considering an allocation of funds for the construction of highways on a strategic military highway system and if such funds are made available regulations covering the expenditure of the same will probably require matching with state moneys, so there would be little, if any, state money that could be used to finance the bridge work. He doubted that it would be good business anyway for the Highway Commission to assume this new undertaking which is not now a state obligation. Commissioners Oliver and Clough concurred in the remarks of Chairman Cabell.

Mr. Gray stated that the counties are willing to contribute toward the expense involved and in reply thereto Chairman Cabell advised that the Highway Commission is not trying to evade the project altogether but is willing to consider it if the counties will contribute a considerable amount as cooperation, and will let the delegation know within the next few weeks just what it may expect.

Melvin R. Sorell, Salem, was present in regard to his claim for damages and injuries arising out of an automobile accident on the Pacific

Highway (old route) just south of Salem. He alleged that the accident occurred through no fault of his own but was the direct result of improper signing of the highway. He said that his original claim was in the amount of \$150 but since presenting the claim his insurance company has paid all of the expense except \$25 which he is asking the Commission to pay. The Engineer advised that the highway was properly signed and in addition the old road at the point where the accident occurred was closed by a barricade which could be seen for one-half mile, and in his estimation the reason for the accident was simply carelessness on the part of the driver of the car. Furthermore, the new highway was open and was being used by Pacific Highway traffic at the time of the accident and there was absolutely no reason for Mr. Sorell to use the old road in going to the roadhouse south of Salem which was his objective. After discussion the Commission concluded that the state is not liable for the payment of the claim and thereupon denied it by unanimous vote.

A delegation from Crook County, including County Judge A. R. Bowman and Messrs. Harry Severance and Robert Lester Palino, was present and asked the Commission to authorize an expenditure of additional funds to complete the rocking of the Crooked River Secondary Highway from the end of the improved section, easterly to Paulina, a distance of about six or seven miles. Judge Bowman advised that the state's maintenance crew has been working on this road for some time past but was recently called off the job when the funds budgeted for this work became exhausted, so the people of the Paulina district cannot use the easterly end of the road without a lot of inconvenience and delay. It was his thought that it would not cost more than \$2,000 to gravel the worst places along the remaining seven-mile section. The Engineer recommended approval of the request. The Commission approved the recommendation by unanimous vote.

Judge Bowman also asked the Commission if there are any objections to the state's power shovel, that is loading state trucks on road work in the vicinity of Prineville, also loading some of the county's trucks at this location. He said that Crook County heretofore has performed similar service for the state and he thought perhaps the Commission would have no objection in evening up the account in this instance. The Commission approved by unanimous vote.

Representative Roy E. Carter, Gold Beach, was present in the interests of state highway department maintenance men located at Gold Beach. He said that he has it in mind to introduce a bill in the legislature requiring the Highway Commission to pay these men a higher wage because they are now receiving only \$0.50 per hour for their services, which is less than any other men in the county receive, but he wanted to talk the matter over with the Highway Commission first to ascertain definitely whether or not the Commission would approve a wage increase for these men without such legislative action. He was informed by Chairman Cabell that the rules and regulations governing employees must be uniform throughout the state, particularly so far as a general wage scale is concerned and that the Commission is not ready at this time to discuss whether or not employees are entitled to any increase in wages because it will take a lot of time to assemble and prepare pertinent information. He further advised that if Mr. Carter presented this matter to

the legislature he must do so independently because the Commission is not ready, for the reasons given, to join with him in the matter.

Mr. Carter also complained of the arrangement set up for the men that live in Gold Beach, alleging that these men now have to report to a maintenance headquarters which is located 16 miles from Gold Beach, using their own private cars and on their own time, notwithstanding that they are immediately required to retrace their steps to Gold Beach in state equipment. It was his thought that a much more satisfactory arrangement could be worked out and he asked the Commission to look into it. The matter was referred to the Engineer.

At 3:30 p. m. Chairman Cabell announced the awards of contracts as follows, such awards having been previously approved by the Commission by unanimous vote:

"Lapine Rock Production Project on The Dalles-California and Fremont Highways, in Deschutes and Klamath Counties. Requires approximately 12,000 cu. yds. crushed gravel in stock piles. Two bids were received for this project, the low one being that of Chester T. Lackey, Ontario, in the amount of \$17,700 and the other being that of A. S. Wallace, Roseburg, in the amount of \$25,440.00. The Commission awards the contract to Chester T. Lackey at his low bid of \$17,700.00.

"Foster-Cascadia Section of the Santiam Highway, in Linn County. 10.39 miles surfacing. The River Bend Sand & Gravel Company, Salem, submitted the low bid for this project in the amount of \$13,504.00. O. C. Yocom, Willamina, submitted the second-low bid in the amount of \$14,195.00. There were two higher bidders. The Commission has rejected all bids received for this project and has ordered the project readvertised.

"Gilliam County Line-Zinter Ranch Section of the Wasco-Heppner Secondary Highway, in Morrow County. 6.92 miles grading and topping, also construction of two untreated timber bridges. Eight bids were received for this project, the low one being that of M. L. O'Neil & Son, John Day, in the amount of \$49,896.50, and the second-low being that of E. C. Hall Company, Eugene, in the amount of \$51,730.00. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Jones Hill-Lena Section of the Heppner Highway, in Morrow County. 0.16 mile grading and 9.2 miles surfacing and oiling. The low bid for this project was submitted by R. O. Dail & Warren Bros., Portland, in the amount of \$42,677.00. The second-low bid was submitted by E. C. Hall Company, Eugene, in the amount of \$43,634.00. There were three higher bidders. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Morrow County Line-Stanfield Section of the Boardman-Stanfield Highway, in Umatilla County. 11.54 miles grading and topping. Six bids were received for this project, the low one being that of M. L. O'Neil & Son, John Day, in the amount of \$109,749.00, and the second-low being that of Roy L. Houck, Salem, in the amount of \$123,521.50. The Commission refers all bids received for this project to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied.

"Bridge over Meadowbrook Creek near Starkey, on the Starkey Secondary State Highway, in Union County. W. H. Philpott, Portland, submitted the low bid for this project in the amount of \$6,290.00. Chaffeur & Klatt, Spokane, Washington, submitted the second-low bid in the amount of \$6,488.50. There was one higher bidder. The Commission has rejected all bids received for this project and has ordered the project readvertised.

"Deer Creek-Bellevue Section of the Salmon River Highway, in Yamhill County. 2.12 miles grading and paving; also construction of 150-foot concrete bridge. Five bids were received for this job, that of Roy L. Houck, Salem, being low at \$100,895.25, based on the use of tar, and that of Berke Bros., Portland, being the second-low bid at \$107,457.00, also based on the use of tar. Neither of these contractors submitted a bid on the asphalt alternate. Mr. Houck qualified his bid by stating that he would not accept the award of the contract unless also awarded the contract for the West Sheridan project, bids for which were received at this letting. He failed to sign his bid on the West Sheridan project, so it could not be considered. The combination bid of Berke Bros., for this project and for the West Sheridan project, was the low combination bid received by the Commission, and in view thereof the Commission awards this contract to Berke Bros. at their bid price of \$107,457.00.

"West Sheridan Section of the Salmon River Highway, in Yamhill County. 0.57 mile grading and paving. The low bid on this project was submitted by C. J. Montag and Son, Portland, at \$47,388.70. They qualified their bid by saying that they would not accept this contract unless they were also awarded the contract for the Deer Creek-Bellevue project; hence, in view of the fact that the Commission has awarded the Deer Creek-Bellevue project to Berke Bros., on their combination low bid, the bid of C. J. Montag and Son cannot be considered for the West Sheridan project. Berke Bros., Portland, submitted the second-low bid at \$48,000.70. There were two higher bidders. The Commission has referred the bids for this job to the Engineer with power to award the contract to the low qualifying bidders, Berke Bros., when certain conditions have been satisfied."

County Commissioner W. J. Holland and County Engineer P. M. Morse of Lane County were present in the interests of the Territorial Secondary

Highway. They advised that, if the Highway Commission intends to spend some money this year for oiling on this road, the section most in need of improvement from the county's standpoint is that between Veneta and Crow inasmuch as the county expects to oil this year the uncoiled portion of the county road which extends from Eugene to Gillespie Corners and also expects to oil this year the county road between Eugene and Crow. The Commission took the matter under advisement.

The matter of additional WPA construction on the "Route F" Highway was also discussed. Mr. Morse advised that the county is ready to start the construction of another section east of Linslaw and is wondering whether or not the state will cooperate as it did three years ago in furnishing culvert pipe and powder. The Commission denied the request. Mr. Holland inquired how much more work the county will have to do on this road before the state will take over jurisdiction. He was informed by Chairman Cabell that the Commission is not yet ready to place this road on the state highway system and in all probability greater progress would be made if the work were continued as a county road project than as a state highway improvement.

The Assistant Attorney reported the status of the 1941 right of way budget. He advised that of the \$600,000 budgeted this year for right of way purposes \$166,000 has been obligated to date. Further, that of the \$800,000 budgeted for the purchase of right of way on the Front Avenue Project in Portland \$27,000 has been obligated to date. The Commission approved the report and ordered it filed.

The Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with prices that he recommended be paid for each. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed:

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission, be and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution in regard thereto:

WHEREAS, the State Highway Commission is authorized to locate, relocate, construct, reconstruct, maintain, widen, straighten, and otherwise improve state highways, both primary and secondary, and said Commission is also authorized to construct shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, and snow fences, and is authorized to acquire quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, and broadcasting stations, and is further authorized to develop, construct, improve, operate, and maintain parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, and other places of attraction and scenic value; and

WHEREAS, said Highway Commission is authorized to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property, or any interest therein, necessary or deemed by the Highway Commission necessary for the accomplishment of any and all of the foregoing things; and

WHEREAS, in the judgment of the Highway Commission the several tracts or parcels of land hereinafter described are each and all necessary for the specific and particular purposes hereinafter specifically set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the several parcels of real property hereinafter described are each and all necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and

the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Charles S. Bateman, which property is located in the southwest quarter ($SW\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) and in the southeast quarter ($SE\frac{1}{4}$) of the southeast quarter ($SE\frac{1}{4}$) of Section 26, Township 2 North, Range 5 West, W. M., Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1 and is further identified in the records of the Highway Commission as file R 8669, and which property is being acquired for right of way purposes in connection with the Glenwood-Washburn Section of the Wilson River Highway;*

Real property owned by Ruby Hayden, which property is located in the southwest quarter ($SW\frac{1}{4}$) of the northeast quarter ($NE\frac{1}{4}$) of Section 26, Township 2 North, Range 5 West, W. M., Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2 and is further identified in the records of the Highway Commission as file R 8661, and which property is being acquired for right of way purposes in connection with the Glenwood-Washburn Section of the Wilson River Highway;*

Real property owned by Elmer E. Lyda and William H. Lyda, which property is located in the north half ($N\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 36, Township 2 North, Range 5 West, W. M., Washington County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3 and is further identified in the records of the Highway Commission as file R 8673, and which property is being acquired for right of way purposes in connection with the Glenwood-Washburn Section of the Wilson River Highway;*

Real property owned by Edward O. Lessard and Hazel Lessard, which property is located in Government Lots 1 and 2 ($NW\frac{1}{4}$), Section 4, Township 4 North, Range 1 West, W. M., in Government Lot 1 ($N\frac{1}{2}$ of $NW\frac{1}{4}$) of Section 4, Township 4 North, Range 1 West, W. M., in Lot 5, Block 4, Georgetown, in the City of St. Helens, and in Lot 5, Block 5, Georgetown, in the City of St. Helens, all in Columbia County, Oregon, and is particularly described on the attached sheets and designated as Parcels Nos. 4, 5, 6, and 7 and is further identified in the records of the Highway Commission as file R 8734, and which property is being acquired for right of way purposes in connection with the St. Helens Section of the Columbia River Highway;*

Real property owned by E. J. Miller, which property is located in the Town of Sheridan and situated in the A. B. Falconer D.L.C. No. 43 in Section 35, Township 5 South, Range 6 West, W. M., Yamhill County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8 and is further identified in the records of the Highway Commission as file R 8891, and which property is being acquired for right of way purposes in connection with the West Sheridan Section of the Salmon River Highway;*

Real property owned by W. P. Smith and E. P. Smith, husband and wife, and Gordon Smith, which property is located in the southwest quarter (SW $\frac{1}{4}$) of Section 34, Township 4 North, Range 28 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9 and is further identified in the records of the Highway Commission as file R 8832B, and which property is being acquired for right of way purposes in connection with the Boardman-Stanfield Highway;*

Real property owned by The Western Irrigation Company, which property is located in the northeast quarter (NE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 33, Township 4 North, Range 28 East, W. M., and in the northeast quarter (NE $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 33, Township 4 North, Range 28 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 10 and 11 and is further identified in the records of the Highway Commission as file R 8834, and which property is being acquired for gravel pit purposes (Parcel No. 10) and for right of way purposes (Parcel No. 11) in connection with the Boardman-Stanfield Highway;*

Real property owned by L. A. McClintock, which property is located in the northwest quarter (NW $\frac{1}{4}$) of Section 1, Township 3 North, Range 28 East, W. M., and in the southwest quarter (SW $\frac{1}{4}$) of the southwest quarter (SW $\frac{1}{4}$) of Section 35, Township 4 North, Range 28 East, W. M., Umatilla County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 12 and 13 and is further identified in the records of the Highway Commission as file R 8843, and which property is being acquired for right of way purposes in connection with the Boardman-Stanfield Highway;*

Real property owned by Lenora L. Jack Schmidt, which property is located in Government Lot 1 of Section 6, Township 2 North, Range 19 East, W. M., Gilliam County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 14 and is further

identified in the records of the Highway Commission as file R 8942, and which property is being acquired for right of way purposes in connection with the Quinton-Ramsey Section of the Columbia River Highway;*

Real property owned by Fay E. Ward and Wilfred A. Ward, which property is located in the southwest quarter (SW $\frac{1}{4}$) of the southeast quarter (SE $\frac{1}{4}$) of Section 20, Township 3 South, Range 23 East, W. M., Morrow County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 15 and is further identified in the records of the Highway Commission as file R 8931, and which property is being acquired for right of way purposes in connection with the Gilliam County Line-Zinter Ranch Section of the Wasco-Heppner Highway;*

Real property owned by Edward Hillier, et al., which property is located in Lots 3, 4, and 5, and a fractional lot adjoining Lot 5 in Block 1, as shown on J. L. Lee's Plat of the Town of Nyssa, Malheur County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 16 and is further identified in the records of the Highway Commission as file R 7647, and which property is being acquired for right of way purposes in connection with the Nyssa Undercrossing Section of the Old Oregon Trail.*

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

*The detailed descriptions of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 8, under the heading "Real Property Condemnation Resolutions", and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

4. That I. H. Van Winkle, Attorney General of the State of Oregon, and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

5. That this resolution be entered in full in the minutes and records of this Commission.

The Engineer reported on investigations as to the width of the North Santiam Highway between Detroit and the South Santiam Highway junction. He advised that, in general, the right of way is 80 feet wide, although at one or two points between Detroit and the Linn County line the right of way is only 70 feet wide. Further, that there are a number of encroachments near Detroit. He recommended that the Commission designate the Detroit-Santiam Junction Section a state secondary highway at such time as a full 80-foot right of way has been obtained throughout and the encroachments eliminated. After discussion the Commission approved the recommendation and instructed the Engineer to so inform the County Courts of Marion and Linn Counties which have requested that this section be placed on the state secondary highway system. The Commission ordered the matter covered by written agreement.

The Engineer also recommended that the state take over the maintenance of the North Santiam Highway from the Public Roads Administration at such time as it is designated a state secondary highway. He said that state forces operating out of the Santiam maintenance headquarters can handle such work much more economically than can the government, and the state would not lose any federal funds thereby, because the savings accruing to the government thereby could be spent for forest highway construction elsewhere. The Commission approved the recommendation.

The Commission reconsidered the matter of construction of a bridge over the Willamette River at Independence and decided unanimously to contribute toward the cost of such construction all money received from Polk County on its old debt to the state for highway construction work in that county, but no more. This decision is subject to approval by Governor Charles A. Sprague and Senator Dean Walker. It was left with Chairman Cabell to discuss the matter with the Governor and Mr. Walker.

The Commission authorized the Attorney to secure an option for acquisition of right of way needed for the Eugene-Springfield Section of the Pacific Highway East across property owned by Mrs. Katherine Stewart of Eugene, in view of the fact that this property is on a section of the highway which the Commission anticipates building in the near future.

The Secretary presented a letter from the Gold Beach Chamber of Commerce reporting progress that is being made by a local committee in its investigation with respect to securing of land needed for widening the present Oregon Coast Highway through the town of Gold Beach. The Commission ordered the communication filed.

The Commission discussed a letter from Mr. Carl Rynearson, Manager of the Pacific Highway Association, Inc., who is now in Washington, D. C., in the interest of legislation having to do with the appropriation of federal funds for defense highway construction. The Commission approved the following telegraphic reply thereto:

RE LETTER COMMISSION FAVORS DISTRIBUTION OF DEFENSE ROAD FUND BY SOME FORMULA, PREFERABLY ONE WHICH GIVES CONSIDERABLE WEIGHT TO RATIO OF DEFENSE MILEAGE IN EACH STATE TO TOTAL IN NATION, PROBABLY UNFAIR TO MAKE THIS THE ONLY FACTOR. ALSO SUGGESTS NEED OF STATES MATCHING PART OF FUND TO PRESERVE FEDERAL AID PRINCIPLE.

The Engineer reported that in conformance with previous authority granted him by the Commission he awarded to Babler Bros. on February 18, 1941, the contract for grading, surfacing and oiling the Bend-Forest Boundary Section of the Century Drive Secondary Highway, in Deschutes County, bids for which were taken by the Commission on January 21, 1941, the bid of this contractor being the low bid received and the conditions of the award having been satisfied. The Commission by unanimous vote confirmed the award as reported.

The Secretary presented resolutions from the Lane County Court requesting removal from the state secondary highway of the Richardson-Siuslaw Junction Section of the Eugene-Swisshome Secondary Highway No. 220, and requesting that the Eugene-Veneta Section of the "Route F" Highway be placed on the state secondary highway system in lieu of the Richardson-Siuslaw Junction Section of the Eugene-Swisshome Secondary Highway. The Engineer advised that this is in conformance with previous understanding with the county court. After discussion the Commission approved the county court's requests and thereupon by unanimous vote adopted the following resolutions with respect thereto:

WHEREAS, under the provisions of Chapter 248, Laws of 1931, and Chapter 196, Laws of 1935, and Chapter 529, Laws of 1939, the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Lane County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Eugene-Swisshome Secondary Highway No. 220, and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Lane County Court of the State of Oregon, to eliminate and remove from the system of secondary state highways, under the provisions of Chapter 196, Oregon Laws of 1935, and Chapter 529, Laws of 1939, the hereinafter described section of the Eugene-Swisshome Secondary Highway No. 220, and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the Lane County Court of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Eugene-Swisshome Secondary Highway No. 220 shall, under the provisions of the Laws of Oregon, become a county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Lane County;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described section of the Eugene-Swisshome Secondary State Highway No. 220 is hereby eliminated and removed from the Secondary State Highway System, to wit:

A Section of the Eugene-Swisshome Secondary Highway No.220:

Beginning at the junction of the Siuslaw Highway No. 34 with the Eugene-Swisshome State Secondary Highway near Swisshome; thence in a southeasterly direction along the Siuslaw River to Richardson, a distance of approximately 12.3 miles.

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall become a county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Lane County, as provided by law.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Lane County.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Lane County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Lane County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

An Extension of the Eugene-Swisshome Secondary State Highway No. 220:

Beginning at the junction of the Territorial State Secondary Highway No. 200 at Veneta with the road or highway known as Route "F"; thence easterly via the road or highway known as Route "F" to Eugene, a distance of approximately 12.5 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.
